SOC280 + 280L
STATISTICAL REASONING + LAB

Fall 2026, Hybrid

What are statistics? How do we use statistics in social science to ensure that our research is sound and reliable?

This course will introduce you to the world of statistics and quantitative research. Students will learn about basic descriptive, correlational, and inferential statistical models that we use regularly in the social sciences. During lab time, students will engage in hands-on computation and interpretation, too!

Pre. Req.: Student must be enrolled in both SOC280 and SOC280L
Credits: 4cr, (3 for SOC280 and 1 for SOC280L)
Attributes: DS, GQ

Required for all Sociology Majors!
