RAT LUNGWORM STUDY
WE WANT YOU!

We are looking for volunteers to participate in a study entitled:

“Determining the prevalence of human rat lungworm infection in East Hawaii Island”
Conducted by the Daniel K. Inouye College of Pharmacy, UHH
contact: Sue Jarvi, PhD., rlw411@hawaii.edu

Where? Puna Community Medical Center and Clinical Labs of Hawaii, Pahoa Marketplace

Step 1. Volunteers check in at Puna Community Medical Center in Pahoa Marketplace, during regular office hours (8am-3pm M-F closed for lunch 12-1pm) to complete necessary paperwork.

Step 2. On Wednesdays and Thursdays (regular office hours 7am-3pm M-F closed 12-1pm for lunch) volunteers go next door to Clinical Labs of Hawaii in Pahoa Marketplace where a small blood sample will be drawn.

Appropriate paperwork must be completed and provided to Clinical Labs personnel before blood can be drawn.

When? Best to go on a Wednesday or Thursday so you can complete paperwork and have blood sample drawn on the same day. Study will begin on June 15, 2015 and end Sept.15, 2015 or until we have ~400 samples.
