## **Department of Mathematics 5-Year Review Expectations and Guidelines:**

During their 5-Year periodic review, faculty in the Department of Mathematics will be evaluated on both their teaching performance, and their contributions to scholarly activity and/or service to the University. In particular, faculty under review meet the Math department's expectations by:

- High quality contributions in teaching
- Quality contributions, in line with a three credit course reassignment, in one of the following areas or some equivalent combination of the two:
  - Scholarly contributions in the individual's field appropriate for the rank and the standards of the department.
  - Service to the academic life of the college and/or university system. Where appropriate, contributions to the professional or lay community pertinent to the individual's professional training will be applicable in partial satisfaction of the service criterion.
