 SCHOOL OF NURSING
 DOCTOR OF NURSING PRACTICE

Preceptor Evaluation of Student

Using the descriptors below, please evaluate the DNP student's performance in all the clinical performance categories by checking the boxes that best describe the student's behavior. Please add any additional written comments or suggestions.

- 1: **Novice**-Requires close supervision for plan development
- 2: **Beginner**-Uses own judgment in some tasks but supervision needed for overall plan
- 3: **Competent**-Uses own judgment for most tasks but require consultation for final plan
- 4: **Proficient**-Completes all tasks independently, requires approval for final plan only

CLINICAL PERFORMANCE CRITERIA	Does Not Meet Criteria		Novice		Beginner		Competent		Proficient	
	Mid	Final	Mid	Final	Mid	Final	Mid	Final	Mid	Final
1. Elicits complete information of client's health status using therapeutic and culturally relevant communication techniques to direct the interview.										
2. Demonstrates mastery of advanced assessment skills.										
3. Differentiates between normal, abnormal, and variant findings.										
4. Chooses and interprets laboratory and diagnostic studies that have the highest probability of providing essential information for diagnosis or management.										
5. Demonstrates mastery of differential diagnosis for common health problems seen in the selected population.										
6. Incorporates family and system factors when making clinical judgments and decisions.										
7. Evaluates outcomes for individual clients and makes appropriate adjustments in the plan of care.										
8. Interprets evidence-based findings to develop a practice plan consistent within patient, family and/or other complex systems.										
9. Integrates principles of health maintenance and promotion as well as illness.										
10. Identifies method for evaluation, follow-up or referral										
11. Justifies clinical decision-making and critical reasoning with evidence based data relevant to care of the client and selected populations										
12. Plan addresses assessment (diagnosis), treatment (diagnostics, prescriptions), and education.										
13. Compares the outcomes of a selected group of patients to established data-based or consensus based outcome criteria										
14. Communicates effectively with preceptor, clients, and other members of the health care team.										
15. Assumes responsibility for independent decisions and consults with preceptor as needed.										
16. Takes responsibility for own learning and applies learning experiences to future clinical encounters.										
17. Maintains balance between quantity and quality of encounters by adapting and performing under pressure.										
18. Achieves Individualized Student Objectives
