Ibis Networks is an Enterprise-Internet-of-Things company that enables large commercial organizations to manage plug-load energy use with its patented, secure, scalable InteliSocket™ Platform.

Plug Level Energy Consumption is Quickly Becoming the Most Significant Drain on Energy Costs

Plug In:
- Easy to install
- Works on any campus
- Forms secure mesh network

Measure:
- Thousands of data points
- Real-time analytics
- Cloud-based

Take Control:
- Set power schemes
- Predictive maintenance
- Multi-site energy management

REAP BENEFITS
- Significant savings (5% to 10% total building consumption)
- Increased machine life
- Increased productivity

Optimize Your Efficiency
