Shame on the UH! X

Additional comments: Mauna Kea belongs to the indigenous people of Hawaii. They have the legal, historical and inherited right to protect their land. The Kanaka Maoli people and their protection of the sacred mountain of Mauna Kea must be respected. We demand any construction to cease. I do not consent to the building of the thirty meter telescope on Mauna Kea.

Additional comments: You’ve repeatedly stated that you want to hear from the native Hawaiian community, yet, when a majority of us voice oppositions to ANY and ALL CONSTRUCTION on the Mauna, you ignore us. You look the other way. Native Hawaiians and local people oppose the building of TMT or any other works on the Mauna because the Mauna holds religious value to the very people whose land you live on. This is a form of colonization and disrespect as you desecrate and show clear ignorance towards native beliefs. The very people who are far to often left behind by the government. DO NOT do any more construction on the Mauna because it is the just and respectful thing to do. Prove that you are listening.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

Additional comments:
Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public, YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

Additional comments: I am here making use of a form circulated by ethnic Hawaiian opponents to TMT, through which they hope many people will submit the points stated above even without understanding them. Most of those points are false or misleading. Here are my own comments. I want to encourage you advisors and decision-makers to reject the racial divisiveness of the protestors, and to support the construction of TMT with appropriate safeguards for environmental protection and standards for employment and visitation that will not mandate promulgation of or propagandizing for any ethnocentric cultural or religious views. The Hilo/Kona newspapers quote the Ka Lahui spokesperson speaking at a recent hearing, who concluded: "Any plan for the future of the mauna has to come from Kanaka Maoli." Of course that is false as a matter of fact, and wrong as a matter of morality. It displays the racism and routine arrogance of the ethnic Hawaiian race-nationalists, whose creation legend is part of their religious fascism in which they think every parcel of land is sacred to their gods and their ethnicity. Of course they have a right to whatever religion they choose to believe in -- but the rest of us have no obligation to knuckle under to them. In our society with many races, cultures and religions, we all must fight to protect full equality for everyone. We are all equal in the eyes of God(s) and we should all be treated equally under the law by our government. Hawaiian race-nationalists think people with a drop of the magic blood have a right to set land-use policy and govern Hawaii because their creation legend says they are genetically children of the gods and brothers/sisters to the land in a way nobody else can ever be who lacks a drop of that blood. The Hawaiian version of critical race theory says Whites are inherently racist colonialist oppressors and ethnic Hawaiians are their main victims with a right to take control by any means
necessary. People in Hawaii are horrified at White-nationalism on the mainland, but strangely silent about Hawaiian race-nationalism here. The fascists say "Any plan for the future of the mauna [or any other part of Hawaii] has to come from Kanaka Maoli." These zealots will never abide by decisions made by multiracial legislatures or government hearings. What they say should be treated as logically irrelevant to decision-making. They have freedom to say it, but the rest of us have the right to reject it.

**Additional comments:** As someone who is a scientist and at the same time a student of Hawaiian culture, I am appalled at how UH is managing this. The expected benefits from the TMT or the investment it brings would never be enough to make it worth erasing and further damaging such a sacred place. Furthermore, the world has its eyes on UH and Mauna Kea. Not listening to kanaka maoli and disrespecting the wishes of the native people of Hawai‘i is sending a message that they are not important, and eventually other sites and other natives are not important as well, when set against money. Please revise the plan, and do not allow the TMT to be built on the Mauna.

**Additional comments:** The TMT is one of the greatest projects to ever come to Hawaii. It will diversify our economy and bring jobs and scholarships for our keiki. It will set up Hawaii as the premier astronomy location for decades to come. Please push forward with the project. The protesters have made clear that they are not interested in talking. Please do what is best for the people of Hawaii and build TMT.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:
- For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:
- There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:
- Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:
- There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:
- On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:
- The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:
- Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:
- Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

Additional comments: The abuse n disrespect needs to end. PAU !!!

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.  

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.  

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.  

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.  

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.  

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.  

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no! X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH! X

Additional comments: I do not consent to the building of the thirty meter telescope on Mauna Kea.

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai‘i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain. X

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending. X

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai‘i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea. X

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea. X

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai‘i’s native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority. X

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai‘i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands. X

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. Additional comments: The people have spoken but our voices have fallen upon deaf ears. Enough is enough. UH has mismanaged our mauna from the 60s. NOW that we are more aware, we can oppose such a monstrosity such as TMT. Sometimes it’s not about $$$. It’s about doing the right thing. It’s time to mālama our mauna.

Additional comments: This should have be in the planning...... HRS §711-1107 Desecration. (1) A person commits the offense of desecration if the person intentionally desecrates: (a) Any public monument or structure; (b) A place of worship or burial; or (c) In a public place the national flag or any other object of veneration by a substantial segment of the public. (2) "Desecrate" means defacing, damaging, polluting, or otherwise physically mistreating in a way that the defendant knows will outrage the sensibilities of persons likely to observe or discover the defendant’s action. (3) Any person convicted of committing the offense of desecration shall be sentenced to a term of imprisonment of not more than one year, a fine of not more than $10,000, or both. [L 1972, c 9, pt of §1; gen ch 1993; am L 2002, c 198, §1]

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain. X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending. X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea. X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea. X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority. X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands. X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no! X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hokū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH! X

**Additional comments:** The University of Hawaii has seriously mismanaged Mauna Kea for decades. The University has an inherent conflict of interest and has violated the conservation district by developing an industrial zone of telescopes at the summit. The University of Hawaii has no business managing the delicate ecosystem at the summit of Mauna Kea.

Additional comments: Aloha, I am an attorney and 4th generation resident in Hawai'i, with my family immigrating from Okinawa, Madeira and the Azores. I am concerned about the current process limiting discourse and community engagement relating lease extensions on Mauna Kea amidst the COVID-19 pandemic. This contravenes acting in good faith, and casts suspension over the entire process. Beyond process, there is absolute disregard of the rights of Kanaka Maoli under state, federal and international law. Would you build the TMT on top of the Sistine Chapel, the Punchbowl Or Arlington Cemetry, a temple, mosque or synagogue? We are simply asking for equality and equity, an respecting that Mauna Kea is a sacred place. As the adage goes, "actions speaks louder than words. If you want to be regarded as an Indigenous place of learning, then start by respecting this sacred site, and stop all plans for the TMT. Anything less is not conciliation, but an act of War against Kanaka Maoli."

**Additional comments:** Why is there continual misrepresentation of local support for the building of the TMT? There is not much support and our local community continue to be vocal because we have seen how this mauna and area around Mauna Kea is mismanaged. UH system does not appear to service our community but rather to have its own agenda of profiting foreign entities over the decades of mismanagement many local groups have pointed out!

<td>- Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!</td>
</tr>
</tbody>
</table>

Additional comments: The crux of the matter is UH has neither consent nor jurisdiction to build atop Maunakea, which is designated conservation land. Maunakea is a large aquifer of life-sustaining water.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. Additional comments: Eventually there will be no sacred land left. Time to stop this desecration. Time to save the little that is left. For science there are good alternatives else where. Few or no extra jobs will be created for locals and Hawaiians.

YET despite decades of Hawai‘i’s native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai‘i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.

Additional comments: As a student at UH @ Mānoa, I’m appalled that funds are being funneled into this project. UH claims to be a Hawaiian place of learning but is silencing the voices of the people they claim to represent. The obvious discontent of natives and others from around the world show that the institution does not support kanaka maoli. I strongly believe that the removal of TMT is directly tied to the survival of Hawai’i in the wake of climate change. Although the construction of the telescopes are said to be helping science and technology, it’s not what we need today. We need the money and resources being funneled into this project to go towards revitalizing the ʻāina of the land. The answers to our current climate crisis won’t be in space. For decades kanaka maoli have been making their voices heard in opposition, it’s time that you all listen. The proven ecological damage that comes from construction is not worth whatever it is we are looking for in the sky. The funds need to be invested in our environment, the ocean and the ʻāina. Protect the pu‘uhulhulu, the ‘ōhia trees, the coral, the fish, the streams, and all other aspects of our earth that we stand to lose in coming years. This is not how we diversify the economy. That can only be done when capitalism is no longer serving the supremacist agenda, and this project perpetuates the values of that agenda. If UH really wants to diversify the economy, they’d find alternatives opportunities for environmental remediation guided by kanaka maoli knowledge. We know this land and what’s needed for it to thrive, and to ensure our survival you need to listen to us. This project needs to be stopped and funding discontinued immediately.

No means no!

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

| Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:|  
| For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain. X |
| Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT: There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending. X |
| Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT: Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea. X |
| Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT: There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea. X |
| Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT: On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority. X |
| Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT: The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands. X |
| Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT: Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no! X |

| There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending. |

| Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT: | X |
| Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea. |

| Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT: | X |
| There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea. |

| Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT: | X |
| On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea, the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority. |

| Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT: | X |
| The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands. |

| Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT: | X |
| Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no! |

| Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT: | X |
| Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH! |

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

**Additional comments:** After residing on Maui for eight years and being lucky enough to behold the beauty that is the Hawaiian Islands, I have come to understand that the care of the land and waters are best decided by Native Hawaiians and Hawaiian Nationals, not U.S. settlers who have consistently exploited finite resources for profit to the detriment of community wellness. Decades of mismanagement of Mauna Kea must be addressed before more construction is even considered. It makes no sense to me to build more without the consent of the Kingdom without at least carrying down the decommissioned telescopes. Even the Canary Islands are finding TMT to be a bad deal for their community. I also recognize that TMT and UH are not above racist nor genocidal narratives to further their means in their public relations. TMT and UH must be held accountable for purporting that this is a matter of science and technology versus "superstition" or "religion." This reduction is used to depict Natives as barbarians rather than countrymen who achieved a literacy rate in the 90 percentile in the latter half of the 1800s. This part of history is being made more and more visible these days. Beware to all who dehumanize for their means...

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:
- Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

X

**Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:**
- For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai‘i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

**Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:**
- There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

**Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:**
- Over half a million Kanaka Maoli, Hawai‘i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

**Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:**
- There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

**Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:**
- On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai‘i’s native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

**Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:**
- The indigenous people of Hawai‘i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.

**Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:**
- Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!

**Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:**
- Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

**Additional comments:** You know all the reasons to reject this master plan and discontinue UH’s leasing and management of this sacred place. Mine won’t be new to you. The onus is yours to justify how UH has earned a renewed lease. It is a privilege to manage this mauna. Prove to us why UH should continue to hold it.

Additional comments: My aunty told me that when she was in college they were fighting the construction of a different telescope at the time. Does it seem right that I 20 something years later have to fight against the construction of yet another telescope?? When will it stop? Have you not taken enough land and resources already?? PLEASE PLEASE DO NOT DO THIS. A‘OLE!!!!!!

| Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT: -For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai‘i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain. | X |
| Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT: -There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending. | X |
| Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT: -Over half a million Kanaka Maoli, Hawai‘i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea. | X |

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai‘i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea. X

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea. X

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai‘i’s native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority. X

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai‘i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands. X

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no! X

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hokū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH! X

Shame on the UH!

Additional comments: As an institute that claims to be a “Native Hawaiian Place of Learning”, I urge UH to hold true to that promise by listening to Native Hawaiians. This Hawaiian joins with the countless others who say a‘ole! We do not consent to the construction of the Thirty Meter Telescope upon Mauna a Wākea. Mahalo.

| Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT: | 
|:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH! | X |

Additional comments:
Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. Shame on the UH!

Additional comments: Naive Hawaiians all say no. What part of no don’t you understand? You guys just found a planet in a galaxy far away, so what now? This discovery, and any other future celestial discoveries, does nothing for the current problems on this planet like the pandemic, world wide shortages, Kanaka Maoli suffering from drug and alcohol abuse and Kanaka who cannot even afford to live in their own homeland because their land keeps being turned over to the highest bidder. So, A\OLE TMT and UH, A\OLE!

Additional comments: No more desecration on God’s Mauna, is this word “No” hard to understand or hard to swallow in your na‘au. Enough is enough of all your lies, your greed and to think all of you are up to challenge the rightful owner of the Mauna and who is the rightful Owner? My God and yours, did you think that all of you people are above our Creator? All of you who think ‘money’ can buy His Creations, do what is right and Pono, Mr. your time is almost up, need to give this World back to God, the rightful owner of the Universe

Additional comments: More should also be done to lessen the visual footprint of the telescopes on the mountain even if it means using a paint or covering on the existing observatories that match the color of the mountain. They look very ugly and negatively impact the natural beauty of the mauna.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i’s native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

**Additional comments:** The CMP should address the remaining 12 years on the existing lease. It should address the conditions required by the existing lease. You need to clean up and restore the mountain. The lease is over, it will not be renewed. The TMT we will not be built on Mauna Kea ever. No title, no treaty, no consent. It is the right of the right holders, not the stakeholders, to decide. The right holders are the descendants of the original inhabitants of these stolen & prostituted lands. Be satisfied with the 65 years at $1/year. It is pau.

No means no!

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:—Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

Shame on the UH!

Additional comments: While I believe that astronomy is an important part of scientific development, I do not believe that the further desecration of the culturally and genealogically significant sites on Mauna Kea is acceptable. The Draft Master Plan statement by the University of Hawai‘i respects the capacity both the cultural and environmental significance of Mauna Kea a fallacy. Using ‘Ōlelo Hawai‘i in this Master Plan seemed like a tactic of mockery and was in fact used in opposition to what Kanaka Maoli continually fight and protect for. To name the document “E ‘O I Ka Leo” seems very ironic as it translates to “listen to the voice”. This is very much inconsiderate to Kanaka Maoli as our voices are not being heard, in fact they rewrite history and weaponize our mother tongue against us. Despite the worldwide disapproval of TMT, there are still plans to further develop this plan. Kanaka Maoli do not consent to further desecration on Mauna Kea. As a displaced kanaka of O‘ahu, I defer to the leaders of Kānaka Maoli who have vehemently opposed TMT. Mauna a Wākea is a progenitor ancestor of Kānaka Maoli and therefore I believe that Kānaka Maoli should hold the most sway in decision-making. I strongly urge the University of Hawai‘i to take a similar approach that is rooted in transparency with the community. I am greatly appreciative of the opportunity to have input on this master plan and hope that the University of Hawai‘i will proactively seek to engage and empower Kānaka Maoli on local developments beyond the thirty meter telescope.

Additional comments: The University would not feel safe to me if they allowed the further desecration of my kupuna. I oppose the construction of the TMT, and UH should not call themselves a Native Hawaiian Place of Learning if they contribute to te assault of ‘āina, and Native Hawaiian ancestors.

Additional comments: By continuing with this project, you cement your position as one who does not care for the kānaka and locals who have generational connection to the ʻāina. Disrespecting the ʻāina means disrespecting the people. Shame on UH for saying they are for the people when their actions say just the opposite. It is disappoointing to see one of the biggest Universities in Hawai’i support constructions so obviously destructive and disrespectful of the history and culture here.

**Additional comments:** I am a white citizen of Hawai‘i. I have been an attorney for over 30 yrs. Mauna Kea is not sacred to me. I am opposed to the UH Master Plan and any further construction on the mauna as a matter of justice. If Hawai‘i’s native people consider the mauna sacred, the piko of their universe, who are you to tell them different and desecrate their holy place with an 18-story monstrosity? Have you followed all the astronomical discoveries made in the last three yrs from the telescopes already up there? Any discoveries a larger telescope MIGHT find is not worth demeaning our desecrating our native people's sacred place.

Additional comments: The Hawaiian Kingdom Nation NEVER RELINQUISHED OUR RIGHTS TO THESE LANDS, OUR NATURAL RESOURCES, OR GIVEN CONSENT TO DO SO. Show me your TREATY OF ANNEXATION FROM OUR QUEEN TO YOUR REPUBLIC OF HAWAII OVERthrowERS. It is written in the Organic Act and All Acts that the State of Hawaii is Perpetuating is the description of lands received and Ceded to the Federal United States is called "WHATSOEVERKIND!" There is NO Treaty describing this but only the NON CONSENTUAL MASSIVE KUʻE PETITION PRESENTED TO THE US CONGRESS. ANY AND ALL Derivative Titles after 1893, 1900, 1920, 1933, 1959, 1978 til present day is NULL AND VOID! Your inherited Military Occupation of 1893 until today has continued the violation of GENOCIDE. MY RESPONSE TO THIS AGENDA OF CONTINUALLY DESECRATING OUR MAUNA IS AʻOLE. CONSTRUCTIVE NOTICE IS HEREBY GIVEN TO THE UNIVERSITY OF HAWAIHAWAI, state of Hawaii, Individual Board Members and ALL CONCERNED TO CEASE ACTING LIKE YOU ARE ALL THE MASTERS IN CONTROL OF WE THE KANAKA AND OUR AINA THAT IS IN A "TRUST" AND NOT IN THE STATE OF HAWAII AS OWNERS! CONTINUE TO ACT AS OWNERS? SHOW ME YOUR CONVEYANCE FROM OUR KINGDOM NATION TO YOU!

They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea. X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:—On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority. X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:—The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands. X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:—Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no! X

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:—Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH! X

Additional comments:
Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai‘i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai‘i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

**Additional comments:** The State and its agents, departments, and divisions such as the University of Hawai‘i system have for years exploited Ceded Lands and DHHL lands for economic benefit with no regard to the moral and fiduciary responsibility to the original indigenous inhabitants of the islands. The kanaka maoli have been decimated by disease, oppressed, subjugated, and marginalized over the past 200 years. No one can undo past wrongs, but when government power continues to be abused at the expense of the kanaka maoli, then there is a point when people need to say Lawa / Enough. The UH master plan for Mauna Kea ignores the unique historical and cultural place that Mauna Kea holds to its people. Based on previous actions of fiduciary indifference to those who deserve to benefit from this land, ie the kanaka maoli, there is no reasonable expectation to be had that any positive gain will ever come of this so-called master plan - either culturally or financially. Too many times the government has made its promises and the reneged on those same promises. It is too late - Fool us once, shame on you. Fool us a thousand times, well then you are just corrupt and cannot be trusted AT ALL. That land is conservation land and needs to remain as such. As Kahookahi Kanuha said, the kanaka maoli should not have to prove every inch has value and the culture of the kanaka maoli should not be dismissed because it is contemporary and not more than 200 years old. Hawaiian culture still exists whether you want to acknowledge that or not. Being dismissive of another's culture is absolutely *disgusting* coming from an institution of higher learning sitting on the very same islands.

- There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:  
- On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:  
- The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:  
- Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:  
- Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

**Additional comments:** Eight Criteria to build the Telescope. All Must Be Met for the permit to be approved for construction... Among other issues, such as spirituality and sacredness of the mountain, petitioners have been stressing through their witnesses that the project does not meet Hawai’i Administrative Rules section 13-5. In it, there are eight criteria the Department of Land and Natural Resources must evaluate before allowing construction on a conservation district, such as Mauna Kea. Those eight criteria include: The proposed land use is consistent with the purpose of land conservation district; The proposed land use is consistent with the objectives of the subzone of the land on which the use will occur; The proposed land use complies with provisions and guidelines contained in Chapter 205A, HRS, entitled “Coastal Zone Management,” where applicable; The proposed land use will not cause substantial adverse impact to existing natural resources within the surrounding area, community or region; The proposed land use, including buildings, structures and facilities, shall be compatible with the locality and surrounding areas, appropriate to the physical conditions and capabilities of the specific parcel or parcels; The existing physical and environmental aspects of the land, such as natural beauty and open space characteristics, will be preserved or improved upon, whichever is applicable; Subdivision of land will not be utilized to increase the intensity of land uses in the conservation district; and The proposed land use will not be materially detrimental to the public health, safety and welfare. Because land has been desecrated before does not mean you can continue to do so. We continue to say no to this project. We continue to expect that our concerns and objections are heard and respected by terminating this project.

**Additional comments:** As I see it, this pandemic has shed light on how Hawai‘i needs to be self-sustaining. There has been a push for local farmers to provide our produce, doesn’t it make more sense to protect our resources rather than destroy what has been given freely from our Aina? I oppose TMT being built on Mauna Kea and another thing: this land belongs to Native Hawaiians... remember where your roots are planted and stop chasing the money.

**Additional comments:** Lassner, Chun, Hayes, Young: YOU, lessees, do NOT OWN Mauna Kea. The physical numbers are right in front of you - online 500,000 signatures IN OPPOSITION and 30,000+ statewide marching IN OPPOSITION and thousands at the base of Mauna Kea protecting her IN OPPOSITION and 38 respected Kūpuna literally with their bodies, minds, hEArts, and spirits SAYING NO!!! STOP!!! ENOUGH!!! Avoid saying or explaining one more word. out loud or on paper = NO RENEWAL OF UH LEASE ON MAUNA KEA! NO APPROVAL OF UH MASTER PLAN! NO TMT ON MAUNA KEA! NO TELESCOPES PERIOD ON MAUNA KEA! PLEASE CLEAN UP AND LEAVE. NO = NO!

**Additional comments:** Kānaka Maoli do not consent to the building of TMT. Tens of thousands of Kānaka and non-Kanaka has risen up in opposition. Being a “Hawaiian place of learning” should begin with consensual collaboration with the Hawaiian people. There is no consent. TMT should never be built.

Additional comments: Technology is surpassing itself in realtime. Alignment with the Spaceforce is imperative. Collaborating to build an orbiting space station is the future. Allocating funds on outdated technology is a waste. We need our students on space missions. Astronaut Astronomers.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. Additional comments: I agree with all of the important and relevant points made here. Good stewards cannot ignore the voices of its people so why should you be stewards at all if you lack integrity to uphold and protect our cultural values!? It’s a shame that politics along with self-interest/greed supersedes doing what’s pono. It’s time the people let you know they are paying attention.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Additional comments: Our natural resources were never endangered until our government began to attack its every aspect of natural existence. Once destroyed, we will never be able to restore it to its natural capacity. Our government is gambling with our very existence and that is a chance we will not take. There is too much at stake.

Additional comments: I do NOT consent. TMT does NOT have consent. Stop wasting taxpayers money to pursue this futile act of oppression against native culture and values. The University of Hawai‘i’s sense of entitlement with regard to making big plans that clearly exceed the 2033 lease, and that includes further rape of Hawaii’s majestic lands is appalling and proves just how importance it is for the 2033 lease to be the final expiration date of it’s tenure.

Shame on the UH!

Additional comments: The University of Hawai'i has proven their ineptitude in managing the mauna in manner that supports the protection of the land and Kanaka Maoli self determination. This is evident in the 1998 audit, in the decades of pollution and accumulation of trash that proceeded it, in the unheeded opposition to telescope expansion since the first, and in the fact that UH has not listened observatories went up, and in the fact that UH has not listened to the thousands of Kanaka Maoli and allies opposing the TMT. Why is the TMT still an option in this plan? Why has stewardship of the mauna not been returned to Kanaka Maoli as it is crown lands? Why does this plan call for expansion of facilities on the mauna when the public has made clear they want no construction? Why have public conversations on this plan been heavily regulated? I oppose this plan because it does not address the main issues at stake with the management of Maunakea and public review has been conducted ineffectively.

Additional comments: Space based telescopes will quickly make TMT obsolete. Vox had an article about the new James Webb Space Telescope on September 22, which made very clear that TMT is no more than a vanity project for UH and the involved parties.

**Additional comments:** It cannot be understated that the greater community at large opposes the current version of the Mauna Kea Master Plan proposed by UH. It remains unacceptable to the majority of the Kānaka Oiwi population as well as the majority of the non-native Lāhui. I strongly criticize this plan and will stand in opposition to the implementation of the plan.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i’s native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

**Additional comments:** The corporation of the United States and the state of Hawaii have are illegally occupying the Kingdom of Hawaii. The state of Hawaii along with all the counties have been oppressing Kanaka Maoli, desecrating our lands, ancestral burials, and diverting and polluting our waters. It’s time to restore pono (righteous) to our lands. I oppose any and all activities from the state of Hawaii and United States on Mauna Kea and Pohaku Loa.

- There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending. X

- Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea. X

- There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea. X

- On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. Yet despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority. X

- The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands. X

- Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no! X

- Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH! X

Additional comments: It is time you listen to the vast majority, and especially Kanaka Maoli, most of who oppose the construction of the Thirty Meter Telescope on Mauna Kea. Instead of continuing to pursue a project that obvious opposition from the local community, projects that will directly benefit and therefore support the larger community should be pursued instead.

**Additional comments:** Listen to what the indigenous people are saying and wanting for their own sacred sites. Ignoring overwhelming dissent is criminal. TMT is a willful enterprise that requires desecrating a Native Hawaiian sacred site. No TMT!

Shame on the UH! X

Additional comments: Please stop. Take Mauna Kea off of the potential site list for this project. UH should've held exclusive rights with their 1 telescope instead of selling out for more money and desecrating a sacred water source. Your staff has disagreed with this idea, your students have protested (the majority), men, women, children, kupuna from around the planet has voiced their rejection of this project. The majority has spoken, its time for you to listen. I ask that you scrap any and all development for TMT and future telescopes. Remove, clean, restore, preserve Mauna Kea. Mahalo.

**Additional comments:**
**Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:**
- For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

- There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

- Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

- There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

- On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

- The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.

- Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!

- Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. Shame on the UH!

**Additional comments:** When will the desecration of Mauna Kea STOP!!? When will the voices of Kanaka Maoli be heard!? We as Kanaka Maoli have a responsibility to the 'Āina, a kuleana to protect it!! How much longer before you realize that another monstrosity on the top of Mauna a Wākea is not acceptable??!! I ask that you reconsider the building of TMT on our precious Mauna!

Additional comments: As many have noted, the issue of the TMT is multi-layered, multi-faceted and extremely complicated at best. Although this is true, it is also true that the solution to this conflict is elegantly simple. Aloha aina. Imagine the love that you have for your family, for your mother, your brother, your son. Hold on to the deep emotion within and imagine feeling that same love when you look at a field of kalo, a school of fish swimming near the reef, or a majestic mountain standing tall above the clouds. It's not the appreciation of beauty or the objectification of nature, it's a deep, visceral connection. Aloha aina is a call to strive to live in harmony and balance with everyone and everything around you. Those in support of the would-be telescope claim economic benefits, advancement of scientific knowledge and community pride. I state that we can reach those same goals through aloha aina and do so without increasing the already significantly adverse environmental impact. We can encourage our community members to become more aware of the issues that affect them and get more involved with finding and creating solutions. We can fund education, not by taking from others and corporations, but by using the resources we have in our own communities. In my opinion, no amount of money will ever be worth jeopardizing the future of this place, of our island home. And to me, the construction of the TMT will do just that. Those who criticize the protectors of Mauna a Wakea have stated that we are not willing to compromise. To them I say, the familial relationship between humans and the environment requires that we care for that which cares for us and protect that which protects us. There is no compromise in aloha aina, there is only action.

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai‘i’s native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai‘i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!

Opposition to the University of Hawai‘i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

Additional comments: Education in Hawaii has had a history of degrading and disregarding Kanaka Maoli in favor of colonizer control and "enlightenment". In light of this history of wrongdoings, UH is still choosing to disregard the voices of Hawaiians and continue this settler methodology and mindset of "we know what's best and you are wrong/denying progress if you disagree". Science should not happen at the expense of a people and yet here we are. Where are the ethics in this pursuit of knowledge? Nowhere.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. Shame on the UH!

Additional comments: Let us also remember that we are still under an illegal occupation by the USA. Anyone claiming to have jurisdiction over Mauna Kea that is not Kanaka Maoli is in direct opposition to the Kingdom of Hawai‘i. It is unlawful for anyone either than Kanaka Maoli to be making decisions on behalf of Mauna Kea, and all lands of the Hawaiian Kingdom.

**Additional comments:**  
Times have changed. It should no longer be the colonialist’s right to desecrate sacred land that has been protected by indigenous for thousands of years. WE/Colonialists do NOT know best. To think we can do better than the keepers of this sacred land is pompous and egotistical. Let the protectors of our life blood protect it. Leave Maura Kea be, it is fine a is.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:
- For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:
- There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:
- Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:
- There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:
- On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. Shame on the UH!

Additional comments: Why do you need to build an observatory?? Why not focus on the issues that are happening on Earth before you go looking for another planet? Why not use that money to save our planet from climate change by endorsing and enforcing The Plant Basrd Treaty? It is better for the animals, humans, and the environment.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no!

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH!

Additional comments: Pretty sure the people's decision was final. This is a pseudo democracy after all, at least pretend that the populous have an intrinsic right to self governing based upon the wants and wishes of the majority. Furthermore, the supposedly elected, fiscally elite in control of the governing bodies could not be farther from understanding the cultural and environmental needs of the people and planet they so eloquently fail to support in any resolve ever. This particular issue has been determined through the actions and perseverance of the Kingdom Hawaii and its lawful and sovereign People. This particular issue of #TMT has divided the inhabitants of this land and made it particularly difficult for people without Hawaiian Koko to simply exist. The torment of the many for the greed of a few. It's time to lay this issue to rest. Otherwise more wasted community dollars and an uprising of the people, such as this government has never seen and a course of action that contains the repercussions of their actions. The absolute tyranny of the Hawaiian People since 1823. The reparations are long over due. In simple, to the people responsible for the financial component of tmt: please abandon your resolve. You are tearing our community apart. We are guests in a sovereign land. By any means necessary, respect and honor the culture of our hosts as they have respected (under threat of imprisonment and death) our commercial extortion and exploitation of their most fertile and beautiful lands.

| Opposition to the University of Hawaiʻi (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:--On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawaiʻi's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority. | X  
| Opposition to the University of Hawaiʻi (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:--The indigenous people of Hawaiʻi have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands. | X  
| Opposition to the University of Hawaiʻi (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:--Furthermore, the UH has no jurisdiction to block access to the Mauna Kea summits and should not be allowed to extend their lease beyond the current lease expiration of 2033. No means no! | X  
| Opposition to the University of Hawaiʻi (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:--Lastly, the Kanaka Maoli people and the wider community are being asked to comment on multiple plans related to lease extensions on Mauna Kea within a very short period of time. The US military was recently asking for comments on the Pohakuloa Training Area EIS and the UH is asking for comments on the Hōkū Kea Telescope and the Caltech Submillimeter Observatory decommissioning while simultaneously asking for comments on their Mauna Kea Master Plan all under the cover of Covid-19 restrictions. Shame on the UH! | X  

**Additional comments:** NO TMT - Public and resident outrage will be immense. Stop shitting on indigenous people.

**Additional comments:** No, to building anymore telescopes on Mauna Kea. It is a cultural and sacred area. From childhood, my parents spoke of the Sacred Hawaiian Land. Over a million people internationally agree there should be no more telescopes. They have mis-managed and polluted the site. No to anymore of this. I know the Palm Springs Indians hold their lands sacred and malama and cherish every square foot. We will do the same. Stop, with the money pitches, the indigenous people and all are against it. This is recorded in history. Our eco and infrastructure are worth more than money. Sincerely, Sadie Eckart.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:-The indigenous people of Hawai'i have an internationally recognized human right to self-determination and have over the past 12 years have clearly exercised that right and said NO to the building of TMT on Mauna Kea which is 100% stolen Hawaiian lands.

Additional comments: Jesus Christ, stop messing with what makes Hawaii, Hawaii and what we’ve all come to love about it. This is NOT your land as much as you think it is… you are on the wrong side of history here, friends. Do the right thing. If the kanaka says they don’t want it, you shouldn’t force it down their throats. I will remind you, this is not your land.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:
- For decades, Kanaka Maoli have been vigorously advocating for the protection of Mauna Kea and in the past 12 years, there have been mass demonstrations throughout Hawai'i and abroad in opposition to the building of the Thirty Meter Telescope (TMT) on Mauna Kea. Tens of thousands have occupied Mauna Kea and marched to stop the desecration of our sacred mountain.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:
- There have been numerous lawsuits and contested cases hearings challenging the permitting and construction of TMT and other further development atop Mauna Kea. Some of these suits and cases are still pending.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:
- Over half a million Kanaka Maoli, Hawai'i residents, and world citizens have provided testimony at countless hearings and signed positions and petitions opposing the building of the TMT on the summits of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:
- There were 31 Mauna Kea protectors arrested on April 2, 2015 and 38 respected elders arrested on July 17, 2019. They were arrested for standing in opposition to the building TMT and the desecration of Mauna Kea.

Opposition to the University of Hawai'i (UH) Mauna Kea Master Plan for the next 20 years which includes the building of TMT:
- On September 12, 2021, the UH released its draft Master Plan for Mauna Kea to the public. YET despite decades of Hawai'i's native people saying NO to any further development and 12 years of strong community opposition to the building of TMT atop Mauna Kea the UH (a publicly supported institution of higher learning) continues to make the building of TMT and development a priority.

Shame on the UH!

Additional comments: What ever is considered sacred by any indigenous people should be always be sacred. We kanaka Maoli are taught from babies to respect our Kupuna, we are ready to take on any foreign people to save what is our legacy! To even attempt to desecrate the sacred is not Pomo. The countries That are sponsoring the TMT project are the very countries who pollute the earth the most. India’s water ways are filthy with human remains and excrements’ Japan is leeching radioactive wastes into our pertinent Pacific Ocean, they are depleting our sea animals and killing our Mano! America is even worst with their contamination of the soil, waterways and air. They pollute the rivers with spilt oil, coal mine and factory wastes,

Additional comments: As a Kanaka Maoli pursuing my Bachelors degree in Social Work at UH, I feel it is my kuleana to show my support in Aʻole TMT. My question to you: How can you push a plan to desecrate and build on our land time and time again and teach about the history, our culture, and language and not feel guilty about doing what you are trying to do? It seems so hypocritical that you do the exact thing that oppressed our people, taking our aina for gain of another ... Where is the justice for our people? When will the oppression stop? Why???? How does this benefit my people? Always taking what is not your, acting just like the Westerners that stole our identity, our land, our culture. How do you sleep at night knowing that you are stealing from my people again?? Hewa!!!

Your Testimony/Comments

The Center for Mauna Kea Stewardship has taken a long, hard and inclusive look at the future of Maunakea. Its efforts have been collaborative and responsive to the concerns voiced by many in the community and the path it lays out for future stewardship is thoughtful, respectful and creative. Hawaii needs astronomy; Hawaii needs the mountain on which the most fruitful astronomy in the world occurs managed appropriately and efficiently; Hawaii needs to look to the future and honor its past. The plan proposed by the Center for Mauna Kea Stewardship furthers all of these aspirations. I strongly support it.
(I've copied this from Imua TMT, but I fully agree with the contents.)

I support UH's draft Master Plan because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. I mua Kīlo Hōkū and i mua TMT!

I'm all for it. Despite the din from the myopic naysayers, UH has done a great job managing astronomy on the mountain, and the struggles of the recent past will help guide UH to do an even better job in the future. Astronomy is one the best things we have going on this island, and TMT will be one of the best things ever to happen to this island. Just build it! My brother-in-law William Southwell did the groundbreaking math that made Laser Guidestar possible, and he taught me to look skyward when I was 5 years old. Let's keep the good science going stronger and stronger so our children and the world can continue to learn about the real universe.

Sincerely,
Walter Greenwood
UH Hilo Performing Arts Department

Quidquid Latine dictum sit, altum videtur.
University of Hawaii Board of Regents,

I support UH’s draft Master Plan because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up.

Respectfully,
Kathy A. Reinhart

Sent from my iPhone
I support the UH Master Plan and TMT.

Astronomy and the Polynesians go back to when people first populated the islands.

They got here by following the stars and their urge to learn and explore.

That is what TMT is about, learning and exploring the heavens.

Mahalo

Aloha,
George

Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. I mua Kilo Hōkū and i mua TMT!

Aloha,

Erik Petigura
No better way to advance science than providing new information.
No better way to advance astronomical information with a better telescope

Maybe our planet can be saved and allow a few more trips around the Sun

We need the TMT asap

Michael Kimball MD

I support the building of the 30M telescope on Mauna Kea. Admittedly I am not of Hawaiian descent, but I think their ancestors would approve of this distinct project. They were brave explorers and an adventurous society. The telescope is something to be proud given the proximity of the Hawaiian Islands, and will provide a unique opportunity to young Hawaiians. I do not believe it diminishes the sacredness of the mountain.

Bette Belanger
Kihei, HI
Aloha

I am in full support of the Master Plan and the Thirty Meter Telescope.

Science and knowledge of the cosmos are important to humankind and a building block for future inspiration. Building the TMT will provide ever increasing discovery, will also provide an increase in pride for our state, and further the education of all.

Mahalo to UH for their achievement in astronomy so far, with more to come.

Valerie Weiss
Grandmother of 2 UH graduates and one current senior.

Aloha!

Edward Archangel Michael Odquina <viphonolulu@gmail.com>
To: bor testimony@hawaii.edu

Name is Edward Rambo Odquina Kū.

....Our ancestors have always been the greatest of astronomers and our King Kamehameha would have had all those so-called "Protectors" heads cut off for interfering with the study of the stars.

... THIS TELESCOPE IS NOT JUST ABOUT MAKING HAWAII AND AMERICA THE UNDISPUTED LEADER IN THE STUDY OF THE STARS, IT CAN SAVE HUMANITY.

IF THERE IS ONE THING YOU MUST DO IN YOUR LIFETIME, IT'S TO LEAVE OUR WORLD A BETTER PLACE.

BUILD THE TMT....

THIS TIME, I SUGGEST BUILDING A BIG JAIL AT THE BASE SO THAT ANYONE WHO UNLAWFULLY IMPEDES PERMITTED TRAFFIC CAN GET THROWN IN...BOOKED.....AND BAILED. EACH TIME THEY ARE FINED....MONEY ALLOCATED TO THE CITY AND COUNTY AND TO THE TMT.

......GET PERMITS FOR A JAIL OR PRISON FIRST.

......We can't be bullied or extorted by these FAKE NEWS HAWAIIANS anymore.

NO MORE PLAYING NICE AND DIPLOMATIC.

ENFORCE THE LAW.

......Or, simply HIRE ME, and I'll make sure these annoying "Protectors" stay away.

Edward Rambo Odquina Kū

808-233-8654
The University should support the Thirty Meter Telescope, as it is a noble project not only using talent from the state and the nation, it also brings together nations toward a common goal, nations like China and India whose relations are at times uneven. There are projects that bring the best of us together and that deserve to happen. This is one. TMT will be a great asset to the State, the Nation and the world.

And make no mistake about it, if the Obstructionists succeed in driving away TMT it will be a tragedy, they will then go after the rest of the telescopes. Between that the fall of Arecibo America will then be wavering if not in decline in relation to the rest of the world in ground based Astronomy.

Sincerely,

Don Davis
HI,
I am pro education and exploration,

BUT
Those other telescopes (5 of them) need to be taken away and recycled or responsibly disposed of or sold to another country or state—— before TMT is allowed to be built!

We cannot continue to pollute the land and the earth! We cannot leave our ’opals for the future generations!

If they can spend billions on a new telescope, I’m sure “they” can get rid of the old ones first!!! Or get the countries who built them to help pay to dispose of them properly!!!

Thank you,
Stacie Friel

Comment in support of UH's Maukakea Master Plan

Paul Hirst <paul.hirst@noirlab.edu>  
To: bor.testimony@hawaii.edu  

Tue, Dec 14, 2021 at 9:12 AM

Aloha,

I support UH's draft Master Plan because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. I mua Kilo Hōkū and i mua TMT!

Paul Hirst  
Hilo
Aloha, If not for exploration the world will die. We need to support knowledge of the Universe. The TMT will bring us information that we will not be able to find without the telescope. If protesters run the show, nothing will ever progress. Please do not allow a few out of work, welfare recipients to control our future.

Maybe the Governor did not have enough intestinal fortitude to do the right thing and remove the protesters, but you have a chance to make things right, by supporting the TMT project and building a scientific future for the Hawaiian Islands.

Mahalo,

Harold Spindel

I support TMT!

alexnick@hawaiiantel.net <alexnick@hawaiiantel.net>  
To: bor.testimony@hawaii.edu, "Matthew D. Murphy Murphy" <alexnick@hawaiiantel.net>  

To whom it may concern:

As a long term resident of Hawaii and a proponent of science I truly believe that "TMT" moving forward is in the best interest of the State of Hawaii and of our country. Mauna Kea is sacred and I would never go against the beliefs of our Kupuna and the rest of the indigenous people of the State of Hawaii but I do believe that a balance can be and should be reached between science and our local population. The marvels of the Universe have been discovered and who knows what else is waiting for "TMT" to discover. It would be a shame to loose this opportunity of a life time. Please lets move forward with "TMT" to allow for discoveries to be made now and for generations to come.

Respectfully,
Matthew D. Murphy
I am in support of the Thirty Meter Telescope but the Hawaiian protestors have to be dealt with. I thought you did well when you offered education and money but that seems to have been rejected. Perhaps offer to figure out how to repair the crack in Kahoolawe would be something that might get their approval. Point is you have to get their approval. You may have to hire more Hawaiian astronomers before they approve. I remember an Hawaiian astronomer who talked to my Rotary club but sadly he died. He was very good in his amazement of the universe was contagious.
Parallel Paths and the TMT Telescope
Graham DeVey, Kihei August 9, 2019

I’m hopeful we can find parallel paths to success in supporting Hawaiian culture and operating the Thirty Meter Telescope in Hawaii.

My wife and I have lived on Maui 24 years. What keeps us here is the lasting and positive influence of the Hawaiian people on us and the community. We’ve traveled widely, and there are few places in the world where an endemic culture has been so welcoming, so pertinent and important to daily life for all. It’s an ongoing blessing for all of us to learn from Hawaiians.

I was a science teacher at Baldwin High School on Maui for 17 years and taught 3000 or more students—Hawaiian, Haole, Filipino, Japanese, Portuguese, and many mixes of these. In my classroom lessons, I was very careful to share lessons in ways that were parallel to Hawaiian teachings, both in content and method. A native of Chicago, I was unqualified to teach Hawaiian culture and felt that the Hawaiian kupuna were much better for that responsibility, through their knowledge, passion, patience, mana, and ability to nurture the next generations. But I took pride in finding ways to parallel Hawaiian teaching and culture with my own science lessons. Many, many students and families have thanked me for my approach.

Before teaching, I had been a corporate engineer for 19 years, with 200 scientists and engineers reporting to me. Developing the next generations of young technical people became a calling for me and brought me to Maui. While on Maui, I’ve helped lots of youngsters gravitate toward the sciences.

Losing our local talent to the Mainland is a huge drain on our resources and a personal tragedy for me. I work with local tech businesses to help hire and train Hawaii-born workers, who know how to live and thrive here. Years ago, I attended a community hearing regarding a telescope for Haleakala on Maui. A well-meaning, silver-haired Haole woman stood and said, “Jobs jobs jobs! They are lying to us. These telescope people will bring in their own people from the Mainland and overseas, and our kids won’t get the jobs! Our Hawaii kids don’t know how to do this difficult work!” She was actually weeping. I wanted to climb over the table and smack her, wake her up. Yes, our local kids can and will do the work, and our tech companies would prefer to hire them, rather than train outsiders to work in Hawaii for 2-3 years before returning to their own homelands. We can, we will train brilliant students of Hawaii to work here, and technical people of all levels to work alongside them. This is what I devoted 17 years of my own life to support, and I am absolutely not alone.

At this point, many Hawaiians are gathered to oppose building TMT on Mauna Kea. I see many loving faces, people I know well, among the participants. Part of me rejoices to see native Hawaiians coming together, sharing their spirit, uniting as one. It is difficult to apply the Hawaiian teachings of antiquity to a confused new world. But I feel their pride, their joy, their mana in uniting behind a cause.

For me, though, this is a bitter, bitter development and my heart is bruised by the irony that a telescope is the focus of so much cultural upheaval. Perhaps University of Hawaii could have been a better steward of the mountain environment, I truly do not know. What promises were made in the past, and kept or broken, can surely be researched and discussed. From what I know, though, the TMT project has attempted to treat its mountain site with respect, and has tried to be open in negotiating, in good faith, to do what is pono.
I have taken native Hawaiian students to the top of Haleakala to use its telescopes, and these students enhanced the experience of our entire group. One Hawaiian boy, late in the evening, took off his shirt and lay on his back, surrounded by telescopes, feeling the earth beneath him through his skin and absorbing the stars above. He was connecting with many generations, and I was honored to help him find his way there.

So, here we are. We are at an absolutely unique time in terms of opportunity, to find parallel paths to help Hawaiians connect to their culture and to attract locally-grown talent towards astronomy careers in their own homeland. We must stop accepting the norm of losing our bright youngsters to Seattle, to Silicon Valley, to Wall Street, when we could be helping them use the marvelous TMT telescope to explore, and perhaps challenge or even replace our deepest and most fundamental knowledge of the cosmos, right from Hawaii. I cannot imagine a more rewarding time to work together, honoring and rescuing the past, and preparing the way for educational prosperity for generations to come.

Updated Dec 14, 2021. Graham DeVey
I support the UH draft master plan to keep astronomy alive, especially the Thirty Meter Telescope. Enough said, just do it!

Suzanne Anderson/Petersen

Sent from my iPhone
To whom it may concern,

I fully support UH’s draft Master Plan to keep astronomy on Mauna Kea alive, including the construction of the Thirty Meter Telescope (TMT). I understand UH has managed astronomy on Mauna Kea for many years, and has sought a permit for the construction of TMT. TMT could be a huge asset for Hawaii, the United States and the world. I hope TMT is built sooner rather than later.

I have been advised that the Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world. Astronomy on Mauna Kea is good for Hawaii and is part of our culture. Astronomy on Mauna Kea provides opportunities for all Hawaii residents, including our keiki, to benefit in terms of scientific education, training, inspiration and pride in the many discoveries that occur there. The presence of astronomy on Mauna Kea is important for the Big Island community and our state as a whole for many reasons, including our economic diversification and the discoveries from the world-class research conducted there. Thank you for all of your efforts.

Aloha,

James C. McWhinnie

---
Aloha,

I'm just an ordinary citizen, born and raised here, my wife's family are from the Big Island and lots and lots of blood Hawaiian relatives. I am in total support of the UH TMT program and what it means to the university, our community, and the future of space science.

I recognize the respect Native Hawaiians have and desire to declare an area sacred. My question is, How far does the area extend? They claim, The whole mountain. Is that feasible? Is that respectful of those Hawaiians and citizens of Hawaii who also respect the sacred aina but want to be able to utilize this magnificent location as one of the best and most optimal locations in the world for this type of hope? The hope that this may bring to future citizens the wonder and discovery of that great unknown, space?

It's time we move on to enhance our future with the TMT.

Thank you for your kind consideration.

Mahalo,
Paul
Aina Haina

### Your Testimony/Comments

As an olapa hula practitioner who has lived in Hawaii for more than half my life, I support the draft UH Maunakea management plan and construction of the TMT. I believe this is consistent with the ancestors, whose very history is one of discovery and exploration and whose reverence for Maunakea did not preclude use of the mountain's resources (as evidenced by the adze quarry there).

I remember the days before UH management, and it angers me that opponents cite problems from that era, since corrected, along with misinformation in an attempt to sway public opinion against astronomical research. I have watched with sadness attacks on Native Hawaiians who thoughtfully express support for the project, creating an atmosphere of intimidation that prevents many who are not opposed from speaking out.
Please imua - move forward with the management plan and astronomical research on Maunakea.

My testimony in STRONG support of the TMT!!!!

Nancy Taylor <taylorn005@gmail.com>  
To: bor.testimony@hawaii.edu  

Tue, Dec 14, 2021 at 10:05 AM

I STRONGLY SUPPORT TMT for our State, for scientists worldwide but mostly for the people of Hawaii and the amazing opportunities that this project can offer. The possibilities that might unfold from this project are limitless. The prestige it will bring is massive and the highly skilled jobs, though limited in number, will be important in maintaining a level of excellence at UH. This, I am VERY hopeful that, at last, this incredible project can begin and that it will bring a greater spotlight on the excellence at UH and offer the opportunity for extensive exploration and discovery in the decades ahead.

Thank you for consideration of my strong support for this amazing project. What a dream!! Please enable that dream to become a reality!!!!!

Nancy Taylor
Support of UH's Master Plan for TMT & Mauna Kea

Lucia Kaplan <luciakaplan@me.com>  
To: bor.testimony@hawaii.edu  
Tue, Dec 14, 2021 at 11:03 AM

I support UH's draft Master Plan because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). We are so fortunate that the Island of Hawaii is the best place in the world to observe & study our Universe. I am in awe of the great scientists to study our cosmos & make important discoveries of our small planet fits into the larger expanse of outer space. I believe there is more than enough room for all to utilize the gifts of Mauna Kea. We must continue to move forward with plans to build TMT. It is time to build TMT now!

Mahalo,

Lucia Kaplan

Your Testimony/Comments

I support UH's draft Master Plan because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific
discovery that takes place in our home. This project gives our keiki a great opportunity to pursue a career in an important field while allowing them the ability to stay close to their family in the islands to work. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. I mua Kilo Hōkū and i mua TMT!

Your Testimony/Comments

From thousands of years ago, the stars have guided all of Polynesia. Let us continue to grow our search into space to support Earth, train its people's to sail beyond what we know, and to never deny the pursuit of knowledge. If we say yes to denying our future, we tell each other that there is no point to wonder.

### Your Testimony/Comments

As the Polynesians of old observed, studied, studied, and understood the movement of the stars in time, to explore, navigate, discover, inhabit and populate remote islands throughout the vast Pacific, the planning, investment, and development of astronomy, astrophysics, astro-mathematics, astro-technology on Mauna Kea under the management and guidance of the UH Mauna Kea Master Plan, will advance and expand in humanity’s knowledge and understanding of the principles and forces that operate in the infinite cosmos, allowing humanity to navigate, discover, explore the Universe in Time and Space.

<td>I fully support the UH Draft Master Plan because it keeps astronomy on Maunakea and TMT. UH has done an excellent job managing the Maunakea Science Reserve and surrounding areas. From managing the road, to getting rid of invasive species, care for the Wolf Spider and the Weiku Bug, the historic properties, the Nene Goose and all the flora such as the Aweoveo, the area continues to flourish. They did a thorough job with obtaining the construction permit for the Thirty Meter Telescope, meeting each requirement that seeks to protect the environment. I support the UH’s endeavor to renew Master Lease for the astronomy precinct so that Hawaii can continue to lead in this field of science. I hope my alma mater does everything possible to see that TMT is built on Maunakea and astronomy continues in Hawaii.</td>
</tr>
</tbody>
</table>

---
I know the anti TMT people would like to see an end to astronomy in Hawaii, but every institution of higher learning has an astronomy and physics department. For the last 50 years the observatories in Hawaii have contributed to knowledge for all humanity, from the Cosmic Microwave Background, to mapping out our galaxy Laniakea, to discovering Powehi. We cannot step backwards, we must move forward as our ancestors did on those long oceanic voyages. It is because we are Hawaiian, descended from master naked eye astronomers that we must continue to study the heavens and understand our place in the universe.
In support of Mauna Kea Observatories and TMT

Please keep it up. I mua Kilo Hōkū and i mua TMT!

I am sure you will see many direct copies of the above message. I have carefully read it to be sure I support the points that it lists. I add that under the UH the Mauna Kea astronomy complex is the best managed in the world. This is partially shown by the many amazing discoveries that have come from Mauna Kea. I know that the UH's draft Master Plan represents many hours of careful study and decisions and I completely support it.

Please continue the great and valuable work.

Alan Mefford

UH Hilo Center for Maunakea Stewardship's Proposed Maunakea Master Plan – Support for UH Board of Regents Approval

UH Board of Regents Special Board Meeting
Thursday, December 16
via virtual meeting

Aloha University of Hawaii Regents,

I am Nancy Sakamoto, submitting supportive testimony for the approval of the Proposed Maunakea Master Plan in my capacity as an active community member, and as a tutu for my grandchildren who offer much promise as the next generation of Native Hawaiian leaders.

I have been actively involved in the Kona Kohala Chamber of Commerce, the Kailua Village Business Improvement District as an advocate for stewardship of our valuable resources here on Hawaii Island.

I’ve kept up to date on the stewardship of Maunakea, through presentations and engagement. The Center for Maunakea Stewardship, formally known as Office of Maunakea Management, has been successfully managing its lands on the mountain, implementing state policy on astronomy since 2000. Let’s remember that nearly sixty years ago, it was the State of Hawaii who wanted to develop astronomy in Hawaii. Looking towards the future, I would ask all of us to take pride in this accomplishment.

This new draft management plan takes us forward into the next few decades, ensuring good, sound management of the unique resources found on Maunakea. The balance struck in the master plan limits development that protects the resources while ensuring world class astronomy continues in Hawaii, providing inspiration for our island students. How fortunate we really are.

I support the draft and I ask you to as well.

Mahalo for allowing this opportunity to share my comments.

Keaau, HI
RE: UH’s Master Plan

I am writing in full support of UH’s draft Master Plan because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT).

The way to the future is guided by roads from the past: knowledge of the stars - astronomy - is what brought our forebears to these islands.

We honor the accomplishments of those who came before by continuing to advance the study of the stars for all the world’s peoples. And at the same time enhancing our local and state economy and providing opportunities for our keiki.

Keep up the good work - I mua TMT!

Mahalo and aloha,

Ali Bairos
Aloha:

I am a resident of Kailua-Kona and would like my voice to be heard. Mauna Kea is a resource for ALL of the Big Island residents and scientists visiting the telescopes. Mauna Kea is one of the best locations for stellar and interstellar research to be done. The benefit of the TMT to the entire island is something all people on the island should approve.

Hawaiians, when the took off from their island in the South Pacific, were navigators, able to cross unfathomable ocean to "find" our beautiful islands. They were star navigators of the highest rank and should be applauded by all astronomers and navigators even today. The TMT consortium was willing to provide money to the island schools for STEM subjects which as we know, can lead to highly paid positions after college. But if we wish to keep our people on the island, they NEED jobs hiring in those fields. I want our gifted children and young adults to see what can happen by seeing highly successful people living among them, hearing their stories, and believing that they, too, can succeed. That can only happen if the money is pumped into our schools, and TMT is a willing partner in this endeavor.

UH has mismanaged the mountain for a long time but it can and must involve more than a few people. Please plan on doing what's right for the mountain and for the Big Island. Hold meetings here on our island, not on Oahu. Come here to our island and hold meetings around the island so regular people have a say. Regular people have good ideas and you must hear them personally.

Mahalo for your time,

Greg Olsen

Your Testimony (pdf or word)

[masterplan_comments_tc.pdf (103.9 kB)](masterplan_comments_tc.pdf)
I have reviewed the Maunakea UH Master Plan – E O I Na Leo. This is a thoughtful document, and I strongly believe that the Boards should approve the Master Plan, pending modifications/clarifications.

I also agree with the Task Force’s other conclusions, including that it should engage in sustained outreach efforts and that it should continue to manage the MKSR – either solely or as a major partner in a reorganized management structure -- and support world-class astronomy.

I have the following additional comments on UH’s past management and on the Master Plan itself, requesting some minor modifications.

Master Plan comments:

- In agreement with the National Science Foundation’s comments, my main criticism is that the Native Hawaiian community needs to have a clear voice in the management of Maunakea if for no other reason than UH’s management area includes at least some land – Lake Waiau, Pu’u Poliahu, etc. – upon which Hawaiian traditional and customary practices unquestionably occur. The existence of Kahu Ku Mauna, cultural training, and a promise of deeper engagement is most welcome. But I believe the Master Plan would be substantially improved with a discussion of how to not just consult the Hawaiian community but involve said community in the governance of Maunakea itself.

- Likewise, I agree with NSF that describing how new guidelines on observatories lessen environmental or cultural resource impacts.

As one specific example, in multiple places the document describes how facilities must convert to a zero-discharge waste system by 2033. A reader is not given the motivation for this rule. One could infer that UH is somehow conceding that the current waste disposal systems pose a threat to the island’s water, an often-repeated bit of pseudoscience from the TMT contested case hearing. Instead, moving to a zero-discharge system is an action that lessens cultural impacts as many practitioners believe that the deposit of waste into summit grounds is culturally inappropriate.

- Re: the UH commitments on decommissioning (Sect 4.1.2). First, it should be clearly acknowledged that the multi-observatory decommissioning steps are spurred by TMT’s CDUP. I.e. TMT in exchange for multiple older telescopes. This is alluded to in Sect 4.3.2.1 but should be clearly spelled out. Furthermore, Appendix E describes that UH will receive input from other organizations – including Hawaiian organizations – on which additional telescopes would be decommissioned by 2033. I think it would be more appropriate for Hawaiian organizations to have a vote in this process, not merely be consulted. This suggestion goes back to the first comment: that the Native Hawaiian community should have a clear voice in the management of Maunakea.
UH’s past management:

- I very strongly believe that the University of Hawai‘i has done an exceptional job managing and protecting resources on Maunakea for at least the past decade. As the Independent Auditor’s Report acknowledges, “the cultural and natural resources on the state conservation lands on Mauna Kea are some of the best managed and protected lands in the entire State. The area is clear of trash, the invasive species are being removed not only by OMKM but volunteer groups, and the OMKM Rangers to ensure public safety on Mauna Kea.”

- The inventory of cultural/historical sites is exhaustive and well documented. In my years on Mauna Kea, I have seen cultural practitioners free to engage in their activities without harassment but with respect from UH. The cultural orientation program required for all Mauna Kea astronomy personnel is well presented.

- As evidenced during TMT’s most recent Contested Case Hearing, UH has done an exceptionally thorough job in documenting and protecting Mauna Kea’s natural resources. Arthropod surveys are well thought out and detailed. The weiku bug population has recovered. Documentation and surveys of plant species is also well thought out.

As I said in the auditor’s report, UH’s stewardship of the land is a stark contrast to the poor stewardship that some TMT protesters have on the Pu‘u Huluhulu encampment. UH’s commitment to laws and regulations is a stark contrast to lackadaisical attitude from state and county law enforcement. Furthermore, mistakes that are often attributed to UH instead lie at the feet of the state itself. For example, it was the state that has allowed protesters to damage planets and scatter plants at the MK Access Road. It was the state that refused to prosecute Palikapu Dedman’s disinterment of remains and placement of bones on the TMT site in an act of protest and against state law.

My Background:

- I have gone to Mauna Kea for the past 14 years for astronomical observations and thus have seen the state of the mountain prior to the completion of the CMP, during the early years of its implementation, and up to recent times.

- I have not shied away from pointed and public criticism of UH or the Institute for Astronomy in other contexts. For example, as an interviewee for EnVision Mauna Kea I expressed extreme frustration and anger at IfA for "a lack of courage" in direct and frank discussions with some TMT opposition leaders in order to have a future where the telescope is built on Mauna Kea in the most peaceful way possible. While I am strongly encouraged by the new leadership at IfA, I remain extremely concerned about the lack of engagement by IfA faculty in general.

RE: UH’s Master Plan

I am writing in full support of UH's draft Master Plan because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT).

The way to the future is guided by roads from the past: knowledge of the stars - astronomy - is what brought our forebears to these islands.

We honor the accomplishments of those who came before by continuing to advance the study of the stars for all the world’s peoples. And at the same time enhancing our local and state economy and providing opportunities for our keiki.

Keep up the good work - I mua TMT!

Mahalo and aloha,

Ali Bairos

Please support the TMT; we need to continue looking outward.

mahalo,
glee stornont
Time to continue the voyage into the unknown the Hawaiians began centuries ago. Ancestors sailing across and unknown, open ocean in search of knowledge were the true pioneers of life. Instead of hiding behind imaginary fears, these brave warriors faced uncertainty and the unknown to seek knowledge, happiness and new adventure. Open your minds and hearts to the unknown as the ancestors did when they began to travel to unknown worlds.

I support UH's draft Master Plan because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). UH has done a much better job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built.

Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. It was the stars that led the ancestors to these beautiful shores full of opportunity. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. I mua Kilo Hōkū and i mua TMT!
Dear Regents,

I write to you to express my support for the Plan.
I have followed the process for the several years you have published information on your plans and the pros and cons expressed by the community.

I confess that I am not as familiar with the objections to the project from the Hawaiian community or the proposals UH has made to rectify their concerns regarding stewardship. My concern stems from the potential of further developing a viable world class astronomy program directly beneficial to the University and the state with major world wide implications for other countries who participate in this type of research and development.

I find it difficult to imagine sacrificing such an opportunity for the near and far future. It is heartbreaking to give up this dream. Surely a compromise can be reached with those who object so we can assure our children and grandchildren a chance to be part of this monumental endeavor.

It is part of the spirituality my family feels for the precious mountain and the many questions we hope it will answer about our universe. Are we alone? What wonders are yet to be discovered about our home planet, solar system and galaxy. Can we protect ourselves from an interstellar collision? And many others.

I get chicken skin when I think of the wonders of such a program and what it could offer.

I trust you will find the path through the star lit skies just as the sailors across the Pacific did in their voyages of discovery. There is so much at stake in this treasure hunt for us all.

Thank you for your consideration of my testimony.

Marilyn Seely
Kaneohe Hawaii.

I have lived in Hawaii for over 26 years. I have worked as a lawyer in Hawaii for the entire time and have a small law firm in Kona. I have one daughter who was born and raised on the Big Island and is now on the mainland and applying for graduate school in the medical field. I strongly support astronomy and been fascinated with the study since childhood.

I STRONGLY SUPPORT THE UH MASTER PLAN REGARDING MAUNA KEA AND CONTINUING WITH THE TMT. I personally think that the objectors have latched onto what they see as an anti-ha’ole cause and haven’t considered the real essence of what they are protesting. Ancient Hawaiians were fascinated by the stars and even found their way from Tahiti to Hawaii through astronomy. I am humbled to live on the Big Island with a mountain so able to launch exploration and assist with research into life itself. I am also very much in support of education and exploring areas of wonder. The protestors’ children will also greatly benefit from having a resource of this caliber right here at home. I believe the mountain is proud to be contributing to such lofty efforts.

I don’t have time to camp out Mauna Kea for months as a sign of opposition, as I’m very busy helping many people with very difficult legal problems. I question if the protestors have done much to help others on this island as they have a lot of free time to spend complaining and away from any home or work life.

Respectfully submitted, Kimberly A. Jackson, Esq.
Aloha,

I write to offer my support for the new Master Plan so that the Thirty Meter Telescope can be constructed without any further delays.

Regards,

Chris Tipton
Aloha,

Thank you for the opportunity to voice our organization’s support for the Proposed Master Plan for the UH Maunakea Lands. Our testimony is attached.

Hawaii Island Chamber_BOR testimony 12142021.pdf
134K
December 14, 2021

TO: University of Hawai‘i Board of Regents

FROM: Miles Yoshioka, Executive Officer
Hawai‘i Island Chamber of Commerce

SUBJECT: Support for Proposed Master Plan for the UH Maunakea Lands

Aloha Chair Moore and all distinguished Regents,

The Hawai‘i Island Chamber of Commerce, formed in 1898 by the business community of the Island of Hawaii, has continued to be a dedicated supporter of scientific and, in particular, the astronomical enterprises on Maunakea.

In 1963, the Executive Secretary of this Chamber, Mr. Mitsuo “Mits” Akiyama began his quest to rebuild the economy of Hawaii Island, then devastated by the 1960 tsunami that hit Hilo Bay, much as how the COVID-19 pandemic is affecting Hawai‘i Island’s economy today. Through the efforts of Mr. Akiyama, Mauna Loa astrophysicist Howard Ellis and astronomer Dr. Gerard Kuiper, the first telescope was placed on the mountain a few years later for site testing, a precursor to the world-class astronomical center it is today.

Our chamber continues to stand with Hawaii’s business community in support of astronomy, science, culture and environmental stewardship. The economic benefits of this industry are significant. There are hundreds of local residents currently working in the industry earning good wages and supporting their families and community.

Initially through the Office of Maunakea Management and now, through the Center for Maunakea Stewardship, UH has dedicated its management efforts to the protection of the natural and cultural resources while ensuring the UH managed lands on the mountain allow for world-class astronomy. A point we should all be proud of.

HICC members have actively participated in every management plan process, invasive weed pulls and one of our members was awarded for her efforts in partnering with CMS for environmental stewardship. We are working together in our community to ensure best management practices continue for Maunakea.

The University of Hawaii has sought to balance multiple community interests when it comes to Maunakea. The balance struck in the Master Plan limits
telescope development and protects natural and cultural resources, all while ensuring a world class astronomy program for Hawaii continues.

We stand in support of the Master Plan. We call on you to support the Master Plan as well and continue stewardship efforts to malama Maunakea.

Thank you for your time.
To whom it may concern,

I support the University of Hawaii (UH) draft Master Plan because it encompasses astronomy on Mauna Kea including the Thirty Meter Telescope (TMT). I also have confidence in UH continuing to manage Mauna Kea after over 20 years of active involvement. UH has received a legal permit for the construction of TMT, a major Multi National Collaboration that will produce significant data and knowledge on our understanding of the Universe and science. Our existing telescopes have been a major attraction for visitors around the world and TMT will further serve to establish Mauna Kea and Hawaii as a world class location for astronomy in one of the best locations in the world to explore the night Sky. TMT will also attract scientists and technicians creating more jobs in Hawaii not only for TMT but also the support companies needed for this major undertaking. Thirty years ago Hawaii was concerned that its main industry was tourism and the construction of telescopes was a way to attract higher technology positions to the islands, TMT can serve the same purpose and attract firms to establish design, R&D, software and robotics centers and diversify the employment base within Hawaii.

The Hawaiian ancestors arrived here after traveling vast distances in voyaging canoes and navigating at night using only the stars to guide them. Amazing act of skill and seamanship and I think that they would be extremely proud to know that Mauna Kea is now the premiere site for astronomy and expanding knowledge that dates back some 1500 years.

With respect

Clive B Davies PhD

Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, providing research and employment opportunities to residents of Hawaii.

The summits were never “sacred land” and access for any religious purposes would not be restricted by the telescope project.

Please do everything in your power to complete the TMT as soon as possible.

Thank you,
Gail Wong
Hawaii Resident

Support for Renewal of UH Master Lease for Mauna Kea

Victoria Missien <missienv001@hawaii.rr.com>  
To: bor.testimony@hawaii.edu  
Tue, Dec 14, 2021 at 5:23 PM

Our family fully supports the University of Hawai‘i continuing their oversight and management of Mauna Kea, and support their draft Master Plan towards renewal of their Master Lease. Divisive as this issue has become there is no denying the historic, indigenous importance of continually seeking enrichment through the study and knowledge of our night skies. The informed curiosity which led the ancestors to the islands of Hawai‘i is the gift and endowed responsibility for us now: to seek, learn, caretake and share.

There have been assertions that past management of Mauna Kea was less than it should have been, and that any past shortcomings should deny UH continued stewardship, and furthermore deny all astronomical studies at the summit. Whether this accusation is fair or strategic, humanity can and does learn from experience, including gained knowledge of better practices. It would be a sad disservice to determine there is no place for scientific study on Mauna Kea, and that it be strictly a spiritual temple. Mauna Kea has been, can, and should be both, and so much more. The potential to collaborate on a richly rewarding future for education, enrichment, honoring traditions, inspiring our keiki, and yes increased economic diversity is there. It is all possible.

Civility, respect, patience, listening, compromise, and inclusion is needed from all. Imua the responsible collaboration for astronomy on Mauna Kea; imua TMT.
Support for UH TMT Astronomy

Gene <groundsg001@hawaii.rr.com>  
To: bor.testimony@hawaii.edu

Aloha  
Support the UH TMT activities on Mauna Kea. I believe it is a tribute to our Hawaiian culture as well as furthering our knowledge and understanding of the universe.  
Mahalo I am practically a life-long resident of Hawaii, a pioneer of solar energy usage and a long time farmer and rancher. I love the aina.  
Gene Grounds
To whom it may concern,

My name is Eric Takasugi, a resident of the Big Island and I strongly support the Thirty Meter Telescope (TMT).

I also support UH's draft Master Plan because it keeps astronomy on Mauna Kea alive, including TMT. I believe that UH has done a great job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. TMT has also shown their commitment not only to science and astronomy, but also to the community through their numerous contributions to education and job opportunities for people on the island.

Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. Imua Kilo Hōkū and imua TMT!

Thank you for your time.

Sincerely,
Eric Takasugi

December 16, 2021 BOR meeting - Testimony from the Kona-Kohala Chamber of Commerce

Wendy Laros <wendy@kona-kohala.com>  
To: bor.testimony@hawaii.edu

December 14, 2021

RE: December 10, 2021 Proposed Master Plan for the University of Hawai‘i Maunakea Lands, E Ō I Nā Leo.

To the University of Hawai‘i Board of Regents,

The Kona-Kohala Chamber of Commerce brings together the business community as a strong, united voice to address key issues in our community, on our island and in our state. Founded in 1968, our 430 member businesses and organizations represent a wide range of industries such as agriculture, aquaculture, astronomy, banking, construction, education, finance, food service, healthcare, media, non-profits, retail, real estate, tourism, technology, transportation and more. We exist to provide leadership and advocacy for a successful business environment in West Hawai‘i. Our goal is to enhance the quality of life for our community through a strong, sustainable economy on Hawai‘i Island.

We support the proposed Master Plan for the University of Hawai‘i Maunakea Lands, E Ō I Nā Leo. We believe in the UH’s mission and purpose to “Sustainably steward Maunakea for the benefit of our communities, Hawai‘i, and the world, as a publicly-accessible learning landscape where all who visit learn, and those who seek something more discover through rich multi-cultural experiences and multi-disciplinary discourse. Provide equal opportunities across the schools of the UH system and community partners to engage with the mauna in ways that perpetuate and advance knowledge, wisdom and values while fostering mutual understanding and respect.”

UH acknowledges this special place is a destination for residents and visitors seeking cultural, educational, recreational, and exploration experiences. With entities in place such as the Center for Maunakea Stewardship, ‘Imiloa Astronomy Center and the Institute for Astronomy, the University of Hawai‘i has broad resources, vast knowledge and a steadfast commitment to provide the best possible stewardship under very complex circumstances.

We strongly support UH management and state lease renewal on Maunakea. The University of Hawai‘i is by far the best option for a management structure on Maunakea and the lease renewal of 2033 is an urgent matter. The University has taken significant steps to address issues and improve management. We applaud the depth, scope and considerations embedded in the Master Plan pertaining to land use and facilities along with the Comprehensive Management Plan that fully outlines related activities and resources.

The Kona-Kohala Chamber of Commerce strongly supports the astronomy industry on Maunakea noting significant scientific discovery, global leadership, educational outreach, workforce pipelines, jobs and economic impact. Hawai‘i has worked diligently to diversify its economic sectors and attract high tech industry to create more opportunities. Hawai‘i’s astronomy sector provides needed economic diversity with a statewide impact of $167 million. Astronomy activities generate over $52 million in earnings, over $8 million in state taxes and 1,400 jobs statewide. We are very grateful to the UH Institute for Astronomy and Maunakea’s astronomy industry for well-developed, impactful programs that better prepare Hawai‘i students to become the workforce for higher paying science and technology jobs in Hawai‘i’s 21st century economy.
We support culture, science and environmental stewardship on Maunakea. We understand and respect the cultural values associated with Maunakea and believe science and culture can and will harmoniously exist in this special place. In 2017, we recognized the University’s commitment to culture on Maunakea when the Office of Mauna Kea Management, now Center for Maunakea Stewardship, was the recipient of the Kona-Kohala Chamber of Commerce Pualu Award for Culture and Heritage. The Chamber’s Pualu Awards recognize businesses, organizations or individuals that work together for the betterment of Hawai‘i Island. The meaning of pualu translates to “all together, in unison, and cooperative.” (Pukui & Elbert, 1986).

We support expanded educational activity and construction of a new UH observatory at the Halepōhaku Mid-Level Facility to continue the important work of teaching, training and conducting research. As mentioned in the plan’s opening message, “Efforts already underway to elevate culture and education as key priorities alongside astronomy and land stewardship have begun with the assignment of responsibility to the ‘Imiloa Astronomy Center of Hawai‘i. ‘Imiloa is developing additional necessary and appropriate educational programming for those who work on and visit Maunakea and improving the interpretive experience at the Maunakea Visitor Information Station at Halepōhaku.” In Part 2, Section 3 of the Master Plan, it states, “The facilities at Halepōhaku are essential to UH’s ongoing astronomy program and management.” In the UH Commitment Regarding Use of Halepōhaku, it states, “The only astronomy facility that will be proposed at Halepōhaku is the UH Hilo educational telescope.”

Lastly, the Kona-Kohala Chamber of Commerce strongly supports the development and future operations of the Thirty Meter Telescope (TMT). Although this Master Plan does not specifically address TMT, we must voice our support for this permitted project. Since 2009, TMT has contributed millions of dollars to educational initiatives for Hawai‘i Island students that include The Hawai‘i Island New Knowledge (THINK) Fund, Workforce Pipeline and Akamai Internship Program. Additionally, TMT will provide 300 local and specialized construction jobs during the construction phase, and once the telescope is complete, employ 140 staff. TMT’s commitment is to fill these positions with as many Hawai‘i residents as possible and use local businesses for support services. We must acknowledge the positive contributions of TMT for our island community.

We appreciate the opportunity to voice our support for the UH Master Plan for the Maunakea Lands, E Ō I Nā Leo.

Sincerely,

Wendy J. Laros, President & CEO

Peggy Regentine
TMT is true science. Watching Hawaii’s economy tank over the past year and a half, we definitely need to get a positive contribution not only to our economy but to our environment, to our children’s education and to our culture. TMT provides all of this and more. Keep TMT!
Meryl Abrams
Aloha,

I wanted to share with you my support for the TMT project. I feel TMT would benefit the state of Hawaii for the following reasons:

1. Research for the benefit of many – not just the scientific community at large, but also for aspiring scientists here in Hawaii. I envision high school and college students serving in some sort of internship program that would benefit their learning.

2. Aspiring our youth – we already see a “brain drain” of our youth to the mainland due to a lack of technology jobs. Why not give them an opportunity to stay in Hawaii?

3. Providing much needed jobs – as a former resident of Hilo, I understand jobs that pay well are hard to come by. The TMT would provide construction jobs, support staff and secondary jobs once the TMT is complete.

4. Funding for the UH – I’m not a finance person, but I’m sure the TMT would be able to generate funding for the UH through various grants.

Mahalo for listening to my thoughts,

Kevin Ancog

To BOR:

We need UH's new Master Plan in place in order to renew UH's Master Lease for Mauna Kea and keep the astronomy industry, including TMT, in Hawaii! This is an important, clean industry for Hawaii. This will advance knowledge for all people of the world. The master plan is well thought out and shows a sense of honor and responsibility.

Aloha, Ruth Robison

UH master plan

yvonne.yvnn@gmail.com <yvonne.yvnn@gmail.com>  Tue, Dec 14, 2021 at 11:53 PM
To: bor.testimony@hawaii.edu

As a resident of Hawaii for the last 40 years I have been pleased with the UH master plan and the emergence of Mauna Kea as the premier site for astronomy in the world. I would like to see UH maintain this position and not be bullied by an extremely small but loud minority determined to remove UH and astronomy from Mauna Kea under the guise of “religion”, which was not practiced until a road to the summit was built for observatories. Hawaii can lead the world in precious little, but I would much rather it lead the world in astronomy than homelessness.
Gregory B. Wilson, M.D.

Support of UH's Master Plan,

Jean-Pierre MAILLARD <jean-pierre.maillard@iap.fr>  
To: bor.testimony@hawaii.edu  

Aloha to all,

As a French astronomer who lived with all his family for several years in Waima (Big Island), who made the main part of his scientific carrier on the top of Mauna Kea, thanks to the Canada-France-Telescope and also from many collaborations with UKIRT, Keck telescopes, JCMT, Gemini North, I fully support the completion of the UH Master plan. It will continue what was just at the beginning in 1980, the year I arrived in Hawaii which has since, given so many results. And TMT is just in the line of the developments of this exceptional site, with first the generation of the 3 - 4 meters telescopes, then the 8 to 10 meters and now a 30 meters.

For sure, the presence of astronomy on Mauna Kea is vital for the Hawaiian people but also for the worldwide scientific community. So, please don't let a stupid nationalism and a poor populism take the lead. I want to trust your understanding of your true interest, your open mind for a bright future of the science from Mauna Kea.

Dear Regents:

This communication is to express my support for your approval of the revised Mauna Kea Master Plan. I was a member of the Mauna Kea Management Board from 2004 to 2012, when the original Master Plan was developed and approved. My paramount concern has always been the well-being of the natural resources on Maunakea. On the MKMB, we organized a team of people – observatory supporters, objectors, and agnostics alike – to prepare the Natural Resource Management Plan (NRMP) component. My comments concentrate on that aspect of the Plan, as there are many others who are more qualified to discuss other aspects such as the interface with Native Hawaiian cultural practitioners, tourism, etc.

The NRMP was recognized as one of the best plans for management of State lands and has served as model for other areas. Our component plan called first for the protection of rare species and habitats, second for dealing with invasive species, and third with research on the biology of the mauna, which was still not fully documented. A series of goals and objectives and actions were developed to get to work on this. Not only was the plan visionary, it was effective. Under the guidance of the Master Plan and OMKM, all these objectives were pursued with a remarkable degree of success, considering we are talking about the government after all! We now have a much greater understanding of the ecology of the wekiu bug, we have a full flora of the summit area, and we know much more about the permafrost and subsurface hydrology.

I think natural resource management of Maunakea has gotten an unfairly bad rap. There was bad management at one time – I was a protestor myself in the 1990s after construction of one of the observatories left a giant trash pile that blew in the wild summit winds halfway to Hilo. We came up in a pickup truck and retrieved what we could, cursing the University of Hawaii for their malfeasance. But in 2000, when a new management structure emerged, and Barry Taniguchi helped provide the community leadership the mauna really needed, things turned around dramatically for the better. Development of the Master Plan – as contentious as that was – helped solidify that. It is a challenge to manage the multiple permitted uses on the mountain – but we should not just tear down the observatories and kick out the curious tourists and local snowplayers in their lifted trucks. We need some balance. Despite a plethora of fake news, the mauna can be managed with current uses and minimal impacts. Astronomy has been and can be even a greater source of funding for critical management. The new Master Plan redoubles the focuses on working with the Native Hawaiian community to celebrate the mauna and reduce adverse effects. The Center for Maunakea Stewardship has been a very positive addition and has helped outreach into the community in a deeper way than ever before. I urge you to take steps to approve the pre-final Master Plan so that we can continue to take care of the natural and cultural resources and truly malama Maunakea for the greater good of our citizens.

The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. I mua Kīlo Hōkū and i mua TMT!

The future of high tech in our state is linked to the success of astronomy on our mountains, especially telescopes on Maunakea. High Tech is our state's hope for future diversification. We don't have much else - do we really want more tourism? Maunakea is unique on this earth, and the excellent conditions for astronomical research are also unique to Maunakea. We must maintain this opening to the universe. Polynesians in the distant past used the science of astronomy to navigate the whole Pacific; we can continue to use this scientific gift to navigate our world now and for future generations.

Mahalo,
Ann Lum

Your Testimony/Comments
I am an Astronomer Emeritus at the UH Manoa Campus. I worked at the UH from 1980 to 2016 and have therefore seen and participated in the growth of astronomy on Maunakea from the early days. I am a former director of the NASA Infrared Telescope Facility. I was born and raised on Maui, and like many people in the islands I am saddened by the controversy of astronomy development on Maunakea. Stopping the TMT and even stopping all of astronomy in Hawaii will not resolve the issues raised by the Kia‘i movement and it will not yield a better future for the next generation. I believe the proposed Master Plan is a good step toward addressing the many issues that face the University and the community. It will take generations to realize the objectives of the
plan and to address the concerns of the Kia'i movement. No plan will please everyone, but we must move forward and I urge to BOR to adopt this plan.

To: University of Hawai‘i Board of Regents  
From: Mary Beth Laychak  
Subject: Testimony on Proposed Master Plan for the University of Hawai‘i Maunakea Lands  
Date: December 15, 2021

As a staff member of one of the Maunakea Observatories, I am reassured to see a long range commitment to astronomy in the draft Master Plan; E Ō I Nā Leo. The Maunakea Observatories are the scientifically most productive collection of telescopes in the world and I am proud of the work that we do.

I have the privilege to represent my facility and the Maunakea Observatories (MKOs) in the community. The core values described in the Master Plan resonate with me and reflect the work that myself and others strive to do in the community. It is my opinion that the MKOs have a kuleana to the mauna and the community to respect the wahi pana that is Maunakea and share understanding of the universe gained by the telescopes with the broader community. We also have the obligation to be good neighbors, and contribute to the community we call home. Over the past 50 years, the MKOs have not always done as much as we can or should have, but we strive to do better moving forward.

Over the past decade, I have been a part of the MKOs efforts to do better, both within and outside of our traditional STEM outreach. From the start of COVID, the MKOs saw the need in our community and asked the community “how can we help?” When our community answered that critical needs were food insecurity and our keiki, we started to do the work to help. The W.M. Keck Observatory created a program called Farm to Families where they bought produce from local farmers then donated the food to local organizations in need. MKOs staff volunteer at the Hawai‘i Island Food Basket, packing and helping to distribute food across the island. I am one of the founders of Keiki Heroes, a community based program to educate and empower keiki to feel in control of their own health during COVID. Keiki Heroes is now a statewide program with materials distributed through all the major health organizations in the state. The MKOs are a critical sponsor of Keiki Heroes, supporting the program since day one.

Community engagement is a cornerstone of my work. In my experience, engagement works best when it is a two-way street: asking the community what they want and then listening to the answer. I encourage the Board of Regents and the University of Hawai‘i to truly live up to the values outlined in E Ō I Nā Leo by involving community voices—specifically Hawaiian voices. I believe the Maunakea Observatories are eager to support and willing to lead these efforts, working collaboratively with the University and our community to achieve these goals.

Thank you for the opportunity to provide testimony,  
Mary Beth Laychak
Aloha Chair Moore and members of the University of Hawai‘i Board of Regents,

Mahalo for the opportunity to submit testimony in support of a long-term future for astronomy on Maunakea. It is my personal belief that there is much good to come from the continuation of Hawai‘i astronomy, so long as we are able to come together as a community to advance a new model of collaboration, reciprocity and trust.
I was born and raised in the islands, and have the privilege of working with the Maunakea Observatories (MKO). I have been a part of the telescopes’ good-faith efforts to reset relationships with members of the Hawai‘i Island and statewide community. It is clear that, over the past five decades of astronomy on Maunakea, the experience our community members have had with representatives of the astronomy field has been uneven and inconsistent. For some, the observatories are valuable resources, close collaborators, celebrated partners. For others, the observatories are mysterious ivory towers, perceived as inaccessible and unwelcome in our home. The fix for this unhealthy dynamic didn’t start today, nor will it be complete tomorrow; it will take a while, and only happen through genuine effort sustained over time, directed in the shared best interest of our community.

The past several years have been a sharp wake-up call. These events have underscored the need to put much more focus toward caring for the relationships that make healing, collaboration, and new beginnings possible.

As others will likely point out, the draft Master Plan, E Ō I Nā Leo, lacks specificity in describing how community voices - specifically Hawaiian community voices - will inform Maunakea management decisions in the future. This reset of relationships and power dynamics is essential to the success of any future management plan. Ensuring that the community derives meaningful benefit from the presence of astronomy on Hawai‘i Island is critically important as well, and I encourage the Regents to probe further into the University’s position on how that benefit can be shaped in collaboration with our community, and delivered in a meaningful way. The MKOs are eager to support and willing to lead in that effort, and will work collaboratively with the University to advance these goals.

Mahalo for your consideration of my testimony, and for your attention on this important set of issues.

With aloha,
Christine Matsuda

Dear Board of Regents,

On behalf of the Directors of the Maunakea Observatories (MKO), I am respectfully submitting testimony on Agenda Item IV. B. Partial Report of the Maunakea Plan Review Permitted Interaction Group Recommending Consideration of Approval of the Proposed Master Plan for the University of Hawai‘i Maunakea Lands -- E Ō I NĀ Leo (Listen to the Voices) that will be discussed at the Special Board of Regents Meeting on December 16, 2021.

The testimony is attached to this email as a PDF file.

Mahalo,

Rich Matsuda

W. M. Keck Observatory

MKO Testimony_UH Master Plan.pdf
119K
To: University of Hawai‘i Board of Regents  
From: Maunakea Observatories  
Subject: Proposed Master Plan for the University of Hawai‘i Maunakea Lands, E Ō I Nā Leo  
Date: 15 December 2021

The Maunakea Observatories (MKO) appreciate the University’s efforts to guide land use decisions for the next two decades through the proposed Master Plan, E Ō I Nā Leo. MKO extends our support and desire to collaborate with all stakeholders on Maunakea as the important and weighty future responsibility of governing the Maunakea Science Reserve lands is determined.

The MKOs agree with a long range commitment to astronomy in the draft Master Plan. We believe science is important, and astronomy is beneficial to our local community, the state of Hawai‘i, and the world.

For the past five decades, telescopes on Maunakea have provided important new knowledge about the universe, including two Nobel Prizes in Physics, the very first image of a black hole - Pōwehi, detection of ʻOumuamua - the first known interstellar object passing through our solar system, the first image of a solar system beyond our own - HR8799, and much more. The publicly shared scientific knowledge produced on Maunakea deepens our understanding of the laws of nature and even addresses fundamental questions about human existence.

There are many positive benefits that result from our scientific endeavors. We share astronomy with students through our many STEM outreach activities, such as the Maunakea Scholars Program that provides opportunities for Hawai‘i public high school students to engage in research using highly-coveted time on Maunakea telescopes. We provide high-quality internships to college and community college students from Hawai‘i through programs like the Akamai Workforce Initiative. And, we offer a wide range of engineering, technical, scientific and administrative employment opportunities for Hawai‘i residents in our workforce of approximately 500 jobs at the MKOs. In addition, the MKOs rely on scores of local businesses to conduct our operations. The total economic impact is significant, contributing approximately $200M per year to Hawai‘i’s economy.

While we believe in the benefits of astronomy, we acknowledge that for many in the Native Hawaiian and local community Maunakea is a wahi pana of immense environmental and
cultural significance that takes priority over other activities. Knowing this, we strive to conduct astronomy in a balanced and respectful way with care for the environment and respect and support for Native Hawaiian cultural practices. Our thoughts are in alignment with the recently released Decadal Survey on Astronomy and Astrophysics 2020 (Astro2020) from the National Academies of Sciences, Engineering, and Medicine, which includes a major recommendation for “the development of a new model for respectful, collaborative decision-making in partnership with Indigenous and other local communities.” As such, the MKOs recommend the plan be more specific about its impacts on the indigenous Native Hawaiian and local communities, and that the plan outline processes for meaningful partnership and collaborative decision-making with these communities, which we look forward to participating in.

Thank you for the opportunity to provide testimony.

Aloha,

Director Hilton Lewis, W. M. Keck Observatory (Keck I and Keck II)

Interim Director Andy Sheinis, Canada-France-Hawaii Telescope

Director Paul Ho, James Clerk Maxwell Telescope (East Asian Observatory)

Director John Rayner, NASA Infared Telescope Facility

Director Michitoshi Yoshida, Subaru Telescope
The TMT is part of the grand vision of our beloved Governor of Hawaii, John Burns. Mauna Kea's potential was part of how he saw Hawaii and its role in the future. According to grandson Brendan, Governor John Burns, "dreamed of the creation of world class telescopes". Because of his efforts to make this happen, the road leading up to the telescopes on Mauna Kea is called "John A. Burns Way." This was in 1970.

Experts will extoll the location, the pristine conditions, I point out the continuity of history. The building of the TMT will be the pinnacle of the vision he had for our state and the continuation of Queen Lili'uokalani's passion for science. She said, "The ancient Hawaiians were astronomers."
Whatever valid issues exist between the supporters and protesters of the TMT, I hope that they can be worked out in a fair and honest way, perhaps in the Hawaiian Ho'oponopono way.

I think about the ancient ones
— na po'e kahiko—
robust, curious, hungry to find.
How they would have relished
exploring nōho'i
—the Milky Way—
to watch creation unfold
by slicing through time
diving into the waves of the Big Bang.

Jean Toyama

Your Testimony/Comments
While I respect the Native Hawaiians, I believe in science. TMT goes beyond Hawaii and involves the whole world. TMT will benefit all of mankind. We all need to look at the whole picture and see that TMT is for everyone.

**Your Testimony/Comments**

I support TMT.  
I support UH’s draft Master Plan.  
I support keeping astronomy on Mauna Kea--- not just alive but thriving.  
I support the renewal of the UH’s Master Lease with the DLNR to manage Mauna Kea and all the telescopes.  
I am the mother of two boys and grandmother to two more of part Hawaiian ancestry.  
Hawai‘i’s keiki need UH and this state’s unequivocal commitment to encourage astronomy and build TMT.  
Why?
TMT is arguably the greatest project to ever be developed in Hawaii. I am confident UH will continue to do an incredible job of managing Mauna Kea, noting that Mauna Kea is actually among the few best managed state-owned parcels of land in Hawaii. The University has been especially sensitive with respect to obtaining a permit for the construction of TMT, which would join all the observatories administered by UH as the most scientifically-productive collection of telescopes in the world. Surely UH regents must be aware that US intelligence agencies have been directed to give unclassified reports about Unidentified Aerial Phenomenon (UAP), reported by US Navy pilots and others, to Congress in June 2022. The government's publicly admitted interest in these phenomenon presents an unbelievable opportunity for this University to assume a prime position in efforts to learn if we are the only planet with life in this universe. The kids know about these sightings. They are engrossed in Star Wars and enthralled with anything to do with outer space. Why deny that hunger to learn to our keiki right here in our own state?

Too few science educational and enrichment opportunities are available to marginalized populations in Hawaii. The United States government aims to address this problem. STEM education in Hawaii would be significantly enhanced by recognizing the unique opportunity Mauna Kea presents. The building of TMT will tell all our children that they can learn about the stars and the planets right here in Hawaii—they need not leave home. TMT will reinforce the historical fact that their ancestors traveled all over the Pacific and Indian Oceans before the Europeans even knew Hawaii or the Pacific Ocean existed!

Supporters of TMT, and that is actually the majority of the population in Hawaii, know their children want to be able to proudly proclaim: "I am of ___ ancestry and I discovered this, I invented that, I identified!!! an "aerial phenomenon", I made a difference—not just for my people, my culture, my family, my country, but for the whole world—the universe! Yes, me! I did it and you can too!"

Approve the Master Plan and ensure renewal of the Master Lease with the University of Hawaii. IMUA!

Adrienne King

Inclusion across the Nation of Communities of Learners of Underrepresented Discoverers in Engineering and Science (NSF INCLUDES) Design and Development Launch Pilots

Inclusion across the Nation of Communities of Learners of Underrepresented Discoverers in Engineering and Science (NSF INCLUDES) is a comprehensive national initiative designed to enhance U.S. leadership in science, technology, engineering and mathematics (STEM) discoveries and innovations focused on NSF's commitment to diversity, inclusion, and broadening participation in these fields. NSF INCLUDES supports efforts to create networked relationships among organizations whose goals include developing talent from all sectors of society to build the STEM workforce. This initiative seeks to improve collaborative efforts aimed at enhancing the preparation, increasing the participation, and ensuring the contributions of individuals from groups that have traditionally been underrepresented and underserved in the STEM enterprise: women, persons with disabilities, African Americans/Blacks, Hispanic Americans, American Indians, Alaska Natives, Native Hawaiians, Native Pacific Islanders, and persons from economically disadvantaged backgrounds. Significant advancement in the inclusion of these groups will result in a new generation of STEM talent and leadership to secure our nation's future and long-term economic competitiveness. https://www.nsf.gov/pubs/2017/nsf17522/nsf17522.htm

Building TMT is a matter of time. The protesters' game is to delay as long as possible in the hope that we give up. Part of this strategy involves changing the management system of Mauna Kea, especially removing the University of Hawaii as the manager of Mauna Kea because that would create chaos for the astronomy community. The reason for this is that UH holds a Master Lease from the Department of Land and Natural Resources to manage Mauna Kea and all the telescopes have sub-Leases with UH based on that Master Lease. If UH's Master Lease is not renewed, it will create legal ambiguity as to whether the subleases are still good and possibly push the telescopes off Mauna Kea. Therefore, the protesters believe that stopping UH's Master Lease stops TMT. That is not strictly true, but it will create enough risk that we encourage TMT supporters to support renewal of UH's Master Lease.

UH is currently applying for that lease renewal. Part of that process is the creation of a number of plans, including a Master Plan. The UH Board of Regents is holding a hearing to discuss the Master Plan. The protesters are using this opportunity to attack the plan as a way of attacking TMT and destroying the astronomy industry.

The reality is that UH actually does a really good job managing Mauna Kea. Mauna Kea is some of the best managed land in the state.

Gerald Takase
I support UH's draft Master Plan because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT).

UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built.

Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home.

The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up.

I mua Kīlo Hōkū and I mua TMT!

I OPPOSE TMT! this email I received asking to support is malicious and disgusting.

Go build a telescope on YOUR HOUSE then

Shanna
Aloha Regents,

I’m an active member of our Kona community and have served as Association of Hawaiian Civic Clubs Hawaii Council President. I have also served on the Hawaii Island Burial Council.

I support the University’s management on Maunakea.

The mauna holds very special meaning to all of us of Hawaiian ancestry. It’s where we can all look forward as a people knowing our ancestors traveled the vast oceans using the very sky we see from its summit today. It’s the best place in the world to study the universe. The mountain is a portal to the universe – a place to study the stars that lead our ancestors to these islands.

What an honor for future generations of native Hawaiian people to know that their mountain stands in the world’s light. Maunakea represents our future, we respect the value and significance and cultural values keep us moving forward and progressing. Our culture is living and vibrant.

I believe the University of Hawaii is successfully managing the mountain, they are successfully implementing the Comprehensive Management Plan, which we all as a community supported, and they are protecting the cultural, scientific, educational and natural resources within their kuleana of land. The draft Master Plan before you continues the stewardship efforts to malama Maunakea.

When an agency of any kind has to manage public lands, finding a balance to multiple public interests is necessary. That challenge and responsibility is not unique to UH or to Maunakea. The draft Master Plan before you strikes that balance.

This is good stewardship. Please approve the Proposed Master Plan for the UH Lands on Maunakea.

Mahalo for your time,
Gene ‘Bucky” Leslie

Even though I live in Michigan and have never been to Hawaii, I have friends who live there and several relatives and friends who have travelled there! The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and your state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up! The tourism industry in Hawaii has suffered greatly because of the pandemic, so please be good to the astronomy folks! We all need the science of astronomy, so this is good for ALL of the USA!

The international community has weathered the years-long legal storm and protests, and continues to support the TMT in spirit and in substance. The majority of people in Hawaii support the TMT and associated Mauna Kea area management. Even the majority of people with Native Hawaiian ancestry support the TMT. The UH has addressed the issues well, and should remain the master lease holder for telescope management. It is time we move ahead instead of taking a step into stagnation.

I am writing to state my support for your Master Plan.

Sent from my iPad
I write in my individual capacity to support UH's draft Master Plan because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). From what I have heard, UH has done a good job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT.

TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. In my observations, the science community is very respectful and treats the land well. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work.

Astronomy on Mauna Kea is properly viewed as an extension of the Pacific Islands cultures that brought people to these islands. Astronomy has earned high respect. I believe Papa Mau would have supported continued astronomy on Mauna Kea.

Astronomy on Mauna Kea provides opportunities for our youth to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. As an educator, I hope my students will have opportunities associated with astronomy and the TMT.

On a personal note, as an undergraduate I, among others, had the opportunity to work for “big science” in a physics lab exploring the nature of fundamental particles. It greatly improved my academic experience and lead to my life-long involvement in computer science-related work. TMT will make possible many such opportunities of for the younger generations in Hawaii.

The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please extend the Master Plan and keep astronomy on Mauna Kea.

Respectfully, E Malama Pono,
Daniel C. (Dan) Smith, PhD
1-808-462-8346, Mobile
I support UH's draft Master Plan because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I urge UH to do everything in its power to ensure TMT is built.

If the TMT is not built on Maunakea, the long term future of astronomy in Hawaii is bleak, as no project involving the construction of a major observatory on Maunakea (the best site in the world for ground-based astronomy) will want to go through the struggle, with likely a negative result, that the TMT project has been going through for so long. Maunakea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Maunakea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. It brings a valuable dimension to our lives and culture that few communities have. The presence of astronomy on Maunakea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and recognition of the world-class nature of the work it brings to our state. Please keep it up. I mua Kilo Hōkū and i mua TMT!

Sincerely,

Tom Geballe

Aloha

I would like to express support for the Maunakea Master Plan as well as the entire Astronomy community as we work through this difficult stage of our transformation. Although Maunakea has been mismanaged in the past, it has worked hard to improve on all fronts including cultural, environmental and scientific. I grew up with telescopes on Maunakea and I see them as a valuable part of our future. Thank you for hard work and perseverance.

Mahalo

Your Testimony/Comments
I whole-heartedly support the UH draft Master Plan because it keeps astronomy on Maunakea alive (including the Thirty Meter Telescope). UH has done a very good job of managing the mauna over the past 20 years, as someone who has worked there I know this isn't always an easy undertaking. It's easy to criticize when things do go wrong, but overall I am very confident in UH's ability to manage Maunakea - it is now some of the best managed state-owned land in Hawaii!
Astronomy on Maunakea provides a huge amount of scientific knowledge to all of humanity. I am happy the observatories exist and proud of the work they do. Astronomy provides clean, skilled jobs for our residents. It also provides opportunities for our keiki to in terms of education and training. The presence of astronomy
on Maunakea is vital for the Big Island community and our state as a whole, for the economic diversification and the world-class nature of the work that goes on there. Please keep it up, and please do everything within your power to ensure TMT gets built here.

Mahalo for your time,

Michael
I support the UH Master Plan
1 message

Michelle Sandell <mysandell@gmail.com>
To: bor testimony@hawaii.edu

I support the UH Master Plan because I support astronomy in Hawaii, astronomy supports Hawaii, and I believe the University of Hawaii has stepped up well to handle the major responsibility of managing Mauna Kea in the past. I am confident they will continue to do so in the future. The Master Plan’s expanded efforts to incorporate other disciplines for field studies at Halepōhaku, to be committed to the teaching telescope there, and to increase the ways the larger community can connect with the decision-making process are all exciting things to look forward too.

I am proud of what Mauna Kea stands for, and I am proud that this evidence of care for the land and for each other, and the pursuit of knowledge on Mauna Kea is a manifestation of important virtues that humans prioritize. Let’s keep up the good work and move forward with UH’s draft of the Master Plan.

Sincerely,
Michelle Sandell

<td>Many wrongs to Native Hawaiians grievously need attention. There is vehement disagreement whether this can be done in concert with or in exclusion to Astronomy. Yet, driving away Astronomy (TMT, current telescopes) denies educational and life opportunities for Hawaii’s future generations— including for Native Hawaiians who bring valuable perspectives to advancing scientific excellence. If Hawaii becomes known for an anti-science attitude the negative impacts will extend beyond Astronomy to all scientific disciplines, hindering the ability of Hawaii’s children to thrive in the current century and diminishing our ability to solve critical problems. UH can and should lead the way.</td>

I support the draft Master Plan for the University of Hawaii Maunakea Lands dated December 10, 2021.

Maunakea is a special place for its beauty, cultural significance and uniqueness in the world. We share kuleana to keep it that way. The Plan shows careful consideration and balancing of both the cultural and scientific importance of Maunakea.

- Maunakea is the best location in the world for astronomical observation. UH should do everything it can to maintain that status. I support the cutting edge observatories on Maunakea, the decommissioning of observatories that are past their prime, and the building of new observatories as they meet standards in the Master Plan. Yes, I support building the TMT. I believe that the people employed by these observatories will continue to treat the mauna with the utmost respect. The world benefits from the discoveries made on our mauna. Our kamaʻaina benefit from the inspiration (and jobs) our observatories provide.

- Expanding educational opportunities is a great goal, as long as you are careful not to overwhelm facilities.

- Allowing cultural practitioners access to the summit is a given. But they, too, need to malama kaʻaina. I'm disgusted at the continued ugliness of the protestors’ camp leavings and hope we never see such a mess up at the summit.

- Tourism (off-islanders and kamaʻaina) has to be managed and limited to prevent damage to the mauna and to facilities. I think the Plan outlines a decent approach, but I expect it will require adjustments as you learn what works best.

The University of Hawaii has learned a lot (and will keep learning) and has shown that it should continue managing the Maunakea Lands for the benefit of all.

Georjean Adams
South Kohala, Hawaii
I Support TMT

Terryl Leong <terrylberryl@gmail.com>  
To: bor.testimony@hawaii.edu

Because Ancient Hawaiians developed healing methods like massage and plant-based medicines, I really feel they would have supported the education that the TMT project will give the world!

As long as all precious living things that the building of TMT structures would destroy are protected and found homes for, I support this project. All other space exploration structures not being used should be removed with the same consideration.

Sent from my iPhone
To the University of Hawai‘i Board of Regents:

I strongly support UH’s draft Master Plan. It keeps the vital work in the field of astronomy alive on Mauna Kea, including the Thirty Meter Telescope (TMT). In my opinion, the TMT is the most significant, leading-edge project to ever be developed in Hawaii, and UH should be doing everything in its power to ensure the TMT is built. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and some of the most important discoveries in astrophysics, like “dark energy” and locating a “black hole”, have been made at the Keck. Astronomy, using the stars to navigate, is central to the Hawaiian culture, and how anyone, especially any dedicated educator could be against building the world’s greatest telescope here, in reality, runs counter to the Hawaiian culture. Astronomy on Mauna Kea also provides opportunities for our students on all grade levels to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there.

Please make sure it is supported!

Mahalo and I mua TMT!

Re Mauna Kea Master Plan

Sam King <kingsam2@gmail.com>
To: BOR Testimony <bor.testimony@hawaii.edu>

Aloha e Regents,

I am writing in favor of the UH Mauna Kea Master Plan up for discussion at your upcoming Board of Regents meeting on December 16, 2021.

I support UH's draft Master Plan because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there.

I do have a couple of suggestions for how to improve the master plan.

1. After the decommissioning of the 5 telescopes promised with TMT, there should be no future restrictions on the development of Mauna Kea for astronomy purposes imposed by UH on future generations. The individual permitting process for each telescope can decide that. UH should not feel pressured by protesters to place artificial caps on the number of telescopes to be built on Mauna Kea.

2. UH should strive to explain that "culture" is a concept that embraces both scientific endeavor and religious experiences. Unfortunately, much of the discussion of Native Hawaiian issues in the plan provided an overemphasis on Kapuist religious beliefs and creation chants. The reality is more complicated. For starters, the kapu religion imposed on the islands by Kamehameha I was abolished by our ali`i 200 years ago. Continuing to invoke its beliefs, such as the kumolipo, or Native Hawaiians being descended from Papa and Wakea, in the name of the Hawaiian people is odd. Second, there were atheists in Hawaii even prior to the arrival of Captain Cook, so it was never true that Native Hawaiians uniformly believed in any particular religion. The belief that Mauna Kea is sacred, or mention of "Hawaiian worldviews" are unjust impositions on the freedom of thought for Native Hawaiians. Native Hawaiians are free to believe as we choose, both religiously and politically. UH should point out that claims of Mauna Kea's sacredness are ultimately "religious" beliefs. They are, at best, equivalent to scientific beliefs. Thus, both science and religion have a right to share the mountain with each other. And the sharing of the mountain by science and religion is the culture of Hawaii.

Mahalo,

Samuel Wilder King II

I am writing this in support of the Thirty Meter Telescope.
Here is an opportunity to respectfully connect Hawaii's past to its future.
This has many layers of positive things that can benefit our community as well as students in every level of education.
Jobs being one of the driving factors and astronomy the other.
I hope this short letter helps to make this telescope a reality.

Sincerely,

Ian Jenss

I'mua re TMT

I support University of Hawaii's draft Master Plan because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). I have lived in Kamuela for 60 years and the UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture.

It is common knowledge among all of us who live in Hawaii that King Kalakaua showed immense interest in astronomy and stated in a letter to Captain R. S Floyd that he had a desire to see an observatory established in Hawaii. And Queen Liliuokalani oft noted that “The ancient Hawaiians were astronomers”. So it is fitting that the use of Mauna Kea as the world’s premier astronomical observing platform is a testament to the vision of our Hawaiian heritage.

Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our state. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. I mua Kilo Hōkū and i mua TMT!

Your Testimony/Comments

I am a retired kupuna and support the TMT. The mountain is the best seeing in this hemisphere. I think that great knowledge can be learn from heavenly observations at that site.

I see no reason why the mountain can not be used in many different ways as long as the beauty of the place is respected and preserved. The people of Hawaii should be able to visit and learn from the area.

I support the UH Master Plan for Astronomy and the placement of the TMT on Mauna Kea, not only for the numerous opportunities and benefits they would provide Hawaii and its people but for the resultant worldwide recognition and honor of our original Hawaiian navigators and our beloved mauna!

Theone Vredenburg
(Born and raised on its slope.)
15 UH RESPONSE TO MAUNA KEA WORKING GROUP’S HE LĀ HOU KĒAI MA MAUNA A WĒKEA: A NEW DAY ON MAUNA A WĀKEA
University of Hawai‘i Response to the Maunakea Working Group’s Draft Report:
He Lā Hou Kēia Ma Mauna A Wākea: A New Day On Mauna A Wākea

Mahalo for the opportunity to provide comments on the Mauna Kea Working Group’s ("MKWG") Draft Report to the Hawai‘i State Legislature entitled, He Lā Hou Kēia Ma Mauna A Wākea: A New Day On Mauna A Wākea ("Report"). It is clear from the Report that the MKWG worked diligently in fulfilling their charge.

We have organized our response around five themes that arise from the content of the Report: 1) The University of Hawai‘i (UH) embraces the value of the Kānāwai principles; 2) The MKWG’s recommendations risk the future of astronomy in Hawai‘i and beyond; 3) The complexities and costs of managing access to public lands have been underestimated; 4) Legal and administrative concerns; and 5) UH’s responsible stewardship of Maunakea.

Our cover letter summarizes our views on these themes with further elaboration provided in the Attachment. Our intent is to provide an overview of the real challenges and implications of the Report and provide background that should be considered prior to contemplating and drafting legislation seeking to build upon the recommendations in the Report. Further discussion is welcomed.

1. The Kānāwai principles are consistent with UH plans for Maunakea

We acknowledge and appreciate the holistic and integrated approach of the Kānāwai principles described in the Report. The symbiotic connections between the elements of nature, and of nature with humans, emphasizes the importance of sustaining balance between these forms. These principles are valuable guidelines for land use planning and decision making. We understand that stewardship of Maunakea is a privilege that requires a comprehensive and cohesive management program. The University embraces these perspectives, which are reflected in the integrated and balanced nature of our own Master Plan including our proposed update, our Comprehensive Management Plans, and our Administrative Rules that collectively and specifically outline our commitments and responsibilities to Maunakea, the state, and the communities we serve.

As you know, managing public lands, especially 'āina with as many complexities and conflicting expectations is extraordinarily complex. We are committed to continuous improvement and look forward to improving the application and integration of these principles into the University’s existing and next plans within the context of governing laws and regulations.

2. The MKWG Report places the future of astronomy at risk

Foundational to the Report’s recommendations is the position of the MKWG that astronomy on Maunakea above the 9,200 foot elevation should be phased out as an allowed land use (Page 25).

Support for astronomy on Maunakea is a longstanding State policy going back more than fifty years. At that time, the State decided that it did not want to just be a passive landlord for the best observatories in the world but that Hawai‘i should be the home of a world-class program of astronomy research and education. This has enabled Hawai‘i to participate in and lead the discoveries that underlie human understanding of the origins of the universe and the celestial bodies around us. It is not an overstatement to say that what is at risk here is the future of...
astronomy as a field of human inquiry, as a source of economic activity on Hawaiʻi Island, as an inspiration for Hawaiʻi’s youth, as a source of pride for the people of Hawaiʻi, and as an area of international excellence for UH and our students. Consistent with its place in Hawaiian cultural tradition and cosmology, Maunakea stands as a uniquely treasured scientific and community resource.

Maunakea is truly deserving of the highest levels of stewardship. Decisions on access to Maunakea for culture, science, education, recreation, and commercial activities require broader policy discussions involving stakeholders across multiple communities and policy-makers on Hawaiʻi Island and the State. The recommendation to eliminate astronomy is not substantiated by wider stakeholder input in the Report.

The risk to astronomy’s future is further amplified by the lack of specifics in the implementation plan for establishing the new Governing Entity proposed by the MKWG. Numerous steps would need to be achieved to establish the new Governing Entity including, but not limited to, enabling legislation, land transfers, development of land use and management plans, permitting requirements, development and coordination of administrative rules across jurisdictions, standard operations start-up, and the potential for appeals at multiple steps along the way. At the Board of Regents direction, the UH administration conducted its own analysis of alternate governance models for Maunakea in 2020. The MKWG’s projected timeline of three years to establish the new Governing Entity is unrealistic and exacerbates the risk to the future of astronomy due to the impending termination of the current general lease in 2033. These are no small steps and the lack of a viable business plan on top of these challenges makes success highly speculative, especially with the Report’s reliance on general fund appropriation.

3. The complexities and costs of managing access to public lands have been underestimated

Under the proposed powers and duties in the Report, public access appears to be more restrictive and does not reflect the wide variety of values the broader community holds towards Maunakea, including recreational, subsistence, educational, and economic (including commercial tour operator) uses. Does the MKWG propose to prohibit snow play? Hunting? Hiking? Who would determine the legitimacy of claims made by individual native Hawaiian cultural practitioners?

Access to Maunakea by Hawaiʻi Island residents, including native Hawaiian practitioners, is one of the most contentious and consistently raised concerns in matters related to Maunakea. The Report underestimates the complexity of addressing public interests and coordinating across the various jurisdictions on Maunakea. The proposal to include adjacent State and private lands into the jurisdiction of the new Governing Entity exacerbates the operational complexities of the enterprise and significantly increases its resource requirements. It is also unclear on how new rules and procedures the new Governing Entity adopts would integrate with existing rules governing activities on DLNR, DHHL, County, and private landowner property that is included in the new land area defined in the Report. Importantly, who does the MKWG propose to allow to have access, who will it prohibit, and who will make decisions about how individuals are placed into categories that are allowed or disallowed access?

Finally, the Report does not meaningfully address the resource requirements of the new Governing Entity. Annual operating costs for stewardship alone are $12M, the majority of which is covered by extramural and non-general funds generated by the University. In addition, the University provides world-class global network connectivity for all Maunakea Observatories so
that the data collected on the mountain can be shared with researchers and students at institutions around the world. Under the new management regime being recommended, absent other sources of revenue because of the uncertainty created about future access and use, a substantial investment by the State will be required to support a new stewardship program that would have jurisdiction for significantly more land than the current program.

4. Legal, administrative, and funding issues present risks for implementation of the MKWG’s proposal

There are a number of legal, administrative, and funding concerns raised by the MKWG’s proposal that will require further analysis and discussion. These include but are not limited to:

A. The potential constitutional concerns related to race-based membership of a government entity with control over state lands and resources.
B. The Report does not account for the complexity of the various jurisdictions on Maunakea, and the variety of funding sources that will need to be shored up, or replaced with general funds.
C. As discussed before, stakeholder representation on the board of the new Governing Entity will in and of itself create governance and funding problems.
D. The complexities and risks of successfully working through the aforementioned tasks of realigning, much less simply coordinating, management of public lands that are currently under leases and/or the jurisdiction of different agencies with different administrative rules.

All of these are complex issues and any one of these is a potential show stopper given the contentious nature and resources required of them. Attaching the success of a newly established entity to highly speculative outcomes requires considerably more cost-benefit analyses than is provided in the Report.

5. The University’s commitment and ability to successfully steward Maunakea has been demonstrated

The University has acknowledged and apologized for its stewardship of Maunakea in the last century. Subsequent state audits of the University’s management of Maunakea have documented our commitment and improvement over time. In its Report on the Implementation of State Auditor’s Recommendations 2014 – 2017, the State Auditor noted that of the several audit recommendations from 1998, only four (4) were outstanding as of its November 2019 report. One item, directly under the control of the University, was completed with the University Board of Regents’ (“BOR”) adoption of Hawai‘i Administrative Rules (“HAR”) chapter 20-26 on November 6, 2019 (approved by the governor on January 13, 2020). The University is actively working on the remaining three (3) items in coordination with DLNR, which has final approval on these particular tasks. These remaining items are dependent on whether a new general lease is to be granted to UH and, more significantly, whether there is a future for astronomy on Maunakea, both of which are decisions outside UH’s sole authority.

The University is charged with implementing 103 management actions in the Mauna Kea Comprehensive Management Plan, adopted by BLNR in 2009 (“CMP”). The University’s implementation of the CMP was the subject of an independent review conducted by Kuiwalu in December 2020 at the direction of DLNR (“Independent Evaluation”). DLNR’s Independent Evaluation of the University’s implementation of the comprehensive management plan showed that UH had achieved good or some progress on 8 of the 10 desired outcomes identified in the
CMP. The two outcomes where we received a minimal progress rating are actively being worked on. This evaluation also found that people’s perceptions of UH’s effectiveness as manager were associated to whether people supported telescope development on Maunakea, i.e., no change in management practice will satisfy many of those who oppose TMT or even astronomy on Maunakea. This is not a management issue; this is a challenging and contentious statewide policy issue that is, again, not a decision that UH alone makes.

Our efforts to improve stewardship have been recognized by the community. In 2017 UH received the Pualu Award from the Kona-Kohala Chamber of Commerce for our education and outreach. In 2017 UH received a Preservation Commendation Award from the Historic Hawai’i Foundation for our interpretative efforts. And in 2016 we received the Pualu Award for Environmental Awareness from the Kona-Kohala Chamber of Commerce. Finally, and perhaps most notable, in 2011 the Wekiu Bug was removed from endangered species candidate list because of our ecosystem restoration efforts.

The University should be judged by our complete record which shows substantial improvement over time across multiple dimensions. Our commitment has been reliably demonstrated in time, effort, and resources committed by us over the years in the exercise of our stewardship responsibilities for the privilege of access we have. The University believes that the criticism of “mismanagement” often levied against UH, and seemingly the basis for the Report, is now inaccurate and derives from the accusations of those who oppose the state policies in support of astronomy on Maunakea rather than the actual practices of the University.

For these, and the reasons further detailed in the Attachment, we humbly suggest that instead of creating a new entity, the focus turns to what the Hawai‘i Island community, native Hawaiian practitioners, Maunakea observatories, and DLNR have learned over time to continuously improve the University’s stewardship of what has become one of the most, if not the most complex land management challenge in Hawai‘i.

We are available for any questions you or others may have regarding our comments and our stewardship program.

Na māua iho nō me ka ‘oia‘i’o,

David Lassner  Gregory Chun
President, UH System  Executive Director, Center for Maunakea Stewardship
1. The Kānāwai Principles are Consistent with UH Plans for Maunakea

UH acknowledges and appreciates the holistic and integrated approach of the Kānāwai principles described in detail in the Foreword, Introduction, and Chapters 2 and 3 of the Report. The symbiotic connections between the elements of nature, and of nature with humans, emphasizes the importance of sustaining balance between these forms. As stated in the report:

“Normalizing the use of these traditional kānāwai in our modern society protects the life of kanaka, flora and fauna, as well as the health of the environment and the balance of its natural cycles. Developing this worldview can start with an inquiry into native ecology, observing nature, developing a relationship and appreciation of natural phenomena, and exhibiting a sense of responsibility in protecting that which nurtures and feeds us, the ‘āina.” (Page 5).

The connected nature of our surroundings and, therefore, the importance of sustaining balance between the various branches of the natural world are well established in many indigenous cultures. It is a lesson lost upon a large fraction of the world’s population and as an institution grounded in science, UH finds the concepts laid out in the four kānāwai to be sound and relatable. They are the product of centuries of observation and learning in an island setting, developing practices that fundamentally sustain populations of living organisms, including humans, over long periods of time. Embracing them in the future makes sense, given the demonstrated success of their application in the past.

Chapter 3 of the Report is an attempt to bridge the elegant concepts laid out in the previous chapters into a management structure predicated on the kānāwai. Guiding principles are articulated, including:

“We are driven by creativity and innovation, constantly challenging the status quo. Our stewardship of Maunakea is informed based on existing knowledge and traditions (kānāwai) as well as on new and expanding knowledge. We are mindful and observant of needs, trends, and opportunities and seek new knowledge and opportunities in ways that enhance our ability to serve as stewards without jeopardizing our foundation of ‘āina aloha.” (Page 20).

This is an important statement because it explicitly acknowledges the importance of continuity in knowledge systems to support ‘āina aloha, past, present, and future through “…new knowledge and opportunities...”. It is a hopeful and upbeat statement, but the report fails to identify how the approach proposed would actually lead to “new knowledge and opportunities” for our community. It sets up a dichotomy of interests and begs the question, what is the ultimate goal of the proposed management model?

The management of public lands is complicated, as you know, and as any agency will tell you. But, unlike any other land management framework in the state, the University has several layers built into its management framework that includes the Hawai‘i Island community, academics, observatory operators, and the native Hawaiian community who are represented at various levels of decision making. This framework for managing lands on Maunakea was developed
over decades. The University has built constituencies, infrastructure, and funding to support its efforts. The University’s new draft Master Plan and our updates to the Comprehensive Management Plan consider and incorporate what has been learned. Through its experience, the University has successfully moved toward a more balanced goal of astronomy, stewardship, and respect for Maunakea.

The University understands that stewardship of Maunakea is a privilege that requires a comprehensive and cohesive management program. The University embraces the intent of the kānāwai, which is reflected in the integrated and balanced nature of our master plan and our proposed update, management plans, and administrative rules that collectively outline our commitments and responsibilities to Maunakea, the state, and the community in specific terms. These principles are valuable guidelines for land use planning and decision making and we are committed to continuous improvement and look forward to learning how to improve the application and integration of these principles into the University’s existing plans and policies and within the context of governing law and regulation. Maunakea lands currently managed by the University are ceded lands with great cultural significance to native Hawaiians. Ceded lands are held in trust for the five (5) purposes enumerated under section 5(f) of the Admission Act of 1959 and the kānāwai principles can help further balance those objectives.¹

2. The MKWG Report places the future of astronomy at risk

Foundational to the Report’s recommendations is the position of the MKWG that astronomy on Maunakea above the 9,200 foot elevation will no longer be an allowed land use:

“The Governing Entity shall develop a framework to limit astronomy development on the mauna, through development limitations that may include limitations on the number of astronomy facilities or an astronomy facility footprint limitation; provided that in establishing a framework to control astronomy development on the mauna, the Governing Entity shall establish a plan to return the mauna above 9,200 feet elevation to its natural state” (Page 25).

The Report also states that the MKWG had robust discussions over whether future legislation should limit the current astronomy footprint:

“The full Working Group had a robust conversation as to whether the Governing Entity should be prohibited from allowing either an increase to the current number of astronomy facilities or an increase to the current astronomy development footprint. Ultimately, the Working Group was not able to reach an agreement, with some members preferring not to set a specific astronomy footprint or astronomy facility number limit in legislation and others wanting a smaller footprint or less telescopes than what currently exists. Some members wanted a lower number of telescopes, such as the Governor’s and the University of Hawai’i’s proposed nine telescopes. Nine telescopes, while a lower number than the thirteen telescopes that currently exist on the mauna, still represents an increase in the current astronomy footprint, which was unacceptable to some members” (Page 25 Footnote 5).

¹ Section 5(f) of the Admission Act, provides that ceded lands trust purposes are “[1] the support of the public schools and [2] other public educational institutions, [3] the betterment of the conditions of native Hawaiians, as defined in the Hawaiian Homes Commission Act, 1920, as amended, [4] the development of farm and home ownership on as widespread a basis as possible for the making of public improvements, and [5] the provision of lands for public use.”
The Report is also not clear on the question of funding and the details of implementation are lacking:

“To support the Governing Entity, a special fund shall be created as an on-going revenue base of funding. The Governing Entity shall consider various supplemental revenue sources to be deposited into the special fund, including but not limited to renegotiated lease terms and fees; observatory use fees; common area maintenance; toll fees; general funds; ecosystem service fees; user fees; other surcharges or fee structures; and state, county and federal funding” (Page 27).

“To assure that the Governing Entity has adequate time to establish itself, the Governing Entity shall have a transition period of three years to assume management of Mauna a Wākea lands”; and,

“To help establish the Governing Entity, general funds should be allocated by the Legislature for at least the first five years. Special funds shall also be used to provide financial support for the Governing Entity.” (Pages 24 and 27)

Further, the Report states decision making regarding the new managed lands will be under the “sole authority” of the proposed new Governing Entity:

“The Governing Entity shall be the sole authority for the management of designated state-owned lands on Mauna a Wākea (See JURISDICTION)” (Page 24).

Collectively, the result of these proposed changes, i.e., uncertainty regarding: the future for astronomy, implementation requirements, and decision-making authority, is to increase substantially the risk to the ongoing viability of astronomy. Importantly, the process for implementing the recommendations must occur at an unprecedented pace to enable a future for Maunakea (Hawai‘i) astronomy. Numerous steps would need to be achieved including but not limited to enabling legislation, land transfers, development of land use and management plans, development and coordination of administrative rules across jurisdictions, and operations start-up. The projected timeline of three years to establish the new entity is unrealistic and exacerbates the risk to the future of astronomy due to the impending termination of the current general lease in 2033 (see section 5 herein for UH’s governance analysis). The lack of a viable business plan on top of these make success highly speculative, especially with the Report’s reliance on general fund appropriation.

It must also be noted that these changes require not just State of Hawai‘i approval but they must be embraced by US and international federal funding agencies that are wary of large-scale change without assurances of long-term stability. The prospect of protracted litigation, on top of all the other challenges to forging, funding, and implementing a new Governing Entity in the three years prescribed, will surely push the timescale for this proposal well beyond the horizon of viability for the existing Maunakea Observatories.

Support for astronomy on Maunakea is a longstanding State policy going back more than fifty years. At that time, the State decided that it did not want to just be a passive landlord for the best observatories in the world but that Hawai‘i should be the home of a world-class program of astronomy research and education. This has enabled Hawai‘i to participate in and lead the discoveries that underlie human understanding of the origins of the universe and the celestial
bodies around us. It is not an overstatement to say that what is at risk here is the future of astronomy as a field of human inquiry, as a source of economic activity on Hawai‘i Island, as an inspiration for Hawai‘i’s youth, as a source of pride for the people of Hawai‘i, and as an area of international excellence for UH and our students. Consistent with its place in Hawaiian cultural tradition and cosmology, Maunakea stands as a uniquely treasured scientific and community resource.

3. The complexities and costs of managing access to public lands have been underestimated

Under the proposed powers and duties in the Report, public access appears to be more restrictive and does not reflect the wide variety of values the broader community holds towards Maunakea, including recreational, subsistence, educational, and economic (including commercial tour operator) uses. Does the MKWG propose to prohibit snow play? Hunting? Hiking? Who would determine the legitimacy of claims made by individual native Hawaiian cultural practitioners?

Access to Maunakea by Hawai‘i Island residents, including native Hawaiian practitioners, is one of the most consistently raised concerns in matters related to Maunakea. The Report’s proposal appears to be more restrictive and may not reflect the wide variety of values the broader community holds towards Maunakea, including recreational, subsistence, educational, and commercial uses. For example, the Report states on pages 24 and 26:

“The Working Group recognized that the scope of managing an area of such important cultural significance and geographic size presents many challenges. Additionally, because Mauna a Wākea is the kuahiwi, or backbone, of Hawai‘i Island in a structural, physical, and spiritual sense, the Governing Entity should work toward decreasing the human footprint of all users and visitors of Mauna a Wākea.” (Emphasis added); and,

“The Governing Entity shall establish a management framework guided by the Kumu Kānāwai to manage access, stewardship, education, research, permitted uses for frequent and seasonal users, and overall operations. The Governing Entity shall also prohibit commercial use and activities (not including astronomy) above Hale Pohaku and develop rules to designate areas for permissible use, including defining “commercial use.”; and,

“The Governing Entity shall consider restrictions via applications and registration processes to ensure user compliance. Additionally, the Governing Entity shall require an application for all recreational uses, including fees, and create guidelines on limits by monitoring the impacts of recreational use over time.”

In 2020 Governor Ige approved Hawai‘i Administrative Rules (“HAR”) Chapter 20-26 which was developed by the University with significant public input received over multiple years, to be able to enforce our stewardship responsibilities. HAR Chapter 20-26 regulates commercial and public activities on Maunakea lands managed by UH. The rules allow activities subject to the impacts of those activities being addressed. Commercial activities, such as commercial tours, are regulated by permit and operators are required to pay for the impact they have on the resources and for use of public facilities. Commercial tour operators provide a needed service by reducing independent vehicles driving up Maunakea, and this activity provides economic opportunities for the local community. Under HAR 20-26 the University is authorized to levy fees and fines with the opportunity for appeal. The University regulates impacts to resources
caused by public and commercial activities, not native Hawaiian cultural practices. And despite vague criticisms to the contrary, the University has never denied access to native Hawaiian cultural practitioners.

Finally, the Report does not meaningfully address the resource requirements of the new Governing Entity. Annual operating costs for stewardship alone are $12M, the majority of which is covered by extramural and non-general funds generated by the University. In addition, the University provides world-class global network connectivity for all Maunakea Observatories so that the data collected on the mountain can be shared with researchers and students at institutions around the world. Under the new management regime being recommended, absent other sources of revenue because of the uncertainty created about future access and use, a substantial investment by the State will be required to support a new stewardship program that would have jurisdiction for significantly more land than the current program.

4. Legal, administrative, and funding issues present risks for implementation of the MKWG’s proposal

There are a number of legal, administrative, and funding concerns raised by the MKWG’s proposal that will require further analysis and debate. These include but are not limited to:

A. The potential constitutional concerns related to race-based membership of a government entity with control over state lands and resources.

While we understand the intent, the designation of members of a state entity by race raises state and federal constitutional questions. Note that the Kaho'olawe Island Reserve Commission (HRS § 6K-5) and the burial council (HRS § 6E-43.5), both referenced in the Report, do not limit seats on its boards to “native Hawaiians.” Instead, for example, burial councils are comprised as follows:

“Regional representatives shall be selected from the Hawaiian community on the basis of the representatives’ understanding of the culture, history, burial beliefs, customs, and practices of native Hawaiians in the region they each represent.”

We acknowledge that other agencies have board compositions where seats are explicitly designated for native Hawaiians. For example, the Hawaiian Homes Commission Act § 202(a) provides that “at least four of the members shall be descendants of not less than one-fourth part of the blood of the races inhabiting the Hawaiian Islands previous to 1778.” And, the Papahānaumokuākea Council Charter provides that members shall include “three Native Hawaiian representatives.” However, the purposes of those bodies are distinctly different from the new Governing Entity. DHHL was established specifically for the benefit of native Hawaiians and Papahānaumokuākea is an interagency management collaborative where individual partners do not cede their jurisdiction to the collaborative. Board composition tied to race should be further evaluated, particularly when the authority of the new Governing Entity is to manage public lands and state resources.

B. The Report does not account for the complexity of the various jurisdictions on Maunakea, and the variety of funding sources that will need to be shored up, or replaced with general funds.
i. Public lands should remain with the State for the benefit of the public.

On page 24 of the Report, the MKWG states:

“The public land trust lands held by the Governing Entity shall be held in trust as part of the public land trust; provided that the State shall transfer management and control of the lands to a sovereign Native Hawaiian entity upon its recognition by the United States and the State of Hawai‘i”

This language mirrors Hawai‘i Revised Statutes § 6K-9, related to the Kaho‘olawe Island Reserve Commission. However, Maunakea is not Kaho‘olawe. While both are culturally significant, unlike Kaho‘olawe, Maunakea is actively used by the Hawai‘i Island community, including native Hawaiians, researchers, and others from across the state. These are ceded government lands that should remain with the State of Hawai‘i for the five (5) stated purposes under section 5(f) of the Admission Act.

ii. The Report’s proposal to expand the land area under a new Governing Entity adds uncertainty and complexity to an already complex management issue.

The Report recommends a significant expansion of currently managed lands, pulling in private lands and other state lands managed under different laws as follows:

“the jurisdiction area for the Governing Entity shall be state-owned lands above the 6,500 foot elevation line, inclusive of Pu‘u Huluhulu to the summit of Mauna a Wākea, in order to care for Mauna a Wākea through an integrated, whole systems approach. Additionally, for lands outside of its jurisdiction, the Governing Entity shall enter into cooperative management agreements with the Department of Hawaiian Home Lands, County of Hawai‘i, and private landowners whose lands are within the jurisdiction area.”

Conservative estimates of this expansion could include approximately 56,000 acres of DHHL property, and more than 50,000 acres and 3,800 acres designated as DLNR Forest Reserve (“FR”) and Natural Area Reserve (“NAR”) land, respectively, in addition to other unidentified state, county, and privately owned lands that are referenced. The Report does not provide any details on how the new entity will manage state and private lands, and it is unclear what is meant by the new Governing Entity having jurisdiction over adjacent private lands as proposed in the Report. The Report discusses the idea of cooperative agreements but there could be significant property right issues raised through this expansion.

iii. Powers and duties of the new Governing Entity are unclear and already exist.

Existing plans and rules developed and implemented by the University and DLNR over decades of learned and practiced management provide the integrated planning and decision-making framework suggested in the Report.
Chapter 3 of the Report details the powers and duties of the new governing entity on pages 24-25. Among other matters, it states that:

“…the Governing Entity shall develop a single plan that dictates the management of land uses; human activities, uses, and access; stewardship; and disposition. The plan shall be developed during the transition period; finalized and approved, and operational by the end of the transition period; and updated every ten years with a focus on long-term, comprehensive, coordinated planning for all of the managed lands. Additionally, the plan shall consider the state’s energy and sustainability goals, as well as impacts to climate change, including adapting to climate change and developing mitigation measures to climate change, and shall incorporate indigenous management and cultural processes and values.”

Before updating of the master plan for lands managed by the University on Maunakea, the University explored the idea of combining its two governing documents: the master plan adopted by BOR and the CMP adopted by BLNR. Based on the University’s assessment, in consultation with DLNR, we determined that combining them may not be practicable.

Both plans are implemented together and are consistent; however, each serves a different purpose. The CMP is a plan required when applying for a conservation district use permit. It addresses ongoing resource management practices to avoid, mitigate, or minimize impacts caused by proposed uses and activities. The master plan is the University’s vision for the lands it manages on Maunakea for a period of years, and it provides a framework for proposed land uses and decision making early in the planning process before a proposal is advanced to permitting, environmental review, and funding consideration. The University’s master plan and CMP, along with the administrative rules, collectively are required to achieve the state’s long-term goals of stewardship and sustainability.

Chapter 3 of the Report also provides that the new governing entity must comply with various statutes applicable to state agencies, but suggests that Maunakea lands be placed in the FR. On page 25 of the Report, it states:

“To maximize transparency, the Governing Entity shall be subject to administrative procedure pursuant to chapter 91, Hawaii Revised Statutes; Sunshine Law, pursuant to chapter 92, Hawaii Revised Statutes; the State Procurement Code, pursuant to chapter 103D, Hawaii Revised Statutes; and chapters 183, 205, 205A, and 343, Hawaii Revised Statutes.”

The Report suggests that these lands should be subject to HRS chapter 183, Forest Reserves, Water Development, Zoning. Lands designated FR will be subject to the rules and program under DLNR’s Division of Forestry and Wildlife (“DOFAW”). FR rules are far more restrictive generally than conservation district rules (e.g., it is unlikely that astronomy facilities would be allowed in the FR).

Building capacity to operate under HRS chapter 91, the Hawai’i Administrative Procedures Act (“HAPA”), takes time, staff, and resources. HAPA covers rule making, contested cases, and declaratory orders. The Report does not provide
detail on these resource-intensive requirements. These regulatory frameworks are needed, if as the Report suggests, the new entity will have more enforcement authority than the University currently has. The Report states on pages 26-27:

“The Governing Entity shall work with the Department of Land and Natural Resources’ Division of Conservation and Resources Enforcement and Hawai‘i County Police enforcement structure to enforce rules and monitor public safety through cooperative agreement. Additionally, the Governing Entity shall create operational procedures that are guided by the Kumu Kānāwai and implemented by enforcement partners.”

The Report is unclear on how new rules and procedures it adopts would integrate with existing rules governing activities on DLNR, DHHL, private, and other government lands included in the new land area defined in the Report. It is also unclear what the statement “…guided by the Kumu Kānāwai and implemented by enforcement partners” means to people who would visit Maunakea, such as Hawai‘i Island residents, including native Hawaiians.

The University already has administrative processes and procedures in place. It already works under the sunshine law, procurement, HRS chapter 343, and other agency regulations related to land use. These processes have been scrutinized and tested by internal audits, state audits, DLNR oversight, and Hawai‘i courts. How these matters are proposed to be handled directly impacts the viability and resource needs of the new entity.

C. The adequacy of stakeholder representation on the board of the new Governing Entity.

The Report recommends the establishment of a new attached state agency governed by a board of directors: On page 22, the Report states:

“The Governing Entity shall be attached to the Office of the Chairperson of the Board of Land and Natural Resources for administrative purposes. Decision-making for the Governing Entity shall be made by a nine-member board, of which seven seats shall be appointed and two seats shall be held by ex-officio members, with the board selecting a Chair from among its non-ex-officio members; provided that the Chair shall not be the Executive Director of the Governing Entity. Additionally, of the nine members, four of the seven non-ex-officio board members shall be Native Hawaiian Hawaii Island residents, with a preference for Native Hawaiian Hawaii Island residents for all seven non-ex-officio board seats.”

While the University agrees that broad representation on the governing board of a state land management entity is needed to ensure the range of perspectives Maunakea deserves, key expertise is lacking from the proposed structure, including seats for observatory and University representatives.

The MKWG’s lack of consensus for having astronomy representation and for eliminating University representation on the governing entity board is problematic. The Report argues that this would create a potential conflict of interest. First, it is not uncommon to have tenant and stakeholder representation on governing boards of attached state agencies. For example, the Natural Energy Laboratory of Hawai‘i (“NELHA”) maintains
two seats on its board of directors for tenants who hold direct leases from the agency. Second, every board, public and private, deals with conflicts of interest through reporting and recusal procedures, so this alone is not sufficient reason to omit these important perspectives especially if they are a primary source of funding stewardship activities.

By contrast, the University’s management framework includes community advisory groups, such as Mauna Kea Management Board (“MKMB”) and Kahu Kū Mauna (“KKM”) who have early and direct input into the decision-making process. Additional committees that advise the MKMB, like the Environment Committee (“EC”), provide additional, specific expertise. All of these advisory groups include Hawaiʻi Island members who are directly impacted by decisions on Maunakea.

D. Working through the aforementioned complexities of realigning, much less simply coordinating, management of public lands that are currently under the jurisdiction of different agencies, subject to different administrative rules, appear to have been underestimated, like the time for of start-up and amounts of funding.

The details of the University’s concerns here were outlined in section B(iii) above. The processes for working through the challenges of multiple jurisdictions are already in place so further analysis should be performed to discern the cost of duplication or replication of these processes, as compared with any purported benefit.

Each of these issues is itself complex, and any one of them is a potential show stopper given the contentious nature and resources required of them. Attaching the success of a newly established entity to highly speculative outcomes requires considerable more analysis before even attempting to draft legislation.

5. The University’s commitment and ability to successfully to steward Maunakea has been demonstrated

While not explicitly stated in the Report, the rationale for the formation of the MKWG, and the need to establish a new governing entity, appears to be based on the assumption that a new entity could manage Maunakea better than the University. This assumption seems to be based on a snapshot of reports that evaluated the University’s management over the years as well a lack of recognition of the University’s own efforts and response to the University’s critics.

A. State audits of the University’s management of Maunakea show improvement over time

The Report on page 3 cites a series of State Audits that began in 1998 and concludes with the statement that “Subsequent reports, which still identified shortcomings, were filed by the State Legislative Auditor’s office in 2005, 2014, 2017, and 2019.” The University has acknowledged and apologized for its stewardship of Maunakea in the last century, but subsequent state audits of the University’s management of Maunakea have documented our commitment and improvement over time.

In its Report on the Implementation of State Auditor’s Recommendations 2014 – 2017, the State Auditor noted that of the several audit recommendations from 1998, only four (4) were outstanding as of its November 2019 report. One item, directly under the control of the University, was completed with the University Board of Regents’ (“BOR”) adoption of Hawai‘i Administrative Rules (“HAR”) chapter 20-26 on November 6, 2019 (approved by the governor on January 13, 2020).
The University is actively working on the remaining three (3) items in coordination with DLNR, which has final approval on these particular tasks. These three (3) items are:

i. “The University of Hawai‘i should renegotiate with existing sublessees to amend subleases to include provisions that address stewardship issues, as modeled by the provisions in the 2014 TMT sublease, following execution of the new general leases for UH-managed lands on Mauna Kea”;

ii. “The Department of Land and Natural Resources should continue working with UH to renew the general leases for the UH-managed lands on Mauna Kea and ensure the leases are substantially in the form DLNR’s Land Division recommended for approval by the land board”; and

iii. “The Department of Land and Natural Resources should use additional stewardship-related conditions contained within the TMT observatory permit as a template in all new observatory permits issued for the summit of Mauna Kea.”

The timeline on the first two of these audit items is affected by challenges brought by the Office of Hawaiian Affairs (“OHA”) and other groups who oppose TMT in several ongoing administrative and judicial appeals. If the Board of Land and Natural Resources (“BLNR”) grants the University another general lease, then BLNR must approve the first two items, which the University intends to comply with. The third audit item regarding whether BLNR grants a new astronomy facility conditional use permits is not within the University’s control.

These audit findings show the significant progress the University has made over time in fulfilling its management responsibilities. Reliance on those past audits as a measure of the University’s recent or current performance is no longer valid, and the past audits do not support taking the management away from the University. Instead, those audit reports confirm that the University has learned from its decades-long management and improved based on that experience.

B. The Independent Evaluation of University’s implementation of the CMP was positive in most all areas, and the University has made changes to improve the few areas marked for improvement

The University is charged with implementing 103 management actions in the Mauna Kea Comprehensive Management Plan, adopted by BLNR in 2009 (“CMP”). The University’s implementation of the CMP was the subject of an independent review conducted by Kuiwalu in December 2020 at the direction of DLNR (“Independent Evaluation”).

The Report picked up on some aspects of the Independent Evaluation; however, it is important to consider the actual text of the Independent Evaluation. As stated in the Independent Evaluation:

“The purpose of this Independent Evaluation Report (Report) is to (1) evaluate the effectiveness of UH, specifically OMKM’s, implementation of the specific Management Component Plans (MCP) found in Section 7 of the CMP, and (2) to evaluate the efficiency of the governance structure in managing the cultural and natural resources within state conservation lands under lease to UH.”
The Independent Evaluation offers the following conclusions:

i. “UH’s self-assessment and many of the public comments which included members of the Native Hawaiian community and government agencies, have acknowledged that OMKM has implemented most of the 103 MAs within the MCPs. Many have commented that OMKM has effectively implemented many of the MAs that have resulted in protecting and preserving the cultural and natural resources within the state conservation lands.”

ii. “[I]n the areas of untimely adoption of the administrative rules, cultural resources, and education and community outreach, especially with the Native Hawaiian stakeholders, the efforts by OMKM have been ineffective to achieve the desired outcome.”

It is important to note regarding the above conclusions that:

i. At the time of the Independent Evaluation, HAR chapter 20-26 was adopted by BOR and approved by the governor. The University is currently implementing the rules. Before BOR adopted the rules (which it was granted authority to adopt in 2009 under Act 132), the University was continuously implementing the 103 CMP management actions, administering commercial tour operator permits, and coordinating on enforcement related to resources and public health and safety with entities like DLNR and its various programs\(^2\) and county first responders.

ii. Outreach to the Hawai‘i Island community, including native Hawaiians, has been a mainstay of University management on Maunakea, and it is built into its management framework. This includes outreach through advisory groups like KKM\(^3\) and the MKMB\(^4\) as well as local schools, community groups, businesses, native Hawaiian faculty, lineal descendants, and those who identify as kia‘i. The recent adoption of HAR chapter 20-26 and the on-going work finalizing the new master plan include significant efforts by the University to capture community input, resulting in thousands of comments and dozens of meetings with interested groups. All substantive comments were considered, which the University has documented in its rulemaking process and the new master plan Volume II.

iii. There has always been an education component for the public and community outreach conducted by the University and directly by the Maunakea observatories. The University’s recent reorganization furthers this work by designating the ‘Imiloa Astronomy Center for orientation programs and educational partnerships by BOR resolution and executive policy.

The Independent Evaluation **did not conclude that UH has “mismanaged” Maunakea**, a term often used against the University. Here is how the Independent Evaluation discusses “mismanagement”, only once and quoted in full:

“The public’s assessment of how effectively UH has implemented the CMP has primarily varied depending on whether they are in favor or opposition of

\(^2\) For example the State Historic Preservation Division, Division of Conservation and Resources Enforcement, Division of Forestry and Wildlife, Office of Conservation and Coastal Lands, etc.

\(^3\) Comprised of individuals knowledgeable about native Hawaiian cultural practices who advise the MKMB.

\(^4\) Composed of members representing the major stakeholders of Maunakea; primary role is to advise the Office of the Chancellor at the University of Hawai‘i at Hilo on management of the Mauna Kea Science Reserve.
telescope development on Mauna Kea. Those who support existing and future telescope development on Mauna Kea believe that OMKM has adequately implemented the CMP MAs to preserve and protect the cultural and natural resources on Mauna Kea. **For those who do not support continued telescope development on Mauna Kea beyond 2033, the expiration of the existing state lease, they believe that UH continues to mismanage Mauna Kea as concluded in the 1998 State Auditor’s Report. In particular, those in opposition believe that UH continues to advocate telescope development over the protection and preservation of the resources.**

*With respect to the broader public comments on the effectiveness of the UH governance structure, most see UH as one entity. They either believe that the UH existing structure is doing a good job, or they believe that UH is mismanaging Mauna Kea and there is very little in between.*

(Emphasis added.)

It should be noted that the University’s newly issued draft Master Plan establishes a limit of nine telescopes post 2033. It also restricts future development to existing observatory sites. The University committed to these limits despite considerable differences with astronomy advocates.

C. The University and its advisory groups take constructive criticism seriously.

At the direction of the BOR, in April 2020, the University completed an analysis of alternative governance models that included models in which the University did not serve as primary manager. The analysis evaluated the benefits and challenges of establishing the various forms of new entities identified (see BOR Presentation [4.16.20]). In the University’s analysis of governance models, the University concluded that three (3) years is not sufficient time to transfer legal rights under existing agreements, staff, resources, programs, plans, policies, and other elements of the University management program and apparatus to a new, yet-to-be-formed entity. Given the need for bicameral legislative support and based on past legislative efforts, they University determined it would take several years for the enabling legislation to be passed to form the new entity. This short timeline also does not account for the approvals required for a new master plan, management plan, permits, administrative rules, general lease, and observatory subleases, and for developing a viable business plan that ensures the new entity’s sustainability.

As a result, the University has focused its attention on the governance alternative within its control and broadened community representation within its existing advisory groups. In 2021, the EC increased its membership, bringing different expertise and perspectives to its committee. KKM updated its purpose statement and is actively recruiting new members to reflect their renewed vision. The voices on the EC and KKM are diverse and include members who share some of the views of Hawai‘i Island kia‘i.

At their December 7, 2021 public meeting, the MKMB passed a motion recommending that the University administration restructure MKMB along the lines of what was identified as Model 4A, Collaborative Management with UH, in the University’s analysis of governance models. Model 4A expands the current MKMB from seven to nine members; designates ex-officio seats on the MKMB for DLNR, DHHL, OHA, and the
County of Hawai‘i; and redistributes representation of the remaining seats to include various stakeholder interests.

In many ways, the MKWG’s recommended structure parallels what the University is in the process of implementing except that the University and astronomy are represented.

D. Tangible demonstration of the University’s commitment to stewardship

Annual operating costs for stewardship alone are $12M, the majority of which is covered by extramural and non-general funds generated by the University. In addition, the University provides world-class global network connectivity for all Maunakea Observatories so that the data collected on the mountain can be shared with researchers and students at institutions around the world. Under the new management regime being recommended, absent other sources of revenue because of the uncertainty created about future access and use, a substantial investment by the State will be required to support a new stewardship program that would have jurisdiction for significantly more land than the current program.

The fruits of the University’s efforts to improve its stewardship have been recognized by the community. In 2017 UH received the Pualu Award from the Kona-Kohala Chamber of Commerce for its education and outreach. In 2017 UH received a Preservation Commendation Award from the Historic Hawai‘i Foundation for its interpretative efforts. And in 2016 UH received the Pualu Award for Environmental Awareness from the Kona-Kohala Chamber of Commerce. Finally, and perhaps most notably, in 2011 the Wekiu Bug was removed from endangered species candidate list because of the University’s ecosystem restoration efforts.

In closing, the University should be judged by our complete record which shows substantial improvement over time across multiple dimensions. Our commitment has been reliably demonstrated in time, effort, and resources committed by us over the years in the exercise of our stewardship responsibilities for the privilege of access we have. And as a result, as reported by many in the Independent Evaluation “…the cultural and natural resources on the state conservation lands on Mauna Kea are some of the best managed and protected lands in the entire State” and we have a world class research enterprise Hawai‘i can be proud of.
16 WRITTEN TESTIMONY RECEIVED FOR JANUARY 20, 2022, BOARD OF REGENTS MEETING
Mauna Kea

About the author: Educated at the universities of Michigan, Hawaii, Harvard, and Cambridge, Michael Chauvin has taught astronomy at the University of Hawaii at Hilo, been a Lecturer at the Bishop Museum Planetarium in Honolulu, a Resident Scholar at the Dibner Library of the History of Science and Technology at the Smithsonian Institution in Washington, DC., and the recipient, through the American Astronomical Society, of two NASA-funded research awards. He is a founding member of the Inter-Union Commission for the History of Astronomy – an international body formed in 2001 by the International Astronomical Union (IAU) and the Division of History of Science of the International Union for History and Philosophy of Science (DHS/IUHPS) to represent the interests of professional historians of astronomy worldwide.

Testimony on The Master Plan for Maunakea Management

Jimmy Kuroiwa <kuroiwaj@earthlink.net>
To: bor.testimony@hawaii.edu

David Lassner, President
University of Hawaii
Board of Regents
Subject: The Master Plan for Maunakea Management

We submit, as a reminder for the Board of Regents, that the purpose of the Maunakea Management Master Plan is for the only stakeholders, citizens of the State of Hawaii, the “One Larger group of Hawaiians”.

The Purpose of “the Comprehensive Management Plan (CMP) provides a management framework for the University of Hawaii (UH) to address measures to protect the cultural, natural, and scientific resources on UH Managed areas on Maunakea.”

We know that the United States Congress has never adopted in law the Kanaka Maoli (ethnic Polynesian Hawaiian) as an Indigenous People of the Islands of Hawaii.

The science, the law, and the history present the truth from its first visitor –settler from Polynesia arriving about 1219 CE through 1266 CE to the Islands of Hawaii. Their ancestors, followed by other visitor – settlers, became the “One Larger group of Hawaiians” which is a blend of many ethnic groups comprising the State of Hawaii’s current citizens.

These visitor - settler constitute the “All” in the July 4, 1894 Republic of Hawaii’s Constitution, and which was incorporated in the April 30, 1900 Organic Act (The Act to Provide a Government for the Territory of Hawaii). The only “Hawaiian” identified in the Organic Act under:

“Article 1 §4. all persons who were citizens of the Republic of Hawaii on August twelfth, eighteen hundred and ninety-eight, are hereby declared to be citizens of the United States and citizens of the Territory of Hawaii.

“And all citizens of the United States resident in the Hawaiian Islands who were resident there on or since August twelfth, eighteen hundred and ninety-eight and all the citizens of the United States who shall hereafter reside in the Territory of Hawaii for one year shall be citizens of the Territory of Hawaii.”

This"One Larger group of Hawaiians” includes all ethnic groups as “Hawaiians” or “Native Hawaiians” as the Law which was understood throughout the history of the Islands of Hawaii.

Supreme Court of the United States; Rice v. Cayetano, Governor of Hawaii; Certiorari To The United States Court Of Appeals For The Ninth Circuit; No. 98 — 818. Argued October 6, 1999 – Decided February 23,2000: Held: Hawaii’s denial of Rice’s right to vote in OHA trustee elections violates the Fifteenth Amendment. Pp. 15 — 28.

Attached is a copy of our testimony supporting the TMT on Maunakea submitted on July 16,2020.

Thank you,

/s/

James I. Kuroiwa, Jr.
Hawaii LECET Director (Retired)

Attachment:

[2020 Jul 16 University of California System.docx (mailto:2020 Jul 16 University of California System.docx)]
Subject: Testimony in SUPPORT of the Thirty Meter Telescope (TMT) on Mauna kea, Hawaii.

James I. Kuroiwa, Jr. Director Hi LECET (Ret.) LIUNA Local 368

Appointed by President George W. Bush and served two terms on the Hawaii State Advisory Committee of the U.S. Civil Rights Commission. (2007 through 2011). President and RME of Mahana Landscaping, Inc. (Hawaii Island Projects: Hyatt Regency (Hilton) at Waikoloa; The Ritz Carlton (The Orchids) at Mauna Lani; Hapuna Beach Resort; The Four Seasons at Kaupulehu; and other Kona projects from 1985 through 1998). Served as the 81 mm Mortars Section Leader with the 100th Battalion/442nd Infantry USAR (1964 to 1971) and 1st/502nd Ambl 101st Abn I Corps Vietnam (1969).

The Construction of TMT on Mauna kea is settled:

*The construction and operation of the TMT on Mauna kea is a settled issue. The Hawaii Supreme Court decided in the award of the “Notice to Proceed” to TMT through the State of Hawaii. The end results are for the TMT to complete its construction and to begin operations for the expansion of knowledge about our universe to share with the World.

Hawaii’s Governor Stalls:

*The operation of the TMT on Mauna kea will provide the World a clear vision into our Space and future. The TMT project was stalled because of a “Political” issue which has no standing with the Rule of Law. The TMT issue sits in the lap of the Governor of Hawaii, Governor David Ige, in allowing fake politics to reject science.

The “One Larger Class of Hawaii’s Citizens” support the TMT:

*The United State Senate Committee on Foreign Relations submitted Report No. 227 on the overthrow of Queen Liliuokalani to Congress on February 26, 1894, finding the U.S Military, Minister Stevens and Commissioner Blount not complicit in removing the Queen and her Cabinet by the Committee of Safety on January 17, 1893.

*The Senate Report was accepted by the full Senate and on March 5, 1894, by unanimous consent, approved by concurrent resolution to print of 6,000 copies of the Report to be distributed at 2,000 copies for the Senate, 4,000 copies to the House, with required copies for State Libraries, Universities, and States.
The American of Kanaka Maoli ancestry is not recognized by Congress as indigenous and they are a part of the “One Larger Class of Hawaiian Citizens”. The “One Larger Class of Hawaiian Citizens” consists of all ethnic class who are residents in the Islands of Hawaii as recognized in the July 4, 1894 Constitution of the Republic of Hawaii and the United States as described in the April 30, 1900 Organic Act.

Hawaii’s citizens recognize that Mauna kea is a special place, as is the entire State of Hawaii, with 92% of the citizens of the State of Hawaii supporting the TMT’s construction and operations, where both science and Hawaiian culture can exist on the summit.

The United States has never abused the Kanaka Maoli:

The United States legally and historically has never abused the Kanaka Maoli. The visitors from Polynesia were probably the first to make the Islands of Hawaii their home arriving between 1219 CE to 1266 CE.

The United States Congress on July 9, 1921 created and recognized, in conflict with the U.S. Constitution’s Fourteenth Amendment, the sub-group “native Hawaiian” in the Hawaiian Homes Commission Act. The sub-group “native Hawaiian” is the only Congressionally recognized citizen in addition to the “One Larger Class of Hawaiians Citizen” as in the Organic Act.

The Hawaii “Revisionists” attempts to change legal Hawaiian history:

Hawaii does recognize the existence of “Revisionists”, who are American’s of Kanaka Maoli ancestry, who continue attempts to change the legal and historical facts relating to the political evolution of the Islands of Hawaii to become the State of Hawaii. The “Revisionists” for the past one hundred twenty-six years attempted to avoid recognizing the July 4, 1894 adoption of the Republic of Hawaii’s Constitution, that replaced the 1887 Kingdom Constitution.

Hawaii’s Ceded Lands is owned by the State of Hawaii in absolute fee:

The Ceded Lands issue is also settled law, as decided by the U.S. Supreme Court on March 31, 2009 in the Hawaii v. OHA case. The U.S. Supreme Court stated clearly; “The Apology Resolution did not strip Hawaii of its sovereign authority to alienate the lands the United States held in absolute fee and granted to the State upon its admission to the Union.”

The United States Federal Courts; The Court of Claims on May 16, 1910; the Supreme Court on February 23, 2000 and on March 31, 2009, decided after a complete review of legal historical documents and cross examination of witnesses the constitutional outcomes of each case. The “Revisionists” have continued to revise and amend the intent of those decisions on Crown Lands, on the “One Larger Class of Hawaiian Citizen”, and on the Ceded Lands.

Ward Research Inc. polling result for TMT released on May 28, 2020:
According to the TMT-commissioned poll conducted by Ward Research, Inc., approximately 61% of residents want construction to move ahead, while 32% are opposed.” Also, “92% of people think there’s a way for both science and Hawaiian culture to exist on the summit.” And, “The poll surveyed roughly 500 people who are representative of the ethnicity, gender and island-by-island population of Hawaii. About 22% were of (Native Hawaiian) Americans of Kanaka Maoli ancestry.”

The United States invests and develops its Space Force:

*The establishment of the United States Space Force (USSF) that will be overseen by GEN Charles Q. Brown Jr., who was recently nominated to be Chief of the United States Air Force. “The Mission: The USSF is a military service that organizes, trains, and equips space forces in order to protect U.S. and allied interests in space and to provide space capabilities to the joint force USSF responsibilities include developing military space professionals, acquiring military space systems, maturing the military doctrine for space power, and organizing space forces to present to our Combatant Commands.” The USSF must become a working partner with the TMT, the University of Hawaii, and all other TMT Partners throughout the Free World to maintain World peace.

Thank you,

/s/

Subject: Testimony in SUPPORT of the Thirty Meter Telescope (TMT) on Mauna kea, Hawaii.
James I. Kuroiwa Jr.

References:

The July 9, 1868: U.S. Constitution 14th Amendment. “Section 1. All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the state wherein they reside. No state shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any state deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws.”

The February 3, 1870: U.S. Constitution 15th Amendment. “Section 1. The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of race, color, or previous condition of servitude.”

The February 26, 1894: U.S. Senate Committee on Foreign Relations Report No. 227 presented to Congress: The Congressional authorization to conduct the hearing, “whether any, and, if so, what irregularities have occurred in the diplomatic or other intercourse between the United States and Hawaii in relation to the recent political revolution in Hawaii, and to this end said committee is authorized to send for persons and papers and to administer oaths to witnesses.” The Senate Committee at the conclusion of the hearing, involving twenty-five (25) individual sworn testimonies and twenty-four (24) notarized individual statements, found the U.S Military, Ministers Stevens and Blount not complicit in the interference and the removal of the Kingdon of Hawaii’s Queen and her Cabinet by the Committee of Safety.

The July 4, 1894: Constitution of the Republic of Hawaii. “Article 17. - Citizenship. Section 1. All persons born or naturalized in the Hawaiian Islands, and subject to the jurisdiction of the Republic are citizens thereof.”

And, “Article 95. - Crown Land. - That portion of the public domain heretofore known as Crown Lands hereby declared to have been heretofore, and now to be, the property of the Hawaiian Government, and to be now free and clear from any trust of or concerning the same, and from all claim of any nature whatsoever, upon the rents, issues and profits thereof. It shall be subject to alienation and other uses as may be provided by law. All valid leases thereof now in existence are hereby confirmed.”

The July 7, 1898: Annexation of the Republic of Hawaii through the Newlands Resolution. “Resolved by the Senate and House of Representatives of the United States of America in Congress Assembled, That said cession is accepted, ratified, and confirmed, and that the said Hawaiian Islands and their dependencies be, and they are hereby, annexed as a part of the territory of the United States and are subject to the sovereign dominion thereof, and that all and singular the property and rights hereinbefore mentioned are vested in the United States of America.
“The existing laws of the United States relative to public lands shall not apply to such lands in the Hawaiian Islands; but the Congress of the United States shall enact special laws for their management and disposition: Provided, That all revenue from or proceeds of the same, except as regards such part thereof as may be used or occupied for the civil, military, or naval purposes of the United States, or may be assigned for the use of the local government, shall be used solely for the benefit of the inhabitants of the Hawaiian Islands for educational and other public purposes.”

**The April 30, 1900: Organic Act establishing the Territory of Hawaii.** “§4. Citizenship. That all persons who were citizens of the Republic of Hawaii on August twelfth, eighteen hundred and ninety-eight, are hereby declared to be citizens of the United States and citizens of the Territory of Hawaii.

“And all citizens of the United States resident in the Hawaiian Islands who were resident there on or since August twelfth, eighteen hundred and ninety-eight and all the citizens of the United States who shall hereafter reside in the Territory of Hawaii for one year shall be citizens of the Territory of Hawaii.”

**The May 16, 1910: Crown Lands is settled Law.** U.S. Court of Claims, Liliuokalani v. United States, 45 Ct. Cl. 418 decision. “Section 99 of the organic act of 1900 (31 Stat. L., 161) adopts substantially the same language. We have not entered into a discussion of the defenses predicated upon the above provisions of law, believing the case disposed of before we reached them. It is, however, worthy of note that the organic act of 1900 puts an end to any trust -- if the same possibly existed -- and the petition herein was not filed until January 20, 1910, more than six years thereafter.”

**The July 9, 1921: Hawaiian Homes Commission Act.** “§201. (a) That when used in this title:

(7) The term ‘native Hawaiian’ means any descendant of not less than one-half part of the blood of the races inhabiting the Hawaiian Islands previous to 1778;”

**The March 18, 1959: Admission Act approving Hawaii as the 50th State of the United States.** “§15. Territorial laws shall continue in force in the State of Hawaii: All Territorial laws in force in the Territory of Hawaii at the time of its admission into the Union shall continue in force in the State of Hawaii, except as modified or changed by this Act or by the constitution of the State, and shall be subject to repeal or amendment by the Legislature of the State of Hawaii, except as provided in section 4 of this Act with respect to the Hawaiian Homes Commission Act, 1920, as amended; and the laws of the United States shall have the same force and effect within the said State as elsewhere within the United States: Provided, That, except as herein otherwise provided, a Territorial law enacted by the Congress shall be terminated two years after the date of admission of the State of Hawaii into the Union or upon the effective date of any law enacted by the State of Hawaii which amends or repeals sit, whichever may occur first. As used in this section, the term ‘Territorial laws’ includes (in addition to laws enacted by the Territorial Legislature of Hawaii) all laws or parts thereof enacted by the Congress the validity of which is dependent solely upon the authority of the Congress to provide for the government of Hawaii prior to its admission into the Union, and the term ‘laws of the United States’ includes all laws or parts thereof enacted by the Congress that (1) apply to or within Hawaii at the time of its
admission into the Union, (2) are not ‘Territorial laws’ as defined in this paragraph, (3) are not in conflict with any other provision of this Act.”

February 23, 2000: The “One Larger Class of Hawaiian Citizen” Issue is settled Law. SCOTUS, Rice v. Cayetano (7 to 2) decision. “Held: Hawaii’s denial of Rice’s right to vote in OHA trustee elections violates the Fifteenth Amendment. Pp. 15 — 28. The State’s further contention that the limited voting franchise is sustainable under this Court’s cases holding that the one-person, one-vote rule does not pertain to certain special purpose districts such as water or irrigation districts also fails, for compliance with the one-person, one-vote rule of the Fourteenth Amendment does not excuse compliance with the Fifteenth Amendment.”

SCOTUS, Rice v. Cayetano decision. “The agency administers programs designed for the benefit of two subclasses of Hawaiian citizenry, ‘Hawaiians’ and ‘native Hawaiians.’ State law defines ‘native Hawaiians’ as descendants of not less than one-half part of the races inhabiting the Islands before 1778, and ‘Hawaiians’ – a larger class that includes ‘native Hawaiians’ – as descendants of the peoples inhabiting the Hawaiian Islands in 1778.” The State of Hawaii’s 1978 amendment’s definition of “Hawaiians” conflicts directly with the definition of the Hawaiian citizen as written in the Republic of Hawaii’s Constitution and adopted by the April 30, 1900 United States Organic Act.

March 31, 2009: Ceded Lands Issue is settled Law. SCOTUS, Hawaii v OHA (9 to 0) decision. “117 Haw. 174, 177 P. 3d 884, reversed and remanded. ALITO, J., delivered the opinion for a unanimous Court. When a state supreme court incorrectly bases a decision on federal law, the court’s decision improperly prevents the citizens of the State from addressing the issue in question through the processes provided by the State’s constitution. Here, the State Supreme Court incorrectly held that Congress, by adopting the Apology Resolution, took away from the citizens of Hawaii the authority to resolve an issue that is of great importance to the people of the State. Respondents defend that decision by arguing that they have both state-law property rights in the land in question and “broader moral and political claims for compensation for the wrongs of the past.” Brief for Respondents 18. But we have no authority to decide questions of Hawaiian law or to provide redress for past wrongs except as provided for by federal law. The judgment of the Supreme Court of Hawaii is reversed, and the case is remanded for further proceedings not inconsistent with this opinion. It is so ordered. No. 07-1372.”

October 31, 2018: Hawaii’s Supreme Court on October 31, 2018 upheld by a 4 – 1 vote the construction permits of the consortium building the Thirty Meter Telescope (TMT) on Mauna Kea.

I support the construction of TMT on Mounakea

Gideon Clark <konagideon@gmail.com>  
To: bor.testimony@hawaii.edu  
Sat, Dec 18, 2021 at 7:55 AM

Hello to whom it may concern,

My name is Gideon Clark I have lived in Hawaii all my life and am 8% native Hawaiian. Even though I do not practice the Hawaiian religion I have learned and practiced my Hawaiian culture throughout my life.

I support UH's draft Master Plan because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. Moreover, Mauna Kea is now some of the best-managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. I mua Kilo Hōkū and i mua TMT!

I wish my more vocal native Hawaiians did not wish so strongly to hinder the progress and development of technologies like the TMT from coming to Hawaii. I believe it is an honor to be selected as a site for such an amazing achievement.

Sincerely,
Gideon Clark
I am in favor of building the TMT on Mauna Kea. I believe as a member of the human species, we have always striven for knowledge throughout our history on this earth. We need TMT to broaden our knowledge and understanding of the universe of which we are a part.

We must acknowledge and honor our Hawaiian history, also. We must use the very best site for TMT as outlined by all leading experts in astronomy. To do any less would be a tragic error in our efforts to gain insight into the universe we live in.

Thank you.

Your Testimony/Comments

Dear UH Board of Regents,

My name is Chantell and I am a resident of O'ahu, Hawai‘i. I am requesting you revoke this Master Plan on Mauna Kea. You are neglecting the last 4-5 years of protests against any commercial project done on Mauna Kea by Native Hawaiians and locals. It is especially the many decades Native Hawaiians protested against anything being built on Mauna Kea and all stolen Hawaiian land. The various commercial projects like the number of telescopes built on Mauna Kea have also had reports of contamination due chemical substances spilled into the land. No commercial project will ever be built on Mauna Kea nor any other stolen...
Hawaiian land. Stop prioritizing making capital from this commercial project plan. Revoke this Master Plan now!

Sincerely,

Chantell Cambia

Your Testimony/Comments
No to Building on MaunaKea! That is a cultural and sacred place. No more telescopes up there please. Dismantle and move somewhere else please. Sacred places should be left alone. There are other places to choose. Enough is enough! No more just bc of money. My ancestors went to Mauna Kea for spiritual and cultural callings. Stop destroying our Mauna. Damaged telescopes have been unattended up there for years. Only when it was made public, did UH all of a sudden care. No No No to building anything else up there. I Love science, this is Not about "Science".

Your Testimony/Comments
I do not approve the newest updated Mauna Kea Plan because I am an heir to Kaohe, filed with the Bureau of Conveyances, therefore I have undivided interest to Mauna Kea and it’s protection. I do not authorize any development or management of the Mountain or landscape and do not support any plans for development or management of this land/mountain. My family asks that all telescopes be decommissioned and this mountain be private for our family as heir to protect and maintain. We ask that a gate be put up for it is private property. We do not authorize any persons up on Kaohe/Mauna Kea from now until further notice is given by me, Maelani Lee.
I Charlene Holani born and raised on Hawaii island, and an alumni of Manoa hereby urge this new working group maintain straight forward clarity with and to all of Hawaii in regards to every change and decision and updates being down by, with and for this working group. It is paramount that the past 'back door', understand happenings will not be repeated and as such this working group realize the final say of these ceded Hawaiian 'lands was/is/and forever more be 'Hawaiian' the universitys precense on Maunakea is not rightfully so and in continueing to be may UH realize who they are answering to, rather then how it has been operating which is, UH had been speaking for and making decisions with out Hawaiian consent. Be pono UH and may this working group keep them accountable.

regarding the draft

This testimony is also available as a webpage at tinyurl.com/bdz6vh64
Four Fundamental Principles of Civil Rights in Hawaii

Here are four fundamental principles of civil rights in Hawaii, each stated in a single sentence. Then there are brief followup clarifications of what they mean. After that are more detailed explanations of how these principles apply to University of Hawaii policies for the governance of the Mauna Kea lands that are under UH control. The draft proposal of the Mauna Kea Master Plan openly and shamefully violates the first two principles, and was created by a racially and politically stacked Working Group most of whose members oppose the third and fourth principles.

These principles are easy to agree upon but sometimes difficult to implement when special-interest groups demand special privileges not granted to others. First I will list the principles very briefly; then I will offer a few clarifications of key words or phrases.

1. Equality before God: All humans are equal in the eyes of God regardless of race.

2. Equality under the law: Government should treat all people equally under the law regardless of race.

3. Unity with America: Hawaii is the 50th State of the USA, whose laws rightfully have jurisdiction here.

4. Unity of Hawaii: The people and lands of Hawaii should remain unified under the single sovereignty of the State of Hawaii, not divided along racial lines.

A few clarifications:

1. Those who don’t believe in God, or believe in 400,000 gods, have other ways to say it. The U.S. Declaration of Independence said: "All men [people] are created equal." Don't believe in creationism? Natural law gives every human equal worth and inalienable rights.
A beautiful Hawaiian creation legend says the gods mated and gave birth to these islands as living beings. Later the gods mated and gave birth to the first human from whom we all are descended. Thus humans are children of the gods and brothers/sisters to the 'aina.

Unfortunately some activists twist this legend to say only people with Hawaiian blood have this genealogy; therefore ethnic Hawaiians have a god-given right to rule Hawaii. Using religion or race as a basis to demand political power in Hawaii is just as unacceptable as jihad in the Middle East, fascism in Europe, or white nationalism in South Carolina.

2. Equal treatment under the law means there should be no special rights or government entitlement programs for one race preferentially or exclusively. Hawaii has many hundreds of such programs. They are illegal under the 14th Amendment equal protection clause, and morally repugnant as "institutional racism" comparable to Jim Crow laws in the old South.

For each program, either open it so all races have access or shut it down. If Native Hawaiians are truly the most needy, then they will receive most of the help if help is given based on need alone.

Article 12 Section 7 of the Hawaii Constitution grants special rights to Native Hawaiians for "traditional and customary practices" interpreted to include trespassing for shoreline access, religious practices, or gathering certain materials. The pono way to honor that provision while also honoring equality under the law is to extend the traditional and customary rights of Native Hawaiians to all citizens. In the kingdom, those rights were for everyone regardless of race ("hoa'aina" meant "tenant" not "native tenant"; "kanaka" meant race-neutral "person").

3. The Hawaiian revolution of 1893 was done entirely by local men while 162 U.S. peacekeepers, present for fear of rioting or arson, were never needed or used. Hawaii remained an independent nation until 1898.
The Republic was given full-fledged international recognition as the rightful successor government by emperors, kings, queens, and presidents of at least 19 nations, including Queen Victoria — all personally signed letters congratulating President Dole. In 1897, the Republic, internationally recognized as the rightful government of Hawaii, offered a Treaty of Annexation to the U.S., which the U.S. then accepted in 1898 after lengthy debate.

Some Senators complained that ratification by both House and Senate was not correct procedure for a treaty, but they lost. Neither Hawaiian secessionists nor U.N. has standing to overrule the method chosen by the sovereign U.S. to make its internal decision to ratify what the Republic of Hawaii offered. Yes, we are Americans.

4. What Kamehameha hath joined together, let no politicians rip asunder. The people and lands of Hawaii should remain unified under the single sovereignty of the State of Hawaii, not divided along racial lines — no race-based government recognized as though it is an Indian tribe.

-------------

Mauna Kea Sacredness: Debunking the assertion of religious sacredness as a cynical ploy by activists seeking race-based political power and money for racially exclusionary government handouts.

During Summer and Fall 2021 there were several calls for supporters of the Thirty-Meter Telescope project on Mauna Kea to submit testimony to various institutions in Hawaii and mainland USA. Following is a consolidated version of Ken Conklin's testimony.

Aloha. I am Kenneth R. Conklin, Ph.D., retired professor of Philosophy. I have lived in Hawaii permanently since 1992, speak Hawaiian with moderate fluency, and have developed considerable expertise in Hawaiian history, Hawaiian culture, and especially the Hawaiian sovereignty movement. My testimony about Mauna Kea focuses mostly on debunking the disrespectful assertion of religious sacredness
as a cynical ploy by activists seeking race-based political power and money for racially exclusionary government handouts.

1. Activists seeking political power are (ab)using Mauna Kea as a pawn in their political game. They illegally block the access road, literally holding the summit as a hostage. They hope to either secede from the USA and re-establish Hawaii as an independent nation, or else obtain federal recognition for a phony Hawaiian tribe. The state government agency Office of Hawaiian Affairs demands megabucks in "rent" [bribe] for the telescope campus -- money to be spent on racially exclusionary projects. Both varieties of activists want to control access to the telescope campus and the summit, and the kinds of activities permitted there, so they can force visitors to comply with cultural/religious protocols and listen to propaganda about Hawaii's history. If you decision-makers withhold funding or political support for the telescopes, or if you cater to activist demands for control over visitors, including activist requirements for visitor orientation and protocol, you thereby enroll as their accomplices.

2. Extremely few people truly believe Mauna Kea is "sacred" in a religious sense. Everyone appreciates the beauty and majesty of Mauna Kea. The activists regard it as "sacred" in the sense that controlling it is essential to their political and financial success, in the same way as a football quarterback is sacred to the team, or teenagers' weekly allowances are sacred to them. By using the word "sacred" they expect that the warm-hearted and generous people of Hawaii will step back in awe and give deference to what is falsely portrayed as their religion. The activists have a long history of claiming that every square inch of land in Hawaii is "sacred" because of a beautiful creation legend that they twist to say that anyone with even one drop of Hawaiian native blood is genealogically a child of the gods and a sibling to the land in a way nobody else can ever be who lacks a drop of the magic blood. Every location is "sacred" because chiefs, gods, or plants/animals who are body-forms of the gods lived there or did actions there. In bygone centuries Hawaiian natives buried family members or fallen warriors in shoreline sand dunes, back yards, or under their houses; thus ancient bones are found everywhere.
Nowadays if a single bone is found at a construction site the whole project must be halted until a committee decides whether to spend lots of money to ceremonially protect and rebury it in place and leave a vacant perimeter around it, or whether to move it somewhere nearby. Claims of places or bones being sacred are asserted everywhere, thereby giving the activists a race-based permanent property-rights easement on all the lands of Hawai‘i, along with political power, and basis to demand compensation. Today’s activists have been known to bury some human bones or erect small structures either to claim that they are ancient artifacts or to claim that the Hawaiian religion is alive and therefore the artifacts newly created by its practitioners must be treated as sacred.

3. The ancient Hawaiian religion with centuries of tenure was permanently abolished in 1819, the year before the first Christian missionaries arrived. It was abolished by the four top political and spiritual leaders of the Kingdom in a public display in front of perhaps a thousand important people. They broke an major taboo whose violation normally carried the death penalty, and then gave a short speech proclaiming that the old religion was now overthrown, and ordering the destruction of all the stone temples and burning of the idols throughout all of Hawai‘i. The four leaders were the young King Liholiho Kamehameha II, his biological mother Keopuolani (sacred wife of Kamehameha The Great) who had the highest mana (spiritual power) in Hawai‘i, his regent (co-ruler) stepmother Ka‘ahumanu ("favorite" wife of Kamehameha The Great among more than 20 official wives and numerous unofficial concubines), and Kahuna Nui (High Priest) Hewahewa. These leaders freely exercised self-determination on behalf of the entire nation. Soon thereafter came a short civil war. High chief Kekuaokalani, to whom Kamehameha The Great had entrusted the war god Ku, and his army, fought to preserve the old religion but were slaughtered in the Battle of Kuamo'o. Some ethnic Hawaiians today seek to revive the old religion as a political power-seeking ploy, thereby disrespecting the freely-chosen self-determination of their ancestors, and also disrespecting the Christianity practiced by most ethnic Hawaiians today. Many ethnic Hawaiians today claim to embrace both Christianity and the ancient religion, and pray or chant to the god(s) of
both. There are even a few left-leaning Christian pastors who tell their flocks it's OK to embrace both; but the Protestant missionaries of the 19th Century and the Catholic hierarchy of today reject such syncretism. One thing that makes Kauikeaouli Kamehameha III famous among historians was his gut-wrenching public vacillation between the two religions: He dearly loved his younger sister Nahi'ena'ena (same pair of parents) and made a baby with her (especially for love and also for politically-expected genealogical enhancement of mana in the royal family) even while periodically repenting and trying to be a good Christian when the missionaries warned him.

4. An essay drafted by 7 Native Hawaiian leaders in July, 2021 is entitled "The Historical Context for Sacredness, Title, and Decision Making in Hawai‘i: Implications for TMT on Maunakea." It points out that the ancient Hawaiian religion and its gods had no objection to using areas near the summit of Mauna Kea for commercial and industrial purposes which included living and working there, digging into the ground to quarry rocks for sale or barter, and leaving their trash behind. It is not "Wao Akua" (the realm of the gods where ordinary people are not allowed to live or work). "Archaeological evidence demonstrates that, while the kapu system was in effect, Hawaiians utilized Maunakea as a valuable resource for industrial activities for over 500 years until the time of western contact. Hawaiians excavated the upper slopes of Maunakea for stone of exceptional quality to make tools. As described by Hawaiian cultural practitioner and master navigator Kalepa Baybayan during the TMT contested case hearing, “[t]hey ... shaped the environment by quarrying rock, left behind evidence of their work, and took materials off the mountain to serve their communities, within the presence and with full consent of their gods.” This adze quarry complex covers an area over 900 times the size of the permitted TMT site, which itself is small compared to the entire astronomy precinct"

5. Hawaii is multiracial, with many different religions. No individual race or religion should be allowed to dictate to everyone else what will be the decisions of the government. The Constitution, First Amendment, says there shall be no "establishment of religion" by the
government, meaning that government must not adopt any particular set of religious beliefs as the primary basis for making decisions that affect all people of all different religions. That Amendment allows "free exercise" of religion by any religion, so long as it doesn't force itself on anyone who is not an adherent of it. It would be both legally and morally wrong for any government agency to award custody of Mauna Kea to any racial group or to adopt decisions or regulations establishing the ancient Hawaiian religion as the primary authority. The Constitution of the State of Hawaii, Article XII, Section 7 declares that the State "reaffirms and shall protect all rights, customarily and traditionally exercised for subsistence, cultural and religious purposes and possessed by ahupua’a tenants who are descendants of native Hawaiians who inhabited the Hawaiian Islands prior to 1778, subject to the right of the State to regulate such rights." Subsequent court decisions have ruled that those rights extend to ethnic Hawaiians beyond the borders of any particular ahupua'a, and apply to shoreline access and gathering of certain plants for subsistence and cultural practices. To avoid imposing racial exclusivity, all such rights should be allowed to every resident of Hawaii. We would thereby ensure that all Native Hawaiians would be protected as required by the Constitution, while also manifesting the Aloha Spirit and the value "ho'okipa" as we avoid racial supremacy or exclusivity.

In conclusion: The thirty-meter telescope project will bring jobs and economic development sorely needed in Hawaii. Objections based on culture or religion are unacceptable both legally and morally. Mauna Kea is indeed a sacred place -- not only for Native Hawaiians, not only for all the people of Hawaii, but for the entire human race. It will help us explore and understand our origins and the beauty of the cosmos. It will bring us knowledge to guide our descendants as they navigate among the stars, just as ancient Hawaiians used the stars to navigate across the ocean.

[Support of UH's draft Master Plan for Mauna Kea.pdf](#) (40.5 kB)
To the University of Hawaii Board of Regents

I support adoption of UH’s draft Master Plan for Mauna Kea. In my opinion UH has done a very good job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. Building the TMT is absolutely necessary and it should be built on Mauna Kea. I hope UH is doing everything in its power to ensure TMT is built. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud to have been part of it. Astronomy on Mauna Kea provides opportunities for our children to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and the future of astronomy.

Your Testimony/Comments

I fully support this Master Plan for the University of Hawai‘i Maunakea Lands. I am thankful that the rights of the Hawaiians are protected according to the Hawaii Constitution in this Master Plan. The University of Hawaii has done a good job over the past decades and this new plan includes more guidance for the CMP and Public Commercial Activities on Maunakea Lands, this is important as the current structures are aging and require upkeep. I am pleased to see the balance between astronomy, cultural practices and the environment are a focal point of this plan as Maunakea can serve as a center for knowledge for our past and obviously for humanity understanding of our solar system, our place in the universe. There is an emphasis on ‘Imiloa, the Rangers, volunteers, Maunakea Management Board and Kahu Ku Mauna Council, Environmental Community for the future, thus we can move forward in a way that protects the land and our culture.
Management of Maunakea Lands to UH Hilo under the advisory of Maunakea Management Board and Kahu Ku Mauna indicates that people who know best and are closest will be able to make effective decisions should problems arise.

I was encouraged to see DLNR recently evaluated Maunakea's natural and cultural resources as the best protected in Hawaii.

Thank you for trying your best to reach out to the Hawaii Island kia'i, even though they refused to speak with you. Please know I am one of the many Kanaka Maoli supporters of TMT and astronomy. I hope astronomy will continue in Hawaii, I can't imagine an institution of higher learning without an astronomy department. I support TMT and would like to see Hawaii continue as the leader in astronomy not only for the science but for the education for our future generations.

I support this Master Plan.

Sincerely,

Veronica Ohara

<td>King Kalakaua was majorly interested in astronomy, electricity, and communication. He was a far sighted person. The damage done by the so-called Sovereignty Hawaiian movement is beyond belief. They are so busy fighting among themselves for power that they have forgotten, if they even knew, what Kalakaua stood for. They also do not know their history at all. They are a very divisive, backward group. No matter how much money you throw at them, it will never be enough. The destruction of the Hawaiian beliefs by these people, i.e. the damage to plants and territory in their illegal, unlawful pillaging of Maunakea is unbelievable. I think sometimes that if the Japanese, Chinese, Russians, or Germans had taken the islanders - they would still be slaves if not dead. I would point out the necessity for this telescope - and finding out if we have neighbors anywhere close. I know many of...</td>

Your Testimony/Comments

I strongly support the adoption of the University of Hawaii Master Plan for Management of Maunakea Lands. It reflects the needs and aspirations of ALL Hawaii, not only those of a minority group. It recognizes the complexity of the task and is the only thoughtful, coherent plan of management on the horizon.

### Your Testimony/Comments

The draft master plan for the UH stewardship of Maunakea lands, as written, documents an extremely thorough and balanced vision for the future of Maunakea stewardship. If adopted and implemented effectively, this plan should improve on every aspect that the mauna offers, from cultural interpretation, environmental sustainability, astronomical research, cross-disciplinary research, conservation, and educational opportunity. Those who crafted this plan clearly solicited a broad swath of input and listened carefully to all the voices that spoke to their experience with and their vision for Maunakea. Speaking from the perspective of an astronomer of 20 years, the current plan, as written, will not only maintain the highly
productive facilities on the mauna, but allows for a carefully controlled modest re-fitting of those structures on existing sites, those which are not to be decommissioned, in order to make them more impactful while still maintaining a limited presence on the mauna. It also allows for the development of another world class research facility on the currently existing site 13, whether that be TMT or another telescope, a crucial step towards answering the questions of 21st century astronomical research for which currently facilities are insufficient. These questions are at the very core of our search for our origins as a species, the origins of our planet, of our galaxy, and of our universe; a fundamentally human endeavor. This plan is crafted with love for the mauna, what it brings to all people, and looks to improve on the experience of respectfully communing with the mauna for all who chose to, irrespective of their profession, background, race, or beliefs. I believe this plan should be adopted.
Testimony submitted for the support of the TMT

Jean Toyama <toyama@hawaii.edu>
To: bor.testimony@hawaii.edu

Mon, Jan 17, 2022 at 11:09 AM

I am sending you the testimony I sent last month and continue in my firm support of the TMT.

Jean Yamasaki Toyama, Emerita Professor of French-UHM

AsupportTMT.docx
15K
January 17, 2022

I am resubmitting the testimony I sent previously and am more than ever convinced that the we in Hawai‘i must look to the future and realize the vision of Governor John Burns and Queen Lili‘uokalani.

Here is that testimony.

The TMT is part of the grand vision of our beloved Governor of Hawaii, John Burns. Mauna Kea’s potential was part of how he saw Hawai‘i and its role in the future. According to grandson Brendan, Governor John Burns, "dreamed of the creation of world class telescopes". Because of his efforts to make this happen, the road leading up to the telescopes on Mauna Kea is called "John A. Burns Way." This was in 1970.

Experts will extoll the location, the pristine conditions, I point out the continuity of history. The building of the TMT will be the pinnacle of the vision he had for our state and the continuation of Queen Lili‘uokalani’s passion for science. She said, “The ancient Hawaiians were astronomers.”

Whatever valid issues exist between the supporters and protesters of the TMT, I hope that they can be worked out in a fair and honest way, perhaps in the Hawaiian Ho‘oponopono way.

I think about the ancient ones
— na po‘e kahiko—
robust, curious, hungry to find.
How they would have relished
exploring nōho‘i
—the Milky Way—
to watch creation unfold
by slicing through time
diving into the waves of the Big Bang.

Jean Toyama
55 S. Kukui St. #2801
Honolulu, Hawai‘i 96813

533-4186 or 228-9922 (cell)
Mauna Kea management plan

As a scientist (MD) and a resident of Kamuela, I am in favor of the TMT. The plan must provide considerable attention to the Hawaiian Culture, and respect and inclusion for those who believe the Mountain is sacred.

I believe these two issues can be resolved in a win-win.
RECONFIRMING Comments sent to the Board of Regents on the UH Master Plan Draft December 15, 2021:

I support the draft Master Plan for the University of Hawaii Maunakea Lands dated December 10, 2021.

Maunakea is a special place for its beauty, cultural significance and uniqueness in the world. We share kuleana to keep it that way. The Plan shows careful consideration and balancing of both the cultural and scientific importance of Maunakea.

- Maunakea is the best location in the world for astronomical observation. UH should do everything it can to maintain that status. I support the cutting edge observatories on Maunakea, the decommissioning of observatories that are past their prime, and the building of new observatories as they meet standards in the Master Plan. Yes, I support building the TMT. I believe that the people employed by these observatories will continue to treat the mauna with the utmost respect. The world benefits from the discoveries made on our mauna. Our kama'aina benefit from the inspiration (and jobs) our observatories provide.
- Expanding educational opportunities is a great goal, as long as you are careful not to overwhelm facilities.
- Allowing cultural practitioners access to the summit is a given. But they, too, need to malama ka 'aina. I'm disgusted at the continued ugliness of the protestors' camp leavings and hope we never see such a mess up at the summit.
- Tourism (off-islanders and kama'aina) has to be managed and limited to prevent damage to the mauna and to facilities. I think the Plan outlines a decent approach, but I expect it will require adjustments as you learn what works best.

The University of Hawaii has learned a lot (and will keep learning) and has shown that it should continue managing the Maunakea Lands for the benefit of all.

I also submitted comments on January 4, 2022, to the Mauna Kea Working Group that I do NOT support their 12/17/21 draft and that I support the UH Master Plan.

Georjean Adams
South Kohala, Hawaii
This is to reaffirm my support of the Maunakea Master Plan as testified and submitted by email on December 15, 2021.

To: bor.testimony@hawaii.edu

Aloha,

I support UH’s draft Master Plan because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion.

I hope UH is doing everything in its power to ensure TMT is built. Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home.

The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. I mua Kilo Hōkū and i mua TMT!

Mahalo,

What an opportunity for Hawaii to host the largest telescope in the world. Possibly finding discoveries that can enlighten and protect our planet.
Dear Regents,

I am a Hawaii resident writing to express strong support for the Thirty-meter telescope (TMT). This project is important for the knowledge it will give our peoples, and also for the inspiration it will provide for the children of Hawaii, and the opportunities it can open up for our keiki.

When I served as a judge for the Hawaii State Science and Engineering Fair (HSSEF), I saw many students, of all ethnicities, doing projects in astronomy and astrophysics, inspired by our history and heritage of astronomy in Hawai‘i and on Mauna Kea. The enthusiasm of the kids for science, and their drive to understand nature for the benefit of humankind, was truly inspiring. Now, the self-appointed “protectors” of Mauna Kea want to take away the opportunity, and make all of us poorer. The historical injustices are unquestionable, but stopping astronomy on the Mauna will only make them worse. It’s as if a bitter uncle, mistreated and denied education by his family, insisted that the family throw away the college funds for all the next generation, including his own kids. We would pity, not praise, a family who caved into such a demand.

Mauna Kea, as a home for astronomy, is a great gift to all of humanity, and especially to future generations of Hawai‘i. I urge you to let us keep navigating by the stars to secure a brighter future for our state and for our children. Imua kilohoku!

Aloha and Mahalo,

Mike

Aloha,

There can be no better use for Hawaii and Hawaiian culture than to continue the study of the heavens and Earth than the further observation and remote exploration of the Universe by instruments such as the TMT and other facilities located atop Mauna Kea and Haleakala, The premier venues for these observations in the whole world.

Don't throw out the baby with the bathwater.

Jon Sobstad
Molokai, Hawaii
As a culturally sensitive 55 year Hawaii State resident with part Hawaiian grandchildren (one attending Kamehameha School), I have followed the TMT controversy carefully. We must get it right to be fair to all interests and to promote peace and harmony in our Aloha state. I think the State House task-force Report is not a fair and wise map for realigning governance on Mauna Kea since it does not offer safeguards for its continued use, in part, as a uniquely valuable astronomy resource. It does correct the previous former lack of Native Hawaiian leadership input but would cut the UH representation entirely from the Governing Board. It tilts toward Hawaiian cultural activists who seem largely motivated by their activism and wish to dominate and control rather than follow other Hawaiian interests in sharing and developing natural assets for themselves and the larger community. Total control of Mauna Kea by these activists is no longer necessary since the other stakes-holders have now indicated their willingness to compromise and share this sacred* mountain's governance more equitably, upholding all its cultural-religious, scientific, recreational, ecological and artistic values. The Astronomy leaders have made it clear they will greatly heed and as much as possible defer to cultural Hawaiian interests. Future mountain management must include wise and respected leaders from the Kanaka Maole Community as well as the University of Hawaii, the Astronomy Community and State Government. For sure, outdated Observatories must be removed while this one, the last, is added.

*a mountain can be spiritually sacred to many beholders and still be uniquely sacred to its first settlers, without their exclusive management!

It is a known fact that many Hawaiians support the TMT and take issue with the activists’ more narrow perspectives.

Brian O’Hara MD
Honolulu, January 19, 2022
I support adoption of UH's draft Master Plan for Mauna Kea because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built.

Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work and it is important to keep these brilliant scientists employed right here in Hawaii!

Astronomy on Mauna Kea is part of our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. I mua Kilo Hōkū and i mua TMT!

Thank you,
Patricia Cadiz

Aloha,

I am writing to you as a person who cares about the future of Hawai’i, the future of science, and the future of human understanding.

TMT will be a much needed source of scientific knowledge for the entire world, and I welcome its creation on Mauna Kea. There is no better place on Earth for this remarkable feat of human ingenuity, and to reap its benefits we need to have it on the island of Hawai‘i. This will be yet another cause of pride for the state and all of its inhabitants: we will be able to say that the knowledge that belongs to our entire species is furthered in the pristine environment of the world’s largest mountain.

Sincerely,

Pavel Stankov
I support the UH's draft master plan

Dear University of Hawaii Board of Regents:

I wrote before your December meeting expressing my support for the UH draft Master Plan for UH-managed lands on Mauna Kea.

With a new meeting upcoming this month, I wanted to let you know that I still maintain that support. My earlier comments are included below.

Thank you for reading, and please keep astronomy alive on Mauna Kea!

-Michelle Sandell

I support the UH Master Plan because I support astronomy in Hawaii, astronomy supports Hawaii, and I believe the University of Hawaii has handled well the massive responsibility of managing Mauna Kea in the past. I am confident they will continue to do so in the future. It is also exciting to look forward to the Master Plan's expanded efforts to incorporate other disciplines for field studies at Halepōhaku, to be committed to the teaching telescope there, and to increase the ways the larger community connects with the decision-making process.

I am proud of what Mauna Kea stands for. I am proud that all of our activities on and around the summit manifest important human values: caring for the land and for each other, and the pursuit of knowledge. Let's keep up the good work and move forward with UH's draft of the Master Plan!

Sincerely,

Dr. Michelle Sandell

Aloha.

I stand by my previous testimony in support of UH and of the TMT.

Additionally,

I hope UH is doing everything in its power to ensure TMT is built. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home.

The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. I mua Kīlo Hōkū and i mua TMT!

Mahalo.

Valerie Weiss
Kapaa
Aloha,

I worked nine years for Gemini Observatory in their Public Relations and Astronomy Education Outreach Department. My job was to arrange and assist/lead events and presentations to children, classrooms, families and to general public gatherings with the intention of sharing scientific inspiration.

I chose to welcome and inspire everyone to step into the wonder of the stars. My favorite continual opening was to ask ... Who would love a job, if it were to do what you love! and be paid for it! to be part of teams to explore the edge of human discoveries? I would emphasize to all grade levels, this mountain, Mauna Kea, in this ocean at that (this) time (was) is considered the best place in the world for cutting edge discoveries of the universe. In their back yards!! ... then I would continue to introduce the stars (star systems - Hawaiian as well as Greek) and encourage them to look up and greet/make friends of identifiable stars that are forever around us, that may help us all keep time and place in our lives as they have in the past navigating the oceans.

I left Gemini in 2012! At that time, the Thirty Meter Telescope project was supportive in programs for our community, partnering to enable funding for Journey through the Universe affecting thousands, helping summer Akamai internships and many more projects. At that time, ‘First Light’ for TMT was tentatively (as the most ambitious!) 2018!!! Not even broken ground in 2022! Lets not use this project as a political sledgehammer. Wow, lets not delay!

What honor we might welcome in our back yard! and Hawaiian resident children be welcomed to work with.

Discovery! Science! inspiration! Not even for profit! May TMT please be our future or their future (everyone who chooses so)!

Thank you,

Andolie Marten

To: bor.testimony@hawaii.edu

University of Hawaii Board of Regents,

This is my email to the Mauna Kea Working Group (MKWG) regarding it's Draft Report on the Management of Mauna Kea. The MKWG Draft Report EXCLUDES the International and National Astronomy, Scientific and Academic Communities from participation in the Management of Mauna Kea. The astronomical and scientific research, development and discoveries on Mauna Kea are too valuable and beneficial to Mankind's Knowledge of the Infinite and Eternal Universe to be sidelined and rejected by a racial, ethnic, cultural minority with a belief that Mauna Kea is sacred. The stewardship and management of Mauna Kea must remain with the UH Stewardship Master Plan adopted by the Board of Regents.

Gerald Lai

---------- Forwarded message ----------

Subject: Mauna Kea Working Group's Governing Model for Mauna Kea
To: <maunakeaWG@capitol.hawaii>
Cc: <imuatmt@gmail.com>

To Members of the Mauna Kea Working Group (MKWG)

The Draft Report of the MKWG EXCLUDES the international and national astronomy and scientific community a vote on the management of Mauna Kea.

The International and National Science communities, recognize the importance and immense value of astronomy to advance mankind's knowledge of the Universe, in the fields Astro-Physics, Mathematical Physics, Mathematics, Quantum Physics, and Cosmology. The international astronomy and science community includes the United States, Canada, China, and India which have invested billions into the research and development of the science, technology, hardware, software, and construction of existing observatories and the Thirty Meter Telescope on Mauna Kea.

In the United States, the US National Academy of Science, Gordon and Betty Moore Foundation, Caltech and the University of California are major supporters, contributors, and investors in the research and development of the Thirty Meter Telescope on Mauna Kea.

To exclude the International and National Science Communities from having a say or a vote on the management of Mauna Kea, is a highly prejudicial, one-sided proposal by the opponents of the Thirty Meter Telescope.

The opponents of the Thirty Meter Telescope have used the meme and trope that Mauna Kea is sacred. However, the Hawaiian religion and governance, under the Kapu system, was abolished by King Kamehameha II, Liholiho and Queen Kaahumanu in 1819, 203 years ago. Under the First Amendment to the US Constitution, Under the Establishment Clause, the legislature "shall make no law respecting an establishment of religion". And under the Free Exercise Clause, "or prohibiting the free exercise thereof." "Thus building a wall of separation between Church and State." Thomas Jefferson, a founding father of the US Constitution and third President of the United States.

The Importance of the Thirty Meter Telescope
In 1608 AD, Galileo Galilei invented a telescope which magnified objects 30 times clearer in detail than the human eye. Galileo was the first person to see the four moons of Jupiter, which he thought were distant stars. But after months of observation, he realized that Jupiter’s moons were orbiting Jupiter. With his telescope, Galileo observed the movement of the planet Venus and the waxing and waning of Venus like our moon. When the sun was between the Earth and Venus, Venus was brightly lit. And as Venus moved toward or away from the Earth, Venus would wax and wane like the phases of our moon. When Venus was between the Earth and the Sun, Venus was in full darkness. Galileo then realized that Venus was actually orbiting the Sun, and that the Earth and the other planets were also orbiting the Sun. Up to that time, people, everyone, and the Catholic Church, believed the Earth was immovable, the center of the Universe, that the Sun, planets, stars, and celestial bodies were absolute, immutable, immovable and revolving around the Earth. Galileo with his telescope observed that the faint smudges of light in our Milky Way Galaxy were actually packed with billions of stars, our Sun just one of them. Galileo also observed a supernova, a comet, solar flares and sunspots on our Sun.

Galileo’s discoveries and findings contradicted portions of scripture in the Bible, which brought him into conflict with the Catholic and Protestant churches. In 1633, Galileo was arrested, then tried and convicted for heresy by the Catholic Inquisition. Galileo was forced to recant his astronomical and scientific discoveries, and placed under house arrest for the rest of his life.

Galileo is also considered the Father of the Scientific Method, deriving Principles and Findings by observation, experiment and inductive reasoning. Albert Einstein called Galileo, “The Father of Modern Science”. Galileo implemented a major development in human thought, the Separation of Science from Religion and Philosophy. “The Laws of Nature are Mathematical”- Galileo. Besides his accomplishments in Astronomy, Galileo is also considered the Father of Modern Physics of the Principle of Relativity, of mathematical astronomy, inventor of telescopes, microscopes, thermometer, and time pieces.

The Thirty Meter Telescope on Mauna Kea will have a thousand-fold magnification of Galileo’s telescope and will be technically far superior to Galileo’s telescope. The Thirty Meter Telescope will have the capability to observe the cosmos in near-ultraviolet to med-infrared wavelengths, with adaptive optics to reduce blurring. The Thirty Meter Telescope on Mauna Kea, located in the Northern Hemisphere, working in conjunction with the Giant Magellan Telescope (GMT) in Chile, located in the Southern Hemisphere, will allow astronomers and scientists an unobstructed view of the entire cosmos from the Earth.

As the Polynesians of old, observed, studied, and understood the heavens, to guide them, navigate, explore, discover, and populate vast and remote areas of the Pacific, The Thirty Meter Telescope will carry on this tradition of observing, studying, learning, and understanding the vast Universe in Time and Space, to move Mankind forward toward a greater Knowledge and Understanding of the Infinite and Eternal Universe.

I support adoption of UH's draft Master Plan for Mauna Kea because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. I mua Kilo Hōkū and i mua TMT!

Although this is a copy of a text from a member supporting the development of the Thirty Meter Telescope on Mauna Kea, I would like to express my wholehearted support for the project as a symbol to the world of the greatness that can be achieved here in Hawaii when presented with the right opportunity along with the chance to share it with the world.

Barnaby Beech
As an amateur astronomer from Australia, I implore you to take all steps possible to ensure the construction of the Thirty Metre Telescope on Mauna Kea.

To this end, I urge you to support adoption of the University of Hawaii’s draft Master Plan; obviously this involves continuing UH’s role as manager of Mauna Kea, without which its Master Lease from the Department of Land and Natural Resources may not be renewed, throwing into doubt the continuation of the sub leases of the various observatories on Mauna Kea.

The astronomy research carried out on Mauna Kea is second to none throughout the world; additionally the facilities provide many employment opportunities for the local population, not to mention the manifest educational and scientific pathways for the keiki.

The TMT will take its place at the fore front of global astronomical research; it is good for astronomy, good for the planet and peoples of the world, and good for the local community in particular.

Please do your bit to enable construction of this marvellous and invaluable telescope.

Yours sincerely;
Wayne G. Roberts.
Dear UH,

I’m not a big writer but I just have to say that Hawaii and the world needs these telescopes.

If this were the first building of telescopes on The Mountain I might understand the Hawaiian peoples resistance. But it’s not.

I want Hawaii to be part of the future! I want the jobs and the research of our Universe.

I also want the Hawaiian culture to continue into the future. The world must change and Hawaiian culture must change with it. Be proud of the ancient path finders and build on their discoveries. Let the culture be part of the future not stuck only in the past.

Find a way that the Hawaiian people can benefit from the telescopes. Funding and education directed to the betterment of the people. Be proud of what the Hawaiian people can achieve into the next millennium!

Always with Aloha
E.C. Bolton

I stand by my testimony submitted in December 2021 to approve the Master Plan for the University of Hawaii Maunakea Lands ʻE ʻŌ ʻI Nā Leo.
Dear Board of Directors,

I stand by my testimony submitted in December. I continue to vigorously support the addition of the TMT telescope to the astronomy use of the mountain top provided that the older buildings/refuse are cleared from the mountain to use only the space needed. I want to protect the mountain but I also seek the mountain’s use to add to scientific findings in astronomy, which has always been part of Hawaiian culture. I show respect to Mauna Kea by acknowledging and accepting her best in the world spots for astronomy. Aloha nui loa, Kim

I support adoption of UH's draft Master Plan for Mauna Kea because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT).

Aloha……Marcia Nora

Sent from my iPad
I totally support TMT on Mauna Kea for all the right reasons including Mauna Kea being the single best location for Astronomy in the Northern Hemisphere. Although I am not Hawaiian I know many Hawaiians whom I have worked with and some who are friends and they support TMT also. The anti-TMT Kia‘i have made many false claims about TMT including that Hawaiians are against the building of the telescope on Mauna Kea... I remember when ground breaking for TMT was happening and the leader and, pretty much, the creator of the anti-TMT movement marched in front of Kapuna at the ceremony; berating them and calling them; "infidels". I, as I'm sure many others, felt shocked that anyone other than a terrorist would call others infidels. I understand that eventually about 50% of Hawaiians joined in support of the anti-TMT movement but then Hawaii is now comprised of many cultures as well as Hawaiians...every poll since this debate began showed a state wide support for TMT. All legal challenges against TMT were overruled because the claims of those opposed to TMT were found to be false. I know it shouldn't matter how long someone is a citizen of Hawaii. But I have lived and worked in east Hawaii for 44 years... Please, I implore you to rule on the side of both truth and the majority of our state's citizens.

Sincerely,

Euclid A. LoGiudice

Sent with ProtonMail Secure Email.
As a retired Hawaii educator I fully support the building and implementation of the TMT on Mauna Kea of the Big Island of Hawaii. I have had the privilege of experiencing what Chile has and is accomplishing in the Southern Hemisphere with their telescopes and look forward to having the privilege to do more here in the Northern Hemisphere. What a honor for us to have the TMT as a worldwide center for learning.

Sincerely, Paula Kamiya, Waikola, HI

UH Center for Maunakea Stewardship's draft Master Plan for UH-managed lands on Maunakea

Dear University of Hawai‘i Board of Regents,

I support UH's draft Master Plan because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. I mua Kilo Hōkū and i mua TMT!

I am sure you will see many direct copies of the above message. I have carefully read it to be sure I support the points that it lists. I add that under the UH the Mauna Kea astronomy complex is the best managed in the world. This is partially shown by the many amazing discoveries that have come from Mauna Kea. I know that the UH's draft Master Plan represents many hours of careful study and decisions and I completely support it.

Please continue the great and valuable work.

Alan Mefford
I support the UH draft master plan for Mauna Kea, the continued use of Mauna Kea for astronomy, and construction of the TMT on Mauna Kea. The plan balances preservation of the environment, scenic vistas, recreation, and native cultural practices with the critical scientific endeavors for which Mauna Kea is the best location in the world. It honors the Hawaiian cultural traditions of exploration, astronomy, and adoption of new technologies. It allows for preservation of an important economic sector which provides good jobs, tax revenues, and support for education and paths to a successful future for Hawaii's keiki.

Douglas Perrine

I am an avid supporter of UH continuing to manage Mauna Kea and the TMT. The Hawaiian community should have a voice also & be able to practice their beliefs under UH management. The telescopes and the UH Astronomy Program provide a wealth of knowledge & education for our community not available anywhere else in the world. We should not lose this opportunity to expand our knowledge as our mariners of old did.
My comments on the TMT BoR Meeting.

Comments in Support of UH Master Lease for Mauna Kea

Ronald Lynch <ron@lynch.name>
To: bor.testimony@hawaii.edu

I am writing to voice my support for the adoption of UH's draft Master Plan for Mauna Kea. I believe the University of Hawaii has done a very fine job of managing Mauna Kea as evidenced by the collection of world-class telescopes and acquiring a permit for constructing the Thirty Meter Telescope (TMT).

Astronomy is one of the purest of sciences since its discoveries contribute to our understanding of the universe but can seldom if ever be turned into commercial products. There is no other place on Earth that is more ideal for conducting astronomical observations than Mauna Kea. Although space-based telescopes have some advantages, they are severely limited in size and maintainability leaving a critical role for ground-based telescopes such as those currently on Mauna Kea and the proposed Thirty Meter Telescope.

Astronomy has been and continues to be a "good neighbor" and the entire state benefits from its presence both in prestige and in more immediate ways such as job creation and infrastructure improvements. If UH's master lease is not renewed, it could jeopardize or delay construction of the Thirty Meter Telescope and might call into question the validity of the subleases used by the existing astronomical facilities.

I realize that a subset of the Native Hawaiian community are opposed to this renewal claiming rights to Mauna Kea on religious grounds. While I support the right of protestors to state their objections and to have their day in court (which they did), those who blocked the legally approved construction of the TMT were illegal obstructionist not protestors. Had the courts sided with the protestors they would have have expected the rest of us to respect that decision but, having lost, some of them decided that the court ruling was invalid and implementation should be physically prevented. That is not the way things should work in a civilized society.

Respectfully Submitted,

Ronald A. Lynch

Killing TMT should not even be under discussion. It's the stupidest pathway possible.
Aloha - As an extremely proud ’62 UC Berkeley and a 50+ year resident of Hawaii I write to lend my full support to the building of the Maunakea Telescope on the island of Hawaii. My reasons are many:

- Positive impact on for jobs and opportunities for Hawaii sand Hawaiians
- Positive impact to the State of in terms of reputation for the University and in the world of astronomy
- Ideal location for the future of important astronomical research
- Many opportunities for research and inspiration for Hawaii’s students from elementary through the University level

The benefits for Hawaii and the scientific community are immense. I strongly this important project both for science but also for Hawaii which is my second home.

Thank you for you consideration of my thoughts.

Aloha.

Nancy Taylor
Good morning. I will be brief. I urge your approval of the UH Master Plan for Mauna Kea.

In particular the TMT must proceed as foreseen or our community will forego a wonderful and unique research facility. We cannot allow a shortsighted or limiter approach to astronomy in Hawaii.

I wish we could have it on Haleakala but that will not work.

Thank you and Aloha.

Paul Meyer

Maui
Aloha

My name is Gardner De Aguiar. I am a 57 year old Kānaka Maoli and have lived all my life in Hawaii, the majority here on the Big Island. I fully support the construction of the Thirty Meter Telescope here. We need an industry that will keep our best and brightest people here in the islands, and Astronomy should be that industry. It is an industry that will progress our people and place us on a level playing field with the rest of the modern world. It will provide another industry to rely on besides Tourism -- an industry that makes servants of us. Our ancestors were Explorers and we should continue this tradition in these modern times. Culture and Science can COEXIST on the Mauna.

Gardner De Aguiar
Hilo, Hawai‘i
Aloha, I would like to offer testimony on the master plan. I truly support the continued objectives of astronomy on Maunakea, however I would like to see more accountability in sustainably dismantling telescopes, containing any chemicals from the ground, and protection of places such as Lake Waiau. I also would like to see more reforestation, more focus on subjects that reflect the historical significance of the mauna and protection of fauna and flora such as silverswords, and conjunction with Maunakea Stewardship on restoring mamane trees and other subalpine flora that are endemic and sustainable for the unique habitat of the mauna. Mahalo for your work on this subject and I am looking forward to your final plans. Jessica Kuzmier, Kona
Support the TMT on Mauna Kea

The TMT has my support . . . We need the astronomy industry in Hawaii! Sajean Geer

Robert J. Robinson
Thank you for the opportunity to submit testimony in support of adopting UH's draft Master Plan for Maunakea. This well-crafted Master Plan lays the groundwork for keeping world-class endeavors in astronomy on Maunakea, including currently operating telescopes and the future Thirty Meter Telescope (TMT). UH has continuously improved its management of Maunakea over the last 20 years and has built respect and observance of Hawaiian culture into its plans. I want astronomy to thrive in Hawai`i because it represents the cutting edge of understanding of our place in the universe. This is important for all people on earth. The scientific discoveries that have been made by our telescopes have been first class because Maunakea is a first-class site for them. The various organizations that operate the telescopes, as well as the individual astronomers and support staff, have been wonderful additions to our communities, enhancing educational opportunities for our students and serving as a source of inspiration and pride. In addition, astronomy is a clean industry, which Hawai`i needs as we attempt to diversify our economy. Astronomy under the management of UH has not exploited the people of Hawai`i. On the contrary, it has lifted us all up. This Master Plan will make it possible for these benefits to continue into the future. Mahalo.

Parallel Paths and the TMT Telescope

Graham DeVey, Kihei
August 9, 2019
(January 17 2022 Update)

I’m hopeful we can find parallel paths to success in supporting Hawaiian culture and operating the Thirty Meter Telescope in Hawaii.

My wife and I have lived on Maui 24 years. What keeps us here is the lasting and positive influence of the Hawaiian people on us and the community. We’ve traveled widely, and there are few places in the world where an endemic culture has been so welcoming, so pertinent and important to daily life for all. It’s an ongoing blessing for all of us to learn from Hawaiians.

I was a science teacher at Baldwin High School on Maui for 17 years and taught 3000 or more students—Hawaiian, Haole, Filipino, Japanese, Portuguese, and many mixes of these. In my classroom lessons, I was very careful to share lessons in ways that were parallel to Hawaiian teachings, both in content and method. A native of Chicago, I was unqualified to teach Hawaiian culture and felt that the Hawaiian kupuna were much better for that responsibility, through their knowledge, passion, patience, mana, and ability to nurture the next generations. But I took pride in finding ways to parallel Hawaiian teaching and culture with my own science lessons. Many, many students and families have thanked me for my approach.

Before teaching, I had been a corporate engineer for 19 years, with 200 scientists and engineers reporting to me. Developing the next generations of young technical people became a calling for me and brought me to Maui. While on Maui, I’ve helped lots of youngsters gravitate toward the sciences.

Losing our local talent to the Mainland is a huge drain on our resources and a personal tragedy for me. I work with local tech businesses to help hire and train Hawaii-born workers, who know how to live and thrive here. Years ago, I attended a community hearing regarding a telescope for Haleakala on Maui. A well-meaning, silver-haired Haole woman stood and said, “Jobs jobs jobs! They are lying to us. These telescope people will bring in their own people from the Mainland and overseas, and our kids won’t get the jobs! Our Hawaii kids don’t know how to do this difficult work!” She was actually weeping. I wanted to climb over the table and smack her, wake her up. Yes, our local kids can and will do the work, and our tech companies would prefer to hire them, rather than train outsiders to work in Hawaii for 2-3 years before returning to their own homelands. We can, we will train brilliant students of Hawaii to work here, and technical people of all levels to work alongside them. This is what I devoted 17 years of my own life to support, and I am absolutely not alone.

At this point, many Hawaiians are gathered to oppose building TMT on Mauna Kea. I see many loving faces, people I know well, among the participants. Part of me rejoices to see native Hawaiians coming together, sharing their spirit, uniting as one. It is difficult to apply the Hawaiian teachings of antiquity to a confused new world. But I feel their pride, their joy, their mana in uniting behind a cause.

For me, though, this is a bitter, bitter development and my heart is bruised by the irony that a telescope is the focus of so much cultural upheaval. Perhaps University of Hawaii could have been a better steward of the mountain environment, I truly do not know. What promises were made in the past, and kept or broken, can surely be researched and discussed. From what I know, though, the TMT project has attempted to treat its mountain site with respect, and has tried to be open in negotiating, in good faith, to do what is pono.

I have taken native Hawaiian students to the top of Haleakala to use its telescopes, and these students enhanced the experience of our entire group. One Hawaiian boy, late in the evening, took off his shirt and lay on his back, surrounded by telescopes, feeling the earth beneath him through his skin and absorbing the stars above. He was connecting with many generations, and I was honored to help him find his way there.

So, here we are. We are at an absolutely unique time in terms of opportunity, to find parallel paths to help Hawaiians connect to their culture and to attract locally-grown talent towards astronomy careers in their own homeland. We
must stop accepting the norm of losing our bright youngsters to Seattle, to Silicon Valley, to Wall Street, when we could be helping them use the marvelous TMT telescope to explore, and perhaps challenge or even replace our deepest and most fundamental knowledge of the cosmos, right from Hawaii. I cannot imagine a more rewarding time to work together, honoring and rescuing the past, and preparing the way for educational prosperity for generations to come.

Respectfully submitted,

Graham DeVey

Mauna Kea lease
1 message

Geoff Nelson <suisuncreek@gmail.com>  To: bor.testimony@hawaii.edu  Mon, Jan 17, 2022 at 7:13 PM

This should be simple. It's essential to keep astronomy here. Good for the economy, world class science, and very environmentally aware. Please.

Geoff Nelson
Suisun Creek Vineyards
Support for TMT!

Aloha,

I support adoption of UH's draft Master Plan for Mauna Kea because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). UH has managed Mauna Kea over the last 20 years and while not perfect, I am not aware of any ill intent on their behalf. They performed exceptionally well with respect to obtaining a permit for the construction of TMT and while it is easy to say ‘no’ because of the loud minority, I urge you to stand up and say ‘yes’ to TMT.

TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. I also support removing antiquated sites on Mauna Kea as well in order to not only show good stewardship but also to keep Mauna Kea in pristine order.

Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is part of Hawaiian culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home.

The presence of astronomy on Mauna Kea is a feather in our Hawaii Island community’s cap as well as for our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. I mua Kilo Hōkū and i mua TMT!

Mahalo, Len Gambla
Papa'ikou
Ok, this email from Imua TMT gives me clarity on how to proceed for the upcoming UH Board of Regents meeting on Jan. 20 and how best to respond to keep astronomy and TMT alive on Maunakea:

Aloha TMT Supporters,

We need UH's new Master Plan in place in order to renew UH's Master Lease for Mauna Kea and keep the astronomy industry, including TMT, in Hawaii! The protesters will be attacking the Master Plan at a UH Board of Regents Hearing on January 20, 2022.

Please submit email comments in support of UH's Master Plan here: bor.testimony@hawaii.edu

Please send comments by Wednesday January 19!

If you sent comments previously, please submit again. You can send the exact same comments again. Very little changed in the report. The reason for testifying twice is that at the first hearing in December the Regents could only listen and at this hearing they can vote. Two hearings were required and so we need to submit testimony twice to show community support!

Here is a draft comment to give you ideas. Feel free to use it verbatim or to type your own message from the heart:

I support adoption of UH's draft Master Plan for Mauna Kea because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. I mua Kilo Hōkū and i mua TMT!

Further background:

Building TMT is a matter of time. The protesters' game is to delay as long as possible in the hope that we give up. Part of this strategy involves changing the management system of Mauna Kea, especially removing the University of Hawaii as the manager of Mauna Kea because that would create chaos for the astronomy community. The reason for this is that UH holds a Master Lease from the Department of Land and Natural Resources to manage Mauna Kea and all the telescopes have sub-Leases with UH based on that Master Lease. If UH's Master Lease is not renewed, it will create legal ambiguity as to whether the subleases are still good and possibly push the telescopes off Mauna Kea. Therefore, the protesters believe that stopping UH's Master Lease stops TMT. That is not strictly true, but it will create enough risk that we encourage TMT supporters to support renewal of UH's Master Lease.

UH is currently applying for that lease renewal. Part of that process is the creation of a number of plans, including a Master Plan. The UH Board of Regents is holding a hearing to discuss the Master Plan. The protesters are using this opportunity to attack the plan as a way of attacking TMT and destroying the astronomy industry.

The reality is that UH actually does a really good job managing Mauna Kea. Mauna Kea is some of the best managed land in the state.

Please let UH, and Hawaii, know that we support TMT and astronomy on Mauna Kea.

Thank you.

Mike Muszynski
Removal of UH's Master Lease for Mauna Kea

Strong support for UH Master Plan for Mauna Kea

Barbarak <barbarak@hawaii.rr.com>
To: bor.testimony@hawaii.edu

Mon, Jan 17, 2022 at 9:58 PM

As a concerned resident of the State of Hawaii, I strongly support the UH Master Plan for Mauna Kea and think the Lease should be in the care of astronomers and leaders from UH. I have read the bill in the state house which would leave the care of the telescopes with a board composed of not a single representative from UH nor a single astronomer. Do not allow that to happen. UH has the ability to properly care for all aspects of Mauna Kea and will continue to take positive steps to make Thirty Meter Telescope a reality here. This will definitely be a huge step toward enhancing scientific research and putting Hawaii at the forefront. No other place can offer what Mauna Kea does. Please vote to move Hawaii forward. Keep UH in charge of Mauna Kea. Thank you

Aloha,
Barbara Krasniewski
Stan Krasniewski

I’m an engineer, and thus a believer of science. Science is humanity’s way of understanding how the universe really works: from the unimaginably small to the incomprehensibly large. Scientists study things as fast as light, as slow as rocks and almost everything in between. Why believe in science? When we follow science to do something, we succeed. Engineers exploit that knowledge and experience to make things for people, from the apparently simple like a pin to the mind-bogglingly complex like the International Space Station. Things so big and so complex that no one person is capable of understanding more than a fraction of a subsystem, so far nothing bigger than a transcontinental railroad, or smaller than an atom.

One of these engineering science projects is planned for Hawaii. The planning has taken 10 years so far and the construction will take about seven more. It will occupy about 0.00004% of this island. Less space relative to Mauna Kea than this is to the rest of the newspaper page. Some people feel this is an affront to their belief that the tiniest blemish to what they consider sacred is unacceptable. They are entitled to their belief. Others say that: they are entitled to their belief but have no right to impose it on everyone else. Who is everyone else: the island population, the state population, the scientific community, or the whole world? Jews and Muslims have found a way to share the much smaller Jerusalem Temple Mount, over the centuries Christians have shared it too. Those of a scientific mind maintain that the whole world stands to benefit if the project goes forward, but admit it’s not possible to predict what the benefit will be. Like Ben Franklin said about newfound electricity “Of what use is a newborn baby?”

The International Telescope Committee (ITC) has handled this badly. They claim that they consulted with cultural practitioners before proceeding but as a layman on those issues I see some serious mistakes. First the name TMT sounds like a disease. It’s just an abbreviation for Thirty Meter Telescope, a name that needs explaining and is often explained wrong. Thirty meters, about 100 feet, is the diameter of the primary mirror. No doubt someday the official name will be for some professor of astronomy. Probably someone most of us never heard of. The least they could have done is to give it a Hawaiian name. Just think how much less resistance there would have been. If it was the Kamehameha Telescope there would be no Kamehameha-Go-Home protest signs. King Kalakaua was interested in astronomy and in 1883 had a telescope installed at Punahou School. Kalakaua Telescope would be hard to protest; Hale Kino Hoku O Kalakaua would be even less likely.

The ITC has emphasized the scientific and commercial benefits, all of which are obvious but has done little to promote the cultural connection to Hawaiians whose lives were governed by the stars. There were Hawaiian Royal Hilo Koku, a title which can be translated as Royal Astrologer or Astronomer. Many heiau also served as observatories. Polynesians achieved celestial navigation long before Europeans and they did it without complex instruments. The images collected will be electronic, not requiring observers to peer through a conventional lens, thus they can be shared with the cultural community as well as academia. They could even be on YouTube.

The ITC published and widely circulated promotional artist’s conceptions that until 2017 all depicted the observatory at the peak of the mountain, when the proposed site on the north face is 500 feet lower. Those misleading images still circulate and are the basis for much protest. It’s not like they have not been told. The ITC failed to engage the Hawaiian community. It has lived up to the popular image of eggheads who study more and more about less and less until they know everything about nothing.
I write in my individual capacity to support adoption of UH’s draft Master Plan because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). From what I have heard, UH has done a progressively better job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT.

TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. In my observations, the science community is very respectful and treats the land well. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work.

Astronomy on Mauna Kea is properly viewed as an extension of the Pacific Islands cultures that brought people to these islands. Astronomy has earned high respect. I believe Papa Mau would have supported continued astronomy on Mauna Kea.

Astronomy on Mauna Kea provides opportunities for our youth to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. As an educator, I hope some of my students will have opportunities associated with astronomy and the TMT.

On a personal note, as an undergraduate I, among others, had the opportunity to work for “big science” in a high energy physics lab exploring the nature of fundamental particles. It greatly improved my academic experience and lead to my life-long involvement in computer science-related work. TMT will make possible many such opportunities for the younger generations in Hawaii.

The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please extend the Master Plan and keep astronomy on Mauna Kea.

Respectfully, E Malama Pono,
Daniel C. (Dan) Smith, PhD

To: bor.testimony@hawaii.edu

I support adoption of UH's draft Master Plan for Mauna Kea because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built.

Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work.

Astronomy on Mauna Kea is our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. I mua Kilo Hōkū and i mua TMT!

Respectfully submitted,
Cheryl Tanguay

**Your Testimony/Comments**

As long time residents of the Big Island (since 1999) my wife and I both are strong supporters of going forward with the Thirty Meter Telescope, fully respectful of native Hawaiian rights and concerns and with due diligence in maintaining the site properly. There is no reason science cannot co-exist with religion and cultural practices, as long as both sides respect one another. This is not an oil pipeline or luxury resort built for economic gain. It’s in the pursuit of science and knowledge and, in the long run, wisdom and humility. Thank you.

RE:  Written Comments for Draft Master Plan for the University of Hawai‘i Maunakea Lands (dated January 11, 2022)

INTRODUCTION

The Flores-Case ‘Ohana provides the following comments once again regarding the Draft Master Plan for the University of Hawai‘i Maunakea Lands (“draft plan”). Despite us submitting comments to the University of Hawai‘i (UH) Board of Regents (BOR), Maunakea Management Board (MKMB), and Office of Mauna Kea Management (OMKM) on several occasions pertaining to Mauna a Wākea as well being a petitioner in two contested case hearings pertaining to the Thirty Meter Telescope (TMT), the University of Hawai‘i (UH) failed to contact us and other Kanaka Maoli (aka Native Hawaiian) cultural practitioners during the initial process of drafting this plan several months ago. We were only contacted by email on October 14, 2021 at the ‘eleventh hour’ when comments were due on October 26th. This extremely late attempt at contact is perceived more as an afterthought or as a formality to state that consultation was attempted. There are no excuses why we and other cultural practitioners and kia‘i were not contacted earlier when the UH system, governmental agencies, elected officials, astronomy organizations, commercial tour operators, etc. were given the opportunity to review earlier pre-publication versions of this draft plan.1 At the time, there was insufficient time of only a few weeks to examine this extensive draft plan and also provide comments. The Flores-Case ‘Ohana met with several authors of the draft plan to get further clarity on certain parts of the plan and also provided oral comments on October 21st. This was followed up with a compilation of

1 See: Appendix A - Summary of Outreach and Consultation
written comments that were initially submitted by October 26, 2021. Additional comments are being submitted at this time along with previously submitted comments.

Despite nearly 1,500 individuals submitting comments regarding the draft plan (dated September 2021), the current draft plan (dated January 11, 2020) included revisions that were primarily “minor copyediting changes” without any substantial changes. Why should members of the public including Kanaka Maoli engage in this process when input and comments are systematically dismissed and ignored?

In addition, the communication between the Center of Maunakea Stewardship (CMS) and members of the public is not timely and quite pathetic. Case in point, when this matter was brought forth for a special BOR meeting on December 16, 2021, CMS only sent us an email regarding this meeting the day before on December 15th as noted in the screenshot of the email below.
The UH needs to comprehend that Kanaka Maoli are not just stakeholders, but are actually “right holders” as it pertains to the natural and cultural resources of Mauna a Wākea and that their efforts of proper consultation are seriously lacking.

GENERAL COMMENTS

I. UH continues a pattern of not listening

The title for this draft master plan, *E Ō I Ka Leo* (Listen to the Voice), is in contradiction to how this plan was drafted with the narratives systematically ignoring decades of community and Native Hawaiian concerns and comments regarding the issues surrounding the mismanagement of Mauna a Wākea by the University of Hawai‘i (UH). This same issue was also identified in the *Mauna Kea Science Reserve Master Plan* (“2000 Master Plan”) as noted below:

*Cultural Sensitivity*: Issues of cultural sensitivity were raised repeatedly. The sensitivity of the plan to Hawaiian cultural values was mentioned and questions were raised as to whether community voices would be heard.

Firstly, the voice of the Mauna Kea observatories is clearly the overriding voice throughout this draft plan. Whereas, the voices of Kanaka Maoli (Native Hawaiian) cultural practitioners were excluded during the initial process of drafting this plan as well as with the current version.

Nearly 1,500 individuals submitted comments to the CMS by October 26, 2021. Likewise, the Flores-Case ‘Ohana engaged in this process and provided written comments via email and also provided comments during a video conferencing meeting. However, the revisions made to the current draft plan were primarily “minor copyediting changes” without any substantial changes despite what was stated in UH News, *Public input requested for new Maunakea Master Plan* (Sept. 12, 2021), as noted in the solicitation below.

*The University of Hawai‘i is seeking broad community feedback on a draft of a new Maunakea Master Plan that will guide land-use decisions on UH-managed Maunakea lands.*

*All public comments/feedback will be taken into consideration as the draft is amended before going to the UH Board of Regents for review and possibly further changes before final approval, which is expected in early 2022.*
A policy including guidelines for consultation with Kanaka Maoli communities and organizations should be included in this draft plan. It’s very apparent that UH administrators, programs, and consultants/contracted firms are not familiar with the process and methods of proper consultation with Kanaka Maoli. Examples of how agencies should engage Kanaka Maoli are included as attachments and/or links in the footnote. Even though some of these procedures are applied at the federal level and in Section 106 actions, they are still applicable to the UH in how to engage and consult with Kanaka Maoli.

Why does the UH ask the public for input and comments/feedback, but is not going to apply any constructive critique and relevant suggestions to this draft plan? This is another example of the systematic pattern of the UH not listening. That’s why the draft plan should more accurately be called, *Hoʻokuli I Nā Leo* (Deaf to the Voices).

**II. UH exemplifies unethical cultural appropriation**

This draft plan is a prime example of unethical cultural appropriation and exploitation of Hawaiian culture through the distortion, and misuse of traditional knowledge, cultural expressions, and Hawaiian terms. The Foreword [pp. x-xiv] has taken ʻōlelo noʻeau and clearly distorted the meanings of these traditional sayings outside of their original cultural context. There is an attempt to promote astronomy and further development on Mauna a Wākea through a western worldview cloaked under these Hawaiian sayings. In addition, Hawaiian phrases and terms are peppered throughout this document in an attempt to give an illusion that this is a Hawaiian plan and to make it more palatable to Hawaiians. These displays of misappropriation of Hawaiian cultural elements are disrespectful and are also considered a form of desecration. Likewise, as noted in UH Mānoa’s guidelines, “Cultural appropriation is a form of intellectual plagiarism.” As an institution of higher learning, the UH administration and programs should be held to the same strict ethical standards it expects of their students.

[see attached specific comments regarding the Foreword]
III. UH fails to acknowledge issues with its management

In this draft master plan, the UH failed to acknowledge and formally apologize for their role as the lessee of the Mauna Kea lands that has resulted in cumulative impacts upon its resources that have been determined to be substantial, significant, and adverse.

[see Flores-Case ‘Ohana detailed comments previously submitted October 26, 2021]

IV. UH fails to uphold its statutory and constitutional obligations

The UH continues to fail their affirmative duty and legal obligations to protect the natural and cultural resources, public land trust, and rights of the public and Kanaka Maoli connected with Mauna a Wākea. The overemphasis of the promotion of astronomy development and activities has overshadowed the protection of the afore-mentioned in this draft plan.

[see Flores-Case ‘Ohana detailed comments previously submitted October 26, 2021]

V. UH fails to be in compliance with its management plans

Before UH approves a master plan for those lands that include the Mauna Kea Science Reserve (MKSR) and the mid-level facilities at Hale Pōhaku, the UH should ensure it’s in compliance with the BLNR approved management plans and conditions of the Conservation District rules. Also, it’s important to maintain compatibility and consistency between this draft plan and previously approved management plans. In addition, this draft plan fails to enforce UH’s compliance with these management plans.

[see Flores-Case ‘Ohana detailed comments previously submitted October 26, 2021]

VI. Adverse impacts upon the sacred piko and resources of Mauna a Wākea

The actions of the UH to advance the overdevelopment of astronomical facilities within an environmentally and culturally sensitive landscape has caused adverse impacts and irreparable harm upon the sacred piko as well as the natural and cultural resources of Mauna a Wākea. This draft plan fails to protect the sacred nature of this piko by stripping all references to this aspect that’s been referenced in various accounts. In fact, the 2000 Master Plan included at least 25 references to this mountain’s sacredness. Whereas, this draft plan reduced it to only one flawed reference as such, “for some the mauna is sacred.”

5

Flores-Case ‘Ohana - Draft Master Plan Comments 2
The sacredness of this mountain is well known and documented in several traditional accounts.

[see Flores-Case ‘Ohana detailed comments previously submitted October 26, 2021; also see pages 29-35 extracted from The Report of the Hui Hoʻolohe, 2018]

VII. Adverse impacts upon ancestral akua, kupua, and kupuna

The actions of the UH to advance the overdevelopment of astronomical facilities within an environmentally and culturally sensitive landscape has caused adverse impacts and irreparable harm upon those akua, kupua, and kupuna of Mauna a Wākea. This draft plan fails to protect them from further development.

[see Flores-Case ‘Ohana detailed comments previously submitted October 26, 2021]

VIII. Adverse impacts upon cultural resources and historic sites

The actions of the UH to advance astronomy overdevelopment within an environmentally and culturally sensitive landscape has caused adverse impacts and irreparable harm upon those cultural resources and historic sites connected to Kanaka Maoli and their practices. This draft plan fails to protect these resources and sites from further development.

[see Flores-Case ‘Ohana detailed comments previously submitted October 26, 2021]

IX. Adverse impacts upon Kanaka Maoli customary and traditional practices

The actions of the UH to advance astronomy overdevelopment within an environmentally and culturally sensitive landscape has caused adverse impacts and irreparable harm upon cultural sites and traditional and customary Kanaka Maoli cultural, spiritual, and religious practices. This draft plan fails to make commitments to protect these practices.

[see Flores-Case ‘Ohana detailed comments previously submitted October 26, 2021]

X. UH has failed to prepare an EIS according to HRS, Chapter 343

The UH has not prepared an Environmental Impact Statement (EIS) for this proposed Master Plan in accordance with Hawai‘i Revised Statutes, Chapter 343. Whereas, a Final EIS was completed prior to the UH BOR adopting the 2000 Mauna Kea Science Reserve Master Plan.
SPECIFIC COMMENTS
[see Flores-Case ‘Ohana detailed comments previously submitted October 26, 2021]

CONCLUDING REMARKS

Members of the Flores-Case ‘Ohana have participated at all levels of the public review process pertaining to Mauna a Wākea such as attending board meetings and hearings, submitting testimony, entering into contested case hearings, and filing legal appeals. Based upon our personal experience, it's very evident that the State (inclusive of the Governor, Attorney General Office, BLNR, DLNR, UH, BOR, OMKM, CMS, their contracted law firms, hearing officers, other agencies and individuals) have taken very adversary positions and actions against Kanaka Maoli cultural practitioners which have resulted in detrimental impacts upon our cultural practices and traditions associated with Mauna a Wākea. Likewise, the State has systematically ignored community and Kanaka Maoli concerns dating back to the 1970’s regarding the overdevelopment of the environmentally and culturally sensitive landscape of this sacred mountain.

The written comments presented in this document highlight significant deficiencies and lack of accountability in this review process. Comments put forth are specific to the items presented and were not intended as an assessment of all aspects of this current draft plan as there was insufficient time and resources to do so. Other parts of this draft plan that aren’t commented upon does not constitute an endorsement or agreement with these sections. We reserve the right to further comment on this draft plan in the future. These comments are submitted on behalf of the Flores-Case ‘Ohana.

The true aspect of stewardship entrusted to the UH for our precious and public lands in conservation districts is to ensure that these significant areas are acknowledged, preserved for present and future generations, and not systematically destroyed. In essence, the astronomy development on the summit of Mauna a Wākea has been conducted as a commercial enterprise under the guise of science, educational, and economic opportunities that has resulted in the cumulative impacts upon the natural and cultural resources being substantial, significant, and adverse due to over 50 years of mismanagement.

Everyone is responsible and accountable for their intentions and their actions in the wao akua, this sacred space known to our kupuna as Mauna a Wākea. On this mauna, one must interact in a manner that is pono, upright in the presence of the ancestral connection that binds us through space and time to teachings, traditions and lifeways that have continued because of the kuleana that has been passed down from one generation to the next.
It is important to remember that many peoples, including Kanaka Maoli, have a reverential relationship with the living Earth as our 'Mother' or 'Grandmother'. The cultural perspective of mālama ʻāina and aloha ʻāina, to care for the land and nature with sincere love and respect, is at the heart of Kanaka Maoli cultural traditions. For those who are listening, what is our ʻāina trying to tell us during these times of change?

Kanaka Maoli and their allies throughout Hawai‘i and the world have risen like a mighty wave and are committed to protecting their beloved Mauna a Wākea from further desecration and destruction. To gain an in-depth understanding of the history and issues surrounding this sacred mountain, one should read, *Reclaiming the Past for Mauna a Wākea’s Future: The Battle Over Collective Memory and Hawai‘i’s Most Sacred Mountain*, by Terina Kamailelauliʻi Faʻagau. (see attachment)

In conclusion, this current draft plan is basically the same as the previous draft version without any substantial changes despite comments submitted by nearly 1,500 community members and organizations. This draft plan fails to restore lōkahi (harmony/balance) on Mauna a Wākea. The manner in which the various versions of this draft plan were orchestrated just reaffirmed that the UH is inept of consulting with Kanaka Maoli and the broader community. Likewise, it’s very evident that the UH is incapable of properly managing these culturally and environmentally sensitive lands of Mauna a Wākea even with this proposed plan. As such, the appropriate action would be to transfer the management of these lands to a non-governmental Native Hawaiian entity.
E Ō I KA LEO (LISTEN TO THE VOICE)
FOREWORD

Mauna Kea, kuahiwi kū ha’o i ka mālie.
Mauna Kea, standing alone in the calm.²

This ‘ōlelo noʻeau (Hawaiian proverbs and poetic sayings) recognizes and expresses the sentiment that Maunakea is a source of inspiration to many people. Steadfast always, the mauna (mountain) compels us to gaze upward in search of the unknown, thereby engendering a sense of wonderment and hope.³

Maunakea is linked to the Hawaiian people, their culture, cosmology, and for some the mauna is sacred. Its resources serve as the source for a diverse range of spiritual, research, educational, recreational, and subsistence experiences that define the significance of the mauna. Its extraordinary blend of topographic and atmospheric qualities make Maunakea the most desirable location for ground-based astronomy in the northern hemisphere, and the exceptional combination of alpine and sub-alpine ecosystems in a tropical environment make it ecologically unique as well. If there is truth to the idea that the nature of “place” shapes who we are as a community, Maunakea certainly stands alone as a preeminent example of this.

The quest to understand their beginnings is an inherent drive in all humans, and it has led virtually all cultures to develop rich stories and beliefs regarding their origins. For early Hawaiians, Maunakea was the origin – the first-born island. For modern astronomy, Maunakea provides a window on the origins of the Universe. Integrating these diverse and rich perspectives is both the purpose and challenge with this plan and thus its name, E Ō I Ka Leo (Listen to the Voice), for it is in listening deeply to the many values attached to Maunakea that the knowledge of who we are will be revealed, and our humanity affirmed.

The mauna stands alone, calm in the midst of all forms of storm. It reminds us that our varied interests, as diverse and sometimes divisive as they may be, are in fact woven as lei (garland) through the innate human drive to understand our beginnings, and it is that lei which connects us all as one community.

Strengthening Connections to Place

He ali‘i ka ʻāina; he kauwā ke kanaka.
The land is a chief; man is its servant.³

Foundational values that guide UH’s stewardship and inform E Ō I Ka Leo derive from key tenets of the Hawaiian worldview, which holds that cultural and natural landscapes are one and the same. In this worldview, land is not a commodity but rather an esteemed elder in the Hawaiian family

²Pukui, 1983, No. 2147
³Pukui, 1983, No. 531

Comment: This is another example of cultural appropriation when Hawaiian sayings are inserted into a document to make it appear "cultural" without any relevance to the content. Recommendation: Delete this ʻōlelo noʻeau.
system. The Hawaiian relationship to the land is one of reciprocity: people serve the land which in turn provides for the people. In this view, it is the collective responsibility of UH, Native Hawaiians, the Hawai‘i Island community, and the astronomy facility staff who benefit from Maunakea’s remarkable viewing conditions, to behave in ways that sustain Maunakea’s gifts of spirit, life, discovery, learning, and connection for future generations. The purpose of E Ō I Ka Leo is to help all fulfill their responsibilities to the mauna and to one another.

Part of this responsibility is to integrate the knowledge and traditions of the ancestors into our plans and practices wherever we can. For example, the Kumulipo (an important Hawaiian creation account) describes Maunakea as the first-born mountain son of Wākea (sky father) and Papa (earth mother), who were also progenitors of the Hawaiian race. Maunakea is symbolic of the piko (umbilical cord) of the island-child, Hawai‘i, and that which connects the land to the heavens (Maly, Piko Kaulana:v). Comment: The reference to the Paupani-a(ʻa)kea is incomplete according to source cited. Also, this is another example of cultural appropriation with the inexact comparison to astronomical qualities. Paupaniākea is another name for Wākea referenced in the Kumulipo. The name may mean “End of the closing up of light” or “Opening up of light” (Beckwith, Hawaiian Mythology:294) which in either case accurately describes some of the unique spiritual and astronomical qualities associated with the summit area. Further, as Pukui and Elbert note ‘Āpapalani refers to the “Legendary upper stratum and abode of the gods [or] chiefs of the highest rank, as ni‘aupiʻo.” (Pukui-Elbert:28). In researching these names Pualani Kanahele notes:

“‘Āpapalani is the space above the earth’s atmosphere where the oxygen is thinner. On the mountain it is where the greenery subsides and disappears, thins out like the oxygen. The space below where the daily rain clouds meet the mountain is ‘Āpapanuʻu. Therefore, we have two nomenclatures, the very top is Paupaniākea and ‘Āpapalani below”.

It is UH’s intent that this Master Plan serve as a framework for aligning land use decisions, management actions, and educational programs in a way that strengthens everyone’s connections to this special place by integrating traditional and contemporary knowledge and practice where possible. Achieving balance in the development and management of the resources can be accomplished only when there is a greater understanding and appreciation of the many values held by the community regarding Maunakea.

History, Voice, and Vision

I ka ʻolelo no ke ola, i ka ʻolelo no ka make.

In language there is life, in language there is death.4

Words can heal, words can destroy.

Historians write from a worldview that is shaped by their backgrounds, experience, and values. In Hawai‘i, for many years this meant that American historians often neglected and even denigrated traditional Hawaiian values and culture. That has changed substantially in recent decades with Comment: This is another example of cultural appropriate when Hawaiian sayings are inserted into a document to make it appear "cultural" without any relevance to the content. Recommendation: Delete this ʻōlelo noʻeau. Comment: What is being done through cultural appropriation that grossly distorts traditional Hawaiian values and culture in this Foreword by the author(s) of this plan is similar to what "American historians" have done.

4 Pukui, 1983, No. 1191
Hawaiian voices increasingly expressed and heard. As a result, historical events and political injustices experienced by the Hawaiian people are now well-documented, as are the devastating impacts those experiences have had on the well-being of Hawaiians. The broadened discussion by voices of indigenous peoples has given rise to a movement that seeks to rectify harm caused by these past injustices. **Comment:** The over-development on Mauna Kea has been echoed by many members of the community consistently dating back to the 1970's - not just by Hawaiians.

The resonance of the native Hawaiian kāhea (call) to compensate for past injustices is clearly reflected in the ongoing conflict over the development of the Thirty Meter Telescope (TMT) and with what is viewed as over-development on Maunakea for astronomy in general. At the same time, other community voices have consistently spoken in support of astronomy on Maunakea as an important element of the island’s future economic and educational base. This has motivated many in the community to pursue a vision for Hawai‘i of a more diversified economy that includes greater support for research, education, and technology and less dependence on tourism.

UH believes that whether one supports or opposes astronomy on Maunakea in general and/or TMT in particular, and regardless of whether one believes that UH is the most appropriate agency to manage the upper reaches of the mountain, if Hawai‘i is to achieve its goals of building a more diverse and sustainable future for this and future generations, the path forward is through a knowledge-based economy inclusive of disciplines grounded in science and technology guided by the values of the community. A central question for Maunakea then becomes “do the values of our community allow for Maunakea to be a place where a component of this future (astronomy) is pursued beyond 2033 when conducted under a comprehensive management plan?”

How one answers that question is a function of the diverse and sometimes conflicting views one holds regarding land use, governance, and stewardship. This diversity of opinion was most recently observed in the findings of the Department of Land and Natural Resources’ evaluation of UH’s implementation of the Maunakea Comprehensive Management Plan, which stated that “…the opinions of members of the public regarding UH stewardship of Maunakea has often depended upon whether they support or oppose telescope development on the mauna.”

Unfortunately, E Ō I Ka Leo cannot resolve past historical injustices and the consequences inflicted upon and experienced by Native Hawaiians because of them. Neither can it resolve the fundamental question of whether State and Federal policy should continue to endorse astronomy on Maunakea. While both are critical topics for the State, these are policy issues that UH alone cannot decide, and their resolution is beyond the scope of this Master Plan. What E Ō I Ka Leo attempts is to incorporate the diverse values held by the community into a framework that supports discourse and decisions leading to a balance of interests and responsibilities and a unifying vision for Maunakea as a unique source of learning.

**Comment:** It's true that this plan cannot resolve all "past historical injustices and the consequences," but UH could start by acknowledging and formally apologizing for their role as the lessee of the Mauna Kea lands that has resulted in cumulative impacts upon its resources that have been determined to be substantial, significant, and adverse. In addition, UH could also acknowledge that the UH Mauna Kea managed lands are within the ahupua‘a of Ka‘ohe, moku of Hāmākua, that were designated as Government Lands of the Kingdom of Hawai‘i as the result of the Mahele Act of 1848.

---

Comment: The over-development on Mauna Kea has been echoed by many members of the community consistently dating back to the 1970's - not just by Hawaiians.

Comment: It's true that this plan cannot resolve all "past historical injustices and the consequences," but UH could start by acknowledging and formally apologizing for their role as the lessee of the Mauna Kea lands that has resulted in cumulative impacts upon its resources that have been determined to be substantial, significant, and adverse. In addition, UH could also acknowledge that the UH Mauna Kea managed lands are within the ahupua‘a of Ka‘ohe, moku of Hāmākua, that were designated as Government Lands of the Kingdom of Hawai‘i as the result of the Mahele Act of 1848.

---

Extending the Reach

‘Aʻohe pau ka ʻike i ka hālau hoʻokahi.
All knowledge is not taught in the same school.6
One can learn from many sources.

In 2016, UH collaborated with the astronomy-community in sponsoring the Envision Maunakea Initiative, a series of conversations led by its community partner, Friends of the Future. These conversations identified the aspirations of community members regarding what Maunakea means to them and how they would like to see it stewarded. The intent was to improve UH’s understanding of why Maunakea is important to people and to use this feedback to inform UH and astronomy community’s plans for the future. The conversations were intimate and, in many instances, deeply personal, with the shared experiences documented in The Report of the Hui Hoʻołohe.7

Two key insights revealed by that collaboration have informed this plan. First, all groups agreed that it is a privilege to experience Maunakea, whether that be as a cultural practitioner, recreationalist, tourist, astronomer, commercial tour operator, or other. Maunakea uniformly is described as moving minds and spirit, and lives have been changed because of one’s relationship to the mauna even if for only a single experience. Second, the mauna is the teacher. While each of us brings with us a set of values, a knowledge base, and tools that shape our experience of it, in the end it is the mauna that teaches us both what we came to learn and that which it decides we need to learn.

Maunakea is not just a valuable astronomical resource, it is a unique natural, biocultural, and social ecosystem that has much to teach us about our origins, future, human nature, history, ʻike Hawaiʻi (traditional knowledge), climate, and so much more. E Ō I Ka Leo proposes to broaden the focus of UH’s facilities and resources at Halepōhaku to support the educational and research opportunities that Maunakea offers in fields other than astronomy. The exact nature of the educational opportunities that will be offered are still to be developed, but in concept would be supported by Halepōhaku serving as a multi-disciplinary field station for research and teaching. Facilities and programs offered there would serve as a venue for focused, customized, high-touch, educational programming for college and secondary school students; community, professional, affinity groups; and the general public. It would be a place for integrating multiple disciplines and addressing diverse topics.

Foundational to future educational programming and field work would be building a solid cultural base of ʻike Hawaiʻi and nohona Hawaiʻi (traditional practices) underpinning all offerings and opportunities. CMS and ʻImiloa are partnering to develop this programming in collaboration with other Hawaiian cultural resources across UH and in the community with a common goal of inspiring the intellectual and personal growth of all those who are privileged to visit, learn, and work there.

Comment: The plan fails to disclose that the Envision Maunakea Initiative was a process not open to the general public and that participants were only included by invite.

Comment: In the same manner that this Foreword used Hawaiian accounts inappropriately, it also misrepresented the accounts in The Report of the Hui Hoʻołohe. Firstly, the term "privilege" isn't even found in this report. Instead, several participants make reference to their "experience" as being "profound" and "spiritual." Likewise, participants in this report don't articulate "the mauna is the teacher." In fact, the term "teacher" is only written once on page 16 in a totally different context. The key insights revealed in this report are not what is being presented in this paragraph.

---

6 Pukui, 1983; #203
7 Envision Maunakea, 2018
Ancestral Ways, New Beginnings

_Hahai no ka ua i ka ululāʻau._
Rains follow the forest.\(^8\)
Knowing this, Hawaiians hewed only what was needed.

Hawaiians understand how special Maunakea is as both a source of inspiration and for the value of its unique natural resources. Guided by this perspective, this plan helps demonstrate UH’s relationship to Maunakea as a significant cultural and historical landscape where astronomy is a legally permitted use, commitments are honored, and use of its resources are balanced in order to achieve a sustainable future for the diverse values our community ascribes to this special place.

In recognition of this, E Ō I Ka Leo seeks to ʻāwili (weave) the diverse values Maunakea represents, striving to find balance amongst the community’s many approaches to understanding our origins and encouraging people to collaboratively protect this special place. Finding balance is a never-ending, constantly evolving journey that aligns well with UH’s overall purpose. Accordingly, E Ō I Ka Leo establishes a framework for moving forward with the understanding that, as with all sail plans, the navigators must constantly be aware of, adapt, and adjust to changing winds and seas that we encounter during our journey.

*Comment:* This is another example of cultural appropriate when Hawaiian sayings are inserted into a document to make it appear "cultural" without any relevance to the content.

*Recommendation:* Delete this ʻōlelo noʻeau.
At every session, participants referred to Maunakea as “sacred,” and talked about their spiritual connection with it, but they did not speak with a single voice. Some used “sacred” in a literally religious sense: the ways in which their religion declared the mountain, especially the summit, to be sacred, and to be venerated in religious rituals. For example, a number of participants spoke of the upper regions as wao akua, “place of the gods” (as opposed to the lower regions, wao kanaka, “place of ordinary human beings”).

Although some participants described religious ceremonies they performed at lower elevations, overwhelmingly it was the summit that was referred to as “sacred.” When no particular ceremony or practice was described, participants often described it as “special,” or “spiritual.”

Certainly the summit was sacred in the past. Participants spoke of who would be allowed into the sacred zone, and who would not. Participants commonly linked sacredness to behavior, talking about what should or not be done there in the present—what might be called “proper behavior.”

We heard very little “theology,” and it’s not hard to see why. It was clear to us that although some of our participants were well versed in matters of Hawaiian religion, they mainly talked to us about behavior in the sacred areas.
This series of statements speaks to individual behavior—how to act. Other participants spoke about what should be done (or not done), which is a different matter; we treat that elsewhere.

— It is a spiritual place. A place for the gods. Everyone who’s lived here knows that it’s sacred. You know that when you go up there you’re really connecting with your family. You wouldn’t do anything bad or disrespectful. It’s just an unspoken thing that you know.

— Maunakea is a sacred place, like a religion. For us it’s like going to church. We don’t announce we’re going to church, we just go.

— There are realms that don’t belong to us. When we are niele [nosy], we interrupt forces that work together naturally. It is not for humans; it is not our place, not our kuleana. That realm is talking to us.

— Sacred is about experiencing it. The way you interact is different when a place is sacred. You walk lightly, and you feel that on Maunakea. It’s very personal to you. I don’t have to understand your sacredness to understand that it’s important to you.

One participant gave us examples of what can happen in the sacred regions. We heard a few similar stories:

— These things happened in the highest region. One story is of the two convicted felons who, after their visit [to the summit] with me, cried like babies, went home and became outstanding citizens, fathers, husbands and community members. I also informed you about the broken family (father and son) who for the first time hugged each other and cried like babies. The son straightened out his life, married, bought a house and became a good father. He now maintains a good relationship with his father.

Some participants explicitly linked sacredness with exclusion—in other words, the only proper activities were those associated with Hawaiian religious practices. Others were more inclusive. There was disagreement as to whether a summit kapu meant that no one should go there, or that people should only go there if they had a purpose. Although this wasn’t always stated so directly, the notion that visits to the upper regions should be done for serious reasons was commonly expressed.

— Recently during a solstice ceremony, a gentleman from India asked if he could participate. “Is it OK if I do my own practice?” When it was his turn at the ahu, he participated in his language with his practice. Hawaiian practice is to be one with the earth.
Mālama and aloha everything around us that nurtures us into ancestry. Every native person has the same practice, as long as you know what Hawaiian practice is, join us. Allow sacredness to happen in a sacred place.

— Lots of misunderstanding about sacredness. We are talking about the entire mountain. Whatever that person, they have to understand the summit is sacred/spiritual. It is not to keep off, it is to go to communicate with the supreme being.

— When I think of people telling me what should be up there, I think that’s one man’s opinion. As for the akua, they are in a different realm. What we do doesn’t mean anything to them. They will be here long after we’re gone.

Some participants understood that Maunakea is considered sacred by some, but didn’t feel it personally:

— I’m Native Hawaiian and I don’t think it’s sacred; maybe because that was not passed down to me.

Participants often referred to the tension between the sacred and the secular (meaning recreational, scientific, commercial, and other non-religious activities). It was common for someone to describe Maunakea’s sacred nature and then follow up by talking about what, therefore, should not be done—sometimes very generally, and sometimes very specifically. Here are some statements taking up different themes: influences of the outside world, using the mountain’s power for one’s own gain, needing to have a reason for going, and one that was often repeated in other contexts: go there if you have reason to, but leave as soon as you can.

— The mountain is sacred. So why must we encroach? We keep encroaching whether in ocean and on land. Where is the end? To me, beauty is in the natural setting; that’s beauty to me. To me, a lava field is beauty. Why must we alter the land so much? I’ve seen a lot in 77 years. I’ve never spoken like this before and it is time that I speak. Sacredness and mana of the mountain is the most important thing to me.

— Talking to a kupuna, I asked her about the mauna, and she said “Never been there. I don’t need to go there.”

— My granddaughter asked if I was going to the mountain [for the protests]. I said, “No, and, if you go, make sure you know why. If you’re only going to shout or going because someone else is there, that’s the wrong reason.”
— I agree the mountain is very, very powerful. People can use power in not so good ways, and I believe firmly a lot of people are using power from the mauna in a bad way for their own personal gain. Unless people can stop and look at the power as a positive thing, we will be fighting for a long time.

— [There are] ancient springs on Maunakea only the highest could attend to; ali‘i were allowed in those realms. There was a deep reverence...do not stay or dwell...go and leave.

Although there was explicit discussion of sacred sites at Hale Pōhaku, almost all talk of the sacred, not surprisingly, centered on the summit. At every ‘aha kūkā session we encouraged the participants to talk about the entire mountain, not just the summit. But almost invariably the talk returned to the summit regions.

It was mainly the ranchers, hunters, naturalists, and artists who gave us “the rest of the mountain” statements, and although not many of these touched on the sacred as such, a great many of them touched on the spiritual, almost always in a personal sense.

— People have lived here for generations and their mana is still here. It is in the soil. When we eat from the land, we take that in. Rocks, trees, it’s all here. There is energy. I think the connection to Maunakea is, for a lot of people, like it’s almost a fulcrum where it all comes together in a powerful place.

— I think there are people within every religion, as well as people who are nonreligious, who experience the natural world as sacred, whether they use that term or not. In a sense I believe the whole earth is sacred. But there are certain places that are exceptionally powerful—you can feel the energy. Maunakea is one of those places.

— In times past, there was no separation between the “sacred” and the secular. Religion and life were inextricably intertwined. A multiplicity of deities guided daily lives, were revered and were honored frequently by ritual. We seem to have lost much of our familiarity with the natural world, the wonderful outdoors. We proclaim the heights of our mountains “sacred,” and for many they are indeed places where divinity resides.

More commonly, we heard our participants describe their relationship to Maunakea as “spiritual” in a non-religious way. We said earlier that we learned never to anticipate where a participant’s narrative would go, which was one of our joys. Here’s a hunter’s description complete with a beautiful insight.

— [Maunakea is one of the] sources that ground us, nurture us. It’s hard to explain; it’s more than just the clean air, the feeling
you get sitting on a rock, not thinking about hunting. It has a spiritual impact when you’re up there. It is all simplicity and complexity. It’s perfect. That is one of the treasures we have and we really need to share with the world. It’s that place that our kūpuna could recognize and utilize for their spiritual purposes. Aloha ‘āina and mālama ‘āina are intended to be spiritual acts.

An entomology graduate student relates her understanding of how the mountain works:

— The spirituality is definitely not religious for me. I’m on a cinder cone looking at bugs and even though it rained hours ago, you can hear water percolating underground, the breeze in your face . . . I cannot explain it . . . that’s my definition of spirituality.

Many participants spoke of the quiet, the peace. For example,

— I think it’s the peace, quiet, nature, being close to nature, feeling the cold, connected to the elements and exposed to the elements. There is something we find in nature that makes us feel alive. That is the spiritual side for me.

Some artists spoke of spirituality in these ways:

— As a writer, and what I guess one would call a “nonreligious mystic,” I feel a strong spiritual connection with Maunakea. It is the inspiration for much of my work, even when it does not appear literally in a poem, and an important part of my spiritual practice. I offer my own spirit’s deepest attention to this place. I write poems about the plants, the changing light, the austere, silent spirit of the mountain. Even when the poems are not “about” Maunakea, they aspire to express its unique spiritual integrity, clarity, and space. What I feel when I am on the top is that Maunakea is in connection—in conversation—with the whole universe. It feels unbounded, expansive, full of light, weightless.

From an observatory support staff person, who chose not to talk about his technological life:

— I view the mountain mostly as an artist first, vision and visual artist. When I go up there, especially alone, and park at Pu’u Huluhulu and feel the breeze for a few minutes…it’s not religious. It is respectful to ask permission and then to feel that cold kiss on the cheek; I know my day is going to be OK.
From an artist-turned-astronomy student:

— As an artist, I see comfort in the serenity and natural beauty of Maunakea, as it offers a strange unifying balance between the heavens and our seemingly insignificant selves. The distance from civilization adds to a warm feeling of controlled isolation, which I personally find to be a valuable distraction from everyday stress and chaos. The mountain’s respectable, grand size allows me to experience a new found strength, persistence, balance, and fervor directly resulting from the realization of how weak I am in the grand scheme of the Earth alone, and ultimately in the eyes of the universe. In both ways, Maunakea is sacred, as it allows us to ground ourselves while reaching out to touch the heavens, the realm of the gods and our own creation.

Some participants reported profound experiences that flowed from simple acts, such as stopping on the Saddle Road before dawn and getting out of the car:

— For me one of the most spiritual experiences was on the side of the Saddle Road; I pulled over at 5 AM— I was traveling with a colleague—he jumped out and was speechless—and he talks a lot—speechless. It was what the world’s best planetarium aspires to be: the stars around the perfectly clear sky, still, quiet. It really made you think about how we are so small.

The same person later said,

— If I had to pick one thing that’s most significant—and I had no idea until I went up—it was the silence, such a profound silence. You think you know silence until you go up—your thoughts and your breath—quiet like nothing I ever experienced before or after, the quiet up there.

These notions of sanctity, of spirituality were sometimes intertwined with feelings of cosmic connection, being part of a bigger whole, being close with nature, and feelings of wonder. Some expressed feelings of being laid bare, being exposed to the universe. And for some, the feelings seemed to stem from things that were wholly metaphysical, such as the mana of previous generations imbued in the rocks and land itself.

Interestingly, there was something of a dichotomy in the ways these feelings led people to regard summit access. For some, the sanctity of the summit meant it should be kapu except for religious purposes. One or two went so far as to say even they should not be permitted. For others, the feelings of wonder and connection led them to believe that as long as access itself did not threaten the summit, it was a place that all of mankind could share for its mutual betterment.
We heard what can only be called prescriptions: *Know why you’re going there*, and *If you go there, do what you have to do and leave*. As we will see in the next section, these can be brought to bear on Maunakea’s issues.
Reclaiming the Past for Mauna a Wākea’s Future: The Battle Over Collective Memory and Hawai‘i’s Most Sacred Mountain

Terina Kamailelauli‘i Fa‘agau*

VII. LOOKING TO KA WĀ MA HOPE: THE FUTURE OF MAUNAKEA AND KĀNACA MAOLI .......................................................... 72

I. UNDERSTANDING THE RELATIONSHIP BETWEEN PAST, PRESENT, AND FUTURE

The ‘ōlelo noʻeau (proverb) “I ka wā ma mua, ka wā ma hope” illustrates how Kānaka Maoli (Native Hawaiians)1 orient themselves temporally. “Ka wā ma mua,” literally translated as “the time in front,” describes the time that precedes the present (i.e., the past).2 Likewise, “ka wā ma hope” means “the time in back,” the time coming after the present (i.e., the future).3 Kānaka Maoli appreciate that they “stand[] firmly in the present, with [their] back[s] to the future, and [their] eyes fixed upon the past, seeking historical answers for present-day dilemmas.”4 Recollections of the past, however, “are largely constructed in the present.”5 While looking to history6 can provide insight for the present and into the future, understandings of history depend on “who tells it, how it is told, which stories are shared, the nuances and complexities, [and] the language used.”7

1 “Native Hawaiian,” “Kanaka Maoli,” or “Maoli,” as used in this article, refers to individuals that can trace their ancestry back to the peoples inhabiting the Hawaiian Islands prior to the arrival of Captain James Cook in 1778, regardless of blood quantum. “Kanaka” is the singular, while “Kānaka” is the plural. MARY KAWENA PUKUI & SAMUEL H. ELBERT, HAWAIIAN DICTIONARY 127 (1986) [hereinafter HAWAIIAN DICTIONARY].

3 KAME’ELEIHĪWA, NATIVE LAND, supra note 2, at 22; Wilson-Hokowhitu & Meyer, supra note 2, at 1.

4 KAME’ELEIHĪWA, NATIVE LAND, supra note 2, at 22.

6 “History” is traced back to the Greek “histōr,” meaning “wise man” or “judge.” HISTORY, ONLINE ETYMOLGY DICTIONARY, https://www.etymonline.com/search?q=history&source=ds_search (last visited Feb. 21, 2021). For the purposes of this article, “history” refers to a story, narrative, or relation of incidents (true or false) of the past. See id.

7 Melody Kapilialoha MacKenzie & D. Kapua’ala Sproat, A Collective Memory of Injustice: Reclaiming Hawai’i’s Crown Lands Trust in Response to Judge James S.
And as those social understandings of the past evolve, so do the solutions for present-day problems.8

Traditionally, Kānaka Maoli fixed their eyes on “ka wā ma mua” by looking to their history and ancestral knowledge preserved through mo’okū‘auhau (genealogies), mele (songs), and mo’olelo (stories).9 But near the end of the 19th century, many Kānaka worried their ancestral knowledge would be erased, leaving future generations lost without the cultural kahua (foundation) Native Hawaiians relied upon since time immemorial.10 As American businessmen seized control over the archipelago and Hawai‘i’s native population declined due to foreign-introduced disease, “non-native historians developed and promoted [a] narrative” that failed to “acknowledg[e] . . . [Americans’] hostile takeover of an indigenous sovereign” and instead centered “around sugar planters, the economy, and land and power in Hawai‘i.”11 Prevailing for nearly a century after the 1893 illegal overthrow of the Hawaiian Kingdom, colonial narratives developed and promoted by foreign historians centered around shifting economic and political power in Hawai‘i.12 This “history” crafted by non-natives suppressed Native Hawaiians’ historical accounts, along with their collective memory of the injustice that took place in Hawai‘i.13

Burns, 39 U. Haw. L. Rev. 481, 482 (Summer 2017).

8 See id.

10 SILVA, STEEL-TIPPED PEN, supra note 9, at 7–8.

12 MacKenzie & Sproat, supra note 7, at 483–84.

13 Id. The modern Hawaiian sovereignty movement galvanized Kānaka Maoli’s pursuit of redress for the colonization’s injuries. Julian Aguon, NATIVE HAWAIIANS AND INTERNATIONAL LAW, in NATIVE HAWAIIAN LAW: A TREATISE 352, 360–61 (2015). To get at the heart of the issue, Kānaka Maoli worked to reconstruct history and correct the inaccurate collective memory that was told, and prevailed, for so long. See MacKenzie & Sproat, supra note 7, at 484–85 (citing HAUNANI-KAY TRASK, FROM A NATIVE DAUGHTER: COLONIALISM AND SOVEREIGNTY IN HAWAI‘I 1–24, 31–50 (2004)); KAME‘ELEIWIWA, NATIVE LAND, supra note 2, at 3 n.7 (describing the shift in Native Hawaiian consciousness and the politicization, identification, and capitalization of “Native” during the Hawaiian sovereignty movement). Native Hawaiians began to “expand the law’s narrow framing of
Which aspects of history are told, and how they are told, determine social understandings of justice and how that “justice” will be accomplished. Collective memory—a powerful tool wielded by colonizers for centuries—can be reclaimed and deployed by Kānaka and other Indigenous People to undergird justice claims. Kānaka Maoli today are deliberately looking to the past—through stories, songs, genealogies, and chants—to understand how they can shape and determine their future. They continue the effort to recover parts of history left out of colonizers’ narratives. And while the courts often tell a different version of “history,” Native Hawaiians have persisted in making these recovered narratives public and changing the way others understand what justice for Native Hawaiians requires.

injustice and focus on historical facts to more fully portray what happened and why it was wrong.” Hom & Yamamoto, supra note 5, at 1757. History was more than a way for Hawaiians to look to the past and remember the ways of their ancestors. Id. It became “a catalyst for mass mobilization and collective action aimed at policymakers, bureaucrats, and the American conscience.” Id.

14 Hom & Yamamoto, supra note 5, at 1764.

15 Id. at 1764–65. For instance, the 1993 Apology Resolution’s recognition of the illegal overthrow of the Hawaiian Kingdom bolstered Native Hawaiians’ claims to the Crown and Government Lands of the Hawaiian Kingdom. MacKenzie & Sproat, supra note 7, at 520–21. A result of the Great Māhele in 1848, King Kamehameha III held 2.5 million acres, sixty-percent of the kingdom’s lands, with chiefs holding the remainder of the land. Id. Kamehameha III then divided his lands into two. Id. First, he established the Government lands, about 1.5 million acres, that were “‘set apart forever to the chiefs and people’” of the kingdom. Id. Kamehameha III retained the remaining land, subject to the rights of native tenants, “for himself and his heirs and successors[]” Melody Kapilialoha MacKenzie, Historical Background, in NATIVE HAWAIIAN LAW: A TREATISE 2, 12–14 (2015). These lands were “taken by the United States upon annexation of Hawai‘i as a territory following the 1893 overthrow.” Hom & Yamamoto, supra note 5, at 1766–67 (citing Melody K. MacKenzie, Historical Background, in NATIVE HAWAIIAN RIGHTS HANDBOOK 3, 12 (Melody Kapilialoha MacKenzie ed., 1991)). Upon statehood in 1959, Hawai‘i’s Government and Crown Lands were transferred from U.S. control to the State of Hawai‘i by the 1959 Admission Act. Melody Kapilialoha MacKenzie, Public Land Trust, in NATIVE HAWAIIAN LAW: A TREATISE 76, 79 (2015). These former Government and Crown Lands are subject to the Public Land Trust, which imposes on the state specific fiduciary obligations of due diligence and undivided loyalty in ensuring that trust benefits are maximized for Native Hawaiian and public beneficiaries. See id.; HAW. CONST. art. XII.

16 See Hom & Yamamoto, supra note 5, at 1759–60. For instance, Noenoe K. Silva uses nineteenth and twentieth century texts written by Kānaka in ‘Ōlelo Hawai‘i (Hawaiian language) to examine the gaps left in the historical record authored primarily by non-native outsiders and illuminate the history of Native Hawaiians’ resistance to American imperialism. NOENOE K. SILVA, ALOHA BETRAYED: NATIVE HAWAIIAN RESISTANCE TO AMERICAN COLONIALISM 15 (2004) [hereinafter SILVA, ALOHA BETRAYED].

17 SILVA, ALOHA BETRAYED supra note 16, at 15.

18 See id.; Hom & Yamamoto, supra note 5, at 1759–60.
In October 2018, the Hawai‘i Supreme Court published the decision *In re Contested Case Hearing re Conservation Dist. Use Application (CDUA) Ha-3568 for the Thirty Meter Telescope at the Mauna Kea Sci. Res. (“Mauna Kea II”)* (2018). On the heels of protracted administrative trials (contested case hearings) and earlier litigation, the court’s *Mauna Kea II* decision affirmed the state’s Board of Land and Natural Resources’ ("BLNR’s” or “the Board’s”) grant of a Conservation District Use Permit (“CDUP” or “the Permit”) for the development of the Thirty Meter Telescope (“TMT”) on Maunakea. Many assumed that the court’s ruling finally “clear[ed] the way for TMT to begin construction.” But when developers sought to break ground on the TMT in July 2019, several hundred Kia‘i (guardians) gathered at the base of the Mauna Kea Access

---

22 BLNR administrative rules require that “[n]o land use(s) shall be conducted in the conservation district unless a permit or approval is first obtained from the department or board.” HAW. CODE R. § 13-5-6(d) (2009).

23 *Mauna Kea II*, 143 Haw. at 384, 431 P.3d at 757. All names for the same mountain, “Mauna Kea,” “Maunakea,” and “Mauna a Wākea” are used interchangeably throughout this article. “Mauna Kea” (white mountain) describes the mountain’s snow-covered peak. “Maunakea,” as one word, is short for “Mauna a Wākea” (mountain of Wākea). Consistent with Native Hawaiian tradition, “[t]he University of Hawai‘i Hilo School of Hawaiian Language recommends the one-word spelling[]” *Mauna Kea or Maunakea?*, UNIV. OF HAW. INST. FOR ASTRONOMY, https://www2.ifa.hawaii.edu/newsletters/article.cfm?a=690&n=55 (last visited Feb. 21, 2021). The ‘Ōiwi (Native) place-name “Maunakea” is used throughout this article “to remember and honor the mana, the spiritual and cultural power, that resides in places and the persons . . . associated with those places.” See DETOURS: A DECOLONIAL GUIDE TO HAWAI‘I 16 (Hōkūlani K. Aikau & Vernadette Vicuña Gonzalez eds., 2019); HAWAIIAN DICTIONARY, supra note 1, at 280.

25 MARY KAWENA PUUKI & SAMUEL H. ELBERT, HAWAIIAN DICTIONARY 146 (rev. & enlarged ed. 1986). Behind the movement to protect Maunakea are “self-described ‘protectors, not protestors’ or Kia‘i Mauna (guardians of the mountain).” Noelani Goodyear-Ka‘ōpua, *Protectors of the Future, Not Protestors of the Past: Indigenous Pacific Activism and Mauna a Wākea*, 116 S. ATL. Q. 188–89 (2017). In this article, “Kia‘i” and “Kia‘i Mauna” are used synonymously to refer to protectors holding space on
Road to halt the contentious project’s construction, which they have been successful in doing for nearly two years as of this writing.26

The present conflict engulfing TMT is the culmination of a decades-long battle over the summit of Maunakea.27 This conflict, however, is not simply a battle over a sacred mountain, but a battle over the collective memories of Maunakea and Kānaka Maoli and the injustices committed against them.28 The Hawai‘i Supreme Court majority and TMT stakeholders and supporters recall memories altered by their “hopes and desires” to justify their approval and support for the project.29 On the other hand, Kia‘i, other Kānaka Maoli, and their allies remember and retell a competing collective memory of injustice, one that “integrates the ancestral with claims of right” to Maunakea.30 These present-day constructions of the past will determine the future of Maunakea and other Kānaka Maoli struggles for justice.31 The prevailing collective memory of “ka wā ma mua” will inform what will be done “ka wā ma hope.”32

This article unpacks the incomplete “history” of injustices in Hawai‘i and on Maunakea—as depicted by BLNR’s approval of TMT’s CDUP and reinforced by the Mauna Kea II majority—that the Hawai‘i Supreme Court and TMT supporters deployed to rationalize and clear the way for the telescope’s development.33 Further, this article explains how the prevailing collective memory of injustice will determine the fate of the TMT on Maunakea and shape narratives of justice for Native Hawaiians “ka wā

26 HPR News Staff, Latest Developments as TMT Construction Preparations Begin on Mauna Kea, HAW. PUB. RADIO (July 15, 2019), https://www.hawaiipublicradio.org/post/latest-developments-tmt-construction-preparations-begin-mauna-kea#stream/0. In March 2020, one of two countries using public funds to finance the TMT, Japan suspended its yearly funding, “citing the stalemate over [the project’s] construction on Mauna Kea.” Ku‘uwehi Hiraishi, Japan Suspends TMT Funding Citing Mauna Kea Stalemate, HAW. PUB. RADIO (Mar. 3, 2020), https://www.hawaiipublicradio.org/post/japan-suspends-tmt-funding-citing-mauna-kea-stalemate#stream/0. In response to the suspension, Kia‘i delivered a letter to the Consulate General of Japan reaffirming their stance on protecting the mountain from the TMT. Id. Kia‘i Lanakila Mangauil urged Japan to divest money from the project and instead “reinvest back into their own communities and help their own people.” Id.

ma hope.” Part II explores collective memory and explains its power and potential for justice struggles in Hawai‘i with an example from Rice v. Cayetano (2000). Part III examines the cultural and historical significance of Maunakea to Hawai‘i and Native Hawaiians as well as the history of Western astronomy on the mountain’s summit. Part IV provides the legal background of this battle over Maunakea and outlines the State of Hawai‘i’s affirmative duty to protect Native Hawaiian traditional and customary rights. Parts V and VI illuminate the recent and ongoing battle over the collective memory of injustice of Maunakea. Part V closely examines the Mauna Kea II majority and dissenting opinions and their effects on public perception surrounding Maunakea and justice for Native Hawaiians. Part VI then brings light to Native Hawaiians’ oft-ignored familial, spiritual, and legal claims to Maunakea—with examples from Kia‘i’s testimony before BLNR, the court, and the public—to combat the narrative that has paved the way for the approval of the TMT. Finally, Part VII concludes this article by looking to “ka wā ma hope” and contemplating the future of Maunakea.

II. COLLECTIVE MEMORY’S ESSENTIAL ROLE IN SHAPING NARRATIVES OF JUSTICE FOR KĀNAKA MAOLI

Kānaka Maoli identity and understanding of the present derive from mo‘olelo. Native Hawaiian Professor and Scholar Lilikalā Kame‘eleihiwa explained that “every aspect of the Hawaiian conception of the world is related by birth, and as such, all parts of the Hawaiian world are one indivisible lineage . . . Hawaiians patterned their behavior after the ancestral example found in their genealogy.” That past informed their future. But since Western contact, the “historical portraits” often used to describe Hawai‘i were crafted primarily by non-native voices that reflect Eurocentric views.

Since “Western views [of history] have [largely] predominated,” those narratives play a significant role in Native Hawaiians’ lives. Eric K.

34 See infra Parts V–VI.
36 See KAME‘ELEIHIWA, supra note 2, at 1 (describing how “Hawaiian identity is, in fact, derived from” the mo‘olelo and “cosmogonic genealogy” of the Kumulipo); Nakanelua, supra note 9, at 198–99 (“[U]nderstanding Mo‘o [and mo‘olelo] as a paradigm, the foundation of Maoli understanding of law, culture, and society, is critical to the way Kānaka create and re-create community identity.”).

39 Id. at 3.
40 Id. at 4.
Yamamoto, Fred T. Korematsu Professor of Law and Social Justice at the William S. Richardson School of Law, also recognized how historical narratives impacted Kānaka’s sense of identity: “‘Who we were and what happened’ are integrally connected to how Native Hawaiians were sometimes pejoratively described by white American missionaries (savages and pagans), businessmen (incompetents), and politicians (a dying race), and later by racial immigrant groups (lazy and uneducated).”41 Equally important is the way these predominating narratives or stories determine what justice entails for Native Hawaiians.42 As succinctly put by Columbia University Professor Edward Said:

[Stories are] the method colonized people use to assert their own identity and the existence of their own history. The main battle in imperialism is over land, of course; but when it came to who owned the land, who had the right to settle and work on it, who kept it going, who won it back, and who now plans its future—these issues were reflected, contested, and even for a time, decided in narrative.43

Understanding the inherent power in narratives and how they are framed, Dr. Kame‘eleihiwa questioned the flawed accounts peddled by non-native Westerners:

[H]ow can anyone write an honest history? Moreover, how is it possible to write an accurate, or even approximate, replay of life when writing the history of a people from the viewpoint of another completely distinct culture, or from another completely different time?44

Professor Yamamoto observed that, akin to Native Hawaiians, other groups also understand how the past informs present and future constructions of justice and redress.45 Those groups seeking social justice “tend to define injustice more broadly” than the “progressive lawyers” whose ideas of injustice are framed within the narrow confines of legal doctrine that “narrows public imagination and debate.”46 To achieve mass mobilization and collective action, social justice groups must “expand the law’s narrow framing of injustice and focus on historical facts to more fully portray what

46 Id.
happened and why it was wrong.” As Professor Yamamoto noted, however, both “progressive lawyers” and social justice groups often fail to address the crux of how collective memory operates.

A. Understanding Collective Memory

More than historical facts and events simply “retrieved from a brain storehouse,” memories are “constructed and continually reconstructed.” Memories are always being reshaped “by complex interactions among people and their social environments.” Both individuals and social groups “often subconsciously choose what to remember in ways that reflect their desires, hopes, and the cultural norms of their social environment.”

Moreover, memories of the past are framed within the context of culture. These culturally-framed memories are conveyed and perpetuated through narratives.

Narrative structures derive from purposeful constructions of collective memory and “shape how society constructs and relates to individual and group identity claims.” “Direct experiences, cultural forms, institutional practices, and political ideology generate the underlying, or structural, narratives.” These narratives serve as a lens through which groups understand history and frame their relationship of the past to the present. But “this lens is constructed,” and thus “remembering’ the past is neither innocent nor objective.” Historian Peter Burke’s observation illustrates how “historical memory is selective”:

A way of seeing is a way of not seeing, a way of remembering is a way of forgetting, too. If memory were only a kind of registration, a “true” memory might be possible. But memory is a process of encoding information,

56 Id.
57 Id.
storing information and strategically retrieving information, and there are social, psychological, and historical influences at each point.\textsuperscript{58}

Figuring out “what happened and who we were” goes beyond factual discovery and is “an act of historical and political construction.”\textsuperscript{59} The daughter of Holocaust survivors, writer Eva Hoffman observed that the understanding of any event is “shaped by contemporaneous values and ideological pressures.”\textsuperscript{60} For instance, historian Peter Novick examined how “America’s preoccupation with the Holocaust . . . is motivated as much by political as moral concerns.”\textsuperscript{61} The Holocaust “has been treated as a political issue and deliberately used for political ends.”\textsuperscript{62} Therefore, to effectively use collective memory to understand present-day justice struggles, a “lawyerly approach”—digging historically to find out what happened and applying those facts to show a violation of established rights norms—will not suffice.\textsuperscript{63} Instead, “[t]he digging we must do is not only into the documentary archives, but also into the archives of mind, spirit, and culture—then and now.”\textsuperscript{64}

Since “framing justice is about social memory,”\textsuperscript{65} social justice lawyers and activists often aim to refute inaccurate historical narratives and take a more active role in constructing group memories “as we go, within a context of not only rights norms but also larger societal understandings of injustice and reparation.”\textsuperscript{66} Collective memory allows groups demanding justice to dismantle the inaccurate narratives—told and retold by individuals, institutions, and nations—that “refram[e] shameful past acts” and deflect blame and responsibility.\textsuperscript{67}

B. Collective Memory’s Power and Potential for Justice Struggles in Hawai‘i

For Kānaka, recounting “what happened” in Hawai‘i’s past remains difficult for several reasons.\textsuperscript{68} Many stories traditionally passed down between generations of Kānaka Maoli were lost when the native population was decimated by foreign-introduced disease.\textsuperscript{69} With America’s increased presence in Hawai‘i, Western narratives and institutions predominated, suppressing Hawaiian language and culture.\textsuperscript{70} And, as Professor Yamamoto explained,

Making the task of recounting even more difficult is the present-day reality that native Hawaiians are building their own new understandings of ‘what happened’ and ‘who we were’ partly in order to claim ‘what is rightfully ours.’ This linkage of events to identity and then to rights implicates contemporary notions of nationhood.\textsuperscript{71}

Other scholars, including Dr. Kame‘eleihiwa, similarly recognized and emphasized how history is tied to identity, which are tied to rights claims and justice.\textsuperscript{72} Unpacking and examining “history”—especially when inscribed into law—thus becomes a crucial task because of collective memory’s use as a strategic tool that justifies upholding or denying rights to certain groups as well as promoting or thwarting notions of justice.\textsuperscript{73} Professor Yamamoto outlines five strategic points to translate collective memory into practical strategy that can be deployed to realize the power and potential of collective memory for justice struggles.\textsuperscript{74} First,

\bibitem{74} \textit{Id.} at 1764.
\end{thebibliography}
“justice claims of ‘right’ start with struggles over memory.”\textsuperscript{75} “Collective memories differ depending on locale, group experiences, and cultural norms.”\textsuperscript{76} Since different groups remember the past differently, they often disagree on what injustice looks like and what justice entails.\textsuperscript{77} Therefore, justice depends upon “critically engag[ing] the dynamics of group memory injustice.”\textsuperscript{78}

Second, the “[g]roup memory of injustice is characterized by the active, collective construction of the past.”\textsuperscript{79} Memory is not composed of a recollection of past events.\textsuperscript{80} Instead, it involves present-day constructions that are built and altered, not simply found.\textsuperscript{81} Collective memory “emerges from interactions among people, institutions, media, and other cultural norms.”\textsuperscript{82}

Third, “[t]he construction of collective memory implicates power and culture.”\textsuperscript{83} Decisionmakers have the power to decide which memories ought to be acknowledged, and those prevailing memories shape justice claims.\textsuperscript{84} “[S]truggles over memory are often struggles between colliding ideologies, or vastly differing world views.”\textsuperscript{85} Challenges to the prevailing historical narratives are met with “fierce opposition by those in power” who “seek[] totally to discredit the developing memory proffered by outsiders” or who “seek[] to partially transform [an] old memory . . . into a new memory . . . that justifies continued hierarchy.”\textsuperscript{86}

Fourth, “[t]hese contests over historical memory regularly take place on the terrain of culture—of which legal process, and particularly civil rights adjudication, is one, but only one, significant aspect.”\textsuperscript{87} Memories of past events, persons, and interactions are culturally-framed—“they are subject to socially structured patterns of recall, they are often triggered by

social stimuli and they are conveyed through communal language."\(^{88}\) Legislators, judges, and other decisionmakers “determine[] which cultural practices, images, and narratives formally frame the memories. And those memories in turn legitimate future understanding of and action on justice claims.”\(^{89}\)

Finally, “it is always important for those outsiders to conceive of law and legal process as contributors to—rather than as the essence of—larger social justice strategies.”\(^{90}\) Activists seeking justice have dual goals: “to achieve the specific legal result and to contribute to construction of social memory as a political tool.”\(^{91}\)

Together, these strategic points “underscore collective memory’s powerful role in justice struggles in Hawai‘i and beyond.”\(^{92}\) They call attention to the ongoing battle over collective memory of injustice and the strategic import of deploying collective memory to bolster justice claims.\(^{93}\) In courts in particular, judges hold power to shape collective memory, which, when inscribed into case law, legitimizes “socio-legal or cultural narratives, or stories, about groups, institutions, situations and relationships.”\(^{94}\) The “prevailing, or master, narrative provides a principle lens[] through which groupings of people in a community see and interpret events and actions.”\(^{95}\)

Thus, the battle over the memory of Maunakea poses major implications for not only Maunakea but also Native Hawaiians themselves.\(^{96}\) The battle over Maunakea—both in and outside of the courtroom—illustrates these five strategic points and collective memory’s significant role in the struggle for justice for Kānaka Maoli.\(^{97}\)

Professor Yamamoto deployed \textit{Rice v. Cayetano} (2000) as an example to illustrate how collective memory can perpetuate injustice, and the controversial majority opinion authored by Justice Anthony Kennedy is representative of the types of narratives and collective memories told by

non-natives that Native Hawaiians have sought to correct.\(^9\) In 1978, a result of the Constitutional Convention, Hawai‘i voters established the Office of Hawaiian Affairs (‘OHA”) and its Board of Trustees comprised of and elected by Native Hawaiians.\(^9\) Catalyzed by the efforts of Native Hawaiian Convention participants who “saw the convention as an opportunity to further the goal of self-determination,” \(^1\) Hawai‘i’s diverse peoples overwhelmingly approved the 1978 state constitutional amendment creating OHA and its indigenous Hawaiians-only voting structure.\(^1\) A unique governing entity independent from the state’s executive branch, OHA holds broad powers to “acquire, hold, and manage property; to enter into contracts and leases; to manage and invest funds; and to formulate public policy relating to Hawaiian affairs.”\(^1\)

In 1996, Harold Rice, a rancher from Hawai‘i Island, sued then Hawai‘i Governor Ben Cayetano to invalidate OHA’s voting process and claimed that it was nothing more than a special privilege for a racial minority in violation of the Fifteenth and Fourteenth Amendments.\(^1\) The U.S. Supreme Court agreed, in part, with Rice’s argument and struck down the voting system.\(^1\) The majority concluded the state’s “denial of [Rice’s] right to vote to be a clear violation of the Fifteenth Amendment.”\(^1\)

How was the Court able to reconcile the history of injustice in Hawai‘i with its invalidation of a program clearly intended to rectify injustice? As Professor Yamamoto elucidates, “the Court majority generated a remarkable narrative reminiscent of the familiar tale of how Western culture and law, more or less naturally, ‘civilized’ the native savage

\(^1\) Rice, 528 U.S at 499.
Justice Kennedy’s majority opinion contorted history and, in effect, what was required to achieve justice in Hawai‘i. The majority’s narrative euphemized the impacts of Western colonists in nineteenth century Hawai‘i. It framed a narrative that it claimed was only a “neutral” and “uncontroversial” recounting of past events. Characterizing “white American missionaries and businessmen [not] as foreign settlers but rather as natural heirs of Hawai‘i,” the majority intimated that there were no negative effects of U.S. colonization. All things considered, there was no injustice for OHA to remedy.

The majority’s inaccurate retelling of Hawai‘i’s history and its “dissonant framing of the ‘injustice’” has effectively left other laws and programs intended to benefit Native Hawaiians vulnerable to legal challenges and potential invalidation. A devastating blow to Native Hawaiian self-determination:

106 Hom & Yamamoto, supra note 5, at 1773.

107 See Rice, 528 U.S. at 498–511. Justice Kennedy detailed, and analogized, the histories of the voting structure in Hawai‘i and the events surrounding the Fifteenth Amendment. Id. at 511–14. Despite the vast dissimilarities between those histories, Justice Kennedy then likened OHA’s voting scheme to pre-Reconstruction voting restrictions and an Oklahoma voting law that was struck down for its “subtle” attempt to limit voting to white citizens. Id. The majority found that OHA’s voting structure “[rested], in the end, on the demeaning premise that citizens of a particular race are somehow more qualified than others to vote on certain matters.” Id. at 523. Justices Stephen Breyer and David Souter’s concurrence went further and opined that OHA’s electorate does not resemble that of a federally recognized Indian Tribe and that “there is no ‘trust’ for native Hawaiians here.” Id. at 524–37 (Breyer, J., concurring).

108 Hom & Yamamoto, supra note 5, at 1773.

109 Id. at 1772.

110 Id. at 1775. For instance, the Court characterized (pre-contact) life in Hawai‘i as:

[N]ot “idyllic” because there was internecine warfare and. . . kings could order the death or sacrifice of any subject.” . . . [T]he majority blandly described often greedy Western encroachment as a “story of increasing involvement of westerners in the economic and political affairs of the Kingdom.” . . . [T]he Court intimated that the overthrow was justified by Queen Lili‘uokalani’s undemocratic actions . . . [T]he majority alluded to the “Chinese, Portuguese, Japanese, and Filipino” migrations to Hawai‘i and how these immigrants faced, and overcame, discrimination.

Id. at 1773–74.

111 See id. at 1775.

112 Id. at 1771.

113 See id. Authored by Justice John Paul Stevens’ and joined by Justice Ruth Bader Ginsburg, the dissenting opinion criticized the majority’s holding for failing to understand the significance of Hawaiian history and “rest[ing] largely on the repetition of glittering generalities that have little, if any, application to [Hawai‘i’s] compelling history.”
Rice and the collective memory it legitimates distort progressive civil rights and erase human rights. They twist a history of white racial dominance into a justification for present-day equality for Freddy Rice... By narrowly framing history to legitimate its decision, the Supreme Court generated precedent for forthcoming cases that undermines the principle of justice through reparation.114

This example demonstrates that, more than a tool for “retrieving group histories[,]” collective memory of injustice is “construc[ed] as we go, within a context of not only rights norms but also larger societal understandings of injustice and reparation.”116 Professor Yamamoto’s analysis of Rice is but one example evincing the power of collective memory for Native Hawaiians seeking to rectify wrongs perpetuated by revisionist histories and colonial narratives.117

III. KA PIKO KAULANA O KA ‘ĀINA: THE FAMOUS SUMMIT OF THE LAND

A. The Significance of Maunakea to Hawai‘i and Kānaka Maoli

Mauna a Wākea’s allure is uncontested—people from Hawai‘i and abroad admire the mountain’s beauty. But Kānaka Maoli’s connection to Maunakea is unique from those of other locals, astronomers, or tourists. That connection—Maunakea’s historical and cultural significance to Kānaka—is embedded in their many stories, songs, genealogies and

Rice v. Cayetano, 528 U.S 495, 527–28 (2000) (Stevens, J., dissenting). Justice Stevens based his dissent on Congress’ analogous treatment of Native Americans and Native Hawaiians and the reality that OHA’s trustee system and electorate “violate[d] neither the letter nor the spirit” of the Fourteenth and Fifteenth Amendments. Id. at 538. Native Hawaiians’ legal status and OHA’s technically being an “arm of the state” should not have precluded the state from implementing OHA’s voting scheme, especially given that Native Hawaiians’ lack of “any vestigial native government” was “a possibility which history and the actions of [the United States] deprived them.” Id. at 535. The dissenters accosted the majority’s flawed collective memory. See id. They understood that, through OHA’s implementation and voting scheme, Kānaka Maoli sought neither “privileges [n]or handouts.” See Hom & Yamamoto, supra note 5, at 1775.

114 See Hom & Yamamoto, supra note 5, at 1777.

116 Id.; Hom & Yamamoto, supra note 5, at 1764.

117 See, e.g., Nakanelua, supra note 9; MacKenzie & Sproat, supra note 7.
Most notably, the Kumulipo, “an oli of our beginnings” and “arguably the most important literary work in the Hawaiian canon[,]” traces Kānaka Maoli’s lineage directly back to Maunakea.

Traditionally passed down through generations orally, the Kumulipo imparts the story of Papa (earth mother) and Wākea (sky father) from whom the islands were born and all Kānaka Maoli descended. Wākea and Papa bore their first human daughter, Hoʻohōkūkalani. Hāloanaka—Wākea and Hoʻohōkūkalani’s first child—was born prematurely, buried in the earth, and grew into the first kalo (taro) plant. Wākea and Hoʻohōkūkalani then delivered a second son, Hāloa, who became the first Kanaka, aliʻi nui (high chief), and the progenitor of all Kānaka Maoli.

As McDougall explains:

A 2,102-line mele koʻihonua (creation and genealogical chant), the Kumulipo provides an evolutionary account of creation and traces the beginnings of the Kanaka Maoli concept of the universe, from degrees of darkness to the births of plants and animals, to the births of the gods from whom came the first Kānaka. Although the Kumulipo is not the only moʻokūʻauhau, nor is it the only one relating the creation of the universe, the Kumulipo is thought to be most complete and best preserved.

The Kumulipo was first transcribed in 1889 for King Kalākaua. Several translations of the Kumulipo were subsequently produced, including one by Queen Liliʻuokalani in 1897. The most popularly used translation today was provided by Martha Warren Beckwith in 1951. Though often used and cited to, some scholars have criticized Beckwith’s version as being translated through a primarily Western lens.

With over 300 varieties in Hawai‘i, kalo, or taro, has been a staple of Maoli diets “from earliest times to the present.” HAWAIIAN DICTIONARY, supra note 1, at 123.

Because the union of Papa and Wākea resulted not only in Maunakea’s birth but also the birth of the Native Hawaiian people, Native Hawaiian scholar Leon Noʻeau Peralto attributes Maunakea as “the birthplace of a Kanaka Maoli consciousness.” Emalani Case, I ka Piko, To the Summit: Resistance from the Mountain to the Sea, 54 J. PAC. HS. 166, 174 (2019) (citing Leon Noʻeau Peralto, Mauna a Wākea: Hānau Ka Mauna, the Piko of Our Ea, in A Nation Rising: Hawaiian Movements for Life, Land, and Sovereignty 233, 234 (Noelani Goodyear-Kaʻōpua, Ikaika Hussey, & Erin Kahunawaikaʻala Wright, eds. 2014)).
Before Hoʻohōkūkalani’s birth, Papa and Wākea bore their first-born mountain son, Mauna a Wākea.128 A mele hānau (birth chant) composed for Kauaikaoauli (Kamehameha III) recounts Maunakea’s creation and divine origins:

O hanau ka Mauna a Wakea,
O puu aʻe ka Mauna a Wakea.
O Wakea ke Kane, o Papa, o Walinuu ka wahine.
Hanau Hoohoku, he wahine,
Hanau Hāloa he ‘lii
Hanau ka Mauna, he keiki Mauna na Wakea

*Born is the Mauna a Wākea,*
*The mountain of Wākea buds forth.*
*Wākea is the male, Papa Walinuʻu is the female.*
*Born is Hoʻohōkū, a female,*
*Born is Hāloa, a chief,*
*Born is the Mauna, a mountain-child of Wākea.*129

Imbued with “multiple layers of kaona, or veiled meaning,” these genealogical stories shape Native Hawaiians’ connection to ‘āina (land)130 and to Maunakea.131 By “blur[ing] the boundaries and break[ing] down hierarchies between humans and nonhumans,” the Kumulipo, along with accompanying mele and moʻolelo, teaches that “we are all interconnected and genealogically part of the ‘āina.”132

The Papa and Wākea lineage teaches the fundamental lessons, traditions, and responsibilities of Mālama ‘Āina (caring for the land) and Aloha ‘Āina (loving the land).133 It conveys the Maoli understanding that

129 Id.
132 See McDOUGALL, *supra* note 118, at 95.
133 See KAMEʻELEIHIWA, *supra* note 2, at 25. A longtime member of the Protect Kahoʻolawe ʻOhana, Professor Davianna Pōmaikaʻi McGregor describes “Aloha ʻĀina” as having:

[T]he different layers of meaning: It is the practice of caring for the land and the resources of the land. It is the practice of honoring the
“[b]oth the [‘āina] and Kanaka are instilled, at birth, with particular kuleana [privileged responsibilities] to each other.”

Kānaka Maoli’s familial relationship to the land is the foundation of Native Hawaiians’ “desire [not] to conquer his elder female sibling, the ‘Āina, but to take care of her, to cultivate her properly[.]” This responsibility is reciprocated: “[s]o long as younger Hawaiians love, serve, and honor their elders, the elders will continue to do the same for them, as well as to provide for all their physical needs.”

As described by Native Hawaiian Scholar and Professor Emalani Case, Native Hawaiians understand themselves as “belonging to” the ‘āina, including Maunakea, rather than having “possession of” it.

More than a genealogical record, these ancestral teachings “firmly establish our history and belonging to the pae ‘āina (archipelago), with all of the kuleana, or privileged responsibilities, associated with this familial belonging.” With ‘āina as an ancestor, pono (balance, perfect order)

spiritual life force of those natural resources and honoring them through worship or through gifting, but also through a demeanor and manner that is respectful of those resources. And then at certain key political points it has meant that those who are aloha ‘āina are people who are nationalists and have a strong sense of patriotism for Hawai‘i and the land of Hawai‘i and Hawai‘i Pae ‘Āina.

Peralto, supra note 127, at 234. “Kuleana” translates to “right.” It also translates to both “privilege” and “responsibility.” HAWAIIAN DICTIONARY, supra note 1, at 179.

KAME‘ELEIWIHA, supra note 2, at 25. “[T]he kalo plant, which was the main staple of the people of old, is also the elder brother of the Hawaiian race, and as such deserves great respect.” Id.

Id. For “it is the ‘Āina, the kalo, and the Ali‘i Nui who are to feed, clothe, and shelter their younger brothers and sisters, the Hawaiian people,” Id.

Case, supra note 127, at 180.

McDOUGALL, supra note 118, at 94.

HAWAIIAN DICTIONARY, supra note 1, at 340. Dr. Kame‘eleihiwa describes pono as “denot[ing] a universe in perfect harmony.” KAME‘ELEIWIHA, supra note 2, at 25. Richard Kekuni Blaisdell further elaborates on this pono relationship between Kānaka Maoli and ‘āina:

[W]e are lōkahi with everything in our cosmos, inherently, because we have the same parents and therefore we are all siblings, and therefore, we must respect, revere, everything in our environment, and that is why we cannot destroy and pollute, contaminate, because to do this is to hurt ourselves. That is the essence of being Kanaka Maoli. In our thinking and action, the greatest virtue is to maintain proper pono, that is proper relationships, harmony within ourselves and others with everything in
exists so long as the land takes care of Kānaka Maoli and Kānaka Maoli take care of the land.140

While Native Hawaiians understand that all land must be taken care of, Maunakea also has particular significance to Kānaka Maoli because of its divine origin.141 As the piko (naval) of Hawai‘i, the summit of Mauna a Wākea is “where Kanaka Maoli can be closest to Wākea, the ancestor whose domain is the sky”142 and “where heaven, earth, and stars find union.”143

Moreover, the summit of Maunakea, with an elevation of 13,803 feet,144 is a wahi pana (storied place)145 that lies within wao akua (space of the gods).146 Pono required that Kānaka respect the bounds of wao akua and refrain from developing structures within or altering the landscape of the cosmos.

MCDougall, supra note 118, at 95 (quoting Aloha Quest: Kumulipo/Hawaiian Cosmos (KFVE television broadcast Dec. 9, 1999)).

140 See Steele, Professor Jon Osorio, supra note 130.

141 Case, supra note 127, at 168.

142 Id. Piko is also translated to mean the “summit or top of a hill or mountain.” HAWAIIAN DICTIONARY, supra note 1, at 328. “Mauna Kea can be considered the piko ho‘okahi, the single navel, which ensures spiritual connections, genealogical connections, and the rights to the regenerative powers of all that is Hawai‘i. It is from this ‘world navel’ that the Hawai‘i axis emerges.” KEPĀ Maly & ONAONA Maly, MAUNA KEA, KA PIKO KAULANA O KA ‘ĀINA (MAUNA KEA, THE FAMOUS SUMMIT OF THE LAND) ii (KUMU PONO ASSOCIATES, LLC 2006). For more information on piko, see id. at i–ii (describing the significance of piko and explaining how Native Hawaiian understandings of piko provide a better understanding of the importance of Mauna a Wākea as a “piko o ka moku” (navel of the island)).

143 Maly & Maly, supra note 142, at i (“Not just any heaven, but Wākea, not just any earth, but Papahānaumoku, and not just any constellation . . . but Ho‘ohōkūkalani, whose children descend and return to the stars.”).

144 Measured from sea level, Maunakea stands as the tallest mountain in the Pacific. See Flores-Case ‘Ohana’s Proposed Findings of Fact, Conclusions of Law, and Decision Order, A Contested Case Hearing Re Conservation Use Application HA-3568 for the Thirty Meter Telescope at Mauna Kea Science Reserve 46 ¶ 341 (May 30, 2017) [hereinafter Flores-Case Proposal]. From its base on the ocean floor to its peak, Maunakea is nearly 33,000 feet tall, making it the tallest mountain in the world. See id.

145 Wahi pana are sacred or “legendary” places. HAWAIIAN DICTIONARY, supra note 1, at 377.

146 Case, supra note 127, at 168; see Flores-Case Proposal, supra note 144, at 23–24. Ku‘ulei Kanahele explains that wao akua might be equated with conservation lands—places that should be left alone by humans. MAUNA KEA LUC: Ku‘ulei Kanahele On Wao Akua (Oct. 25, 2019), BIG ISLAND VIDEO NEWS (Oct. 28, 2019), https://www.youtube.com/watch?v=riDPV5199yCM. In contrast, Kānaka resided in and subsisted off of wao kanaka and the resources it provided. Id. Although typically translated to “god(s),” “akua” can be better understood as elements, and, in accord with that thinking, the elements (e.g., winds, waters, lava) and all other resources (e.g., plants, animals) are physical manifestations of the akua. Id.
summit area of Maunakea. Thus, while tradition indicates that people traveled across Maunakea with great frequency, the upper elevations and summit area were kapu (sacred).\textsuperscript{149} Kānaka Maoli often prayed or honored akua at the summit and “actively nurture[ed] and maintain[ed] our relationship to our ancestors, thereby renewing our sense of responsibility to them” and to the ‘āina.\textsuperscript{150} Maunakea’s summit was left untouched by Kānaka Maoli “on purpose because [it was] reserved for honouring the spiritual connection between Kanaka and ‘āina.”\textsuperscript{151}

Sitting atop an aquifer, Maunakea is also integral in “collecting waters that sustain life[.]”\textsuperscript{152} Kaʻohe, the ahupuaʻa (district)\textsuperscript{153} in which the summit sits, is aptly named after ‘ohe (bamboo) for the way it collects water.\textsuperscript{154} Kānaka Maoli know Kaʻohe as “the place that we will find water, always.”\textsuperscript{155} They understand that Waiau (the lake), Poliʻahu (the snow),

\textsuperscript{147} See Mauna Kea LUC, supra note 146; Steele, Professor Jon Osorio, supra note 130. Because Native Hawaiians understood akua to be literal elements, respecting wao akua was also an act of conservation or sustainability of their environment upon which they depend. See Mauna Kea LUC, supra note 146; Steele, Professor Jon Osorio, supra note 130.

\textsuperscript{148} MALY & MALY, supra note 142, at 453, 456.

\textsuperscript{149} See Case, supra note 127, at 172, 180. What is sacred “is ultimately a conversation of a relationship between humans and all of creation.” Id. at 173. Native Hawaiian Scholar and Professor Emalani Case discusses the intricacies and difficulties involved in discussions about Maunakea and sacredness:

To talk about Mauna Kea, therefore, is to talk about spirit. It is to use words like ‘sacred’ and to draw on emotions born of connection and relationship that are too often disregarded in academic discourse. Further, it is to use stories that are frequently categorized as ‘myth’, a category that has not served Indigenous peoples well as myths tend to be read as fantastical or make-believe. The relegation of Indigenous beliefs to the realm of the mythical, or even the spiritual, is further complicated by the fact that conservations of what Indigenous peoples consider ‘sacred’ must sometimes occur in court rooms . . . and in written testimonies. This can be problematic—or as Winona La Duke explains, quite ironic—because, in those spaces, ‘what is sacred to Native Americans [or other Indigenous peoples] will be determined by the government that has been responsible for doing everything in its power to destroy Native American [and other Indigenous] cultures’.

\textsuperscript{155} Id.
Kahoupokāne (the springs), and Lilinoe (the mist)—akua and waters of Maunakea—“give continued life through a healthy water supply.” Even today, “their wellbeing is stewarded by kānaka practitioners.” Maunakea is thus not only an elder but also a valuable water resource that must be “safeguard[ed] for future generations.”

These stories and names of Maunakea elucidate Kānaka Maoli’s connection—physical, spiritual, genealogical, and ecological—to ʻāina, including the mountain itself. They are the bases for, and help to make sense of, Kānaka Maoli’s responsibility to care for and protect the land and its natural resources. And they illuminate Maunakea’s centrality in Native Hawaiians’ understanding of themselves and the universe encompassing them.

B. Western Astronomy’s Occupation of Maunakea

Although Native Hawaiians intentionally left Maunakea undisturbed as a space reserved for akua, colonizers “strategically used the appearance of emptiness to justify their claims to land.” These early claims became astronomers’ basis for increased development of observatories on the summit of Maunakea. Western astronomers at work on observatories atop Haleakalā, Maui’s tallest peak, admired

160 See id.

162 Similar to Maunakea, the summit of Haleakalā is both a wahi pana (storied place) and a sacred site for Native Hawaiians. The Haleakalā summit falls within those lands “ceded” to the United States upon annexation and later transferred to the State of Hawai‘i upon its 1959 admission into the United States. Haleakalā Crater, SACRED LAND FILM PROJECT (Sept. 1, 2008), https://sacredland.org/haleakala-crater-united-states/\text%20Holy%20site%20or%20wahi,spiritual%20wisdom%20and%20meditation.
Maunakea for its height and sought to use its summit that was unobstructed by cloud cover. Astronomers have since continued to praise Maunakea’s summit as “the finest [astronomical observing sight] in the world.”

In 1953, University of Hawai‘i Professor Walter Steiger made it his “goal to establish a solar observatory on the top of” one of Hawai‘i’s highest peaks. Soon after, Governor John Burns released funds to begin the construction of an access road to Maunakea’s summit, where astronomers housed the first telescope in 1964. The mountain quickly became renowned as “a truly superb site, the finest [many astronomers] had ever seen.”

Over the following decade, in Steiger’s words, “the spectacular developments on Mauna Kea began.” These developments were catalyzed, in part, as an effort to attract investors and revitalize Hilo’s economy after the county was devastated by a tsunami. In 1968, the Board of Land and Natural Resources approved a 65-year lease to the University of Hawai‘i for the lands referred to as the Mauna Kea Science Reserve, which included all lands above the 12,000-foot level of the mountain. In the same year, astronomers established the first observatory on Maunakea on Pu‘u Poli‘ahu.

169 See Dickerson, supra note 166. In order to quickly attract astronomers and investors, the University of Hawai‘i rented land on Maunakea for only one dollar per year. See id.

170 1998 AUDIT, supra note 161.

171 Steiger, supra note 161. Steiger recalled the development of the first observatory proposed by John Jefferies in 1968: the 88-inch telescope “was a well-conceived plan” that was “a terrible blow to Dr. Kuiper, who felt ‘his mountain’ was ‘stolen’ from him . . . Regardless of the outcome, [Kuiper] must be acknowledged as the discoverer of Mauna Kea as a superb astronomical site.” Id.
In 1969, the University established the Institute for Astronomy (“IfA”) to facilitate research and education on astronomy. As more astronomers began work on the mountain, more foreigners began claiming Maunakea as their own. Failing to turn a profit, the observatories atop Maunakea have also seldom employed Native Hawaiians, with most positions being outsourced to organization and university investors. Moreover, the observatories gave rise to longstanding controversy within the local community because of the University’s mismanagement and its failure to consult with Native Hawaiians.

By 1974, three telescopes were in operation after being constructed without the appropriate Conservation District Use Permits, and three more telescopes were planned for development. Local groups, including conservationists, formed a coalition to challenge increased development on Maunakea’s summit. In response to these concerns, Governor George Ariyoshi issued a memorandum directing BLNR Chairman Sunao Kido and the Department of Land and Natural Resources (“DLNR”) to “develop and promulgate . . . a Master Plan for all of Mauna Kea[,]” assemble an advisory group to provide input for the plan, and incorporate the planning under lease to the University.

State and federal agencies, individual scientists, representatives from conservation organizations, and community members sought to weigh in on DLNR’s plan for Maunakea. But by 1976, the Department had not

sacred place and a cultural tie with the past,” should not be obliterated by haphazard development. And the rarefied atmosphere on the mountain’s higher slopes and summit surrounding unique Hawaiian ecosystems should not be unreasonably disturbed in the name of progress or scientific development.190

Members of the Waimea Hawaiian Civic Club191 also worried that the mountain would become overcrowded by “outsiders who do not have good ‘mana’o’ (thoughts) about preserving the valuable history of the mountain.”192 One member hoped to prevent “irreversible effects such as full-scale erosion of the mountain itself, not to mention the devastating effect it has on the existing historical sites.”193

Largely ignoring these concerns, IfA researchers sought to expand “astronomy as an enterprise on Mauna Kea” and aspired “to develop an academic program matching the excellence of our sites[.]”194 And while BLNR developed subsequent management plans,195 concerns over Mauna Kea’s mismanagement were never adequately addressed or resolved.196

By the late 1990s, Mauna Kea’s summit housed thirteen telescopes.197 And in 1998, the State Auditor published a scathing report detailing the state’s failure to adequately manage the natural and cultural

construction of more telescopes on Maunakea’s summit. At those meetings, Native Hawaiians “gave impassioned testimony about the sacredness of Mauna Kea, their opposition to further development, and their great distrust of the [U]niversity and the astronomy community.” After thirty years of astronomy on Maunakea, “it was the first time [the Board of Regents] heard such testimony firsthand.” In the decades that followed, Native Hawaiians continued to challenge further development of Maunakea’s summit.

Native Hawaiian practitioner and then-Regent Nainoa Thompson brought to light the broader justice issues that the Maunakea controversy reflected, explaining that “[t]his is really about abuse of the native people being subject to racism and disrespect. This is an opportunity for a real turning point, a defining moment.” The same sentiment has been emphasized in recent years as the controversy over Maunakea has made international headlines. Protectors of the sacred mountain emphasize that “the movement we are witnessing today is not new . . . It has been at least a century in the making, from the first arrival of colonialism in Hawaiian lands.” For Native Hawaiians, the continued development on these lands “is fundamentally indistinguishable from earlier colonization activities.”

IV. THE STATE’S AFFIRMATIVE DUTY TO PROTECT NATIVE HAWAIIAN TRADITIONAL AND CUSTOMARY RIGHTS

Shaped by a culture unique to Hawai‘i, the state’s laws are comprised of special legal protections for Hawai‘i’s people, land, and natural resources. Both inspired by and affirming Native Hawaiian tradition and custom, the state’s laws—in the Constitution, Hawai‘i Revised Statutes

“HRS”), and case law handed down from the Hawai‘i Supreme Court—
include intentionally-crafted legal protections for Native Hawaiian
traditions and customs.213 The State of Hawai‘i has an affirmative duty to
protect Native Hawaiians’ traditional and customary rights,214 and these
rights are a protected public trust purpose under Hawai‘i’s public trust
doctrine.215

A. Native Hawaiian Traditional and Customary Rights

Notwithstanding the onset of drastic changes to Hawai‘i’s cultural
and political landscape as a result of American colonization, “[a]ncient
Hawaiian usage [] survived the transition from communal land tenure to a
Western system of private property rights[,]”216

A landmark result of the 1978 Constitutional Convention, the duty
to protect traditional and customary rights was codified into the Hawai‘i
Constitution as Article XII, section 7, which provides: “[t]he State
reaffirms and shall protect all rights, customarily and traditionally
exercised for subsistence, cultural and religious purposes and possessed by
ahupua’a tenants who are descendants of native Hawaiians who inhabited
the Hawaiian Islands prior to 1778, subject to the right of the State to
regulate such rights.”217 “Against the backdrop of rising consciousness
now known as The Hawaiian Renaissance,”218 delegates to the Convention
intended that the provision “encompass all rights of Native Hawaiians
such as access and gathering.”219 In an effort to rectify some of the wrongs
committed against Native Hawaiians since the 1893 overthrow of the
Hawaiian Kingdom, delegates sought to codify these rights that were “an
integral part of the ancient Hawaiian civilization and are retained by its
descendants.”220

PROCEEDINGS OF THE CONSTITUTIONAL CONVENTION OF HAWAII OF 1978 at 637, 640
(1980).

220 Id.; Forman & Serrano, supra note 216, at 786–87 (“[I]n November 1978, state
voters approved [the] amendment to the Hawai‘i Constitution that sought to provide further
HRS section 1-1 provides further protections for Native Hawaiian traditional and customary practices:

The Common law of England, as ascertained by English and American decisions, is declared to be the common law of the State of Hawaii in all cases, except as otherwise expressly provided by the Constitution or laws of the United States, or by the laws of the State, or fixed by Hawaiian judicial precedent, or established by Hawaiian usage[.]

Section 1-1 codifies the doctrine of custom into Hawai‘i’s common law. Although Native Hawaiian traditional and customary rights are not expressly referenced in the statute, the Hawai‘i Supreme Court has cited that the Hawaiian usage exception in section 1-1 is a basis for protecting those rights.

HRS section 7-1 also protects Native Hawaiian traditional and customary gathering rights “on the premise that they ‘were necessary to insure the survival of those who, in 1851, sought to [continue to] live in accordance with the ancient ways.’”

The Hawai‘i Supreme Court has protected Native Hawaiians’ traditional and customary rights on the basis of HRS section 1-1, section 7-1, and Article XII, section 7. Authored by the Hawai‘i Supreme Court’s first Native Hawaiian justice, Chief Justice William S. Richardson (“CJ Richardson”), Kalipi v. Hawaiian Trust Co. (1982) was the first of his court’s landmark decisions that would uphold protections for Native Hawaiian traditional and customary rights. CJ Richardson’s “opinions

225 Tanigawa Lum, supra note 218, at 89 (quoting Kalipi v. Hawaiian Trust Co., 66 Haw. 1, 8, 656 P.2d 745, 750 (1982)).

226 See id. at 89; Ka Pa’akai O Ka ‘Āina v. Land Use Comm’n, 94 Haw. 31, 7 P.3d 1068 (2000).

227 Kalipi, 66 Haw. 1, 656 P.2d 745 (affirming that pursuant to Article XII, section 7 of the state constitution that Hawai‘i courts are obligated to preserve and enforce Native Hawaiian traditional and customary rights).
reflect his humble background, his commitment to a more open society with equal opportunity for Hawai‘i’s multi-ethnic population, and his strong belief in looking to Hawai‘i’s rich past as a source of today’s law.”

Reflecting on his court’s approach, and exemplifying “i ka wā ma mua, ka wā ma hope,” CJ Richardson explained,

While the [Native Hawaiian] culture had largely been displaced, nevertheless many of the underlying guiding principles remained. We set about returning control of interpreting the law to those with deep roots and profound love for Hawai‘i . . . [W]e made a conscious effort to look to Hawaiian custom and tradition in deciding our cases[.]

CJ Richardson “broke new ground” for traditional and customary rights with his 1982 Kalipi decision, which held that HRS section 7-1 “assure[s] that lawful occupants of an ahupua‘a may, for the purposes of practicing native Hawaiian customs and traditions, enter undeveloped lands within the ahupua‘a to gather those items enumerated in the statute[.]

By recognizing that gathering rights are also protected by HRS section 1-1 and Article XII, section 7 of the Hawai‘i State Constitution, the Richardson court in Kalipi “set the foundation for more recent cases affirming traditional and customary rights[,]” such as Pele Defense Fund and PASH. In Pele Defense Fund, the court broadened the black letter of the law to better reflect native practices by concluding that Native Hawaiians’ exercise of traditional and customary rights was not limited to practitioners’ ahupua‘a of residence. Native Hawaiians’ traditional and customary rights, the court held, should not be “narrowly construed or ignored by the court.” In Public Access Shoreline Hawaii v. Hawai‘i County Planning Commission (“PASH”) (1995), the Hawai‘i Supreme Court reaffirmed Native Hawaiians’ traditional and customary rights under Article XII, section 7 and held that the state is “obligated to protect the reasonable

Pursuant to the state’s laws and the unique principles underlying them, the state has a duty to “conserve and protect [Maunakea’s] natural beauty and all [its] natural resources.” Moreover, the state’s public trust doctrine protects Native Hawaiian traditional and customary rights on the summit of Mauna a Wākea. The majority’s narrative and holding, however, hold neither BLNR nor the University accountable for their repeated failures to adequately protect Maunakea and its resources, including Kānaka Maoli’s traditional and customary rights.

V. (Re)Shaping Ka Wā Ma Mua: The Battle over Collective Memory of Injustice Shrouding Maunakea

The most recent controversy concerning Maunakea, the proposed TMT, threatens to further desecrate Maoli lands and curtail Native Hawaiians’ protected rights. In 2008, the TMT International Observatory, LLC (“TIO”) consulted with the University of Hawai‘i to assess the development of the TMT on Maunakea, chosen for its pristine atmospheric conditions. Following a 2010 Final Environmental Impact Statement (“EIS”), TIO submitted Conservation District Use Application (“CDUA”) HA-3568 for the TMT in the same year.

Maunakea, with its thirteen existing telescopes, is already home to more astronomical observatories than any other mountain peak in the world. If built, the proposed TMT would tower over Hawai‘i Island as the largest building on the isle. The structure, planned to be built within the conservation district, would occupy over five acres of land just 600 feet below the summit ridge.
The contentious project, like other telescopes and observatories before it, was met with resistance by Kānaka Maoli “working to assert and protect their genealogical connections to elements and deities of the mountain against an expanding footprint of astronomical observatories and telescopes.”\(^{263}\) Kiaʻi Mauna, protectors of Maunakea, explained that the eighteen-and-a-half story structure would desecrate the sacred summit, which had already suffered substantial, adverse impacts from the existing observatories that occupied the summit area.\(^{264}\) They also argued that BLNR, by approving the TMT’s permit application, violated its constitutional duty to protect Native Hawaiian traditional and customary rights.\(^{265}\) In 2011, the Board approved the TMT’s Conservation District Use Permit (“CDUP” or “permit”), despite strong Maoli-led opposition and without holding an administrative trial or contested case hearing that would determine the rights of Native Hawaiians in the matter.\(^{266}\)

In April 2015, thirty-one Kiaʻi Mauna were arrested for “‘trespassing’ on government property and ‘obstructing’” the access road to the summit in an effort to halt the TMT’s construction.\(^{267}\) Meanwhile, in the courts, grassroots community group Mauna Kea Anaina Hou and other Kiaʻi\(^{268}\) challenged the permit, contending that BLNR “put the cart before the horse” by prematurely approving the CDUP.\(^{269}\) The Board claimed, on the other hand, that the approval was a preliminary decision and that the construction of the TMT was stayed pending the outcome of a contested case hearing.\(^{270}\) The Hawaiʻi Supreme Court ruled in favor of the Kiaʻi petitioners, holding that the CDUP was invalid and ordering a new contested case hearing for the CDUA.\(^{271}\)

The following year, the state legislature passed a statute allowing contested cases regarding conservation districts to be directly appealed to the Hawaiʻi Supreme Court.\(^{272}\) In 2016, as ordered by the *Mauna Kea I*
court, BLNR began its second contested case for the TMT before a new Hearing Officer, former Judge Riki May Amano, who concluded that the permit should be granted.\textsuperscript{273} In accord with Hearing Officer Amano’s recommendation, BLNR again approved the TMT’s CDUA and granted its permit.\textsuperscript{274}

In February 2018, Native Hawaiian cultural practitioners appealed to the Hawai‘i Supreme Court, where they argued that the permit approval violated BLNR’s public trust duties and its duty to protect Native Hawaiian traditional and customary rights and practices.\textsuperscript{275} By October 2018, the court majority published its decision that affirmed that BLNR properly issued the telescope’s CDUP.\textsuperscript{276}

Less than a year later, on July 10, 2019, Hawai‘i State Governor David Ige and TIO announced that the TMT’s construction would begin on July 15, 2019.\textsuperscript{277} Hundreds of Kia‘i Mauna, anticipating the beginning of construction, convened again on Maunakea to block vehicles carrying construction equipment for the TMT from reaching the summit.\textsuperscript{278} In an emotional confrontation for Kia‘i and local law enforcement officers, police arrested thirty-three kūpuna (elders) who had placed themselves on the frontline.\textsuperscript{279} Kia‘i were unshaken and maintained their presence, with thousands of other Kānaka and their allies convening—along the access

road, at rallies on neighboring islands, and across the world—in support of protecting Maunakea.280

Mauna Kea II reignited a public battle over the story of Maunakea.281 The majority opinion, contrasted against Kānaka Maoli’s ancestral claims and their kuleana to Maunakea, also highlights an even broader centuries-long battle over the collective memory of Hawai‘i that will play an integral role in determining the future of Maunakea and the future of Kānaka Maoli and their struggles for justice.282

As “outsiders” in a foreign legal system, Native Hawaiians’ memories have often been ignored.283 And, in effect, their justice struggles are inadequately addressed by Hawai‘i’s courts and by state agencies and their departments.284 Despite protections explicitly guaranteed by the Hawai‘i State Constitution, as made apparent by Mauna Kea II, the state has yet to “fully embrace[. . .] its trust responsibility” to Native Hawaiians.285 In an uphill battle against a whitewashed, popularized narrative, Kānaka Maoli have fought for decades to reshape collective memory to reflect a more complete story of Mauna a Wākea.286 By bringing typically “forgotten” events back to the forefront, Native Hawaiians deployed collective memory as a tool in a struggle over justice for Maunakea—a struggle to protect against the state-sanctioned desecration of Kānaka Maoli’s ancestral land, to prevent further destruction of a sacred ancestor, and to preserve the mountain and its resources for the generations to come. Before BLNR, the state supreme court, and the general public, Kia‘i sought to reshape mainstream narratives told about Maunakea, and Kānaka generally, in a valiant effort to protect their sacred mountain and bolster other justice claims.

The majority for Mauna Kea II, on the other hand, employed a brief, selective “history” of Maunakea to justify affirming BLNR’s approval of the TMT.287 It told a historical narrative that, deliberately or not, removed

Native Hawaiians from the centuries-old story of Maunakea. A narrative that relieved the state of its public trust obligations and disemboweled Native Hawaiians’ constitutionally protected traditional and customary rights. A narrative that is in lockstep with other colonizers’ accounts of Hawai’i’s history—one that begins with and revolves around Western contact and its ostensible benefits gifted to Kānaka Maoli.

A. The majority’s “history” of Maunakea is almost entirely void of Native Hawaiians and obscures Kānaka Maoli’s deep-seated connections to Mauna a Wākea.

By integrating ‘ike kūpuna (ancestral insight) with current claims of right, Kia’i petitioners told an “ancestral” collective memory—a “genealogy preserved orally over generations through chants.” Kia’i consistently reiterated what Kānaka Maoli have known since time immemorial: Mauna a Wākea is sacred. And through oli and mo’olelo, they told stories of their familial connection to the ‘āina and to Mauna a Wākea. These stories, Kia’i urged, “are not myths but rather teaching tools[,]” about Native Hawaiians’ kuleana to care for the ‘āina, including Maunakea, for future generations, just as Kānaka Maoli have always done.

Kia’i explained that Maoli identity has always been intimately tied to Maunakea and its well-being. “It is clear that to many Hawaiians,
Mauna Kea is more than a mountain; it is the embodiment of the Hawaiian people. Kānaka testified about their genealogy—extending back to Papa and Wākea—that imparts upon them a responsibility as stewards to protect the ‘āina—in this case, Maunakea—consistent with and in furtherance of Native Hawaiian tradition.

The Mauna Kea II majority, however, relegated Kānaka Maoli’s experiences to a short paragraph providing a vague, “objective” overview of what “some Native Hawaiians consider” Maunakea to be. The majority opinion opened by appearing to acknowledge Maunakea’s spiritual significance to Native Hawaiians. The one-paragraph summary ended as quickly as it began, and it failed to capture the tremendous significance Maunakea holds for Kānaka Maoli, traditionally and to this day. By failing to convey Native Hawaiians’ deep-rooted, genealogical connection to Maunakea, the majority limited Native Hawaiians’ claims of right to the sacred mountain.

Providing no further explanation aside from a simple definition, the majority stated that Maunakea is “wao akua (the place where gods reside)[.]” “Before Western contact[,]” the majority writes, “the summit area was considered kapu (taboo) to all but the highest chiefs and priests, and unavailable to the general public.” This account did not attempt to relay the complexities of kapu or wao akua and how they function together. Instead, it mirrored Westerners’ descriptions that “few Hawaiians travelled to the summit area of Mauna Kea” making it “largely unknown even to the native populations.” The court’s collective memory of injustice, though it does make mention of Native Hawaiians, also simultaneously erases Native Hawaiians from its narrative of Maunakea.

304 Id. at 385, 431 P.3d at 758.

305 See id.

Nowhere in the opinion did the majority clarify that kapu was neither just a set of restrictions nor a prohibitive system. It did not include that kapu was a “code of conduct” for Kānaka that facilitated this Indigenous society’s creation and implementation of conservation practices; or, that the kapu marked the sacred and required Kānaka to understand their relationship to those hallowed sites (e.g., areas marked as wao akua) and entities. The Board and, subsequently, the majority ignored testimony that explained the Mauna’s holy status, which:

[W]as known from the remote times of the ancient ones. It is for this reason that amongst the countless ancestors of Kanaka Maoli and numerous ali‘i (chieftly) dynasties that lived in these islands, they never built any large heiau (temples) on the summit in this realm that is considered kapu . . . so as not to create a physical and/or spiritual disturbance, disconnection, or imbalance between man and his akua, and between man and his environment.

Instead, the majority’s framing of kapu plays into the Western caricature of a punitive system that restricted maka‘āinana (common people) from freedoms that only privileged ali‘i (chiefs) could enjoy. The majority, therefore, completely misunderstood and mischaracterized Native Hawaiians’ relationship to Maunakea. By the court’s account, Native Hawaiians seem to have benefited from the increased access to the

312 Flores Testimony, supra note 293, at 18 (emphasis removed).
313 See HAWAIIAN DICTIONARY, supra note 1, at 224.
314 See Rice v. Cayetano, 528 U.S. 495, 500 (2000) (“Kings or principal chieftains, as well as high priests, could order the death or sacrifice of any subject.”). Dr. Jamaica Heolimeleikalani Osorio explained that the state and others local to Hawai‘i are “accustomed to think of kapu as obstructions, as something tell you to keep out,” and it has often been used contemporarily to keep Native Hawaiians out of their homelands. Interview with Jamaica Heolimeleikalani Osorio, Assistant Professor, University of Hawai‘i Department of Political Science, in Mānoa, Haw. (Feb. 18, 2020).
summit, which was once “forbidden,” via roads built for the observatories.\textsuperscript{316} 

Opposite the majority, in order to accurately reflect Native Hawaiians’ history on Maunakea, Kia‘i underscored the significance of wao akua and kapu. Within wao akua, Kia‘i explained, Maunakea’s summit is an especially sacred landscape.\textsuperscript{317} And while select ceremonial and spiritual practices take place at the summit, Kia‘i emphasized that many Native Hawaiians refrain from entering into that sacred space all together as a practice of reverence.\textsuperscript{318} Even more than a cultural practice, Kia‘i urged, Kānaka Maoli’s sacred conduct on the summit is a kuleana—a birthright borne from the familial connection between Kānaka and their elder Mauna a Wākea.\textsuperscript{319}

The court’s framing obscures Native Hawaiians’ genealogical connection and deep-seated relationship with the mountain. The absence of physical “evidence” of Native Hawaiian practices occurring on the summit was construed by the court as indicative that there were no cultural or spiritual practices that ever took place there.\textsuperscript{320} By twisting wao akua and kapu, the majority construed Kānaka Maoli’s physical absence from the summit to intimate that since Native Hawaiians were traditionally restricted from physically accessing the summit, then they could not have a legitimate claim today.\textsuperscript{321} But, as Kia‘i asserted, the court’s “use it or lose it” justification reinforces a colonial lens incompatible with Maoli culture and worldviews.\textsuperscript{322} The court’s approach blatantly ignores kapu and wao akua, some of the very Native Hawaiian customs that influenced current state law and that the state is obligated to protect.\textsuperscript{323} Both BLNR and the court failed to recognize that revering wao akua and the sacred mountain—by not building structures or frequenting the areas—is a cultural and spiritual practice in and of itself.\textsuperscript{324}

court threatens any traditions or customs that risk being misinterpreted—or misconstrued, intentionally or not—by the state, and it dangerously reaffirms the colonial-borne court system’s grasp over Native Hawaiians’ fragile rights. 325

The remainder of the majority’s opinion, aside from stating that archaeological research reveals the existence of an adze quarry on the southern slopes of the mountain, treated Native Hawaiians and their interests in the Mauna as peripheral, and Native Hawaiians are mentioned only as an afterthought. 326 After its scant overview of the “history” of Maunakea before Western contact in 1778, the majority skipped forward two-hundred years to post-statehood in 1968, offering a collective memory of Maunakea that barely mentioned Native Hawaiians at all. 327

The majority overviewed the establishment of the Mauna Kea Science Reserve and then listed all twelve observatories built between 1970 and 2002. 328 It details the “direct” and “obvious benefits” of the TMT and the twelve already-existing observatories on the mountain’s summit. 329 The majority’s emphasis on the already-existing observatories implies that the next “natural” step is building the TMT, another “advanced world-class telescope.” 330 By the majority’s account, the TMT is just one more telescope that should take its rightful place next to the other thirteen already occupying Maunakea. 331

The erasure of Native Hawaiians from the majority’s “history” of Maunakea justifies the state’s continuing exclusion of Native Hawaiians from making decisions on matters regarding the summit. 332 The majority, intentionally or not, evoked the same collective memories deployed by Justice Kennedy’s majority opinion in Rice v. Cayetano and the late Justice Burns’ “The Crown Lands Trust: Who Were, Who Are, the Beneficiaries?”,

both of which told narratives also justifying undermining Native Hawaiians’ rights and justice claims.\textsuperscript{335}

The majority actively ignored, and thus rendered insignificant or irrelevant, Maoli testimony and well-established Native Hawaiian traditions and customs.\textsuperscript{336} The erasure of Native Hawaiians from the majority’s narrative of Maunakea effectively threatens Native Hawaiians’ constitutionally protected traditional and customary rights.\textsuperscript{337} The brief “history” provided by the majority as a background to \textit{Mauna Kea II} sets up the rest of the court’s analysis that, also through skewing “history” and suppressing Native Hawaiians’ collective memory of injustice, minimized the state’s duty to protect natural and cultural resources on public and conservation district lands and cuts away at Native Hawaiians’ protected rights enshrined in Hawai’i’s Constitution.\textsuperscript{338}

\subsection*{B. The majority ignored decades of the University and DLNR’s mismanagement of Maunakea and the significant, substantial and adverse impacts to the summit.}

To justify the majority conclusion that BLNR did not violate its constitutional duty to protect the summit and traditional and customary rights by permitting the TMT, the majority glossed over the decades of UH’s mismanagement of the mountain;\textsuperscript{339} ignored the long-term substantial, adverse impacts to public trust lands, resources, and purposes that it concedes the observatories have effected;\textsuperscript{340} and applied a framework that allows the state to ignore the cumulative impacts to conservation and public trust lands.\textsuperscript{341}

For the first time, in \textit{Mauna Kea II}, the Hawai’i Supreme Court explicitly held that state-managed conservation district lands “are public resources held in trust for the benefit of the people pursuant to Article XI, Section 1.”\textsuperscript{342} Despite the majority’s concession that the telescopes’ cumulative effects already caused substantial, adverse impacts, the majority nonetheless held that the “use of the land by TMT is consistent with conservation and in furtherance of the self-sufficiency of the State.”\textsuperscript{343}
Therefore, the court concluded, “the TMT comports with Article XI, Section 1 public trust principles and . . . the BLNR met its duties as trustee under [Article XII, Section 4] public land trust.”

The majority justified this conclusion by evading details of the state’s mismanagement of Maunakea’s natural and cultural resources and by ignoring its own case precedent regarding public trust lands. Using what Justice Wilson’s dissent called “the degradation principle,” the majority concluded that TMT alone would not cause substantial, adverse impacts and thus the board met its Article XI, section 1 trust responsibilities and would instead benefit Hawai‘i and Native Hawaiians.

Embracing their kuleana to mālama ‘āina, Kia‘i told a collective memory of decades of harm caused by already-existing and poorly-managed observatories on Maunakea. Kia‘i’s testimony and stories, when taken collectively, created an extensive list of the University’s mismanagement and the lasting injuries to Maunakea’s summit. Since the 1960s, the predominating story of Maunakea is one that elevates its potential for stargazing—as the best astronomical site in the world. Kānaka Maoli, however, have sought to uncover the deleterious impacts to Maunakea and Native Hawaiians caused by the astronomical “progress” that the Mauna became renowned for.

Kānaka Maoli detailed a number of egregious mistakes by the University since the first telescope’s establishment on Maunakea: allowing the development telescopes without permits and others “without permit conditions or controls to ensure implementation of management plans[;]” refusing to establish a limit to telescopes against the suggestions of the Mauna Kea Advisory Committee, many members of the public, state leaders, and Native Hawaiians, and prioritizing astronomical research over its obligation to protect the summit’s resources. Unlike the Mauna Kea I majority, Kia‘i stressed the scathing 1998 Auditor’s Report and the University’s blatant disregard of the audit’s criticisms and

recommendations intended to safeguard the Mauna’s natural, historical, and cultural resources.\textsuperscript{350}

Kia’i told a collective memory of injustice that sought also to hold the Department of Land and Natural Resources and its Board accountable for their complicity in Maunakea’s mismanagement.\textsuperscript{351} They drew from several critical reports from the Hawai’i State Auditor to demonstrate that even the state itself recognized the Department and Board’s failures as lessor to provide oversight of the University’s actions on the mountain.\textsuperscript{352} Kia’i cited that, according to a 1998 audit, DLNR “failed to define its relationship with the university, allowing the institution to oversee its own activities and not provide a mechanism to ensure compliance with lease and permit requirements.”\textsuperscript{353} Citing a later audit report from 2005, Kia’i underscored that this matter had “been previously brought to the attention of DLNR and its board for several decades.”\textsuperscript{354} According to the 2005 audit, which Kia’i quoted, “[t]he lack of oversight by the department allow[ed] the university and its sublessees unchecked discretion on the use of Mauna Kea and le[ft] cultural and natural resources at risk for further damage.”\textsuperscript{355}

Demonstrating the state’s readiness to undermine its public trust duties and protections for Native Hawaiians’ rights, Kia’i drew attention to a previous controversy with “issues . . . almost identical” to those in \textit{Mauna Kea II}.\textsuperscript{356} In 2004, despite the 1998 audit’s critical findings, the Department of Land and Natural Resources permitted the development of the NASA/Keck Outrigger Telescopes project near the summit without a comprehensive management plan.\textsuperscript{357} Native Hawaiians and other

\textsuperscript{350} Ward Testimony, \textit{supra} note 347; see Flores Testimony, \textit{supra} note 293, at 4; 1998 \textit{Audit}, \textit{supra} note 161, at 15.

CODE R. § 13-5-39(b) (2011)} (“The department or board may require the preparation of a comprehensive management plan where it finds that further development may lead to significant natural, cultural, or ecological impacts within the conservation
conservation groups, including many of the Kia'i that challenged the TMT in *Mauna Kea I*, intervened to challenge the permit. Petitioners challenging the “Outrigger” project endeavored to hold the state accountable to its responsibility to preserve and protect the summit and to comply with its own administrative rules. NASA eventually pulled its funding for the project but only after its federal environmental impact statement, created as a result of the litigation, had acknowledged the adverse and significant impacts of three decades of astronomy on the cultural and natural resources of Maunakea.

Recent events, pertaining specifically to the TMT’s development, also reveal the state’s evasion of its public trust duties and its duty to affirmatively protect Native Hawaiians’ rights. For instance, prior to BLNR’s consent to sublease to TIO, the Board allowed TIO to take possession of the proposed site to grade, excavate, and bore into Maunakea’s summit. “Th[ose] activities, between August and October 2013, resulted in irreparable harm and damage to th[e] unique and pristine geological and cultural landscape” of Maunakea. Moreover, Kia’i emphasized the Board’s attempt to evade due process and expedite the TMT project, which came to a head in *Mauna Kea I*. By “putting the cart before district.”).

358 Pisciotta Testimony, *supra* note 295, at 3. The project “sought to construct four (4) to six (6) smaller ‘outrigger’ telescopes placed around the existing two (2) KECK observatories that sit on Kukahau’ula (the summit).” *Id.* After the Hearing Officer concluded that the project lacked the required BLNR-approved management plan, BLNR remanded the decision for re-review and the Hearing Officer changed his position. *Id.* On appeal to the state district court, Mauna Kea Anaina Hou and other petitioners were successful, and the court voided the CDUP issued for the KECK project. *Id.* Later, a federal Environmental Impact Assessment case, the Office of Hawaiian Affairs sued NASA on behalf of Mauna Kea Anaina Hou “for failing to complete a full EIS for the Outrigger Telescopes Project . . . After the Third Circuit Court vacated [the project’s] CDUA, NASA eventually pulled their funding for the project.” *Id.*

359 Ward Testimony, *supra* note 347, at 3. Judge Glenn Hara overturned the board’s decision to approve the development and directed the development of a management plan. *Id.* A result of Judge Hara’s decision and order, the University developed a Comprehensive Management Plan which was approved by the board in 2009. *Id.* at 4. Deborah Ward, in testimony to BLNR, criticized the 2009 Comprehensive Management Plan for its reliance on a 2000 Management Plan that “has neither been scrutinized nor approved by the BLNR, yet it is referenced as the determining document for future development.” *Id.* at 4; *see* 2009 MANAGEMENT PLAN, *supra* note 164, at 37, 3-8 (describing the 2000 Mauna Kea Science Reserve Master Plan and its approval by the University Board of Regents).

361 Flores-Case Proposal, *supra* note 144, at 69.

362 *Id.*

363 *See id.* at 145 (“BLNR has a pattern of executing actions that are comparable to ‘putting the cart before the horse[].’”).
the horse,” the Board revealed its willingness to forfeit its statutory and constitutional obligations to further the project.\footnote{See id.}

Since the first concerns regarding TMT’s permit application arose over a decade ago, Kia‘i urged the state to fulfill its statutory and constitutional obligations as outlined by \textit{Ka Pa‘akai} by rejecting the TMT’s CDUA.\footnote{Id. at 69.} Kia‘i also criticized the University and the TMT’s lack of meaningful consultation with Native Hawaiians regarding the project.\footnote{Id. at 83 (“It was not only the lack of quantitative lack of consultation with Native Hawaiian cultural practitioners, but also the types of questions that were asked and the kids of information that were provided in the asking of the questions.”).}

Rather than “trigger[ing] high levels of cultural conversations, consultation, engagement, [and] decisionmaking” among Native Hawaiians, TMT stakeholders, and the state,\footnote{Id. at 81.} the TMT’s proposal to build on sacred land was “rubber stamped” by the state.\footnote{Id. at 2 (“There’s an underlying perception that these types of projects are typically ‘rubber stamped’ and pushed through the existing State permitting process due to political pressures and/or business influences despite very apparent noncompliance with State laws.”).}

As Maoli practitioner and Kia‘i Kalani Flores explained, the lack of accountability for state decisionmakers thus leaves the burden on the public, specifically Kānaka Maoli, to adequately protect Maunakea.\footnote{Id.} By remaining “engaged in the process,” Flores and his ‘ohana (family) and others seek to fulfill their “civil responsibilities,” or kuleana, to protect Maunakea.\footnote{See id.}

The majority glossed over the the mismanagement of the MKSR and the irreplaceable natural and cultural resources located within the reserve.\footnote{See \textit{Mauna Kea II}, 143 Haw. 379, 385, 431 P.3d 752, 758 (2018).}

The opinion conceded that:

Construction of these observatories and roads has had significant cumulative adverse impacts on cultural, archaeological, and historic resources in the MKSR. The observatories have also had significant cumulative adverse impacts on gelogy, soils, and slope stability in the MSKR because they significantly modified the preexisting terrain, the tops of certain pu‘u were flattened to accommodate observatory foundations, and some materials were removed
from the pu‘u were pushed over their sides, creating steeper slopes more susceptible to disturbance.\textsuperscript{372}

The opinion then mentioned the 2000 MKSR Master Plan adopted by the University’s Board of Regents in response to “significant criticism raised” in the 1998 Audit of the Management of Mauna Kea and the Mauna Kea Science Reserve.\textsuperscript{373} The majority, however, did not describe the “significant criticism.”\textsuperscript{374} Nor did it include any of the criticisms outlined in the three audits that followed in 2005, 2014, and 2017.\textsuperscript{375} Instead, by avoiding all audits’ criticisms, the majority trivialized the already significant, adverse impacts that it admitted the TMT would exacerbate.\textsuperscript{376}

The majority did not include the first audit’s finding that the University’s focus on developing Maunakea to “enhance[] the university’s prestige and that of its astronomy program . . . overshadowed the university’s commitment to provide reasonable assurance of protection for the summit’s natural resources,” or that a subsequent audit found the same.\textsuperscript{377} The majority did not consider that, even when the University outlined plans for resource management and protection, “many of these plans were submitted late and were weakly implemented” due, in part, to “the university’s lack of commitment and the Department of Land and Natural Resources’ failure to enforce plans.”\textsuperscript{378} These failures “compounded the problem of inadequate environmental protection.”\textsuperscript{379} The 1998 Audit repeated that Maunakea’s stellar reputation as “a premier location for astronomical research” came at the expense of the University’s and DLNR’s neglect of the mountain’s natural resources, but the majority failed to include any information about these audits beyond the fact that one was published in 1998.\textsuperscript{380}

\textsuperscript{372} Id. at 385–86, 431 P.3d at 758–59.

However, the university has not dealt with certain significant management issues, such as resolving jurisdictional issues with the Department of Land and Natural Resources and monitoring conservation district use permits. Such issues, if left unaddressed, increase the likelihood of harm to the science reserve’s vulnerable environment.”).
\textsuperscript{378} 1998 Audit, supra note 161, at 18.
\textsuperscript{379} Id.
\textsuperscript{380} See Mauna Kea II, 143 Haw. at 386, 431 P.3d at 759.
In its opinion, the majority referred to the 2000 Master Plan’s goals and the establishment of the Office of Mauna Kea Management (“OMKM”), which were created to help better effectuate those goals of protecting the right to exercise traditional cultural practices and preserving natural resources and landscapes.\(^{381}\) The majority mentioned the Master Plan’s goals but not how those goals were effectuated, if at all.\(^{382}\) And it did not provide any updated information regarding the state’s implementation of the 20-year old plan or the subsequent 2009 Comprehensive Management Plan.\(^{383}\)

In addition to emphasizing the Master Plan’s goals, the majority highlighted DLNR’s and TMT’s mitigation measures and plans that would “lessen the impacts of the TMT.”\(^{384}\) The court determined that, on balance, the TMT would be consistent with conservation and in furtherance of the state’s self-sufficiency.\(^{385}\) In the majority’s view, “[t]he TMT Project does not involve the irrevocable transfer of public land to a private party” and, as a condition of the TMT’s decommissioning plan, “the land [will one day] . . . be restored.”\(^{386}\)

As a text that constructs collective memory of injustice and inscribes it into law, the majority’s opinion perpetuates a narrative that ignores astronomy’s cumulative impacts on the summit while exaggerating its benefits, especially as they concern Native Hawaiians. By ignoring the state’s decades-long mismanagement of Maunakea, the majority shirked the legal obligation of the state to ensure protection of natural and cultural resources as required by Article XI, section 1 of the constitution.\(^{387}\) Rather than recognizing and taking into consideration the significant adverse impacts the previous observatories already caused, the majority ignored all that history, and instead looked only at the specific impacts the TMT itself would have in one specific area.\(^{388}\) It removed the TMT from the rest of the history of observatories on the summit and viewed the TMT’s impacts in isolation.\(^{389}\) Overall, the majority masked the state’s numerous

\(^{389}\) See id.
shortcomings and promoted the TMT as a benefit to the state with few, if any, negative implications. 390

1. Justice Wilson challenged the majority’s indefensible use of the “degradation principle.”

The collective memory of injustice that Native Hawaiians sought to recast more closely parallels Justice Wilson’s dissent, which criticized the majority for its use of the “degradation principle.” 391 Similar to Kia‘i, Justice Wilson recognized the significance of including the entire history of damage to the summit. 392 Both Native Hawaiians and Justice Wilson sought to portray the full extent of astronomy’s impacts on Maunakea more accurately. 393 Justice Wilson’s dissent sheds light on the court’s own precedent and past events omitted or obscured by the majority’s analysis. 394 Throughout his opinion, Justice Wilson consistently criticized the majority’s reliance on “the degradation principle,” a principle contrary to Hawai‘i law. 395 He pointed to the state’s duties to Kaho‘olawe to illuminate the danger of the majority’s incorporation of the degradation principle into its legal analysis. 396

Whereas the majority proposed that there was no precedent for BLNR or the court to follow concerning management of public trust resources on Maunakea, Justice Wilson turned to the state’s management of Kaho‘olawe as an example of the state’s obligation toward protecting Hawai‘i’s lands and natural resources. 397 By bringing this context forward, Justice Wilson explained that the state’s approval of the TMT is inconsistent with its constitutional duties under Article XII, section 7 and Article XI, section 1. 398

Justice Wilson recalled that, like Maunakea, Kaho‘olawe had been “severely degraded.” 399 However severe the damage already inflicted upon a public trust resource, the state still maintained the “duty to preserve and rehabilitate in perpetuity.” 400 The interpretation put forth by the majority—

400 Id.
that “the passage of time and the degradation of natural resources can justify unacceptable environmental and cultural damage”—renders null the state’s duty to protect conservation district lands and other public lands and resources.\footnote{Id. at 422, 431 P.3d at 795.} According to Justice Wilson, the state’s duty is “potentially undermined or extinguished under the new degradation principle.”\footnote{Id. at 422 n.2, 431 P.3d at 795 n.2.} Letting the degradation principle inform its opinion, the majority:

[R]enders inconsequential the failure of the State to meet its constitutional duty to protect natural and cultural resources for future generations. It renders illusory the public trust duty enshrined in the Constitution of the State of Hawai‘i and heretofore in the decisions of this court to protect such resources. And its policy of condoning continued destruction of natural resources once the resource value has been substantially adversely impacted is contrary to accepted norms of the environmental rule of law.\footnote{Id. at 423, 431 P.3d at 796.}

The dissent further criticized the majority for its failure to recognize and consider the intent of the existing legal framework concerning public trust lands and resources within conservation districts—“to conserve, protect, and preserve the important natural resources of the state through appropriate management and use to promote their long-term sustainability and the public health, safety, and welfare.”\footnote{Id. at 433, 431 P.3d at 806; see HAW. CONST. art. XI, §§ 1, 9; HAW. CONST. art. XII, § 7; HAW. REV. STAT. § 183C-1 (1978); HAW. CODE R. § 13-5-30(c)(4) (2011).} In its analysis and application of the law, the majority also ignored the Constitutional Convention delegates’ intent that the 1978 amendments expressly set forth the state’s obligation to conserve and protect all public lands and natural resources, including Native Hawaiians’ traditional and customary rights.\footnote{See Mauna Kea II, 143 Haw. at 411–12, 413 P.3d at 784–85 (Pollack, J., concurring). Justice Richard W. Pollack, however, in his concurring opinion, did consider the 1978 Constitutional Convention and delegates’ express intent regarding Article XI, section 1. Id. (“[T]he principle that public land is a natural resource within the meaning of article XI, section 1 has long been established under our law.”).} Based on the foregoing, Justice Wilson warned that as a result of the majority’s flawed analysis, “one of the most sacred resources of the Hawaiian culture loses its protection because it had previously undergone substantial adverse impact from prior development of telescopes.”\footnote{See id. at 422, 431 P.3d at 795 (Wilson, J., dissenting).}
2. The majority’s narrow collective memory relieved the state of its constitutionally mandated duties.

Although Justice Wilson’s dissenting opinion did not refute the entire flawed history embraced by the majority, his opinion, focused on the degradation principle, purposefully portrayed a fuller picture of Maunakea’s past and criticized the majority for its failure to fully weigh the TMT’s implications.407 On the other hand, by failing to acknowledge the University’s and BLNR’s grave failures, thereby neglecting to hold the state accountable, the majority opinion resulted in the curtailment, or dilution, of Native Hawaiians’ rights despite their being guaranteed by the constitution and statutes.408

By the majority’s logic, the cumulative past is irrelevant. Thus, although the astronomical development on Maunakea has “resulted in substantial, significant and adverse impacts,” the court concluded TMT was still permissible because even if the TMT would exacerbate the already substantial, significant, and adverse impacts on the summit, the impacts of the TMT alone would only be “incremental” in comparison to the overall damage already done.409 Following this logic, the majority held that the TMT would not adversely impact cultural resources.410 If applied to future cases, the majority’s reasoning allows for the state to ignore or dismiss its constitutional duties to Native Hawaiians and the general public if public trust and conservation lands are deemed to have already suffered enough “substantial, significant and adverse impacts[].”411

In addition to artificially separating the TMT’s impacts from the history of all the existing observatories, the majority also failed to acknowledge the significance of the University’s history of mismanagement of the Mauna and its resources.412 In essence, the court ignored the state’s entire past of mismanagement mistakes.413 Separating the present (TMT) from the past (thirteen existing telescopes and the University’s past behavior) effectively deemed the cumulative past irrelevant in determining

407 Id. at 421–34, 431 P.3d at 794–97.
408 See id. at 386, 395–98, 400–02, 431 P.3d at 759, 768–71, 773–75.
409 The court, citing Kilakila III, explains that “BLNR does not have license to endlessly approve permits for construction in conservation districts, based purely on the rationale that every additional facility is purely incremental.” Id. at 403–04, 431 P.3d at 776–77. But this rationale, which the court appears to refute is exactly the logic it deploys to justify permitting the TMT. See id.

what justice entails for Native Hawaiians and Maunakea.\textsuperscript{414} It concealed the genuine justice concerns shared by Kānaka Maoli and allowed for the majority to cast TMT as purely a benefit to the state and Native Hawaiians.\textsuperscript{415}

Justice Wilson’s critical dissent brought into focus the entire impact of the area and considered the actual and potential implications of the observatories, including TMT, on Maunakea.\textsuperscript{416} He began to tell a story more in line with Native Hawaiians’ collective memory of injustice by comparing the state’s history with and duty to Maunakea to those of Kaho‘olawe.\textsuperscript{417} Justice Wilson’s consideration of the TMT’s impacts to the entire summit, as well as his recognition of the University’s mismanagement and lack of accountability, revealed, in part, the injustice that Native Hawaiians remember and that the majority’s opinion masks.\textsuperscript{418}

Opposite the majority, the dissent’s more complete account of history and its criticism of the “degradation principle” attempted to reinforce and uphold the state’s constitutional duties under Hawai‘i law.\textsuperscript{419}

3. The majority ignored traditions and customs exercised everywhere but within the exact footprint of the TMT project.

Chief Justice Richardson’s seminal decisions upheld that the state’s “resources should be held for the benefit of the public[.]”\textsuperscript{420} In \textit{Mauna Kea II}, however, the majority abandoned CJ Richardson’s legacy of protections for Native Hawaiian traditional and customary rights that were based on his pursuit of “justice for Hawai‘i’s native people and, indeed, for all people in our homeland.”\textsuperscript{421}

The court’s selective approach to history that undermined Native Hawaiians’ claim to Maunakea is captured by a single sentence that contends: “various Native Hawaiian traditional and customary practices are derived from these beliefs, which have also led to related contemporary cultural practices.”\textsuperscript{422} The court’s separation of “related contemporary” cultural practices from “traditional and customary” ones created a dichotomy that never existed and does not accurately reflect Native

Hawaiian cultural practices. Moreover, this superficial distinction between traditional and contemporary stands “contrary to legal understandings that Hawaiian cultural practices must evolve in contemporary times to support a living culture.”

The court’s framing of cultural practices lends to the narrative, “a tired colonial trope, representing Indigenous Peoples as mere vestiges of a quickly fading and increasingly irrelevant past.” In essence, the court legitimizes the colonial narratives that cast Native Hawaiian culture as antithetical to progress and modernity. Moreover, the court’s mischaracterization of Native Hawaiian culture sets up the framework for the rest of its analysis that, in effect, invalidates Native Hawaiians cultural practices on Maunakea.

Just as the court majority narrowed the scope of time in its evaluation of “history” and TMT’s potential impacts, it similarly narrowed the scope of physical space evaluated such that the TMT would appear not to affect Native Hawaiian traditional and customary rights on Maunakea. This narrowed scope further justified the majority’s conclusion the state did not violate its obligations under Article XI, section 1, Article XII, section 7, and HRS section 1-1 when it approved the TMT’s CDUP. In doing so, the majority’s conclusion ignored the Native Hawaiian principles that are the very foundation of Hawai‘i’s unique legal system that this state boasts. Further, Mauna Kea II departed from longstanding precedent and curtails the specific protections for Native Hawaiians’ rights incorporated into state law.

Departing from Chief Justice Richardson’s precedent and legal legacy, the Mauna Kea II majority constricted its focus to look only at the

423 See id.; KIYUNA, supra note 156, at 7.
424 KIYUNA, supra note 156, at 7 (“Although Hawai‘i case law establishes that practitioners must demonstrate that a particular practice existed prior to 1892, this does not mean that traditional and customary rights are frozen in time and cannot take on new forms. Indeed, in the Declaration on the Rights of Indigenous Peoples, the United Nations affirmed that Native peoples retain the right to ‘practice and revitalize their cultural traditions and customs[,] . . . includ[ing] the right to maintain, protect, and develop the past, present, and future manifestations of their cultures.’”).

specific area that TMT would occupy. By narrowing its scope and considering the proposed observatory site in isolation, the majority constricted the Ka Pa‘akai analysis to conclude that there was no evidence that the site was used to store or bury artifacts, that ahu or lele (sacrificial altars or stands) existed, or that mele or hula were performed there. This constricted focus on the specific site proposed for the TMT Observatory conveniently narrowed the scope so much so that it excluded Native Hawaiians—along with their well-documented cultural traditions and customs—from the analysis. Doing such contradicted Kalipi and subsequent precedents that consistently upheld Native Hawaiians’ rights.

The majority cited the evidence—testimony, research studies, plans, and impact assessments—provided by BLNR to examine the extent of cultural practices that took place on Maunakea. The majority acknowledged the cultural practices of Native Hawaiians on the Mauna’s summit by summarizing some of BLNR’s findings that:

Native Hawaiian cultural practitioners on Mauna Kea conduct their practices at the summit of Mauna Kea (Pu‘u Wēkiu), Lake Waiau, Pu‘u Līlīnoe, or Kūkahau‘ula. Cultural practices at Mauna Kea include solstice and equinox observations on Pu‘u Wēkiu, burial blessings, depositing of piko (umbilical cord) near Lake Waiau as well as collection of its water for use in healing and ritual practices, the giving of offerings and prayers at the ahu lele (sacrificial altar or stand), behind the visitor center adjacent to Hale Pōhaku, and

monitoring or observing the adze quarry, or observing stars, constellations, and the heavens.\textsuperscript{437}

Despite acknowledging the many Native Hawaiian practices that take place atop Maunakea, the majority quickly turned around to conclude that none of those practices were relevant in assessing the TMT’s impact on cultural resources or traditional and customary practices.\textsuperscript{438}

The majority, in accord with BLNR’s assertions, narrowed its analysis to what it called the “relevant area,” which included only the proposed TMT Observatory site area and the Access Way.\textsuperscript{439} Thus, the court concluded that there were no Native Hawaiian cultural practices, artifacts, or structures found in the “relevant area.”\textsuperscript{440} The majority noted that there were ahu erected in the vicinity of the project but wrote those off as irrelevant because they were not within the narrowly construed “relevant area,” as well.\textsuperscript{441}

With little explanation, the majority further concluded that the two ahu constructed on the Access Way by Kia’i in 2015 to protect Maunakea “did not constitute a traditional and customary right or practice.”\textsuperscript{442} The majority did not discuss whether Native Hawaiians were consulted to reach this conclusion, or whether this practice—of building ahu to protect sacred land—was a tradition or custom.\textsuperscript{443} The majority also did not fully consider or address the cultural practice of refraining from going to Maunakea’s summit in wao akua.\textsuperscript{444} The majority ignored these factors, and instead constructed a narrative that the apparent absence of Kānaka from the “relevant area” justified denying Native Hawaiians’ claims to Maunakea and permitting continued development on Maunakea.\textsuperscript{445}

Even where the majority took a broader approach and recognized that Native Hawaiian cultural practices did indeed take place on Maunakea, the court emphasized that those practices have “coexisted” alongside the astronomy facilities at the summit.\textsuperscript{446} The majority did not include that, for decades preceding TMT’s conception, Kānaka and others urged to halt any

further development of telescopes on Maunakea. Nor did it include Native Hawaiians’ early concerns that the mountain would become “overcrowded” by outsiders who do not share the same concerns regarding protection of the natural and cultural resources or “preservation of the valuable history of the mountain.” The majority also omitted the many state officials’ statements admitting the University’s and state’s failures on Maunakea, including Governor Ige’s concession that “[w]hether you see it from a cultural perspective or a natural resource perspective, we [state officials] have not done right by a very special place.”

On the contrary, the majority assumed that since previous observatories had “co-existed” alongside “Native Hawaiian uses,” the TMT would not “curtail or restrict” any Native Hawaiian practices. The majority conveniently forgot Native Hawaiians’ vehement opposition to development on Maunakea at the turn of the 21st century, or that astronomers had previously resigned from or declined work at observatories on Maunakea in response to the mistreatment of Indigenous resources and issues by other astronomers. These “forgotten” stories refute the majority’s flawed memory of Native Hawaiians coexisting with and consenting to the already-existing facilities on the mountain.

With the majority’s inscription of its flawed narrative into law, the court constructed and legitimized a “memory” of Maunakea devoid of Native Hawaiians. The opinion adds to the Western-produced historical accounts and narratives that minimize Native Hawaiians’ presence in Hawai’i’s history. The erasure of Native Hawaiians and their cultural practices from Maunakea supports the state’s and court’s presumption that no harm would be done by the TMT. “Limiting the analysis of Native

Hawaiian rights only to the TMT site” in the way the majority did “emasculates the law and not only deprives these rights fundamental justice, but essentially erases them from recognition.”

In its narrow analysis of traditional and customary rights on Maunakea, the majority perpetuated the narrative—often proffered by those who take issue with Kānaka Maoli’s “recent” mobilization to protect Maunakea—that traditional and customary practices have “co-existed” on the summit alongside astronomy for decades. In an act of erasure of Native Hawaiians, the *Mauna Kea II* majority concluded that since previous observatories had been “compatible” and “co-existed” with Native Hawaiian practices, so would the TMT.

Native Hawaiians, publicly and through formal testimony, have sought to counter these narratives that falsely assume the compatibility of astronomical structures on sacred land and the ability for such developments to co-exist with Native Hawaiian culture. Rather than remembering past observatories as compatible with the land and land-based cultural practices, Kia’i’s stories reminded us that Kānaka Maoli consented neither to the existing observatories nor the TMT, nor did any of the telescope developers meaningfully consult with Native Hawaiians or involve Kānaka in the processes of developing these projects.

Native Hawaiians seeking to protect Maunakea criticized that these developments never “co-existed” but have actually threatened cultural practices. And petitioners urged that the need for the *Mauna Kea II* case only existed because of the state’s unwillingness to listen to and recognize petitioners’ claims that observatories never co-existed with Native

Hawaiian traditions and customs on Maunakea. Kealoha Pisciotta lamented, “Native Hawaiians have watched the University repeatedly erect telescopes on Mauna Kea over and against their protests and patient explanations of the site’s sacred importance.” Others also recall their efforts over the past decades to “remed[y] the habitat loss, the repeated pollution accidents, the introduction of multiple alien predators and weeds, the permanent and irreversible alteration of the geologic terrain.” Time and again, however, Kia‘i’s pleas have fallen on the state’s deaf ears.

In its unprecedented approach, the majority limited the scope of its analysis to the TMT’s specific footprint and curtailed protections for Native Hawaiian traditional and customary rights. The court’s narrative not only shapes how we remember history but also influences how history will be evaluated under the law, and how the law will apply to future cases. The court’s formalist approach ignored the broader context of this issue as well as the real-life impacts the court’s decision would inflict. This formalist approach separates legal rules from their political and social implications and is particularly easy for courts to employ. By stripping away the surrounding context, courts—and other decisionmakers—can readily replicate unjust laws as well as the stories (i.e., collective memories), flawed or not, that originally justified them. The history transcribed by the court and the majority’s conclusion in Mauna Kea II illuminate the importance of collective memory in struggles for justice. The controversy over Maunakea is a testament to the court’s power and readiness to “filter and twist, recall and forget ‘information’ in reframing shameful past acts (thereby lessening responsibility)” to also define and enact “justice” in a way that does not actually redress Native Hawaiians’ rights claims.

The state’s intentional exclusion of the surrounding area ignored a history of Native Hawaiian customs and traditions involving Maunakea. Consequently, by looking only at the “application area” and holding that Native Hawaiian practitioners did not meet their burden to show the summit was essential for traditional and customary practices, the majority subverted the Ka Pa‘akai analysis and weakened protections for Native Hawaiians traditional and customary rights. This approach is contrary to the court’s analysis in Ka Pa‘akai, Na Wai ‘Ehā, and Wai‘ola, all three of which affirmed the state’s affirmative duty to adequately consider and protect Native Hawaiians rights.

The majority’s legal conclusions derived, in large part, from the history the court itself constructed. Thus, by putting blinders on to avoid the surrounding summit area, the court relieved the state of its public trust duties, including the obligation to protect traditional and customary rights. The court’s holding that BLNR met its constitutional duties—despite the actual and potential implications of its decision (i.e., ignoring relevant cultural practices; limiting the scope of analysis in a way that favors development; irreversible damage to the summit environment and natural resources)—absolved the state of its duty all together.

The majority abandoned the well-documented intent of Constitutional Convention delegates who sought to protect the “integral part[s] of ancient Hawaiian civilization” that are “retained by its descendants.” And opposite its own precedent, the court “narrowly construed” and “ignored” Native Hawaiians rights enshrined in Article XII, section 7. The court’s problematic framing of present-day cultural

practices as separate from those practiced by earlier Kānaka distorted the way traditions and customs have been perpetuated and passed down between generations of Kānaka Maoli.\textsuperscript{483} It presumed that traditional practices are frozen in the past, not “retained” in the present and for the future, and that the culture practiced by Native Hawaiians today is not legitimate and does warrant protection.\textsuperscript{484}

Further, the court’s analysis drastically departs from principles that have guided it in evaluating these fundamental protections. As Native Hawaiians argue, and as previous cases have upheld, Native Hawaiian traditions and customs that are practiced have adapted, and must continue to adapt, to changing times.\textsuperscript{485} For instance, in \textit{Palama v. Sheehan} (1968), the Richardson court upheld the exercise of rights along an ancient trail by vehicle rather than restricting use to horses and pedestrians as it was used around 1850.\textsuperscript{486} The Hawai‘i Supreme Court also held in \textit{PASH} that “notwithstanding arguable abandonment of a particular site, . . . traditional and customary practices remain[,] intact[.].”\textsuperscript{487} Therefore, even if there was a gap in time between exercising these rights on Maunakea—as a result of “stresses . . . in the form of dispossession, displacement, legal and moral prohibition and more”\textsuperscript{488}—“continuous exercise is not required[,]”\textsuperscript{489} Rather than interpreting these adaptations as traditions and customs that have been “retained”\textsuperscript{490} and “evolved over time[,]”\textsuperscript{491} the majority’s construing these adaptations merely as “contemporary Native Hawaiian practices that derive from . . . traditional and customary rights” threatens extinguishing them.\textsuperscript{492} “Affirming the continuation of traditional and

cultural practice is useless if there are no actual protections provided for practitioners to continue their practices.⁴⁹³

Taking everything into account, the court, in its analysis of traditional and customary rights exercised on Maunakea’s summit, reinscribed a colonial history into law and deployed those colonial narratives to justify ignoring its own precedent and changing the law itself to promote the development of the TMT on sacred land.⁴⁹⁴

C. The majority failed to acknowledge the TMT controversy within the context of colonization and its lasting impacts for Kānaka Maoli.

Kānaka Maoli relate the injustices of Maunakea back to a pattern of colonial “projects” developed in Hawai‘i. In contrast to the court’s extremely limited scope in evaluating “history” and Native Hawaiians’ rights to Maunakea, Kānaka—looking at the broader implications of colonization—understand this controversy as an episode in an ongoing series of injustices against Native Hawaiians. Kānaka Maoli’s collective memory of injustice of astronomy on Maunakea is therefore not just about Maunakea.⁴⁹⁵ The “ongoing violation of Hawaiians’ religious and cultural attachments to Mauna Kea is linked to colonial, systemic deprivation of self-determination that is materially detrimental to Native Hawaiian[s].”⁴⁹⁶

Kia‘i argued that the collective memory of Maunakea cannot be separated from many of the other past harms Native Hawaiians suffered as a result of colonization.⁴⁹⁷ Native Hawaiian musician and scholar Dr. Jonathon Osorio explained the state’s role in perpetuating the legacy of colonization in Hawai‘i:

Since the takeover of our country, we Kānaka Maoli have witnessed the steady and lately, spectacular erosion of our presence on the land that only [four] generations ago was exclusively ours. But of far greater concern, is that neither government nor public interests today effectively regulate the use of our lands in any meaningful way. To put this baldly, the lands of Hawai‘i have been offered up for speculation and to fuel expensive capital projects and neither environmental cautions [nor] community concerns [.] have

⁴⁹⁷ See, e.g., Ward Testimony, supra note 347, at 18; Written Direct Testimony of Jonathan K. Kamakawiwo‘ole Osorio 2 (Oct. 10, 2016), available at https://dlnr.hawaii.gov/mk/files/2016/10/B.07a-Osorio-WDT.pdf [hereinafter Osorio Testimony]. Dr. Osorio is also the Dean of Hawai‘inui‘akua School of Hawaiian Knowledge at the University of Hawai‘i Mānoa.
been able to balance the political trend away from the knee-
jerks of development . . . . Public resistance to the
construction of the [TMT] on Mauna Kea must be
understood within all of these historical contexts.\footnote{498}

Sharing a sentiment felt by many Kānaka Maoli, hula master and Maoli
educator Dr. Pualani Kanakaʻole Kanahele bemoaned the continued
desecration of Maoli lands: “For the economy, we have given up all of our
sacred spaces.”\footnote{499}

Thus, for Kānaka Maoli, challenging the TMT also means having to
challenge that larger narrative concerning colonization, which, as
demonstrated by \textit{Mauna Kea II}, is often excluded by decisionmakers in
considering present rights claims. Regardless, Native Hawaiians challenged
the “racialized images inscribed in and reproduced though law that continue
to foster systemic, present-day exclusion” of Kānaka Maoli in matters
concerning Maunakea and other Maoli lands.\footnote{500}

\section*{VI. \textit{Kū Kiaʻi Mauna}: Kānaka Maoli’s Effort to Protect Maunakea
And Reshape Predominating Narratives}

In their effort to bolster their familial, spiritual, and legal claims to
Maunakea, Kiaʻi testified before BLNR, the court, and the public to reshape
the narrative that has paved the way for the approval of the TMT. Set against
a backdrop of unresolved issues dating back to the beginnings of
colonization, this battle—as well as “future disputes over land and
development in Hawaiʻi”—is happening “within a context of growing
resentment of the state’s failure to protect vulnerable communities and
willingness to ignore inconvenient regulations in its rush to approve sizable
capital projects,”\footnote{501} as well as Native Hawaiians’ “increasing impatience
with the state’s management of our [ancestral] lands.”\footnote{502}

With this controversy hinging on which collective memory prevails,
\textit{Mauna Kea II} is actually a conflict “between people who see the history and
future of Hawaiʻi very differently.”\footnote{503} As Kānaka Maoli see it, the collective
memory of Maunakea and Native Hawaiians will determine how Hawaiʻi
reconciles “a ruptured past, contentious present, and very uncertain

\footnotesize{\begin{itemize}

\item \footnote{503}{\textit{Id.} at 1.}
\end{itemize}}
future.”

Although Kānaka Maoli hoped the court might serve as a site of “cultural transformation” in this battle, the Mauna Kea II majority only reaffirmed colonizers’ narratives and the status quo. By purposefully narrowing the scope of its investigation of history, the court and “the legal process reinforce[d] inequality [and the] power imbalance” between Kānaka Maoli and the private interests that the state favored. Equally important, the court shared a public message that shapes larger societal understandings and policy actions over time.

The court’s intentional framing of Maunakea’s narrative—justifying increased development on an already significantly, substantially, and adversely impacted sacred space and arbitrary limitations on Native Hawaiians’ traditional and customary rights—poses grave implications. The over-development of the kapu area would result in detrimental changes to the “environmental forms” of akua (i.e., the resources and elements on Maunakea), negatively affecting the landscape and changing the summit’s climate. With the deep connection Kānaka Maoli have with the mountain and its resources and elements that exist there, the “irreparable harm caused by the TMT Project will include . . . [p]sychological harms caused by the desecration of a [sacred] site.” Such harms, to “the feeling associated with sites and the cultural practices associated . . . cannot be mitigated.”

On a spiritual level, because Kānaka Maoli know Maunakea is an ancestor that must be cared for, the TMT would sever “connection[s] . . . between the ancestral and human realm. Information shared between us, and knowledge passed down ancestrally would be lost. Interaction between the mountain and the human would be diminished like a loss of a family member, and the death of a way of life.” Further desecration of the summit by the TMT “harm[s Native Hawaiians’] ability to transmit knowledge about who they are in relation to this place to future generations.” Thus, for present and future Kānaka, the TMT is a desecration to Maunakea that would “harm the ability of kānaka to be fully

As explained by Maoli scholar and educator Dr. Noelani Goodyear-Ka‘ōpua,

Aloha ‘āina has been a practice of Kanaka Maoli survivance for generations, and it is based on the understanding that lands, including Mauna a Wākea, are familial kin . . . Kānaka Maoli are not just related to the land but are indeed part of it. The health of kānaka and their cultural identities is directly tied to the health of the land and is thus harmed when the ‘āina is harmed.

The TMT’s “irreparable harms” will extend to and impact future generations of Kānaka by “inhibit[ing] and harm[ing]” the “kuleana relationships between Kānaka Maoli and this Mauna” that Native Hawaiian practitioners and educators have been “trying to preserve and perpetuate[.]”

But the battle over Maunakea, and its collective memory, continues. Although their memory did not prevail in the Hawai‘i Supreme Court, the battle over Maunakea—and its collective memory—continued outside the state’s formal adjudicative processes. Native Hawaiians have since looked beyond the court for ways to “publicize counter narratives that challenge dominant understandings, or master narratives” about Native Hawaiians and their justice claims. While the majority opinion might be considered the “prevailing” collective memory, Kānaka Maoli’s most recent stand to protect Maunakea challenges that narrative in the public domain. To support their claims to Maunakea, Kānaka Maoli challenged the TMT at demonstrations across the Hawaiian archipelago and through a media campaign that reached international audiences and challenged mainstream narratives of Native Hawaiians.

A movement in the making, over 300 Kānaka Maoli—from Hawai‘i Island and beyond—mobilized in the early hours of July 17, 2019 to block the Mauna Kea Access Road and halt the TMT’s planned start of construction. Some Kānaka Maoli chained themselves across

cattleguards, while others stood arm in arm.520 Kūpuna comprised the frontline of the blockade.521 These Kia‘i committed to peacefully resist the state-sanctioned desecration while remaining in kapu aloha, a discipline “rooted in dignity and humanity” and a code of conduct that allow Kānaka Maoli, by acting only with love and kindness, to honor the sanctity of Mauna a Wākea.522

Denouncing Native Hawaiians’ actions as “lawlessness,” law enforcement, equipped with riot gear, confronted Kia‘i and arrested thirty-three Kūpuna, raising tensions among the broader community.523 That same day, Governor Ige declared a statewide proclamation of emergency “to ensure the execution of law [and] suppress or prevent lawless violence.”524 Highlighting the ongoing battle over collective memory of injustice, Governor Ige intimated that Kia‘i, the Native people of this land, were “illegally occupying” space on the Mauna.525 The court’s decision—based on the selective history it inscribed—is, thus, also a “public message” that TMT supporters, including Governor Ige, can rely on to further deny justice to Native Hawaiians while simultaneously labelling them vagrants for violating the “rule of law.”526

525 See Proclamation, Office of the Governor, supra note 524.

Uncritical of the majority’s regressive opinion, TMT supporters, and other bystanders, claim that the rule of law justifies the harassment of Kia’i by law enforcement and the state. Their critiques—that Kia’i are over-emotional and stuck in the past—perpetuate tired “colonial tropes [that] point to the sense of American exceptionalism brought with the U.S. occupation of Hawai’i.” They “see irrational people who fail to see the unique opportunity TMT can provide to Hawai’i and the world.” Emboldened by *Mauna Kea II*, they ask, “[i]f the legal process is thwarted by a vocal minority, what about the rule of law?” But, as Critical Race Theorists and Professors Mari Matsuda and Charles Lawrence III articulated, “settled law can give way when a committed minority heeds the justice call.”

By taking their stand to protect Maunakea, despite criticisms relying on *Mauna Kea II* and the flawed narratives it impressed, Kia’i actively worked to reshape the collective memory of injustice of Maunakea and Kānaka Maoli. And despite the state’s attempt to quash the movement along with Native Hawaiians’ justice claims, the organized movement quickly grew. Kia’i committed to living on the Mauna at Pu’uhonua o Pu’uhuluhulu for as long as necessary. While braving the harsh climate

(*Id.* (“As Hawaii confronts a climate apocalypse we are woefully ill-equipped for, we face annihilation if we cannot learn kapu aloha and a new rule of law: one based on caring for the land and for one another. Instead of seeing protectors on the mountain as crazy Hawaiians, we should consider whether they bring a vision of law that will save our lives.”)).

See *id.*; PU’UHONUA O PU’UHULUHULU, puuhuluhulu.com. Named after the
at an altitude over 6,000-feet, Kānaka Maoli quickly established a highly-organized community rooted in kapu aloha.533

With a “Mauna Media” team documenting the events at Pu’uhonua o Pu’uhuluhulu, the protectors were able to take control over framing how the public perceived what was happening on Maunakea and what led to Kānaka Maoli taking their stand to protect Maunakea in 2019.534 By posting the initial images and videos of Kia’i chained to cattle grates and the live coverage of Kūpuna arrests, “[t]he peaceful dignity of these [Kia’i]” established the media frame for the following weeks” of the Kū Kia’i Mauna movement.535 Soon after, news, information, and personal stories were disseminated directly from Kia’i to the public through social media (i.e., Facebook, Instagram, and Twitter), YouTube videos, the Pu’uhuluhulu website, press releases, and video recordings of near-daily announcements made by Kia’i leaders.536

Not only did the media team “allow[] for rapid mobilization of [protectors],” but it “spread awareness fast and without cost.”537 In this deliberate endeavor to confront pro-TMT narratives and to reshape the

533 Pu’u’u hill) on which it was established, the Pu’u’honua was “established by Kia’i with the support of the Royal Order of Kamehameha ʻEkahi for the purpose of protecting sacred Maunakea.” Id. “Pu’u’honua” are established places of refuge, sanctuary, and peace and safety. Hawaiian Dictionary, supra note 1, at 358.

535 Id.

536 Id. Sterling Higa describes the “concerted effort to control the narrative on social media probably contributes to the generational divide in public opinion, with older people supporting the telescope and younger people opposing it.” Id.

537 Id. This rapid mobilization and communication via social media allowed Kia’i to garner support in ways that the movement might not have seen otherwise. Id. Those unable to travel to Maunakea sent on-the-ground Kia’i money through Venmo or CashApp to help pay for food, water, and other necessary supplies. Id. And when Kia’i, who were shuttling people to and from the Mauna, lacked money for car repairs, donors were quickly notified and just as quickly met those Kia’i’s needs. Id.
enduring collective memory of Mauna Kea and Kānaka Maoli, Kiaʻi filled the gap in the collective memory that neither local news outlets, which did “not have the resources to properly cover all of the resistance[,]” nor international news outlets, “much of which downplayed . . . Native Hawaiians’ range of concerns,” could accurately cover. Kiaʻi and their media team “reveal[ed] . . . the severely misguided understanding of Native Hawaiian perspectives” held by journalists, local and international communities, the State, and the court. Maoli activist Kawena Phillips explained, this movement and the concerted effort to confront and reshape these narratives central to the collective memory of injustice “is about telling the world that [Native] Hawaiians have a right to our own land, a voice in what happens to it, [and] a right to have people listen to and respect our wishes for our land.”

Early news coverage of the events on Maunakea did not include the “history of litigation that has been ongoing for years around the Mauna, [or] the century-long fight of Native Hawaiians to be recognized, eventually culminating in an apology from the [United States] in 1993 for the forceful and illegal annexation of Hawaiʻi.” But since then some mainstream news outlets have adopted the narrative that, “[a]s [Native] Hawaiian leaders have been stating for decades, this struggle is about ‘more than just [the TMT.]’” Articles published in mainstream outlets including The New York Times, The Guardian, and USA Today began to tell a collective memory of decades of Maoli opposition to development on Maunakea that had been ignored; the project’s damage to the ecology, the

“a victory for the protectors,” though Kia‘i continued to hold space on the sides of Mauna Kea Access Road.\footnote{Michael Brestovansky, Protestors, Kim Reach Agreement to Reopen Maunakea Access Road, HAW. TRIB.-HERALD (Dec. 27, 2019), https://www.hawaiitribune-herald.com/2019/12/27/hawaii-news/protesters-kim-reach-agreement-to-reopen-Maunakea-access-road/.} As of this writing, the TMT’s construction is still halted.

In what has become a 21st century “Hawaiian renaissance,” elders said that this type of movement was unprecedented.\footnote{Kapu Aloha: Remember Your Ancestors, PU‘UHONUA O PU‘UHULUHULU (Sept. 13, 2019), https://www.youtube.com/watch?v=adeqsmRgdyl (“We’ve never experienced anything like this.”). In what became an island-wide movement sparked by this battle over Maunakea, Native Hawaiians across the pae ‘āina (archipelago) were emboldened by Aloha ‘Āina, similar to Kānaka of generations past, and mobilized against developments that threatened the integrity of their communities. Christine Hitt & Aaron K. Yoshino, How the Conflict Over the Thirty Meter Telescope Has Reawakened a More-Than-Century-Old Battle, HONOLULU MAG., http://www.honolulumagazine.com/how-the-conflict-over-the-thirty-meter-telescope-has-reawakened-a-more-than-century-old-battle/ (“No matter where you stand on this issue, there is no question that widespread media coverage surrounding Maunakea has reinvigorated activism in the Hawaiian community and focused attention on other movements and protests across the state. On Sept. 26, 2019, 28 people were arrested while blocking construction equipment headed to a $32 million proposed sports complex at Waimānalo’s Sherwood Forest. About three weeks later, 22 arrests were made in Kahuku and 33 in Kalaeloa after dozens of protesters tried to stop transportation of turbine equipment to the Nā Pua Makani wind farm project.”).} This renaissance illustrates that there is no master narrative or prevailing collective memory of the injustice of Maunakea and Native Hawaiians, despite colonizers’ efforts to cement their incomplete narratives as truth.\footnote{Osorio Testimony, supra note 498, at 3–4.} On the contrary, the battle continues as Native Hawaiians challenge the narratives that have stood as barriers to achieving justice. Although colonizers’ narratives predominated for centuries, Kia‘i have begun reshaping the stories told about Maunakea and Kānaka Maoli in the courts, on social media, through public demonstrations and increased academic scholarship. Through all these efforts, Kānaka Maoli challenge the very narratives that deny them justice.

VII. LOOKING TO KA WĀ MA HOPE: THE FUTURE OF MAUNAKEA AND KĀNAKA MAOLI

Dr. Jonathon Osorio foresaw, as presented in his contested case testimony nearly four years ago, that “the renewal of the protest on the mountain, should the TMT prevail [in court] and try to resume construction, will shake the political foundations of the state.”\footnote{Osorio Testimony, supra note 498, at 3–4.} Just as Dr. Osorio
Kānaka Maoli have done just that.\textsuperscript{559} Through investigating, criticizing, and correcting the inaccurate historical narratives deployed by the Hawai‘i Supreme Court and others in support of the TMT, Kānaka Maoli have illuminated their collective memory of injustice, one which sets the controversy shrouding Maunakea against a backdrop of colonization’s continued destruction to Maoli land (including Maunakea), Maoli people, and Maoli self-determination.

This battle over Maunakea is, at its heart, a battle over the collective memory of Maunakea and Kānaka Maoli and the injustices committed against them both. As Professor Yamamoto points out, “if we seek justice by claiming civil or human rights, we must at the outset critically engage the dynamics of group memory of injustice.”\textsuperscript{560} These group memories are “not about simply recalling past events” but rather they are constructed in the present—they are “built and continually altered.”\textsuperscript{561} The collective memory cast by \textit{Mauna Kea II}, only appearing to take into consideration Maoli voices and perspectives, justified the resulting curtailment of Native Hawaiian traditional and customary rights. By ignoring the purpose and intent behind Native Hawaiian traditions and customs on the Mauna, the court deemed that no “relevant” traditional and customary rights were ever exercised by Kānaka. According to the majority’s selective version of history—void of Native Hawaiians, of the continued resistance to development on Maunakea, and of the University and BLNR’s mismanagement of the summit’s resources, void of any discussion of the illegal overthrow—“justice” requires that the TMT, having gone through the “proper” legal process, ought to be built.\textsuperscript{562}

Although the memories acknowledged by decisionmakers (i.e., BLNR, the \textit{Mauna Kea II} court) typically dictate notions of justice, the legal process “is one, but only one, significant aspect” in shaping both collective memory and justice.\textsuperscript{563} Despite the court’s use of historical narratives that, in actuality, perpetuate colonization’s harms to Maunakea and Kānaka Maoli, Kia‘i and their allies have illuminated that the battle also “take[s]...

\textsuperscript{559} See id.
\textsuperscript{560} Hom & Yamamoto, supra note 5, at 1764.
\textsuperscript{561} Id.
\textsuperscript{562} See \textit{Mauna Kea II}, 431 Haw. 379, 431 P.3d 752 (2018). In discussing Native Hawaiians’ potential unjust enrichment claims, Harvard Law Review importantly argues that “choosing how to recount history can dictate the victor of a land dispute. Aloha ‘Aina: Native Hawaiian Land Restitution, 133 HARV. L. REV. 2148, 2151 (2020). Courts evaluating land claims by Native Hawaiians should trace earlier than the lease at hand, to the Overthrow of the Hawaiian Kingdom.” Id. Although \textit{Mauna Kea II} did not address restitution claims, telling a complete history of Native Hawaiians and Maunakea, including the overthrow, remains nonetheless important in determining Native Hawaiians’ rights claims. See id.

\textsuperscript{563} Hom & Yamamoto, supra note 5, at 1765 (emphasis omitted).
Through mass demonstrations, social media, and Maoli scholarship, art, and literature, Kānaka Maoli have increasingly controlled the stories told and retold about Maunakea, Native Hawaiians, and their justice struggles.

By taking control over the narrative, Kānaka Maoli have more fully and accurately portrayed the collective memory of injustice shrouding Maunakea, one that is not separate from the enduring injustices Native Hawaiians face as a result of colonization. Deploying collective memory as a political tool, Native Hawaiians also envision the Kū Kia‘i Mauna movement as a part of a larger movement to rectify colonization’s gravest harms, including global climate change and human rights violations against Indigenous Peoples. Through actively reshaping the collective memory of Hawai‘i’s past (“ka wā ma mua”), as Maoli Political Scholar and Professor Kamanamaikalani Beamer succinctly put, Native Hawaiians have “altered what’s possible in Hawai‘i and what’s possible” for Kānaka Maoli in “ka wā ma hope.”

I support adoption of UH's draft Master Plan for Mauna Kea

Mike Gonsalves <indigo.gonzo@gmail.com>  Tue, Jan 18, 2022 at 5:39 AM
To: bor.testimony@hawaii.edu

Dear Board of Regents:

I support adoption of UH's draft Master Plan for Mauna Kea because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up.

We can all share and care for Maunakea! I mua Kilo Hōkū and i mua TMT!

With respect and aloha,

Michael L. Gonsalves
858 Hoomalu Street
Pearl City, HI 96782
Aloha Kakou.

I am writing to strongly support the adoption of UH's draft Master Plan for Mauna Kea.

If there is anything that the last 2 years have taught us is the importance of diversifying the economy in Hawaii and to not be so dependable on Tourism. Astronomy is not only a clean industry, but it is also one that provides strong economic benefits to Hawaii.

While UH might have committed some mistakes in the past on the management of the Maunakea land they manage, they have shown over the past 10+ years significant improvements and dedication. UH has demonstrated leadership in the Stewardship of the Mountain and they are the right entity to continue to manage those lands and to oversee astronomy on Maunakea.

I stand in strong support of UH and their Master Plan.

Mahalo

I have lived on Hawaii Island 34 years. I taught earth science at Pahoa High and Intermediate school for 10 years through out the 90s.

TMT offers opportunities in STEM education we lack. It offers good jobs and opportunities. It will help look for incoming asteroids we can now do something to deflect. It will greatly enhance science for the world. We can give new discoveries Hawaiian names as has already been demonstrated. Please approve telescopes on Mauna Kea and the TMT. Telescopes are a huge win for Hawaii Island and the world.
I currently live on slopes of Mauna Kea and love seeing the telescopes from my farm.

Karen Buenavista Hanna <khanna@conncoll.edu> To: bor.testimony@hawaii.edu
To: bor.testimony@hawaii.edu
Cc: protectmaunakea@gmail.com

To the Board of Regents of the University of Hawai’i

January, 2022

Dear Board of Regents of the University of Hawai’i,

My name is Karen Buenavista Hanna. I am a concerned citizen and assistant professor at Connecticut College.

I respectfully ask that UH reject the Mauna Kea Master Plan, halt the Thirty Meter Telescope project, and return Mauna Kea to Kanaka Maoli governance.

The Mauna Kea Master Plan is deeply flawed in many ways. It does not respect the wishes of the vast majority of the Indigenous cultural practitioners of that place. It proposes to block their access with gates. It proposes further construction on Mauna Kea, which Kanaka Maoli have not consented to in any way. It proposes perpetual stewardship by the University of Hawai’i, with no plan of ever returning this sacred mountain to the rightful owners of the Crown Lands upon which UH’s Science Reserve sits.

The University of Hawai’i needs to listen to the actual voices of the people of this land, who have been speaking clearly for a long time. Please reject the Mauna Kea Master Plan, stop TMT, and begin the long but worthwhile process of true healing, so that the University of Hawai’i may be a place of genuine learning.

Thank you for your time and consideration.

Sincerely,

Karen Buenavista Hanna, PhD
Aloha, University of Hawaii is the most logical entity on our island to manage all things astrological. What other entity on the island comes close to their expertise or resources? Our island's economy, scientists and keiki need the TMT, and the sooner the better.

Aloha,

I am a native Hawaiian and I support adoption of UH's draft Master Plan for Mauna Kea because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up.

Leinaala Hutchinson
Aloha,

We continue to support adoption of UH's draft Master Plan for Mauna Kea. We are proud of the work that astronomers on the mountain have accomplished and support the building there of the TMT. The mountain is large enough to accommodate native Hawaiian practitioners as well as astronomers. It is ludicrous that so-called protesters want to make it an either/or us-versus-them situation. We are tired of minority rule that allows myth to trump science.

Mahalo.

Don and Kerrill Kephart
Aloha!

Kudos to the Mauna Kea working group for attempting the impossible. I do not believe there is any governing model that will pass muster with the TMT protesters, who have for some time placed themselves outside the law in opposition to the rest of the State of Hawaii. The State of Hawaii must not bow to their illegal blockage of the Mauna Kea Access Road. It is of vital importance to the future of our keiki, our environment, our economy, and the conduct of State business that the TMT project go forward. In my view, the new proposed plan and structure put forward by UH deserves your full support. The Mauna Kea Working Group draft report, however well intentioned, should be scrapped in its entirety.

If, however, the draft report remains on the table, I urge you to address the following shortcomings and issues.

1. The astronomy industry must have a vote in the management of Mauna Kea, through the Mauna Kea Observatories Group as well as through UH—that's two votes, please. We are talking about the entities that maintain the access road and inject billion in much-needed green investment into our economy, helping diversify us away from an economy overdependent on tourism and overexploitation of our aina.

2. The protesters must agree to cease and desist with their protests against TMT. They've had their say. The law is against them and the majority of the Hawaiian population (including the native population) is against them. The tyranny of the minority must cease.

3. References to HRS 183 (which addresses forest reserves) and HRS205A (dealing with Coastal Lands) have no place in a document addressing management of the summit of Mauna Kea, which is above the tree line and far from the coast. These references are Trojan horses for future zoning shenanigans to impede the astronomy industry. These disingenuous references must not stand.

4. With all due respect to those who proclaim the “sacred” status of Mauna Kea, Mauna Kea is not sacred as a Native Hawaiian matter. The ali‘i abolished the kapu religion over 200 years ago, and our Constitution prohibits the government from establishing a religion. The opinion or belief that Mauna Kea is sacred is a private matter, by no means shared by all or even the majority of Native Hawaiians.

5. What’s with “Mauna a Wakea”? Whatever the hidden agenda is in promulgating this name, it should not be indulged in document funded by taxpayers. It’s partisan propaganda.

Mahalo nui loa for your attention.

Resident of Hilo, Hawaii
I support adoption of UH’s draft Master Plan for Mauna Kea because it keeps astronomy alive, including the Thirty Meter Telescope (TMT). UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that take place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. Do not let us be the ones Puck was referring to when he said, “Oh what fools these mortals be”, or be swayed by the vocal protesters who, as Lucy wisely advised Charlie Brown, “If you can’t be right, be wrong at the top of your lungs.”

The recently launched James Webb telescope is being heralded to world-wide acclaim. That same recognition, respect, and appreciation will also deservedly be given to the TMT.

I mua Kilo Hoku and i mua TMT.

Mahalo nui loa, and aloha,

Linda Hunter
P.O. Box 888

To whom it may concern:

I would like to express my support for the adoption of UH’s draft Master Plan for Maunakea, especially because it serves to keep astronomy alive on Maunakea (including the Thirty Meter Telescope, TMT). UH has done an excellent job of managing the mauna over the last 20 years, especially with respect to obtaining a permit for the construction of TMT.

TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built.

Furthermore, Maunakea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Maunakea is our culture. Astronomy on Maunakea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. As a secondary educator, my classes directly benefit from the presence of astronomy in this state. Keeping astronomy on Maunakea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. I mua Kīlo Hōkū and i mua TMT!

Sincerely,
Andrew Repp

Approve the Master Plan and ensure renewal of the Master Lease with the University of Hawai‘i.

- Only UH can credibly continue to manage Mauna Kea---in spite of perceived or real past insensitivities.
- Mauna Kea is actually among the few best managed state-owned parcels of land in Hawai‘i.
- Any other proposal does not insure the expertise required to manage Mauna Kea for the benefit of Hawai‘i’s keiki.
- UH regents know that too few science educational and enrichment opportunities are available to marginalized populations in the state.
- Hawai‘i’s keiki need UH and this state's unequivocal commitment to encourage astronomy and STEM education in the state.
- The United States government aims to address this problem.
- UH will manifest its commitment in this effort by approving the Master Plan and renewal of the lease.

Inclusion across the Nation of Communities of Learners of Underrepresented Discoverers in Engineering and Science (NSF INCLUDES) Design and Development Launch Pilots

Inclusion across the Nation of Communities of Learners of Underrepresented Discoverers in Engineering and Science (NSF INCLUDES) is a comprehensive national initiative designed to enhance U.S. leadership in science, technology, engineering and mathematics (STEM) discoveries and innovations focused on NSF’s commitment to diversity, inclusion, and broadening participation in these fields. NSF INCLUDES supports efforts to create networked relationships among organizations whose goals include developing talent from all sectors of society to build the STEM workforce. This initiative seeks to improve collaborative efforts aimed at enhancing the preparation, increasing the participation, and ensuring the contributions of individuals from groups that have traditionally been underrepresented and underserved in the STEM enterprise: women, persons with disabilities, African Americans/Blacks, Hispanic Americans, American Indians, Alaska Natives, Native Hawaiians, Native Pacific Islanders, and persons from economically disadvantaged backgrounds. Significant advancement in the inclusion of these groups will result in a new generation of STEM talent and leadership to secure our nation’s future and long-term economic competitiveness. https://www.nsf.gov/pubs/2017/nsf17522/nsf17522.htm
In support of UH Master Lease for Mauna Kea

UH Board of Regents

I am in strong support of the UH Master Lease for Mauna Kea. Astronomy was a strong part of the original finders of the Hawaii islands and continued for many generations. That knowledge was originally a passed on to the best of the Kānaka Maoli. It is pono that the management of our critical Mauna Kea infrastructure be under the guidance of the most capable institution, one that is interested in the the health and well being of the land, the science, the culture, and the history of astronomy in Hawaii.

Please vote to continue that legacy.

sincerely

Master Plan for Mauna Kea
1 message
Re: Partial Report of the Maunakea Plan Review Permitted Interaction Group Recommending Consideration of Approval of the Proposed Master Plan for the University of Hawai‘i Maunakea Lands and Adoption of the Master Plan for the University of Hawai‘i Maunakea Lands -- E Ō I Nā Leo (Listen to the Voices) -- University of Hawai‘i Board of Regents meeting, Thursday, January 20, 2022.

Regents, a poem:

This is not ethnocracy.

This is not theocracy.

This is science based-industry disestablishmentarianism.

Resist.

Ignore posers.

Dismiss n00b self-pwnage.

Aquaman is fake.

Do not reduce numbers of telescopes and astronomical facilities atop Mauna Kea.

Peoples of Polynesia have looked to the heavens for guidance and insight for millennia.

Do not regress.

Mahalo,

pb

William (Bill) Lester
If the plan doesn’t work, change the plan. But never the goal.
Aloha
I am having a very difficult time understanding why building the TMT on Mauna Kea is a problem whatsoever. Hawaii gets a shining star as a leader in astronomy. Hawaii gets permanent great paying local jobs will result. The foundation is paying one million for rent a year and donating one million to local schools. FIVE usable telescopes will be removed to appease the misinformed. The TMT will not be seen from below. The telescopes occupy 1% of the summit. There are no temples nor burial grounds on the summit. The arguments against it are ignorant and remind me of the lies that the MAGAs have bought into regarding the election…Telescopes do not produce nuclear nor other toxic waste. The information obtained will not be sold for a profit. The summit is Kapu not because of religious significance but because the high altitude killed people in the old days. The old kings wanted to protect the people from altitude sickness. A sad misinformation campaign has people believing delusional ideas. Let's not hesitate. Build the TMT now!

Sent from my iPhone
I strongly support the adoption of UH's draft Master Plan for Mauna Kea because it is the best option for keeping astronomy on Mauna Kea including TMT alive. Over the past 20 years, UH has conscientiously improved and perfected its management and today, it is some of the best managed state-owned land in Hawaii.

The protesters' game is to delay as long as possible. Changing the management system would create chaos for the astronomy community. If the Master Lease is not renewed, it will create legal ambiguity that the protesters believe will stop TMT and possibly push the telescopes off Mauna Kea.

Mauna Kea Observatories are the most scientifically productive collection of telescopes in the world. Astronomy on Mauna Kea is respectful and inspired by Hawaiian culture. It provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world class nature of the work that goes on there.

Mauna Kea Observatories are a treasure and TMT would be an amazing feat for Hawaii to bring to fruition. I pray that it can be completed. The UH Master Plan will make it possible for these benefits to continue into the future.

Honoka’a, Hawaii.
Board of Regents:

I am writing in support of the UH Hilo Center for Maunakea Stewardship's existing management structure and stewardship of Mauna Kea and in strong opposition to the approach taken and the recommendations made in the Mauna Kea Working Group draft final report. It is clear from review of the draft that the ostensible purpose of the group, to propose a new framework for management of Mauna Kea, should be understood as code to develop a way to stop TMT. Let me explain my conclusion:

- Eliminating the astronomy community, one of the primary island communities utilizing space on Mauna Kea, from the Government Entity proposed as the new Manager is a confounding conclusion for a group dedicated to "community input and outreach" to have reached. It ensures anything but comprehensive "community input".

- Taking an extremely one sided and ethnocentric view of a shared environmental resource is hardly the way to avoid the polarization the report decries in its description of the previous efforts undertaken by the current Manager.

- Ignoring the recent efforts the UH Hilo Center for Maunakea Stewardship has proposed, in what seems a good faith effort, to listen to complaints and ameliorate past omissions, certainly presents a one-sided assessment of a complex situation.

- Allowing a three year transition period for the new Governing Entity to assume management ensures that sufficient lease arrangements for TMT and for astronomy on the mountain are impossible, thus rendering the demise of TMT a foregone conclusion.

- Planning to “return the Mauna above 9200 feet elevation to its natural state”, which I can only read as a pre-observatory state, is pretty unambiguous about blocking TMT and astronomy in general from the mountain and the state.

I get it that the idea for this working group was a political placeholder for opposition to TMT, and that that opposition is in its turn a placeholder for outrage at the abridgement of Hawaiian sovereignty, but why the subterfuge? Let’s call it what it is and call this report what it is: an exhaustive effort at further confusing a complex situation in which there are multiple stakeholders, and an excuse for coming up with a pre-determined conclusion for one highly vocal stakeholder group that by no means speaks for the entire group it proports to represent.

Dennis Boyd
Kailua Kona
As a Hawaii born person, I strongly believe that TMT is the best gift we could get. This is an opportunity to allow our citizens to excel in the world, and an extraordinary opportunity for our keiki.

Please have UH continue to manage this as they have done an extraordinary job to date.

Hawaii Island Chamber_BOR testimony 01182022.pdf
133K
January 18, 2022

TO: University of Hawai‘i Board of Regents

FROM: Miles Yoshioka, Executive Officer
Hawai‘i Island Chamber of Commerce

SUBJECT: Support for Proposed Master Plan for the UH Maunakea Lands

Aloha Chair Moore and all distinguished Regents,

The Hawai‘i Island Chamber of Commerce, formed in 1898 by the business community of the Island of Hawaii, has continued to be a dedicated supporter of scientific and, in particular, the astronomical enterprises on Maunakea.

In 1963, the Executive Secretary of this Chamber, Mr. Mitsuo “Mits” Akiyama began his quest to rebuild the economy of Hawaii Island, then devastated by the 1960 tsunami that hit Hilo Bay, much as how the COVID-19 pandemic is affecting Hawai‘i Island’s economy today. Through the efforts of Mr. Akiyama, Mauna Loa astrophysicist Howard Ellis and astronomer Dr. Gerard Kuiper, the first telescope was placed on the mountain a few years later for site testing, a precursor to the world-class astronomical center it is today.

Our chamber continues to stand with Hawaii’s business community in support of astronomy, science, culture and environmental stewardship. The economic benefits of this industry are significant. There are hundreds of local residents currently working in the industry earning good wages and supporting their families and community.

Initially through the Office of Maunakea Management and now, through the Center for Maunakea Stewardship, UH has dedicated its management efforts to the protection of the natural and cultural resources while ensuring the UH managed lands on the mountain allow for world-class astronomy. A point we should all be proud of.

HICC members have actively participated in every management plan process, invasive weed pulls and one of our members was awarded for her efforts in partnering with CMS for environmental stewardship. We are working together in our community to ensure best management practices continue for Maunakea.

The University of Hawaii has sought to balance multiple community interests when it comes to Maunakea. The balance struck in the Master Plan limits
telescope development and protects natural and cultural resources, all while ensuring a world class astronomy program for Hawaii continues.

We stand by our testimony submitted in December 2021 in support of the Master Plan. We call on you to support the Master Plan as well and continue stewardship efforts to malama Maunakea.

Thank you for your time.
Requesting UC to withdraw from TMT

January 18, 2022
Dear Board of Regents of the University of Hawai‘i,
My name is Amisha DeYoung-Dominguez. I am a concerned citizen, UCSB alumni, mother, and attorney from Oxnard, California.
I am taking time from being with my family and toddler because it is important that you hear from people from all walks of life.
I respectfully ask that UH reject the Mauna Kea Master Plan, halt the Thirty Meter Telescope project, and return Mauna Kea to Kanaka Maoli governance, for all the same reasons that advocates have been urging you to do so.

Sincerely,
Amisha DeYoung-Dominguez
I support adoption of UH's draft Master Plan for Mauna Kea because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. I mua Kīlo Hōkū and i mua TMT!
Aloha kākou, I am writing in support of the new University of Hawaiʻi Master Plan, E Ō I Nā Leo. I believe that UH has learned a great many lessons in its time managing the mauna and any new entity seeking to manage Maunakea would not be equipped with these experiences. That being said, I think UH will need to dedicate a lot more financial and staff resources to support this vision proposed in the new Master Plan than what they currently provide. The organizations mentioned in this plan such as the ʻImiloa Astronomy Center of Hawaiʻi and the Center for Maunakea Stewardship have incredibly dedicated and hardworking staff who mālama Maunakea in various ways. Their staff needs to be doubled to support the goals of holistic and hands-on educational programming and stewardship that this plan proposes. I also firmly believe that public access should be restricted or heavily discouraged for particular areas on Maunakea to preserve them physically and spiritually.
sincerely hope that the adoption of this plan will bring about radical change in stewardship, education, science
and culture on Maunakea.

Your Testimony (pdf or word)

No file attached
Aloha,

Please accept the Maunakea Observatories written testimony for the regents meeting on Jan 20, 2022, regarding agenda item VI.E-F about the Proposed Master Plan for Maunakea.

Thank you,

Rich Matsuda

W. M. Keck Observatory

MKO Testimony_2022 January 18.pdf
138K
To: University of Hawaiʻi Board of Regents  
From: Maunakea Observatories  
Subject: Testimony on Proposed Master Plan for the University of Hawaiʻi Maunakea Lands  
Date: 18 January 2022  

The Maunakea Observatories (MKO) appreciate the University’s efforts to guide land use decisions for the next two decades through the proposed Master Plan, E Ō I Nā Leo. MKO extends our support and desire to collaborate to all stakeholders on Maunakea as the important and weighty future responsibility of governing the Maunakea Science Reserve lands is determined.

The MKOs agree with a long range commitment to astronomy in the draft Master Plan. We believe science is important, and astronomy is beneficial to our local community, the state of Hawaiʻi, and the world.

For the past five decades, telescopes on Maunakea have provided important new knowledge about the universe, including two Nobel Prizes in Physics, the very first image of a black hole - Pōwehi, detection of ‘Oumuamua - the first known interstellar object passing through our solar system, the first image of a solar system beyond our own - HR8799, and much more. The publicly shared scientific knowledge produced on Maunakea deepens our understanding of the laws of nature and even addresses fundamental questions about human existence.

There are many positive benefits that result from our scientific endeavors. We share astronomy with students through our many STEM outreach activities, such as the Maunakea Scholars Program that provides opportunities for Hawaiʻi public high school students to engage in research using highly-coveted time on Maunakea telescopes. We provide high-quality internships to college and community college students from Hawaiʻi through programs like the Akamai Workforce Initiative. And, we offer a wide range of engineering, technical, scientific and administrative employment opportunities for Hawaiʻi residents in our workforce of approximately 500 jobs at the MKOs. In addition, the MKOs rely on scores of local businesses to conduct our operations. The total economic impact is significant, contributing approximately $200M per year to Hawaiʻi’s economy.

While we believe in the benefits of astronomy, we acknowledge that for many in the Native Hawaiian and local community Maunakea is a wahi pana of immense environmental and
cultural significance that takes priority over other activities. Knowing this, we strive to conduct astronomy in a balanced and respectful way with care for the environment and respect and support for Native Hawaiian cultural practices. Our thoughts are in alignment with the recently released Decadal Survey on Astronomy and Astrophysics 2020 (Astro2020) from the National Academies of Sciences, Engineering and Medicine, which includes a major recommendation for “the development of a new model for respectful, collaborative decision-making in partnership with Indigenous and other local communities.” As such, the MKOs recommend the plan be more specific about its impacts on the indigenous Native Hawaiian and local communities, and that the plan outline processes for meaningful partnership and collaborative decision-making with these communities, which we look forward to participating in.

Thank you for the opportunity to provide testimony.

Aloha,

Director Hilton Lewis, W. M. Keck Observatory (Keck I and Keck II)

Interim Director Andy Sheinis, Canada-France-Hawaii Telescope

Director John Rayner, NASA Infared Telescope Facility

Director Michitoshi Yoshida, Subaru Telescope
Aloha:

Because the present use of Mauna Kaaba has been so beneficial and can continue to be, I recommend that you continue this program. I am proud that Hawaii is a window into the universe and that you have administered this respectfully and responsively.

Mahalo

Gene Grounds
Aloha. I am a Hawaii island retired public school teacher and I have worked as a middle school science teacher at Honoka‘a High and Intermediate and ma ke ‘ano he kumu ‘epekema malaa‘o a i ka papa 9 ma ke kula ‘o Nāwahīokalani‘ōpu‘u Iki. I am currently employed at the Visitor Information Station at 9,200 feet where I serve the visitors through informing them about how to visit Maunakea safely and respectfully. Thus, I am an employee of the UH Hilo Center for Maunakea Stewardship.

I want to express my full support for the responsible, respectful and pono adoption of UH’s draft Master Plan for Mauna Kea because it keeps astronomy and culture on Mauna Kea alive, including the Thirty Meter Telescope (TMT).

Visitors to Maunakea have great experiences while they are there, as evidenced by their enthusiasm and many positive comments: https://www.yelp.com/biz/mauna-kea-visitor-information-station-hilo-2

Every day I work, I witness the hard work and dedication of the workers at the VIS and Hale Pohaku, and the Rangers, who risk their lives every day to make sure people are safe. Just last week they saved someone’s life in the middle of a blizzard. And this week there was a tragic accident which might have been prevented if they had followed safety protocols. My boss does a great job keeping us safe and informed. Almost all employees at the MKVIS graduated from local public schools. Then there are the people who plant and create habitats for our native flora and fauna, including the silversword, the wēkiu bug, the māmane, and the palila. In addition, there are the telescope techs, the astronomers, the engineers and the people who clear the roads. These are all local people in the community, many who have worked 20 or 30 years at Maunakea.

UH Hilo Center for Maunakea Stewardship is already doing a great job. When problems come up, they get discussed and fixed. If there needs to be a compromise, then that is discussed and acted upon. At the moment, the UH Center for Maunakea Stewardship charges NO FEES to visit the mountain. Everyone is welcome, for free. Just be safe and respectful.

UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit
in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. I mua Kilo Hōkū and i mua TMT!

Na‘u me ke aloha,
na K. Roseguo
Aloha,

Enclosed is my written testimony for the Mauna Kea Master Plan.

Mahalo for your time and consideration.

Best wishes,

Peter

MKMP--Maurer.pdf
28K
Dear members of the Board:

This document is clearly the result of long hours, unbridled patience, and hard work. A great deal of thought and care has been given. I am in favor of the majority of the Master Plan.

As an environmentalist who spoke out numerous times against hydraulic fracturing in New York, I have noted your efforts and care in helping the environment thrive. I appreciate them. I support the upgrades of the VIS and other mid-level support facilities, while recognizing the need to balance those upgrades with the environmental impacts.

Section 4.1.1 on page 4-1 indicates that astronomy was identified as a desirable location for astronomy. However, I feel this history is incomplete, as officials and community members recruited astronomy to help stimulate the local economy due to a natural disaster. Astronomy continues to provide stability as a source of employment and research for Hawaii.

I’m grateful for your continued support of astronomy. As you eluded, most knowledge in astronomy plays a role helps us understand much about our own planet and informs other disciplines, such as medicine and climate. Astronomy also helps guide our perspective as well as our own history on Earth, this solar system, and the universe. I appreciate your continued support toward astronomy, and a management structure that will be more comprehensive to maintaining the cultural and natural resources on Mauna Kea.

Finally, as a strong supporter of education, I urge the University of Hawaii to continue following through on its promises to support community and educational programs for students and the community. Education helps us solve difficult problems and create thriving communities. And, of course, you will also need individuals trained in the sciences from Hawaii to help maintain the observatories and explore Laniakea.

Thank you for your time.

Peter Maurer

Victoria Missien <missienv001@hawaii.rr.com>
To: bor.testimony@hawaii.edu
Tue, Jan 18, 2022 at 4:37 PM

Our family fully supports the University of Hawai‘i continuing their oversight and management of Mauna Kea, and support their draft Master Plan towards renewal of their Master Lease. Divisive as this issue has become there is no denying the historic, indigenous importance of continually seeking enrichment through the study and knowledge of our night skies. The informed curiosity which led the ancestors to the islands of Hawai‘i is the gift and endowed responsibility for us now: to seek, learn, caretake and share.

There have been assertions that past management of Mauna Kea was less than it should have been, and that any past shortcomings should deny UH continued stewardship, and furthermore deny all astronomical studies at the summit. Whether this accusation is fair or strategic, humanity can and does learn from experience, including gained knowledge of better practices. It would be a sad disservice to determine there is no place for scientific study on Mauna Kea, and that it be strictly a spiritual temple. Mauna Kea has been, can, and should be both, and so much more. The potential to collaborate on a richly rewarding future for education, enrichment, honoring traditions, inspiring our keiki, and yes increased economic diversity is there. It is all possible.

Civility, respect, patience, listening, compromise, and inclusion is needed from all.
To the Board of Regents:

I support adoption of UH's draft Master Plan for Mauna Kea because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). UH has done a good job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. Thank you.

Sincerely,
Martin Abel
To the University of Hawaii Board of Regents,

I am an astronomer and have been working for one of the oldest telescopes on the summit of Maunakea for over 22 years. I feel so blessed to be able to work in such a special and unique place.

I urge you to adopt UH’s draft Master Plan for Maunakea because it keeps astronomy on Mauna Kea alive, and it brings in Hawaiian participation in its stewardship through the Kahu Ku Mana council and the Hawaiian Culture committee. I especially like that they hope to broaden their inclusion to more Hawaiians. It includes the Thirty Meter Telescope (TMT) to ensure Hawaii remains at the top of productive astronomical research. UH has done a masterful job of managing Mauna Kea over the last 17 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. Moreover, Maunakea is now some of the best managed state-owned land in Hawaii. Maunakea Observatories (MKOs) are the most scientifically-productive collection of telescopes in the world, and I am proud of the work we do and its impact on all of astronomy. Astronomy on Maunakea is our culture. Astronomy on Maunakea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Maunakea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. I whole-heartedly support the mission of the IfA at UH, all the MKOs, and their future to come when the lease for the Astronomy Precinct is renewed and this is just one of the first steps toward that end.

Mahalo nui loa,
Lisa
Agenda items e f and g

Cheryl B <burgharc@gmail.com>  To: bor.testimony@hawaii.edu

Comments:

Letter E: I oppose the Mauna Kea plan.
1. It with minor revisions looks the same as we have seen under the continued mismanagement of the Mauna by UH.
2. The UH BOR and UH has given too much weight to one department of the university, astronomy as well as to the members of the community supporting the large tool of astronomy. The amount of funding for its' promotion, legal fees and PR from the citizens of Hawai`i’s taxes could be used in many other places that would benefit the entire university.

Letter F: I oppose the Mauna Kea Plan and object to the agenda forwarded to us.
Simply put: why is testimony being requested when letter F says adoption of the plan? We are quite aware that UH BOR will rubber stamp this after they try to give the illusion that they are listening but to put it clearly on the agenda?

Letter G: I oppose the Mauna Kea Plan because as long as UH remains a systemic Eugenics-based place, there is no path to reimagining the university in its current or any new incarnation.

C. Burghardt
Aloha,

We are opposed to the Draft Maunakea UH Master Plan in its entirety.

It’s interesting that you chose the words E Ō I KA LEO (LISTEN TO THE VOICE) as your title. It is not a very suitable title since through the years no actual “listening” has been done by the University of Hawai‘i about protecting Mauna Kea as the most sacred site in Hawai‘i.

In your Forward, you link Mauna Kea as the origin to early Hawaiians as the first-born island to modern astronomy and a window to the origins of the universe. These two ideals could not be more different. The “only” spot or portal on earth where an individual can stand and connect to their ancestors or receive ancestral knowledge is entirely separate from a manmade device that could be absolutely anywhere including outside the earth’s atmosphere to “view” the universe. Thus, the entire premise of your title and ultimately your perspective are quite skewed.

You write of “astronomy on Mauna Kea as an important element of the island’s future economic and educational base”. However, expenses linked to mismanagement, lack of oversight, and poor decisions have caused UH and ultimately the State of Hawai‘i to spend millions of taxpayer dollars to fight lawsuits, direct funds unnecessarily to pay for future decommissioning of telescopes, etc., etc. Education (and particularly early education) suffers the greatest loss of funding when States have these unnecessary expenses. This of course is also a catalyst for poor fiscal responsibility. It is not only short-sighted but dangerous to believe that astronomy on Mauna Kea is a necessary means to economic stability in Hawai‘i.

We would agree that Mauna Kea is a “unique source of learning”. The natural and unique ecosystems including rare and endangered species is the ultimate learning opportunity. UH has unfortunately not protected these areas and has aided in the population decline and the potential future demise of the Pali Lama (although you have tried to transfer the blame on feral animals). The facilities at Halepōhaku on Mauna Kea where the Pali Lama once thrived have caused irreparable harm. While any disturbances and developments at Halepōhaku or the Mid-Level facility areas should be avoided to protect the federally designated critical habitat, UH continues to expect to build and develop these areas. Most recently, a new parking area was made where Māmane trees should have been planted instead. And UH also has the intent of putting a teaching telescope there. This once again has proven UH to not be a good steward of the land nor protector of nature, endangered species and sensitive ecosystems.

Under “UH’S VISION FOR MAUNAKEA” it states, UH recognizes that it must protect the area’s various values including “culturally significant landscape and a recognized historic district with many contributing historic properties” and “rare subalpine and alpine ecosystems”. However, cumulative impacts upon Mauna Kea’s cultural, archaeological, historic, and natural resources have been substantial, significant and adverse under UH’s management and have been well documented as such. So, why would anyone believe this statement? UH continues to send out
a smoke screen filled with deception. Including the “CORE VALUES ASSOCIATED WITH MAUNAKEA” all of which have not been followed to date.

1.4.1 RESPONSIBLY STEWARD MAUNAKEA FOR PRESENT AND FUTURE GENERATIONS
UH:

1. Embraces its responsibilities to Native Hawaiians, respecting their religious and cultural practices;

The TMT project proposes to be built in an undeveloped area amongst the hundreds of the documented and undocumented ahu (shrines) and cultural sites. Kukahau’ula as one example, was determined a historic (district) by SHPD owing its association with legendary figures and ongoing Native Hawaiian cultural practices, however, 1100 feet of the 3400 ft long Access Way that would serve the proposed TMT would cross Kukahau’ula. In addition to hundreds of find spots and shrines in the summit region, it has been referred to by archaeologists with DLNR-SHPD as a “ritual landscape” that UH has shown no care in wanting to protect.

2. Dedicates itself to the protection of the landscape and the flora and fauna that have evolved in its isolated ecosystems;

Time and time again individuals have noted their concerns about the many pollutants such as mercury and other waste products that come with the use and maintenance of the telescopes on Mauna Kea. The fact that adequate studies have not been done on the impacts of those pollutants on the groundwater and native flora and fauna is of great concern and has never been addressed by UH.

3. Dedicates itself to the pursuit of the many non-astronomy research and educational activities for which Maunakea is especially well-suited; and

These areas should be the main focus. Those activities which do not desecrate sacred lands.

4. Will limit astronomical research facilities and projects to only those for which Maunakea is particularly well-suited.

Like many things UH does, the wording here is a smoke screen and not well defined.

As for the objectives:

• Guide human activities on the mountain in a way that minimizes their adverse effects and is sustainable.

Once again, UH has not been a good steward of the lands of Mauna Kea themselves. Therefore, it remains questionable whether they can accomplish this objective since their standard of measuring “adverse effects” is questionable.
• **Protect, maintain, and restore the cultural landscape and natural resources by implementing the CMP management actions.**

The OMKM has failed to properly consult with Native Hawaiian cultural practitioners to develop and implement CMP Cultural Resources policies.

• **Affirm and protect Maunakea as a wahi pana and wao akua.**

Dr. Kahakalau articulated in the TMT contested case that “the entire mountain, as a first born, has a unique, special status for culturally-connected Hawaiians and exudes mana, Mauna Kea’s summit, based on what I was taught, as the highest peak not just in Hawai‘i but the entire Pacific, is also clearly a Wao Akua. A Wao Akua, versus a Wao Kanaka, is reserved for deities and spirits and should only be accessed for specific, always and only spiritual practices, involving special protocols.

It is clear that UH has not protected nor affirmed Mauna Kea as a Wao Akua. Once again, they are using words that are not associated with their actions thus far.

• **Provide educational and other programs to ensure public activities are conducted in a manner that respects Native Hawaiian practices, does not unduly impact the environment, protects and sustains resources, and maintains human health and safety.**

UH is using words to disguise their intentions. Notice that “private activities” nor “corporate activities” are listed here. So one can make the assumption that they only want to “do what’s right” if the “public” is involved. Who is holding the telescope partners, potential construction companies, tour operators etc., accountable?

• **Build relationships between the mauna, its special caretakers, and the broader community.**

Clearly UH has failed here in the past, and there’s no comprehensive plan listed as to what that will entail or look like as an effort from UH.

• **Limit permitted commercial activities to those which support the stewardship of Maunakea’s resources.**

This appears to be just another “unclear” statement that UH wishes to remain vague so they can interpret and change “at will”.

**1.4.2 MAINTAIN THE UNIVERSITY’S & MAUNAKEA OBSERVATORIES’ STATUS AS WORLD LEADERS IN ASTRONOMY**

The best astronomical viewing conditions are obviously high altitude, low temperature, continuous darkness, and a stable atmosphere free of dust and moisture. These conditions are obviously more perfect in outer space than they are on earth. UH can certainly maintain its status as a world leader in astronomy by supporting non-land based telescopes and a world class teaching and observational facility that is “not” on the top of Mauna Kea.
This would also allow UH to be a true leader in the world. One who puts native people and land, endangered species and native flora and fauna, above all else. A genuine leader in the ultimate land conservation effort for future generations. Putting people before profit, preserving habitat for wildlife, maintaining native ecosystems and acknowledging, truly acknowledging Mauna Kea’s natural and cultural resources as well as Native Hawaiian traditional and customary practices and rights for all time by not allowing any more telescopes atop the mountain.

This would be the most responsible stewardship of Mauna Kea for present and future generations.

UH will continue supporting the vision of a knowledge-based economy Hawai’i’s economic future should not depend on a knowledge based economy. Economic success cannot be guaranteed by jumping on the bandwagon of technology or scientific ideology. Monsanto has been a perfect example in Hawai’i of why that can be a dangerous road to follow. Ensuring that inequality does not increase into the future is a very important element and measurement of economic success.

1.4.3 DIVERSIFY EDUCATIONAL PURSUITS AND EXPAND RESEARCH OPPORTUNITIES While the concept of UH working to strengthen its support of research and educational programs in indigenous, natural, and social sciences is a positive pursuit, it should be combined with an effort of sustainability. UH should strive to meet the needs of students without compromising land, ecosystems, traditional and customary practices and rights, social and educational equity, and the ability of future generations to know the natural and scenic beauty of Mauna Kea.

1.4.4 SEEK BALANCE AND MUTUALLY BENEFICIAL RELATIONSHIPS AMONG MAUNAKEA’S STAKEHOLDERS While UH constantly professes to seek a mutually respectful and beneficial relationship with Mauna Kea “stakeholders”, its actions show otherwise. UH’s ineffective management and the unlawful actions of its own employees and individuals under their jurisdiction have continuously resulted in adverse impacts upon Mauna Kea’s natural and cultural resources. Native Hawaiian traditional and customary practices and rights have also been negatively impacted. They consistently fail to properly consult with Native Hawaiian cultural practitioners and have allowed desecration and dismantling of cultural sites on Mauna Kea. This has shown their lack of concern for the health and safety, proper stewardship, and preservation of resources. Actions matter more than words here.

1.5 STRATEGIES 10. Facilitate the development of a new astronomical facility on Astronomy Site 13 Site 13 is a roughly 5-acre area at the end of a four-wheel drive road at an elevation of 13,150 feet on the Northern Plateau of Mauna Kea where there are no current developments.
According to Kealoha Pisciotta’s Written Direct Testimony in the contested case, the viewplane is in “direct line of sight of Maui and the NW plane which is used for ke ala ao (solstice and equinox) ceremonies. There are also lines that represent the relationship between Mauna Kea and Poli`ahu Heiau on Kaua`i, Ahu a Umi Heiau situated between the three great mountains (Hualalai, Mauna Loa and Mauna Kea) on Hawai`i Island, the Pu`u Kohola Heiau in Kawaihae, Hawai`i Island, and Motu Manamana (Necker Island) of the Northwestern Hawaiian Islands which marks the great turn around of the sun during the ke ala polohiwa time. The shrines on this tiny island are related to this relationship too.”

Hāwane Rios also testified she has received ancestral knowledge through mediumship in areas on the Northern Plateau. Ms. Rios explained the significance of shrines along the Northern Plateau, their connection to one another, their alignment with the constellations and tides at certain times of the year, and that they are portals which connect to celestial bodies of the universe. In particular, the Northern Plateau is a place of learning, a celestial realm in the cosmos that is also connected to voyaging. She describes the Northern Plateau as "a very sacred space of higher learning, spiritual learning, higher consciousness."

These are just a few reasons why development on site 13 should not be a consideration if UH truly and deeply cares for Native Hawaiians and their spiritual, traditional and customary cultural practices.

**HALEPŌHAKU (FACILITIES)**

UH continues to disregard endangered species including the Palila in its decision making and Master Plan. They are merely mentioned as a matter of fact. Grading and paving areas, reconstructing areas, building new facilities or adding to existing ones all have a significant effect. Dust and noise etc. in this area during construction will have a tremendous environmental impact. Mitigation measures alone will not suffice. A potential multi-year project will mean a number of nesting seasons for the Palila. Once gone, they may never return. Or, they may be lost forever. There is no guarantee either way. The risk is much too great for an endangered species and its potentially minimal survival rate.

It is stated that, “The DLNR, which is leading Palila recovery efforts, has asked that new disturbances and developments at Halepōhaku be avoided.” However, we already know that disturbances and developments have occurred recently including a new parking area. It is clear the UH doesn’t follow any recommendations for ensuring these areas of critical habitat remain undisturbed.

Archaeological surveys should also be done in this area. UH often rushes to get things done before adequate surveys to confirm there are no historical or cultural properties, altars or remains there.
MAUNA KEA SCIENCE RESERVE

All potential plans for the Mauna Kea Science Reserve should be put on hold. UH’s actions over the past five decades have already resulted in substantial, significant, and adverse impacts on Mauna Kea’s summit region. We must conserve the ecological and culturally irreplacable ecosystems on the summit and preserve this historic district for future generations of Native Hawaiians to continue their customary and traditional practices.

“Mauna Kea, the highest mountain peak in the Hawaiian Islands, is of profound importance in Hawaiian culture. The summit region is sacred to Native Hawaiians, and because of its spiritual qualities, traditional and customary cultural practices are exercised throughout the summit area.” This statement regarding Mauna Kea’s cultural significance is affirmed in the Concurring Opinion from Mauna Kea Anaina Hou v. Board of Land and Natural Resources (2015).

Mauna Kea’s summit region is sacred. Native Hawaiian traditions state that ancestral akua reside there.

E. Kalani Flores stated the following in his Written Direct Testimony in the TMT contested case:

“Embedded within these ahu and stones is ‘ike kupuna and ancestral knowledge along with ancestral guardians. As such, construction (of the TMT observatory) in this vicinity would sever our past, present, and future generational connections with the ‘ike kupuna and ancestral knowledge implanted at these sites. With the understanding that many of these sites serve as depositories of ancient wisdom as well as multi-dimensional portals, the massive extent of destruction proposed in this culturally sensitive landscape would also adversely impact our Native Hawaiian customary and traditional practices that are still connected to these sites.

It is for these reasons that we oppose the Draft Maunakea UH Master Plan in its entirety. UH should be “listening” to those who may oppose any further development on Mauna Kea. UH has done enough damage.

Thank you for your time.

Cheryl Burghardt
Wendy Green
Aloha,

Please accept the attached document that provides our written testimony for the UH Board of Regents.

This is for the January 20, 2022 meeting, Agenda Item F. Adoption of the Master Plan for the University of Hawai‘i Maunakea Lands -- E Ō I Nā Leo (Listen to the Voices).

Mahalo,

Wendy J. Laros, President & CEO

Kona-Kohala Chamber of Commerce

2022.1.18_Kona-Kohala Chamber - Testimony for BOR, UH Maunakea Lands Master Plan.pdf
453K
January 18, 2022

RE: Adoption of the Master Plan for the University of Hawai‘i Maunakea Lands, E Ō I Nā Leo.

To the University of Hawai‘i Board of Regents,

The Kona-Kohala Chamber of Commerce brings together the business community as a strong, united voice to address key issues in our community, on our island and in our state. Founded in 1968, our 430 member businesses and organizations represent a wide range of industries such as agriculture, aquaculture, astronomy, banking, construction, education, finance, food service, healthcare, media, non-profits, retail, real estate, tourism, technology, transportation and more. We exist to provide leadership and advocacy for a successful business environment in West Hawai‘i. Our goal is to enhance the quality of life for our community through a strong, sustainable economy on Hawai‘i Island.

We support the Master Plan for the University of Hawai‘i Maunakea Lands, E Ō I Nā Leo and ask that you adopt the plan. We believe in the UH’s mission and purpose to “Sustainably steward Maunakea for the benefit of our communities, Hawai‘i, and the world, as a publicly-accessible learning landscape where all who visit learn, and those who seek something more discover through rich multi-cultural experiences and multi-disciplinary discourse. Provide equal opportunities across the schools of the UH system and community partners to engage with the mauna in ways that perpetuate and advance knowledge, wisdom and values while fostering mutual understanding and respect.”

UH recognizes this is a precious area for residents and visitors seeking cultural, educational, recreational, and exploration experiences. With entities in place such as the Center for Maunakea Stewardship, ‘Imiloa Astronomy Center and the Institute for Astronomy, the University of Hawai‘i has broad resources, vast knowledge and a steadfast commitment to provide the best possible stewardship under very complex circumstances.

We strongly support UH management and state lease renewal on Maunakea. The University of Hawai‘i is by far the best option for a management structure on Maunakea and the lease renewal of 2033 is urgent. The University has taken significant steps to address issues and improve management. We applaud the depth, scope and considerations embedded in the Master Plan pertaining to land use and facilities along with the Comprehensive Management Plan (CMP) that fully outlines related activities and resources.

The Kona-Kohala Chamber of Commerce strongly supports the astronomy industry on Maunakea noting significant scientific discovery, global leadership, educational outreach, workforce pipelines, jobs and economic impact. Hawai‘i has worked diligently to diversify its economic sectors and attract high tech industry to create more opportunities. Hawai‘i’s astronomy sector provides needed economic diversity with a statewide impact of $167 million. Astronomy activities generate over $52 million in earnings, over $8 million in state taxes and 1,400 jobs statewide. We are very grateful to the UH Institute for Astronomy and Maunakea’s astronomy industry for well-developed, impactful programs that better prepare Hawai‘i students...
to become the workforce for higher paying science and technology jobs in Hawai‘i’s 21st century economy.

We support culture, science and environmental stewardship on Maunakea. In 2017, we recognized the University’s commitment to culture on Maunakea when the Office of Mauna Kea Management, now Center for Maunakea Stewardship, was the recipient of the Kona-Kohala Chamber of Commerce Pualu Award for Culture and Heritage. The Chamber’s Pualu Awards recognize businesses, organizations or individuals that work together for the betterment of Hawaii Island. The meaning of pualu translates to “all together, in unison, and cooperative.” (Pukui & Elbert, 1986).

We support expanded educational activity and construction of a new UH observatory at the Halepōhaku Mid-Level Facility to continue the important work of teaching, training and conducting research. As mentioned in the plan’s opening message, “Efforts already underway to elevate culture and education as key priorities alongside astronomy and land stewardship have begun with the assignment of responsibility to the ‘Imiloa Astronomy Center of Hawai‘i. ‘Imiloa is developing additional necessary and appropriate educational programming for those who work on and visit Maunakea and improving the interpretive experience at the Maunakea Visitor Information Station at Halepōhaku.” In Part 2: Physical Plan, it states, “The facilities at Halepōhaku are essential to UH’s ongoing astronomy program and implementation of the CMP. Those facilities contribute significantly to the achievement of UH goals and objectives.” In the UH Commitment Regarding Use of Halepōhaku, it states, “The only astronomy facility that will be proposed at Halepōhaku is the UH Hilo New Educational Telescope (NET).”

Lastly, the Kona-Kohala Chamber of Commerce strongly supports the development and future operations of the Thirty Meter Telescope (TMT). We must voice our support for this project which is permitted for Astronomy Site 13 as stated in Strategy 10 in the Master Plan. Since 2009, TMT has contributed millions of dollars to educational initiatives for Hawai‘i Island students that include The Hawai‘i Island New Knowledge (THINK) Fund, Workforce Pipeline and Akamai Internship Program. Additionally, TMT will provide 300 local and specialized construction jobs during the construction phase, and once the telescope is complete, employ 140 staff. TMT’s commitment is to fill these positions with as many Hawai‘i residents as possible and use local businesses for support services. We must acknowledge the positive educational and economic contributions of TMT for our island community.

We appreciate the opportunity to voice our support for the Master Plan for the University of Hawai‘i Maunakea Lands, E Ō I Nā Leo.

Sincerely,

Wendy J. Laros, President and CEO
Kona-Kohala Chamber of Commerce
To whom it may concern,

My name is Eric Takasugi, a resident of Kona and a supporter of astronomy and the Thirty Meter Telescope on the Big Island of Hawai‘i.

I support adoption of UH’s draft Master Plan for Mauna Kea because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. I mua Kīlo Hōkū and i mua TMT!

Thank you for your time.

Sincerely,
Eric Takasugi
I support adoption of UH's draft Master Plan for Mauna Kea because it keeps astronomy on Mauna Kea. Astronomy on Mauna Kea is our culture. Astronomy provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of world-class astronomy on Mauna Kea is vital for the economic diversification of Hawaii Island and our state as a whole.

UH needs to be involved on Mauna Kea, as UH was responsible for obtaining a permit for the construction of TMT. TMT is one of the best projects to be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. Mauna Kea Observatories are situated in the best site in the world for the astronomers and the residents of our state. I mua TMT!

Mahalo for reading this, Susan Irvine, Hilo, HI
My name is Drena Rodrigues and I oppose the Master plan you have for Mauna Kea.

The first thing I heard was that it would be gated up there. Who are you trying to keep out?

After years of desecration and severe impacts on our Mauna, it is evident that the U.H should not have a say in the care of our Mauna.

It is said the plan was made by speaking with people and groups of which you mentioned several groups that the Hawaiian people have lost much faith in. To form a plan based on the opinions of these agencies who are not in alignment with what the Hawaiian people want, is a mistake and the Hawaiian people will see thought this.

It is time to walk away from the Mauna and let her heal from the negative impacts that the University and the astronomy community has done to her.

If you have not learned from Red Hill what can happen when a place is not properly managed then we are in trouble.

Mauna Kea does not belong to the UH or the Government, it belongs to the people of Hawaii and it has been proven that no one can take care of her better then the people who revere and love her.

Please leave and stop building and exploiting our sacred Mauna A Wakea

With deep sadness for what has been done to our Aina.

Drena Rodrigues

Testimony for UH Maunakea Master Plan

1 message

Alan Tokunaga <tokunagaa001@gmail.com> To: bor.testimony@hawaii.edu

University of Hawaii Board of Regents,

I am an Astronomer Emeritus at the UH Manoa Campus. I worked at the UH from 1980 to 2016 and have therefore seen and participated in the growth of astronomy on Maunakea from the early days. I am a former director of the NASA Infrared Telescope Facility. I was born and raised on Maui, and like many people in the islands I am saddened by the controversy of astronomy development on Maunakea. Stopping the TMT and even stopping all of astronomy in Hawaii will not resolve the underlying issues raised by the Kia‘i movement and it will not yield a better future for the next generation. I believe the proposed Master Plan is an important step toward addressing the many issues that face the University and the community. A long-term sustained push by the University is needed to realize the objectives of the plan, to address the concerns of the Kia‘i movement, and to heal the divisions in our community. No plan will please everyone, but we must move forward and I urge to BOR to adopt this plan.

Thank you for consideration of this testimony,

Alan Tokunaga
UH Astronomer Emeritus
Let TMT proceed

Suzy Lauer <lauer5090@twc.com>
To: bor.testimony@hawaii.edu

We support adoption of UH's draft Master Plan for Mauna Kea because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and we wholeheartedly support its completion.

We hope UH is doing everything in its power to ensure TMT is built. Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and we are proud of their work.

To: University of Hawai‘i Board of Regents  
From: Mary Beth Laychak  
Subject: Testimony on Proposed Master Plan for the University of Hawai‘i Maunakea Lands  
Date: December 15, 2021

As a staff member of one of the Maunakea Observatories, I am reassured to see a long range commitment to astronomy in the draft Master Plan; E Ō I Nā Leo. The Maunakea Observatories are the scientifically most productive collection of telescopes in the world and I am proud of the work that we do.

I have the privilege to represent my facility and the Maunakea Observatories (MKOs) in the community. The core values described in the Master Plan resonate with me and reflect the work that myself and others strive to do in the community. It is my opinion that the MKOs have a kuleana to the mauna and the community to respect the wahi pana that is Maunakea and share understanding of the universe gained by the telescopes with the broader community. We also have the obligation to be good neighbors, and contribute to the community we call home. Over the past 50 years, the MKOs have not always done as much as we can or should have, but we strive to do better moving forward.

Over the past decade, I have been a part of the MKOs efforts to do better, both within and outside of our traditional STEM outreach. From the start of COVID, the MKOs saw the need in our community and asked the community “how can we help?” When our community answered that critical needs were food insecurity and our keiki, we started to do the work to help. The W.M. Keck Observatory created a program called Farm to Families where they bought produce from local farmers then donated the food to local organizations in need. MKOs staff volunteer at the Hawai‘i Island Food Basket, packing and helping to distribute food across the island. I am one of the founders of Keiki Heroes, a community based program to educate and empower keiki to feel in control of their own health during COVID. Keiki Heroes is now a statewide program with materials distributed through all the major health organizations in the state. The MKOs are a critical sponsor of Keiki Heroes, supporting the program since day one.

Community engagement is a cornerstone of my work. In my experience, engagement works best when it is a two-way street: asking the community what they want and then listening to the answer. I encourage the Board of Regents and the University of Hawai‘i to truly live up to the values outlined in E Ō I Nā Leo by involving community voices— specifically Hawaiian voices. I believe the Maunakea Observatories are eager to support and willing to lead these efforts, working collaboratively with the University and our community to achieve these goals.

Thank you for the opportunity to provide testimony,
Mary Beth Laychak

<td>I grew up in Hilo. There has always been a telescope on Mauna Kea as long as I can remember. The Hawaiians of old navigated across the Pacific Ocean by looking at the stars as well as noting birds, waves, and other navigational guides. Those ancient Hawaiians would be the first to look through the telescopes to better see into the universe. As a veteran public school teacher, I taught a solar system unit annually to my third graders. As scientists we are always asking questions and pushing for the boundaries to gain more knowledge. Our kupuna looked up for direction. We need to continue to follow their example. For the keiki, Susan Lussier Retired elementary teacher who loved science</td>

Aloha,

Since 2005, I am native Hawaiian and have closely followed matters related to management of Maunakea, participate in numerous focus group meetings, and testified in hearings over the past two decades. As an individual who has the privilege of working in economic development, land and resource management, planning, public policy, and education, in addition to reviewing many plans, I have also personally developed comprehensive plans in these areas.

In reviewing the master plan under consideration. I find it is comprehensive, provides a framework that ensures collaborative community engagement, recognizes the diverse stakeholders and accompanying...
diverse concerns in a thoughtful, respectful, and proactive manner. Having participated in information sessions and hearing firsthand the multiple perspectives shared as the plan was being developed, the University of Hawaii clearly did I Nā Leo (Listen to the Voices) and I humbly request that the Board of Regents adopt the Master Plan for the University of Hawai‘i Maunakea Lands.

Mahalo for this opportunity to offer my comments to advocate in support of this plan.

Your Testimony (pdf or word)

To Whom It May Concern:

I strongly support adoption of UH’s draft Master Plan for Mauna Kea because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built.

Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. I mua Kīlo Hōkū and i mua TMT!

Thank you for your time and consideration.

Sincerely,
Mr. & Mrs. Paul M. Trevithick
Kailua-Kona
Sent from my iPad
As a forty year resident of Hawaii, I have the utmost confidence in the management of Mauna Kea by the University of Hawaii. I have no confidence in the management by a group of activists whose sole objective is the elimination of the world’s foremost center of astronomy.

Hawaii can lead the world in precious little. We should be proud to lead it in astronomy rather than homelessness.

Gregory B. Wilson

Sent from my iPhone
Astronomy is a subject that deeply fascinates me. It is a branch of science that fosters the imagination and attempts to answer questions regarding the nature of universe. It is hard to fathom that building a collection of world-class telescopes and supporting astronomy would become such a contentious issue for the state of Hawaii.

Without TMT, it is my fear is that astronomical literacy will dramatically decline. Astronomy on Mauna Kea provides opportunities for scientific progress, education, training, technological discoveries, and ultimately, more jobs. The tourism industry has been woefully impacted by the Covid-19 pandemic and serves as a painful reminder that Hawaii needs more economic diversification. Hawaii needs to be a global leader in science and technology. It is my fervent hope that UH is doing everything in its power to ensure that TMT is built.

I whole heartedly support the building of TMT!

Thank you for your consideration in this matter!

Sherry Sutherland-Choy
Dear Sir,

As a French astronomer who has had the chance to work for many years on the Mauna Kea summit through the Canada-France-Hawaii Telescope, I want to say by my testimony how essential it is to adopt rapidly the new UH's Master Plan. It's essential for all the telescopes on the mountain, for the TMT project, for the science in Hawaii and beyond, for the science in the world. As astronomers we applaud to the perspectives open by JWST just recently launched but we know also that large ground-based telescopes as they exist on Mauna Kea and with their projects of development (case of the CFH Telescope) are fully needed to pursue large programs not feasible on a space telescope, to complete detections made in space and to start new investigations.

More particularly specialist of infrared astronomy, I have been able to fully test, to check and to use the exceptional qualities of the site in this spectral domain. The TMT by its diameter, much larger than the 6.5 m of the new space telescope, installed on the highest peak equipped with a telescope of its size, will be a unique tool for the worldwide scientific community, giving in addition to the University of Hawaii a prominent status. I have been also able to appreciate the quality of its management of the site.

Therefore, I am confident that you realize how important and capital is your decision to endorse the new UH's Master Plan for Mauna Kea.

Aloha

Jean-Pierre Maillard

Aloha,

I have always been so proud of the fact that Hawaiians found Hawaii by using the stars to guide them. The continuation of the study of the Universe is so important, even to those of us who call ourselves Hawaiian. Please fight to keep TMT.

Katherin Nalani Hance

<td>I feel that it should be completely obvious by now that this telescope should not be placed on the Mauna, we need to preserve all the natural resources we have because as we've seen on Oahu's Red Hill one wrong location can be detrimental to the lives of so many. Something like water that is a basic necessity to live should never be compromised, not even considered because no family should have to second guess the water they're using to bathe their children or prepare their meals. Everyone should be confident in the water they're provided, please do not let this become another Red Hill, we are not anti science just pro life and for so many that is what Mauna Kea is.</td>

Greatly appreciate this opportunity to share an opinion on the E Ō I Nā Leo UH Maunakea Lands Master Plan. Thank you for creating the space, time and resources to hear diverse voices on this important topic. I share my view as a UH alumni who has faith in education as a tool for decolonizing our minds and reconnecting us to indigenous knowledge in the place we inhabit now. I have carefully read the master plan and most of the opinions shared to date via email, online form, mail and telephone and again feel the need to make it clear why I resist approval of this proposal. There are other examples of how we can do better: Aloha ʻāina.

For example Mt Fuji is an outstanding precedent for how to decommission and remove construction such as the radar dome that was thought to be productive based on anthropocentric worldview in 1964. Yet through
careful reflection and desire for UNESCO world heritage recognition the poor condition of the peak was reconsidered and a decision was made to remove the dome in 2001 and keep it in a historical museum in Yamanashi. The mountain still faces problems, but this was one big step away from desecrating the peak of a mountain held sacred in Japan that can help us work to care for other mountains we love. Mauna Kea will become a hallmark of our human capacity for reflection, correction and preservation of cultural, natural and heritage perhaps by making a visitor museum of artifacts off of the mountain at a site selected by local residents to show the lessons of the past if it the achievements of astronomy truly hold merit in the long view of time.

Through careful actions, respectful love of Mauna Kea and right speech we can build a better tomorrow. Hawai‘i is a center for stellar navigation that the rest of the world can learn much from in practice, philosophy and action. Let the rightful teachers share, educate, experience and build the frameworks needed to protect Mauna Kea and all sites that are at risk of being threatened by capitalist development in the islands today. With the overwhelming opposition to TMT and the cultural renaissance occurring among indigenous people now across the world, the limited worldview that reduces science to a Euro-American phenomena is clearly in need of expansion. Diversify science to include all perspectives and redistribute resources to the native practitioners who know local ways of not only looking, photographing and analyzing stars by empirical modes of thought but also by land-based knowledge, spiritual worldviews, ancestral wisdom and more.

Now is the perfect time to clean up the mountain and do what needs to be done to care for the Hawaiian archipelago rich culture, traditions and vision to co-create a bright future together. It is possible. No means no. Please listen to the ‘āina, listen to the clear majority of native Hawaiian people, listen to the water, listen to the plants, listen to the animals, listen to people across the world who resist the destruction of Mauna Kea, listen to the insects, listen to so many voices and do what is right. No TMT. Clean up the Mauna now. Clearly mistakes have been made and it is time to correct the wrongs now. Start deconstructing the rest of the telescopes immediately and create a stewardship that is run by a konohiki that knows the place intimately to teach others. Please do what is pono no TMT.

Thank you very much for inviting comments and for reading this message.

<td>I support the development of a plan for Mauna Kea that allows astronomy to continue and the TMT to be built. I can understand why many Hawaiians feel their culture has not been respected in the ways land has been used. However, it seems to me that astronomy is one of the uses that enriches us all and is consistent with Hawaiian navigation which is justifiably celebrated. We need to find a way for astronomy to proceed on Mauna Kea and to allow cultural and religious practices as well.</td>

<td>The only plan that should be considered, is a plan to not build TMT on our Mauna Kea. Desecration of our 'Āina for the advancement of technology and science should never be okay and if the building TMT is truly about science, then science will show why building it on Mauna Kea is not good. The further desecration of our 'Āina needs to be stopped at all levels, especially ones like TMT that will cause more harm than benefit anybody. Why look to the stars and focus on space, when we've got so much to do here on earth and in Hawai‘i. I am not against science or the advancement of technology, but I am against what will be done and what will happen to our Mauna if TMT is built, like damaging the aquifer on Moku o Keawe.</td>
</tr>

January 19, 2022

The National Science Foundation (NSF) appreciates the opportunity to provide written testimony to the University of Hawaii Board of Regents with regards to the incorporation of NSF’s comments into a new Master Plan. As the owner of two major astronomical facilities on Maunakea, Gemini North Observatory and the Maunakea Very Long Baseline Array (VLBA) antenna, both of which are operated on our behalf by non-profit science management organizations and are the subject of sub-leases with the University of Hawai‘i, NSF has a strong interest in the effective management of the Science Reserve on the Maunakea summit. On October 25, 2021, NSF submitted comments (attached) regarding the draft Master Plan version from September 2021. NSF has reviewed the newest version (January 2022) of the Master Plan submitted for approval to the Board of Regents, and we do not feel that NSF’s comments have been sufficiently addressed.

In particular, NSF continues to oppose all references to the decommissioning of the VLBA antenna on Maunakea, and we are disappointed that the only attempt to address the comment was to add a footnote (#27) to the document. Rather than addressing the decommissioning of the facility directly, the footnote merely attempts to explain the University’s reasoning for selection without prior consultation with NSF.

Thank you, again, for the opportunity to provide comments on the draft Master Plan and follow-up testimony to the Board of Regents regarding the incorporation of those comments. In addition to expressing our concern over the continued statement that the VLBA will be decommissioned, we would like to reiterate and reinforce the importance of listening to all voices regarding the future of Maunakea.

Sincerely,

Linnea Avallone, Ph.D.  
Chief Officer for Research Facilities

Sean L. Jones, Ph.D.

National Science Foundation Comment on University of Hawai‘i Draft Master Plan

The National Science Foundation (NSF) appreciates the opportunity to provide comments on the draft Master Plan prepared by the University of Hawai‘i (UH). As the owner of two major astronomical facilities on Maunakea (the Gemini North Observatory and the Maunakea Very Long Baseline Array (VLBA) antenna), both of which are operated on our behalf by non-profit science management organizations and are the subject of sub-leases with the University of Hawai‘i, NSF has a strong interest in the effective management of the Science Reserve on the Maunakea summit. Within that context, NSF recognizes the importance of protecting Maunakea’s environmental resources, respecting Native Hawaiian culture and the interests of the Native Hawaiian community, and preserving NSF’s astronomy assets on behalf of the US scientific community and our funding partners. Therefore, NSF offers the following comments on UH’s draft Master Plan:

1. NSF recognizes the need for the Native Hawaiian community to have a voice in the management of Maunakea. While there are a few references to UH’s plans to involve the Native Hawaiian community in future activities, the document does not specify what that involvement entails. Moreover, the crux of the document focuses on how UH’s mission will be carried out without discussion of how positive or negative impacts to the Native Hawaiian community will be addressed. NSF believes the document would benefit from a meaningful discussion within the final Master Plan of what these impacts are and how future governance will meet the needs and interests of the Native Hawaiian community.

2. The draft Master Plan includes several very specific guidelines that appear to be requirements (such as dome height and color restrictions, limitations on the number of telescopes within the Astronomy Precinct, locations for the siting of telescopes, etc.) without an accompanying discussion of environmental or cultural resource impacts substantiating those requirements. It is, therefore, very difficult for NSF to evaluate or determine the appropriateness of these requirements.

3. NSF notes that there does not seem to be a specific reference in the draft Master Plan to the 10% observing time that observatories on Maunakea provide to UH as a condition of their subleases. This observing time translates to millions of dollars in direct benefits to UH, and this contribution should be acknowledged, discussed, and evaluated to determine whether it should be redirected (in part or in whole) to provide a more equitable distribution of the benefits to the community, especially to Native Hawaiians.
4. NSF strongly opposes all references to the decommissioning of the VLBA antenna on Maunakea in the draft Master Plan (see, e.g., page 4-5, and 4-14: “It is known that VLBA, on Astronomy Site 14, will be decommissioned prior to the end of 2033.”). On numerous occasions, NSF has communicated to UH, both formally and informally, its position that the VLBA antenna on Maunakea should not be decommissioned because it is a valuable astronomy asset for the nation, and, by virtue of its use in maintaining the Celestial Reference Frame and measuring Earth Orientation Parameters as a contributing system for the International VLBI Service for Geodesy and Astrometry, it plays a vital role in maintaining the integrity of Global Navigation Satellite Systems, including the Global Positioning System. Additionally, this VLBA station is afforded special regulatory protections for portions of the radio spectrum at its present location (i.e., footnotes 113, 131, 161 of the United States Table of Frequency Allocations; 47 C.F.R. § 2.106).

5. The process for decommissioning of facilities set forth in Appendix D to UH’s draft Master Plan lacks sufficient detail to provide meaningful review and comment. NSF does maintain that any decommissioning process should be determined after considering input from the science community and led by the Master Lessee. NSF also notes that the Master Lessee should be cognizant of any potential conflicts of interest it may have when making determinations about which facilities to decommission.

Thank you, again, for the opportunity to provide comments on the draft Master Plan. We look forward to seeing how NSF’s comments are incorporated into the final Master Plan. If further clarity on our comments is needed, please feel free to reach out to David Boboltz, Ph.D. at dboboltz@nsf.gov.

Sincerely,

Linnea Avallone, Ph.D.

Please, please include TMT in your Master Plan!
TMT provide education, jobs and prestige for the Hawaiian Islands.
It brings money as well, as well as promoting opportunities for schoolchildren.
This site will work well for everyone!
Mahalo!

Meryl Abrams
I am a resident of Hawaii (Puna) and was an attendee at the demonstrations that blocked the road and halted construction of TMT in 2019.

I was an attendee for an entire day as a quiet observer and TMT supporter, not as a protester. I can state categorically that there were barely enough cars at the demonstration to fill the Walmart parking lot in Hilo. Yes, there were several hundred people present but not the ‘many thousands’ as was widely reported in the media. And frankly, it became brutally obvious that the big issue at the demonstration was Hawaiian sovereignty and secession from the USA, with TMT being merely a scapegoat and tool used to manipulate the media in pursuit of this end.

At the protest, Seminars were given by seasoned non-Hawaiian professional protesters, well read in 60s anarchist writings and the political tactics of leveraging a minority opinion into a political force via carefully orchestrated and highly visible disruption. I know this for a fact, because I attended one of the seminars. TMT was not even mentioned. The Seminar was exclusively devoted to techniques for resisting the police and making the maximum amount of disruption without being injured or creating a negative impression for the cameras. Everything in the seminar was about playing to the ‘cameras’ and the media. This has worked very well for the protesters, who are adept at these tactics and are playing to a sympathetic media.

A big problem with this issue is that the media has taken sides and has consistently presented a distorted perspective sympathetic with the protesters. The state government has meekly followed the lead of the media. In my estimate, the ‘hard core’ anti-astronomy protester community on the Big Island numbers several hundred at most, but this is sufficient to block roads and fill a camera lens, and that is deemed sufficient by the legacy media to erase astronomy from Hawaii.

Much of the argument by anti-Astronomy protesters is framed around the concept of the 'Sacred'; specifically a narrow definition of Sacred' that furthers the political agenda of anti-Astronomy and ultimately, anti-American protesters. The protesters have no monopoly on the 'Sacred' and conveniently fall to address an authentic definition of the Sacred held by ancient Hawaiians that revered the starry sky. The definition of the starry sky as sacred by ancient Hawaiians led directly to the discovery and settlement of Hawaii in ancient times. Yet this authentic definition of the Sacred has been jettisoned in favor of a recently manufactured mythos of Maunakea as a ‘sacred’ and 'untouchable site'. The cost has been discarding of the ancient tradition of star-gazing as a sacred Hawaiian cultural practice; conveniently discarded because it does not fit the entirely political narrative of the protesters.

Finally, 'Native Hawaiian' is explicitly used as a generic term to classify all who oppose Astronomy in Hawaii. There were doubtlessly native Hawaiian protesters on Maunakea in 2019, but they were outnumbered by Hawaiian ‘cultural practitioners’ who are as ‘Hawaiian’ as I am and have only the most tenuous ethnic or cultural connection to Native Hawaiians. We are led to believe that as long as a mob of such ‘Native Hawaiians’ sufficient to block a road can be organized for the cameras, Astronomy cannot be practiced in Hawaii. That assumption is cowardly and false.

The Government and People of Hawaii are being played by small group of political professionals with an Secession agenda, and destroying Astronomy in Hawaii is merely the first battle in their Long March.

Cowardice is not a form of awakened moral and ethical awareness. It is simply cowardice. Nothing good has ever come of it. Cowardice is the ideology of those who believe in nothing with sufficient conviction to defend it. It is cowardice that threatens the future of Hawaii and of the young people who would like to make a future here, instead of being given the stark choice of life of irrelevance in a Third World economy, or fleeing to the mainland..

IMUA THE SACRED STARRY SKY THAT LED PEOPLE TO HAWAII!
IMUA ASTRONOMY!
IMUA HAWAII AND ITS KEIKI!
IMUA KNOWLEDGE.

Aloha UH Board of Regents,

As a born and raised kamaʻāina of Hawaii, I support keeping astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). With consideration and respect to Hawaiian culture, astronomy on Mauna Kea should continue. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. TMT is one of the greatest projects to ever be developed in Hawaii and I support its completion. I hope UH is doing everything in its power to ensure TMT is built. I believe Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I would like to see work continued for future generations. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there.

Mahalo,
Lori Leong

We commend the Mauna Kea working group for continuing the dialogue on the important issue of managing Mauna Kea. The group was given an impossible task of finding an alternative governing model for Mauna Kea that satisfies the small group of TMT protesters while also satisfying the wishes of the majority of the rest of the State of Hawaii. The reality is that UH's management of Mauna Kea has been excellent and the major management failure of late has been the State's failure to enforce the law and arrest protesters unlawfully blockading the Mauna Kea Access Road to prevent the construction of the amazing Thirty Meter Telescope project. The creation of any new governing entity will merely serve to delay TMT and the renewal of the lease that governs the telescopes which expires in 2033. This is, of course, the protesters' objective, but it is not the objective of the majority of the people on the Big Island nor of the State. We believe this new governance model proposal should be abandoned in favor of continuing UH's management under UH's new proposed plan and structure.

However, to the extent this Working Group effort continues on, we have the following comments:

1. The report currently proposes excluding the astronomy industry from having a vote in management of Mauna Kea. The telescopes on Mauna Kea and the University of Hawaii maintain the access road and provide billions of dollars in investment and jobs to our economy. At a minimum the astronomy industry deserves a vote on the management of Mauna Kea, either through the Mauna Kea Observatories group or the University of Hawaii; preferably both.

2. The report should explicitly state that if this newer plan is adopted, the protesters will agree to cease all further protest against the Thirty Meter Telescope.

3. The report seems to slip in, with very little explanation, that Mauna Kea, including the summit, will be governed under "HRS 183" and "HRS 205A". HRS 183 covers "forest reserves" and HRS 205A is for "Coastal Lands". There is no explanation for why the summit of Mauna Kea, which has no trees and is quite far from the coastline, would be governed under these statutes. The most probable reason is that the protesters know these are much more restrictive zoning classifications that could be used to completely exclude astronomy from the summit. This is obviously unacceptable. No zoning changes should be made that would endanger the astronomy industry on Mauna Kea.

4. All implication that Mauna Kea is "sacred" to all Native Hawaiians should be removed. Mauna Kea is not sacred as a Native Hawaiian matter. While some people might maintain beliefs in the kapu religion, and as part of their belief think Mauna Kea is sacred, their beliefs are not authoritative as a Native Hawaiian matter. Our ali`i abolished the kapu religion over 200 years ago and our constitution prohibits the government from establishing a religion. Thus, any mentions of sacredness must explain this nuance and explain that there are also numerous Native Hawaiians who do not think Mauna Kea is sacred, and who also think its sacredness is enhanced by the use of Mauna Kea for the ancient historical pursuit of astronomy.

5. All mention of "Mauna a Wakea" should be excised from this report. Mauna Kea is not named Mauna a Wakea and claims to the contrary are not supported by fact. This tax-payer-funded document should not continue to push this false narrative and modern fictitious construct.

In short, it would clearly be better to simply scrap this proposed plan and continue forward with the current UH management structure under UH's new master plan, especially for purposes of building TMT, and for the continued use of Mauna Kea for astronomy. It is common knowledge among all of us who live in Hawaii that King Kalakaua showed immense interest in astronomy and stated in a letter to Captain R. S Floyd that he had a desire to see an observatory established in Hawaii. And Queen Liliuokalani oft noted that "The ancient Hawaiians were astronomers". So it is fitting that the use of Mauna Kea as the world's premier astronomical observing platform is a testament to the vision of our Hawaiian heritage.

Mahalo nui loa,

Howard and Patricia Hall

Waimea, Big Island Hawaii
I support adoption of UH's draft Master Plan for Mauna Kea because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. I mua Kīlo Hōkū and i mua TMT!

Lindy Pounds
Aloha,

Please accept my testimony for the upcoming meeting on 1/20/2022

Mahalo,

Nancy Sakamoto
UH Hilo Center for Maunakea Stewardship's Proposed Maunakea Master Plan – Support for UH Board of Regents Approval

UH Board of Regents Special Board Meeting
Thursday, December 16
via virtual meeting

Aloha University of Hawaii Regents,

I am Nancy Sakamoto, submitting supportive testimony for the approval of the Proposed Maunakea Master Plan in my capacity as an active community member, and as a tutu for my grandchildren who offer much promise as the next generation of Native Hawaiian leaders.

I have been actively involved in the Kona Kohala Chamber of Commerce, the Kailua Village Business Improvement District as an advocate for stewardship of our valuable resources here on Hawaii Island.

I’ve kept up to date on the stewardship of Maunakea, through presentations and engagement. The Center for Maunakea Stewardship, formally known as Office of Maunakea Management, has been successfully managing its lands on the mountain, implementing state policy on astronomy since 2000. Let’s remember that nearly sixty years ago, it was the State of Hawaii who wanted to develop astronomy in Hawaii. Looking towards the future, I would ask all of us to take pride in this accomplishment.

This new draft management plan takes us forward into the next few decades, ensuring good, sound management of the unique resources found on Maunakea. The balance struck in the master plan limits development that protects the resources while ensuring world class astronomy continues in Hawaii, providing inspiration for our island students. How fortunate we really are.

I support the draft and I ask you to as well.

Mahalo for allowing this opportunity to share my comments.
my comments on the draft MK master plan

Michael Hoenig <mdh@cantab.net>  
To: BOR Testimony <bor.testimony@hawaii.edu>

Dear Regents,

I fully support UH's draft Master Plan for Maunakea. UH's management of the mauna has been debated ad nauseam, and while I realize it isn't possible to please everyone, it is my belief that the university did an extremely competent job running something that is inherently difficult and complex - and I think I have spent enough days (and nights) on Maunakea to be able to state this with some authority. The Master Plan also keeps astronomy on Maunakea alive - MK observatories constitute the most scientifically productive group of telescopes in the world, and I am proud of their many achievements. Furthermore, astronomy on MK provides valuable opportunities for our keiki as well as vital jobs for the Big Island community (and helps diversify the state economy as a whole). For these reasons I also hope that UH is doing everything in its power to ensure TMT is being built.

I hope you are able to adopt this new master plan. It represents a significant step forward.

Mahalo for your time,
Michael Hoenig

The National Science Foundation (NSF) appreciates the opportunity to provide written testimony to the University of Hawaii Board of Regents with regards to the incorporation of NSF's comments into a new Master Plan. As the owner of two major astronomical facilities on Maunakea, Gemini North Observatory and the Maunakea Very Long Baseline Array (VLBA) antenna, both of which are operated on our behalf by non-profit science management organizations and are the subject of sub-leases with the University of Hawai‘i, NSF has a strong interest in the effective management of the Science Reserve on the Maunakea summit. On October 25, 2021, NSF submitted comments (attached) regarding the draft Master Plan version from...
September 2021. NSF has reviewed the newest version (January 2022) of the Master Plan submitted for approval to the Board of Regents, and we do not feel that NSF’s comments have been sufficiently addressed.

In particular, NSF continues to oppose all references to the decommissioning of the VLBA antenna on Maunakea, and we are disappointed that the only attempt to address the comment was to add a footnote (#27) to the document. Rather than addressing the decommissioning of the facility directly, the footnote merely attempts to explain the University’s reasoning for selection without prior consultation with NSF.

Thank you, again, for the opportunity to provide comments on the draft Master Plan and follow-up testimony to the Board of Regents regarding the incorporation of those comments. In addition to expressing our concern over the continued statement that the VLBA will be decommissioned, we would like to reiterate and reinforce the importance of listening to all voices regarding the future of Maunakea.

National Science Foundation Comment on University of Hawai‘i Draft Master Plan

The National Science Foundation (NSF) appreciates the opportunity to provide comments on the draft Master Plan prepared by the University of Hawai‘i (UH). As the owner of two major astronomical facilities on Maunakea (the Gemini North Observatory and the Maunakea Very Long Baseline Array (VLBA) antenna), both of which are operated on our behalf by non-profit science management organizations and are the subject of sub-leases with the University of Hawai‘i, NSF has a strong interest in the effective management of the Science Reserve on the Maunakea summit. Within that context, NSF recognizes the importance of protecting Maunakea’s environmental resources, respecting Native Hawaiian culture and the interests of the Native Hawaiian community, and preserving NSF’s astronomy assets on behalf of the US scientific community and our funding partners. Therefore, NSF offers the following comments on UH’s draft Master Plan:

1. NSF recognizes the need for the Native Hawaiian community to have a voice in the management of Maunakea. While there are a few references to UH’s plans to involve the Native Hawaiian community in future activities, the document does not specify what that involvement entails. Moreover, the crux of the document focuses on how UH’s mission will be carried out without discussion of how positive or negative impacts to the Native Hawaiian community will be addressed. NSF believes the document would benefit from a meaningful discussion within the final Master Plan of what these impacts are and how future governance will meet the needs and interests of the Native Hawaiian community.

2. The draft Master Plan includes several very specific guidelines that appear to be requirements (such as dome height and color restrictions, limitations on the number of telescopes within the Astronomy Precinct, locations for the siting of telescopes, etc.) without an accompanying discussion of environmental or cultural resource impacts substantiating those requirements. It is, therefore, very difficult for NSF to evaluate or determine the appropriateness of these requirements.

3. NSF notes that there does not seem to be a specific reference in the draft Master Plan to the 10% observing time that observatories on Maunakea provide to UH as a condition of their subleases. This observing time translates to millions of dollars in direct benefits to UH, and this contribution should be acknowledged, discussed, and evaluated to determine whether it should be redirected (in part or in whole) to provide a more equitable distribution of the benefits to the community, especially to Native Hawaiians.
4. NSF strongly opposes all references to the decommissioning of the VLBA antenna on Maunakea in the draft Master Plan (see, e.g., page 4-5, and 4-14: “It is known that VLBA, on Astronomy Site 14, will be decommissioned prior to the end of 2033.”). On numerous occasions, NSF has communicated to UH, both formally and informally, its position that the VLBA antenna on Maunakea should not be decommissioned because it is a valuable astronomy asset for the nation, and, by virtue of its use in maintaining the Celestial Reference Frame and measuring Earth Orientation Parameters as a contributing system for the International VLBI Service for Geodesy and Astrometry, it plays a vital role in maintaining the integrity of Global Navigation Satellite Systems, including the Global Positioning System. Additionally, this VLBA station is afforded special regulatory protections for portions of the radio spectrum at its present location (i.e., footnotes 113, 131, 161 of the United States Table of Frequency Allocations; 47 C.F.R. § 2.106).

5. The process for decommissioning of facilities set forth in Appendix D to UH’s draft Master Plan lacks sufficient detail to provide meaningful review and comment. NSF does maintain that any decommissioning process should be determined after considering input from the science community and led by the Master Lessee. NSF also notes that the Master Lessee should be cognizant of any potential conflicts of interest it may have when making determinations about which facilities to decommission.

Thank you, again, for the opportunity to provide comments on the draft Master Plan. We look forward to seeing how NSF’s comments are incorporated into the final Master Plan. If further clarity on our comments is needed, please feel free to reach out to David Boboltz, Ph.D. at dboboltz@nsf.gov.

Sincerely,

Linnea Avallone, Ph.D.  Sean L. Jones, Ph.D.

Your Testimony/Comments

Dear University of Hawaii Board of Regents,

I am opposed to the construction of TMT for climate change and a new space observation alternative reasons.

I work in the field of agriculture and risk management, tracking weather trends. Due to climate change, extreme and often violent weather events will only grow in frequency. Hawaii’s archipelago is defended by the
height and mass of Mauna Kea and Mauna Loa. I want to leave as many stones in place on these guardian mountains as possible to fend off the steady train of hurricanes that will continue to come. Excavation for TMT is poor risk mitigation for climate change.

The successful launch of the James Webb Space Telescope also impacts my decision. What an incredible resource this is! No clouds, atmosphere or space junk to block the Webb’s view. TMT would be a 2nd rate observatory in comparison.

Please cut our losses with TMT and walk away from it.

Sincerely,
Weston Yap

You have no respect for the host culture and religion and do not deserve to manage the mauna. What qualifies your organization to be managers? Half of your flagship campus was built on kuleana lands (see your history, "To Build a Rainbow," and your history of exploiting Hawaiians and Hawai‘i is disgusting. You discriminate against Hawaiians by ignoring the protests for financial exploitation because you can, not because you should. I have no respect for you now, Greg Chun.

BOR VI.F. Adoption of the Master Plan for the University of Hawai‘i Maunakea Lands -- E Ō I Nā Leo (Listen to the Voices)

Support

I have reviewed the revised Maunakea UH Master Plan – E O I NA Leo. This is a thoughtful document, and I strongly believe that the Board should approve the Master Plan.

I am also deeply appreciative of the fact that the Master Plan appears to be updated to reflect my prior comments about how new guidelines on observatories lessen environmental or cultural resource impacts.

I also agree with the Task Force’s other conclusions, including that it should engage in sustained outreach efforts and that it should continue to manage the MKSR -- either solely or as a major partner in a reorganized management structure – and support world-class astronomy.
I have the following additional comments on UH's past management and on the Master Plan itself, requesting some minor modifications.

Remaining Master Plan comments:

- In agreement with the National Science Foundation's comments, I reiterate my previous main request that the Native Hawaiian community have a clear voice in the management of Maunakea. They are key stakeholder if for no other reason than UH's management area includes at least some land – Lake Waiau, Pu'u Poliahu, etc. – upon which Hawaiian traditional and customary practices unquestionably occur and occurred prior to UH's role as manager of the mountain. The existence of Kahu Ku Mauna, cultural training, and a promise of deeper engagement is most welcome. But I believe the Master Plan would be improved with a discussion of how to not just consult the Hawaiian community but involve said community in the governance of Maunakea itself.

As one relatively simple modification, why not elevate Kahu Ku Mauna from an advisory group to one with some decision-making power? I agree that UH should continue as at least co-manager of Maunakea. But I also believe that vesting at least some control in the Hawaiian community would be a wise step towards a more peaceable future state on the mountain.

- Re: the UH commitments on decommissioning (Sect 4.1.2). First, it should be clearly acknowledged that the multi-observatory decommissioning steps are spurred by TMT's CDUP. i.e. TMT in exchange for multiple older telescopes. This is alluded to in Sect 4.3.2.1 but should be clearly spelled out. Furthermore, Appendix E describes that UH will receive input from other organizations – including Hawaiian organizations – on which additional telescopes would be decommissioned by 2033. I think it would be more appropriate for Hawaiian organizations to have a vote in this process, not merely be consulted. This suggestion goes back to the first comment: that the Native Hawaiian community should have a clear voice in the management of Maunakea.

I reiterate my position on UH's past management:

- I very strongly believe that the University of Hawai'i has done an exceptional job managing and protecting resources on Maunakea for at least the past decade. As the Independent Auditor's Report acknowledges, "the cultural and natural resources on the state conservation lands on Mauna Kea are some of the best managed and protected lands in the entire State. The area is clear of trash, the invasive species are being removed not only by OMKM but volunteer groups, and the OMKM Rangers to ensure public safety on Mauna Kea."

- The inventory of cultural/historical sites is exhaustive and well documented. In my years on Mauna Kea, I have seen cultural practitioners free to engage in their activities without harassment but with respect from UH. The cultural orientation program required for all Mauna Kea astronomy personnel is well presented.

- As evidenced during TMT’s most recent Contested Case Hearing, UH has done an exceptionally thorough job in documenting and protecting Mauna Kea's natural resources. Arthropod surveys are well thought out and detailed. The weiku bug population has recovered. Documentation and surveys of plant species is also well thought out.
As I said in the auditor's report, UH's stewardship of the land is a stark contrast to the poor stewardship that some TMT protesters have on the Pu’u Huluhulu encampment. UH's commitment to laws and regulations is a stark contrast to lackadaisical attitude from state and county law enforcement. Furthermore, mistakes that are often attributed to UH instead lie at the feet of the state itself. For example, it was the state that has allowed protesters to damage planets and scatter plants at the MK Access Road. It was the state that refused to prosecute Palikapu Dedman's disinterment of remains and placement of bones on the TMT site in an act of protest and against state law.

My Background:

- I have gone to Mauna Kea for the past 14 years for astronomical observations and thus have seen the state of the mountain prior to the completion of the CMP, during the early years of its implementation, and up to recent times.

- I have not shied away from pointed and public criticism of UH or the Institute for Astronomy in other contexts. For example, as an interviewee for EnVision Mauna Kea I expressed extreme frustration and anger at IfA for "a lack of courage" in direct and frank discussions with some TMT opposition leaders in order to have a future where the telescope is built on Mauna Kea in the most peaceful way possible. While I am strongly encouraged by the new leadership at IfA, I remain extremely concerned about the lack of engagement by IfA faculty in general.

Aloha,
Please adopt the UH master plan draft for Mauna Kea! The people of Hawaii overwhelmingly support astronomy on Mauna Kea and think UH has done a good job of managing the observatories. The Thirty Meter telescope is an important part of the plan and needs to be built for so many reasons.
Mahalo for your consideration,
Jay R. Lambert
Please support adoption of University of Hawaii's draft Master Plan. Let us all move forward to a better future.

I would like all people of Hawaii to support the science of astronomy. Let us all learn the secrets of the universe. Please support adoption of University of Hawaii's draft Master Plan for Mauna Kea because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). I hope all can one day see how important this is. Thank you.

UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. I mua Kīlo Hōkū and i mua TMT!
Aloha,

I am writing to show my full support for astronomy on Mauna Kea, and my full support for the TMT. Not only is it good for the world it is extremely beneficial to the folks and keiki throughout the islands. I personally benefit financially through the trickle-down effect of having astronomy on the mountain and my kids have benefited directly in their education because of astronomy on Mauna Kea.

Thank you for your attention,

Morgan Ray

January 19, 2022

To: The Board of Regents, University of Hawai‘i
   bor.testimony@hawaii.edu

Re: Testimony against agenda item VI.F, recommendation to approve the Master Plan for the University of Hawai‘i Maunakea Lands at the Board’s January 20, 2022 meeting

To the Board of Regents,

KAHEA: The Hawaiian-Environmental Alliance (KAHEA), like hundreds of the commenters, strongly opposes the Center for Maunakea Stewardship’s (CMS) recommendation that the Board adopt the Master Plan for the University of Hawai‘i Maunakea Lands - E Ō I Nā Leo (Listen to the Voices), dated January 11, 2022 (master plan). KAHEA is a nonprofit organization with a mission and programming that includes protection of Mauna Kea’s natural and historic resources and the cultural practices that they support.

The master plan is an unlawful rule

CMS concedes there is no rule or law governing the Board’s adoption of the master plan. Item VI.F (CMS recommendation at 2¶D, dated Jan. 13, 2022). Yet, the master plan will guide siting of new facilities, changes to existing facilities that will cause permanent changes to the land, and UH decisions regarding which astronomy sites will remain operational. Master plan §2.1. “It consolidates and clarifies UH’s use and development policies for the subject lands and is intended to guide UH’s decision-making related to them over a 20-year period.” Id.

The master plan is thus a “statement of general or particular applicability and future effect that implements, interprets, or prescribes law or policy, or describes the organization, procedure, or practice requirements of any agency.” Hawai‘i Revised Statutes (HRS) §91-1. It does not concern only the internal management of the University and the actions it guides will affect the private rights of and procedures available to the public. Id. The Board is required to promulgate the master plan as a rule pursuant to all of the procedures under HRS §91-3. Because these procedures have not been followed, the Board cannot adopt the master plan without violating administrative procedure.

No environmental review for the master plan

The University prepared an environmental impact statement for its previous 2000 master plan, yet no such documents were prepared for the master plan. Environmental impact disclosure documents are required for programs or projects using state lands or funds that require discretionary
consent from an agency.

The new EIS rules define a "project" as "discrete, planned undertaking that is site and time specific, has a specific goal or purpose, and has potential impact to the environment." HAR §11-200.1-2. There is a "purpose" section in the master plan: The new plan guides siting of new facilities, changes to existing facilities that will cause permanent changes to the land, and UH decisions regarding which astronomy sites will remain operational. Master plan §2.1. "It consolidates and clarifies UH’s use and development policies for the subject lands and is intended to guide UH’s decision-making related to them over a 20-year period.” "Discretionary consent" is broadly defined as "a consent, sanction, or recommendation from an agency for which judgment and free will may be exercised by the issuing agency, as distinguished from a ministerial consent." HRS 343-2. The Board’s "adoption" of the master plan is discretionary consent that must be informed by environmental disclosure documents.

The master planning process discourages public participation.

The most urgent and repeated comments were: (1) remove astronomy facilities and restore Mauna Kea to its original state before the University lease ends in 2033; and (2) cancel the TMT. No revisions were made to the master plan in response to these comments.

Part of our mission is to educate and organize our community to advocate for their interests. We ask people to take time away from their family, friends, and work in order to make their voices, individually and collectively, heard as part of public processes. The biggest challenge is the perception that people will become statistics used to validate a predetermined outcome that they sought to oppose. CMS’ recommendation confirms this perception. Again. Community members’ participation is supposedly reflected in a tally of their receipt of 596 emails and 245 mailed letters, listed to support your adoption of the plan. How can we continue to urge people to engage in such a process? This flawed process frustrates our mission and the University’s purpose of serving its community.

Thank you for considering our comment.

Yours truly,
Board and Staff 2022, KAHEA: The Hawaiian Environmental Alliance

Your Testimony/Comments

There is no doubt that Maunakea remains an important site in Western astronomy. The proposed master plan for managing Maunakea places astronomy as its central component. For almost a decade, the proposed Thirty Meter Telescope has been a priority of the upper strata of the University of Hawai‘i, the state government, and other scientific agencies. However, the University’s continued support of the project, along with its historical mismanagement of Maunakea's summit, demonstrates the University's inability to reckon with its complicated relationship with the Native Hawaiian community, whose ancestral homeland the proposed telescope would sit on. As a Hawai‘i Island resident and student at both UH Hilo and UH Manoa, I strongly oppose the current proposed plan. The University of Hawai‘i has produced some of the most
important activists in Hawai‘i’s history, yet the University has failed to understand or listen to the concerns of its students, faculty, and greater community in which it serves. As long as money and scientific prestige come before the preservation of one of Hawai‘i’s most sacred and storied places, UH will not be a steward of its community, but an accomplice in the continued occupation and extraction of Hawaiian lands. I hope that the University makes the right decision and decommits to future telescope projects on Maunakea and supports placing the responsibility and stewardship of the Hawaiian community. After all, they have centuries of experience in preserving, protecting, and respecting the land.

The Graduate Student Organization ("GSO") of the University of Hawai‘i at Mānoa OPPOSES the Board of Regents’ ("BOR") adoption of the Master Plan for the University of Hawai‘i Maunakea Lands, E Ō I Nā Leo (Listen to the Voices) ("Master Plan"). We support the comments submitted by KAHEA: The Hawaiian-Environmental Alliance to the State of Hawai‘i Legislature on the Mauna Kea Working Group’s ("Working Group") Draft Report, “He Lā Hou Kēia Ma Mauna a Wākea: A New Day on Mauna A Wakea,” dated December 17, 2021 ("Draft Report"), ("KAHEA Comments").
We support KAHEA’s opposition to the recommendations presented in the Draft Report. KAHEA notes that the Draft Report “unilaterally entrusts a new Governing Entity to ensure these are implemented in a timely and meaningful way,” (KAHEA Comments). “Management and governance of Mauna Kea must proceed from a truly community-based process that builds trust amongst people who have shown their commitment to protecting the mauna, which includes many more than those who served on the Working Group,” (KAHEA Comments). We agree with KAHEA that “the Working Group should demand compliance with traditional kānāwai—no further development on Mauna Kea,” (KAHEA Comments).

We agree with KAHEA that the “Working Group [should] deeply revise its recommendations to include: (1) significant, meaningful, and broad based community input prior to the introduction of any legislation; (2) removing the governor’s power of appointment of nearly all the members of the Governing Entity; and, (3) honoring the traditional kānāwai by, first and foremost, prohibiting any further construction—including the Thirty-Meter Telescope—on Mauna Kea,” (KAHEA Comments).

We ask the BOR to vote “no” to adoption of the Master Plan for the University of Hawai‘i Maunakea Lands, E Ō I Nā Leo (Listen to the Voices).

Sincerely,
Graduate Student Organization
University of Hawai‘i at Mānoa

Your Testimony/Comments

It is rather distressing, given the overwhelmingly strong opposition from the Native Hawaiian community, that the University of Hawaii Board of Regents continue to push the agenda for construction of the TMT atop Maunakea. The individuals that make up the UH Board of Regents are not qualified to serve in the compacity of konohiki. The kuleana of the konohiki is to act in the best interest, and make decisions that best serve the health of āina and her precious natural resources as well as the community. If the konohiki fails at his duty he is ousted, and another is appointed in his place. We don't care for your claims that TMT will boost the economy by providing jobs to locals. That is a falsehood used almost everytime to garner local support. Yet it is becoming more common for residents to be deemed under qualified and individuals contracted from the continent. The alteration of our natural world should be done with the utmost care, reverence, and respect. I don't need to tell
you what you already know. TMT will have devastating impacts on Maunakea, the community, the Pae 'āina. I implore you to think beyond money and profit. Never forget our place in the scheme of the universe. "He ali'i ka 'āina, he kauwa ke kānaka." The land is chief, the man but a servant. 'A'OLE TMT!

Your Testimony/Comments

The University acts as though their soon to expire lease of the lands on Maunakea is guaranteed to be renewed. And so you have a 20 year plan. The University has over and over again been proven to be bad at land management and should no longer have the privilege to use these lands. I say NO to any extended lease and NO to the proposed TMT that has divided our lahui. When will our government and leaders ever start to work for US instead of the interests of outsiders?

Larry Wiss <aloha-larry@hawaii.rr.com>  
To: bor.testimony@hawaii.edu  

I support the ongoing presence/research of Astronomy by UH atop Mauna Kea; I believe the TMT is vital to this important educational resource for Hawaii.

Aloha,
Larry Wiss
I Support TMT and Adoption of UH's Draft Master Plan for Mauna Kea

I support adoption of UH's draft Master Plan for Mauna Kea because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. I mua Kīlo Hōkū and i mua TMT!

A master plan with more telescopes and more desecration of the most sacred land of Native Hawaiians must not be approved. Over 1000 comments were submitted in opposition to the master plan. Is there any part of Hawai‘i that we can leave for our future generations? It is unbelievable the hatred that you must hold towards Kanaka Maoli to seriously advance a plan that would build more telescopes, including the TMT, and erect a gate to keep Hawaiians out. From the military poisoning our waters to this “Hawaiian place of learning” destroying the foundation of life culture - the level of disrespect of our ‘Āina is just off the charts. A‘ole TMT. No more telescopes. Take care of this ‘Āina before you look to the stars.

| Your Testimony/Comments                   | I oppose the UH master plan, which prioritizes the construction of the Thirty-Meter Telescope. In case you weren't listening to our voices when we stood on the frontline in the thousands to oppose this telescope, no means no. Listen to the native people. This is a human rights issue. We already put our lives and bodies on the line to stop this telescope. We endured freezing cold weather for over 8 months to demonstrate our opposition. Listen to this - A‘ole! A master plan with more telescopes and more desecration of the most sacred land of Native Hawaiians must not be approved. Over 1000 comments were submitted in opposition to the master plan because it includes TMT. Is there any part of Hawai‘i that we can leave for our future generations? It is unbelievable the hatred that you must hold towards Kanaka Maoli to seriously advance a plan that would build more telescopes, including the TMT, and erect a gate to keep Hawaiians out. From the military poisoning our
waters to this “Hawaiian place of learning” destroying the foundation of life culture - the level of disrespect of our ʻĀina is just off the charts. Aʻole TMT. No more telescopes. Take care of this ʻĀina before you look to the stars.

<td>I am a concerned citizen from Ohlone land. I respectfully ask that the master plan be rejected. The human rights violations against Indigenous land protectors are unacceptable. Respected elders of Hawai‘i are still being dragged through court, and the resumption of construction would be devastating to many who could be injured, arrested or worse in what would surely be a dangerous and heartbreaking standoff, simply to protect the land they love. The Mauna Kea Master Plan is deeply flawed in many ways. It does not respect the wishes of the vast majority of the Indigenous cultural practitioners of that place. It proposes to block their access with gates. It proposes further construction on Mauna Kea, which Kanaka Maoli have not consented to in any way. It proposes perpetual stewardship by the University of Hawai‘i, with no plan of ever returning this sacred mountain to the rightful owners of the Crown Lands upon which UH’s Science Reserve sits. The University of Hawai‘i needs to...</td>

I am Kaiqing Su, an international student at UH. I acknowledge that I stand on kanaka land, and I owe my knowledge on the subject to the generous conversations with generous kanaka maoli scholars, students, and friends. I oppose the construction of TMT. Firstly, this is not a matter of science but desecration; secondly, to really respect what many acknowledged as sacred and native Hawaiian culture is to understand that there are places that are just not accessible to everyone—in the past, only ali‘i ascended to the summit. It’s not about coexistence between TMT and kanaka, but the recognition of human limit, and sincere humbleness on the subject, especially people who don’t have enough indigenous knowledge, like myself. Thirdly, regarding the benefit of the “whole human race,” since the past constructions have already impacted the ecosystem, the opposition of the plan will do us more good—when a climate catastrophe hits, when sea level rises, when other...
extreme weathers take place, telescopes can't save us. Please don't exploit the aina in the name of science, progress, or truth. I oppose the master plan and I stand in solidarity with kia'i mauna.

**Your Testimony/Comments**
I am a Hawaii-born and raised alumni of UH (B.S. 1978, M.S. 1981), and a current resident of the Islands. I am not Kanaka Ma‘oli, however, my family has been residents of Hawaii for over 100 years, and I feel that the voices of other long-term “natives” of the Islands should be heard, along with the voices of all Kanaka Ma‘oli. As an avid supporter of astronomy on Mauna Kea, including the Thirty Meter Telescope, I support the adoption of the UH Draft Master Plan for Mauna Kea. At this time, with all that is happening in our society, science has become increasingly important. And while I have a deep spiritual belief, I also deeply value what science has brought to mankind – and more recently, how science and spirituality are now entwined, with the insights provided by quantum physics. Those who claim that placing another telescope (TMT) near the summit would
desecrate a sacred space truly do NOT understand authentic spirituality, and are mis-using others’ support for
native cultures.
Mahalo nui for all of your effort. Imua TMT!

Your Testimony (pdf or word)
No file attached
As a Big Island resident, I fully support and embrace the use of Mauna Kea and the islands in general for all astronomy endeavors. Hawaiian history and culture is rooted in its people being curious about their surroundings, and its people are well known for being great explorers of all things unknown. To honor their legacy and to guarantee them a future, it is imperative that the University of Hawaii and the State of Hawaii continue to embrace the world of astronomy in our islands and especially atop Mauna Kea.

Your Testimony/Comments
I oppose the UH DRAFT Master Plan of Mauna Kea Lands. I have given written comment in opposition to the Draft Master Plan and am here today, thousands of miles away from Hawaii as a Hopi woman standing in solidarity with Kanaka Maoli when they say A'ole to the 50 years of mismanagement on Mauna Kea at the hands of the UH and A'ole to the thirty meter telescope proposed to be constructed at Mauna Kea. It is 2022 and the UH blatantly chooses to continue & to participate in settler colonial capitalism by placing themselves as "stewards" to Kanaka Maoli sacred lands and supporting the construction of the Thirty Meter Telescope which has been recently dubbed by scholars as a "Big Money Science Project" Mauna Kea itself has never been ceded by the Hawaiian Kingdom's government to the U.S. government. Again, it is 2022, return the land & rightful stewardship to Kanaka Maoli and allow healing and true stewardship of the land happen. When
looking for answers to the future, look to the past. The UH has the power to correct their predecessors' wrongs by completely decommissioning the current telescopes on Mauna Kea and returning the land back to its original state of being & returning the real stewardship to Kanaka Maoli. Kia'i come in numbers to hold the UH and UC accountable for their actions and in Kapu Aloha in the honor of Aloha Aina and I stand with them.

BOR VI.E. Partial Report of the Maunakea Plan Review Permitted Interaction Group Recommending Consideration of Approval of the Proposed Master Plan for the University of Hawai‘i Maunakea Lands -- E Ō I Nā Leo (Listen to the Voices)

Your Position (required) *
Support

Your Testimony/Comments

I strongly support the adoption of the UH draft Master Plan for Maunakea. I have spent over a year of my life on the summit of Maunakea as a student and graduate of the Institute for Astronomy Ph.D. program. I have spoken with hundreds of visitors on the summit, and I saw them all experience the joy of seeing the amazing views of the stars from the summit. They expressed their wonder at the amazing discoveries in astronomy made in Hawaii. Thanks to UH, which created the opportunity and infrastructure that enabled some of the greatest scientific investigations of human history. Many of the celestial bodies of the outer solar system have Hawaiian names, as does the largest known structure in the Universe. Most of the newly discovered asteroids in our solar system are first seen by telescopes in Hawaii. All because Maunakea and Hawaii have
been at the forefront of science, and only because UH made that possible. No other organization will put science first, and we have seen how the management of other lands in Hawaii by other government agencies have failed.

I do not support the removal of any telescopes from the mountain; this is a decision that must be reversed. Those sites are far too scientifically productive to be let go. If you accept that astronomy is a critical endeavor for Hawaii, removing any telescopes makes little sense. It will not appease the protestors, who will be satisfied only by removing all telescopes.

There are many keiki in our state who dream of being part of astronomy in Hawaii. I was one of them, and I was one of the lucky ones who was able to realize his childhood dreams. Removing UH from managing Maunakea is the first step in ending astronomy in all of Hawaii. That is clearly the goal of the protestors. Ending astronomy in Hawaii will crush the aspirations of so many young people in Hawaii. It will end a source of high paying jobs in economically challenged areas. It will end an economic engine with a much lower land impact than tourism. It will destroy the most prominent academic program at UH. It will end the jobs of the hundreds of people who support Maunakea research.

Maunakea, the very best astronomical site on the entire planet by far, needs to continue to be the inspiration and the leading source of knowledge of the Universe for all of humanity. You must not accept the arguments of protestors who want to keep Maunakea from continuing to be a point of great pride for all the people of Hawaii.

Mahalo for your consideration.
Aloha. Attached is my testimony opposing the BOR agenda items VIF and VIG.

--
“education either functions as an instrument which is used to facilitate integration of the younger generation into the logic of the present system and bring about conformity or it becomes the practice of freedom, the means by which men and women deal critically and creatively with reality and discover how to participate in the transformation of their world.” - Paulo Freire

2444 Dole Street, Bachman 209

FR: Kekailoa Perry

I am Kekailoa Perry, a citizen of the Hawaiian Kingdom and Associate Professor at the University of Hawaiʻi at Mānoa. My testimony opposes all BOR action relating to agenda item VIF entitled “Approval of Maunakea Management Restructuring Plan” and item VIG entitled “Comprehensive Plan to Achieve a Reimagined University of Hawaiʻi.”

1. The PIG recommended management plan for Maunakea is a grotesque document of barbarism that is set on a foundation of cultural misappropriation and the degradation of trust lands that are protected under Article XII and Article XI of the State of Hawaiʻi Constitution (to name just a few laws).

2. The PIG recommended management plan for Maunakea shamelessly misappropriates Hawaiian knowledge and culture to further an agenda that celebrates neo-colonial forms of manifest destiny. The University uses science and claims of social benefits to disguise a more supremacist form of hegemony. Those concepts are subversive and help to hide the University’s real acts of trespassing and abuse of native trust lands.

3. Contrary to the circular and misleading political and legal rhetorical extrapolations of the University and State of Hawaiʻi, both institutions have consistently violated their own constitutional and trust responsibilities. Specifically, the University and State have willingly and forcefully undercut the traditional and customary rights of native Hawaiians.

4. Approving the PIG’s recommended management plan will signal to the Hawaiian community -- and those who cherish fairness and justice -- that the University truly does not care about our communities. Worse, it will signal that the BOR and University administration intentionally seeks to harm past, present and future generations of kanaka ‘oiwi and kanaka ‘oiaiʻo.

5. Item VI.G. suggests that the University will make attempts to reimagine itself. Having no documentation or materials to review, it seems that the UH’s reimagining will materialize from thin air. Should any of the documents appear in time for the meeting, it would be in the best interest of all rights holders for the BOR to table the item. Moreover, if the document has any reference to aloha ʻāina or other concepts and language relating to Hawaiian knowledge, then the document should be tabled indefinitely for lack of cultural respect and for an overtly racist level of imagination.

To be clear, I stand with families, colleagues and rights holders who continue to oppose every effort by the BOR and University from pursuing its institutionally racist degredation of Hawaiian lands, culture and people. We are not defined by loud voices or the numbers in our community; we are known by our faith in our ancestors and our willingness to speak truth to power. How will your actions define you?
In support of TMT

Eric Hagiwara <eric.hagiwara@k12.hi.us>  Thu, Jan 20, 2022 at 6:46 AM
To: bor.testimony@hawaii.edu

In support of TMT:

TMT has already donated millions towards Hawaii county Education. Our Waiakea High Robotics program is one of those long time recipients of their generosity. We on the Big Island have much more difficulty in getting funding than schools on the Island of Oahu. One Chevron official told me that their funding set aside for education has a priority going towards schools that their employee’s children go to. We don’t have any large industry here. TMT and Helco are the largest sources of Educational funding we can tap. Taking TMT away would negatively impact Hawaii Island’s Education opportunities.

We have, just at Waiakea, many graduates who are working as Engineers, Computer Engineers, Cyber Security and other IT jobs because of funding from TMT. Please support TMT

Education of universes is longevity

1 message

Bert Yamamoto <bertsat@icloud.com>  Thu, Jan 20, 2022 at 6:52 AM
To: bor.testimony@hawaii.edu

Education of the universe is similar to the knowledge of our physical body, its health and longevity. From cave man times till now,
Man has adopted ultimate longevity with association knowledge of earth of truth(proven science)and the universe. Small proof is that as we get older with knowledge of good health, the older with knowledge, is healthier compared to his youthful year when he was not as learned. Mind elements of memory of knowledge is remembered as we can recall love memories moments in older people more. This means as we get older we see things more beautiful with education in years than when your younger. The reason is that when, young only little substance of knowledge is in that person. Younger ones can offset this by learning, studying; but as they get older their eye will see more beauty from increase knowledge, so much they may weep, more for what their eyes see.

Peter Sternlicht. Treasurer
Jerry Chang
Dave DeLuz
*Kanani Aton
*Desmon Haumea

*Three of our members are very culturally aware.

Aloha
Richard Ha jr.
Aloha,

I'm writing in against the plan that is being brought again to our attention. It's been 54 years, since the University, the State, the BOR, and Dlnr had their time to Manage the Mauna. You all need to step down, step back and let the people talk n manage our Mauna and Islands

"Listen to the Voices" is your entities motto, it's a hypocritical statement that's being made, when the people are Speaking Out Loud, of their concerns, that again is falling upon deaf ears.

Please reconsider these choices that you all are making for the people of Hawaii, and concentrate on what is needed down here on our islands. Homelessness, drug addiction, our Keiki on Islands falling wayside.

You all know that it's the destination and Aloha what brings the world to Hawaii and Not the Telescope that only a few "chosen"people that Benefits from it, being educational.

These entities should know that all those Telescopes up there is sitting on the Main Aquifers of Hawaii Island. Shame on all of you, to think that you and you alone have the right to the People's Crown Lands.

Mahalo for taking the time to read our letter of our deep concerns.

Mahalo and Aloha,
Laurie Avilla and Ohana

Hawaiian Libra <kauwilamahina@gmail.com> Thu, Jan 20, 2022 at 8:31 AM
To: bor.testimony@hawaii.edu

Aloha nō e Ke Kula Nui O Hawaiʻi, Board of Regents,

My name is Kaylene Kauwila Sheldon and I am writing to you in regards to the construction of the Thirty Meter Telescope (TMT) on Mauna Kea and about your proposed lease renewal. I am also a Native Hawaiian grandmother and my ancestral ties come from Hawaii island known as the Keaunui clan who were long time allies, close advisors and relatives of the Kamehameha lineage.

There are significant ecosystems and archaeological/anthropological value on Maunakea. It is also a place of the wao akua, the most sacred space in Hawaii.

I wanted my moʻopuna to follow the traditions of placing piko at Waiau however because of the trauma and desecration, I could not follow the traditional protocol. The building of the telescope would deviate from the sacredness of our kūpuna. The spiritual health and well-being of our people have gone through generations depends on the health and well-being of Hawaiʻi. Furthermore the healthy of the honua (earth) affects all of us.

Lastly, I wanted to remind the pro-TMT supporters that when our kūpuna built an adzes quarry on the Mauna, it was eco-friendly, done with protocol and was purposeful and functional whereas the aquifers were not polluted and the Mauna was respected not discarded. Please remember if you are an astronomer that studied anthropology/archaeology then you would know that the ancients knew and understood the universe far more than we did and that their teachings should be taken seriously. I leave you with these two ‘ōlelo noʻeau, Hawaiian proverbs:

ʻO na hoku no na kiu o ka lani (The stars are the spies of the heaven) I like to reflect into this ‘ōlelo noʻeau as we do not have to look much further as their are more intelligent beings above that know much more than us.

Please esteemed community and colleagues please listen to the kūpuna and make the right decision.

Mahalo nui loa,

Kaylene Kauwila Sheldon, Kaʻaʻawa
Aloha mai,
Please find attached my written version of my oral testimony presented to the BOR on 1-20-22.

Thank you,
Candace Fujikane
Professor of English
Director of the Undergraduate Program in English
University of Hawai‘i

[Attached file: Fujikane BOR Testimony against Master Plan 1-20-22.docx (21K)]
Aloha mai kākou e UH Board of Regents:

My name is Candace Fujikane, and I am a professor in the English Department. I have been an English professor at the University of Hawaiʻi for the past 27 years.

I want to address agenda item VI.F. regarding “Adoption of the Master Plan for the University of Hawaiʻi Maunakea Lands—E Ō I Nā Leo (Listen to the Voices).” I urge the board to reject the Master Plan because it fails to put into place a decision-making process that involves community members who have deep knowledge of ancestral practices of stewardship as reflected in oli and mele. The Master Plan fails to enact any substantive changes and thus continues to undermine the public trust in the University of Hawaiʻi. The Master Plan also fails to enact a decision-making process that listens to the voices of people of Hawaiʻi who put their lives on the line to protect Mauna a Wākea. In fact, the Master Plan articulates its goal to “facilitate” astronomical facilities” rather than stewardship. This ignores the voices of the overwhelming majority of people who have spoken against the proposed Thirty Meter Telescope.

The Master Plan, states under “1.5: Strategies”: “UH will pursue the following strategies,” number 10: “Facilitate over the 20-year period of this Master Plan the development of an astronomical facility on Astronomy Site 13.” This is one of many places that reveals the fact that the university plans to “facilite the development of astronomy,” specifically the Thirty Meter Telescope at Astronomy Site 13 rather than “stewarding the land.”

I find the naming of the new entity the “Center for Maunakea Stewardship” offensive. Why is it now stewardship when the so-called stakeholder group identified in the Master Plan remains the same? The Institute for Astronomy, the ʻImiloa Astronomy Center, the Mauna Kea Management Board and Kahu Ku Mauna are the very same groups that have been used to advance the interests of the Thirty Meter Telescope. The very formation of Kahu Ku Mauna has been exposed as fraudulent when a courageous former member of the group testified at the BLNR TMT contested case hearing that she was asked to rubberstamp policies. How is that true collaboration or stewardship?

Let me explain what true stewardship looks like. It would mean going to Kanaka Maoli who look to ʻike kupuna or ancestral knowledge to design a stewardship plan. Kumu hula Pualani Kanakaʻole Kanahele and other hula practitioners and aloha ʻāina put together a stewardship entitled Kīhoʻihoʻi Kānāwai: Restoring Kānāwai for Island Stewardship. I urge you to consider that document, which can be found online, and to consider the ways that that plan illustrates deep knowledge of the elements in Hawaiʻi and how to properly care for them. From generations of practicing the art of kilo, keen observation of the natural world, they have identified the kānāwai a ke akua or the laws of the elements. The truth is that Pualani Kanakaʻole, a beloved kumu hula,
was one of the kupuna arrested for standing for the kānāwai a ke akua or the laws of the elements. These laws include the Hoʻokikī Kānāwai, the Law of Continuity, that is violated by the Thirty Meter Telescope. Pualani Kanakaʻole Kanaheleʻs daughter Kekuhi Kealiʻikanakaʻoleohaililani co-wrote the Kīhoʻi Kānāwai stewardship plan teaches courses in island stewardship, and she is the one training hundreds of people in true land stewardship through the educational organization Lonoa Honua. You can learn more about true land stewardship at kekuhi.com.

Why does the University of Hawaiʻi, supposedly the premiere insititution of higher education in Hawaiʻi, consistently ignore the work of Kanaka Maoli practitioners most steeped in ancestral knowledges that are articulated in Hawaiian language in mele and oli?

The Master Plan privileges the knowledges of settlers who do not have 1) moʻokūʻauhau or genealogical connection to lands and waters in Hawaiʻi and 2) do not have a knowledge of Hawaiian language and the ancestral knowledge of stewardship as it is reflected in oli and mele.

I urge you to reject this Master Plan that continues to ignore the voices of the people who stand for the protection of Mauna Kea.

Sincerely,

Candace Fujikane
Professor of English
Director of the Undergraduate Program in English
Aloha Board Member,

I am writing to you in favor of continued management of Maunkea’s astronomy pursuits. The further we seek the truth of our origins and look beyond the stars, we can keep our connection to our ancestors. I may not be of Hawaiian descent but my family looked at the same stars I see when they took a leap to find a new life. To keep opportunities open, we must invest in it.

The stars have connected us for the years and we can’t turn away from it now because of those who are loud. Learning is ongoing and we need to pursue it here in Hawaii through astronomy.

Aloha,

Joni Kamiya
Kaneohe, HI

Sent from my iPhone
Aloha, Please let the world see that we stand first in line to lead on science and the future. The world needs our mountain. Support the Master Plan that will allow the stars to be observed for many lifetimes. Keep it simple, support The Plan and the TMT project.

Mahalo,

Harold Spindel
I oppose the UH master plan. Please stop this madness. There is nothing more you should do to the mauna. Please stop violating the rights of the mauna and kanaka maoli. Do you not have something else better to do in the face of climate change? There was a huge volcanic eruption near your ohana neighbor pacific island of the kingdom of Tonga and Samoa. Wheres the aid in that? Wheres the preparation for for climate disaster that will come to Hawai‘i if you build that telescope. Of course you dont think this little (NOT little) development has any impact, just like how elon musk or jeff bezos didnt think their impact on the world changes the climate, but it does! Online shopping, streaming, and more private transport all contributes to that. Please stop fighting the people, YOUR own ohana. And please fight the billionaires TAKING all the
resources for personal gains like 30 seconds in space with a private rocket. Just think about it. This is ridiculous.

I oppose the UH master plan, which prioritizes the construction of the Thirty-Meter Telescope on Mauna Kea. In case you weren't listening to our voices when we stood on the frontline in the thousands to oppose this telescope, no means no. Listen to the native people. This is a human rights issue. We already put our lives and bodies on the line to stop this telescope. We endured freezing cold weather for over 8 months to demonstrate our opposition. Listen to this - A'ole! A master plan with more telescopes and more desecration of the most sacred land of Native Hawaiians must not be approved. Over 1000 comments were submitted in opposition to the master plan because it includes TMT. Is there any part of Hawai'i that we can leave for our future generations? It is unbelievable the hatred that you must hold towards Kanaka Maoli to seriously advance a plan that would build more telescopes, including the TMT, and erect a gate to keep Hawaiians out. From the military poisoning our waters to this "Hawaiian place of learning" destroying the foundation of life culture - the level of disrespect of our 'Āina is just off the charts. A'ole TMT. No more telescopes. Take care of this 'Āina before you look to the stars.
Please provide your testimony on this form for the next University of Hawaii Board of Regents meeting. Make sure you include all the requested information so that the Board of Regents is able to clearly understand the testimony provided.

Before the world figured out that Mauna Kea was the tallest mountain in the world, was there ever a proposal to build on Mt. Shasta(Denali)?, if so then BUILD THERE!!! Or Mt. Rushmore, BUILD THERE!!! Why does HAWAII and the HAWAIANS(KANAKA MAOLI) or the locals in HAWAII continuously have to suffer. When IS enough, ENOUGH?!? WHY DOES THE
STATE OF HAWAII ALWAYS HAVE TO BE USED, ABUSED (contamination of land/aina) bombing by the military that's called practice or training exercises. Then when they are done the land that's not habitable, cannot grow vegetables that helps the island thrive, cannot help provide temporary or permanent housing for the homeless, cannot be used as a park for the KEIKIS' to play, KUPUNAS to EXERCISE, CULTURAL PRACTITIONERS to teach about the people of this AINA!?!?! For our community to continuously go through this kind of ABUSE, will no longer be tolerated!!!

ALL OF THESE COUNTRIES THAT IS SO INTERESTED IN BUILDING ON THE MAUNA, WITH ALL OF THE MILLIONS OF DOLLARS PROMISED. WHY DON'T THEY BUILD IN THEIR OWN COUNTRIES OR MOUNTAINS?!?! BECAUSE THEY'VE ALREADY DID STUDIES ON THE DAMAGE THAT WOULD BE CAUSED BY THE TELESCOPE (BUILDING OF IT AND IT'S EXISTANCE)!!! IT'S DAMAGE TO THE LAND/AINA CANNOT BE HEALED AND BROUGHT BACK TO IT'S PRISTINE CONDITION AS IT SITS NOW!!! THERE ARE PLANTS & INSECTS THAT ONLY LIVE ON THE MAUNA!!! NOWHERE ELSE IN THE WORLD DO THESE PLANTS & INSECTS EXIST!!! WHERE IS THE PROTECTION FOR THOSE THINGS TO LIVE AND THRIVE?? IF IT WAS ANOTHER PLACE IN THE WORLD TO HAVE THIS TELESCOPE THERE WOULD BE JUST AS MUCH RESISTANCE I'M SURE. BUT BECAUSE IT'S IN HAWAII
AND THE HAWAIANS NEVER PUT UP RESISTANCE, "OH WE CAN JUST TAKE IT, THEY WON'T DO ANYTHING!!!" *****THOSE DAYS ARE OVER!!!!!!***** WE WILL RESIST!!! UNTIL THE LAST ALOHA AINA!!!!!

Your Testimony/Comments
Hawaiian lands belong in Hawaiians hands. Why do we spend MILLIONS on dollars on poles that do nothing for the people. If a missle is coming stars in the sky do NOTHING FOR THE PEOPLE and the reason why my ohana will never ever support this and we will be on the mountain to support our ohana and the lands that where apart of the Hawaiian legacy. Spend money where its needed not on a big telescope on OUR mountain.

I support the master plan including the Thirty Meter Telescope. I am the daughter of an astronomer and grew up on the Big Island. I was trained at University of Hawaii John A Burns School of medicine and practice in Honolulu. I have voyaged on Hikianalia (one of the Polynesian Voyaging Societies wa'a). I believe that Maunakea has the ability to be both a sacred and a scientific wonder and we should strive for it to be an example of how we can be both respectful of the land and all its people as well as a place for discovery and innovation. For me it has never been a question of yes or no it is how do we do it in a way that changes the narrative of the past that hurt so many people and make our home a place that nurtures and thrives where people are treated with aloha. I think this master plan is a step in this direction and this is why I support it.

*I have a hard time understanding individuals who utilize Hawaiian stolen lands for the benefit of their own corporate agenda. For a decade now Kanaka Maoli, Native Hawaiians have been AGAINST the continued rape of our lands. Let us not forget that Native Hawaiians did NOT vote to be apart of the US, it was the transplant Americans who were given that exclusive voting rights that put us here today. What we need to do is focus on the current and remaining issues that our host people go through. Which once again is shown through these meetings, because STILL, after 2015 and 2019, are haole investors and corporations being prioritized over the actual Hawaiians that love and care for this place. You cannot simply put a few Hawaiian values and articles of language to fully engage the perspective of Native Hawaiians. You cannot simply take one language*
course at the University and believe that you no more than the generations of Hawaiian families that have
been working these lands for generations. We are still struggling with access to our lands, ALL LANDS ARE
HAWAIIAN LANDS, let us not forget that! If you truly want the trust and respect from the Native Hawaiian
community then there must be sacrifices, because everyday Hawaiians sacrifice our sanity, our mental health,
our physical health, and most importantly our spiritual health, just by being a part of a government and a
capitalist system that has continued to show us no ALOHA. Funny how that works, our own language being
used against us. Do you even know what real aloha is? As a university who has had MANY problems with
Kanaka Hawaii, I find it mind boggling that we are still fighting you folks to get your selves together and be
more FOR THE HAWAIIANS. When will you realize that our land is far more priceless than the projects you
wish to build to EXPLOIT our land and people. When will you realize that it takes actual Kanaka Hawaii to
learn and teach the Hawaiian culture in its most authenticity. People who have NO SPIRITUAL connection to
these lands, who have NO GENERATIONAL connection to these lands AS HAWAIIANS, have no right to attack
the Kanaka who are standing up and saying ENOUGH IS ENOUGH. NO MORE TELESCOPES ALREADY! Get
more Hawaiians to our lands, get us working on our spiritual health by making these places available. Right
now there is an influx of outsiders moving in and Hawaiians moving out, does that not scare you? Hawaii will
never be Hawaii if we continue to put projects that are temporary and not sustaining to the whole well-being
of our Hawaiian community. Hawaii will never be Hawaii if we continue to place american values over
Hawaiian values, HAWAII WILL NEVER BE HAWAII if you continue to shut the HAWAIIANS OUT. And that is
what everyone needs to realize. This aina is our Kupuna, these resources are our akua, and you will never feel
what it truly is to be a Hawaiian in Hawaii if you never give us the SAFE SPACE to be that. May the kupuna
guide your naau to what is pono, and no, not the biblical Righteousness, but the Hawaiian perspective of
balance. YOU, University, have raped that Mauna for too long, SHE NEEDS TO REST AND BE RESTORED, THAT
IS PONO INTENTIONS, THAT IS ALOHA, THAT IS HAWAIIAN. Me ke aloha aina oiaio.

| Aloha TMT Supporters,  

We need UH’s new Master Plan in place in order to renew UH’s Master Lease for Mauna Kea and keep the astronomy industry, including TMT, in Hawaii! I support adoption of UH’s draft Master Plan for Mauna Kea because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea |
Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. I mua Kilo Hōkū and i mua TMT!

Pat Dunlap Evans asserts in "Don't let tunnel vision eliminate astronomy on Mauna Kea," Thursday, January 13, 2022, that those who oppose the construction of TMT on Mauna Kea suffer from a narrowness of vision. On the other hand, on careful examination, it is Evans who shows a lack of rigor in her reasoning. Those who offer their opinion on critical issues should be held to a certain standard: First They
should be based on all the facts. Second, the writer should express the moral or legal principles that guide their opinion. She leaves out critical facts and fails to offer a coherent basis for rendering her decision.

The author complains that the MKWG opinion is wrongfully based on race and religion. She doesn't explain why providing Native Hawaiian's a critical voice on the working body is wrong. She seems to view Native Hawaiians as one of many immigrant groups and thus, preferring Native Hawaiians as to opposition to TMT, beyond their pro-rata representation in the population of Hawaii is wrong. She states that "if the race is to be the determining factor, then the Governing Entity should be 34 percent white, 21 percent Asian, and 12 percent Native Hawaiian" in the county of Hawaii.

She seems to be operating from the view that equality consists of treating all groups equally—according to their percentage of the population. Yet, the principle of equality, or treating all cases that are alike equally, also implies that treating unequal cases the same is another form of inequality. Native Hawaiians are not immigrants. Native Hawaiians are the indigenous people of Hawaii. Anyone who asserts that everyone who came to Hawaii, even the first, is an immigrant, lacks a coherent understanding of the distinction between immigrant communities, and indigenous people. By indigenous people, one means those who settle first and establish a political governing entity. Moreover, to consider Native Hawaiians as akin to immigrants.

Native Hawaiians not only are indigenous but had a nation-state prior to the takeover of the United States. In her thinking, the overthrow of the Kingdom of Hawaii but for the assistance of United States military intervention is irrelevant.

On January 17th Native Hawaiians remember one of the most bitter events in their history, the overthrow from both within and without of a sovereign nation-state complete with laws and respected and recognized by all other nations, including the United States. The Kingdom of Hawaii had a legal system deserving of as much respect as any other nation-state, including the United States. By the overthrow, an event the United States Congress has apologized for the United States displaced the legal system of the Kingdom of Hawaii for that imposed by the United States. Evans leaves out important facts. Namely, the United States and the State of Hawaii have provided programs, remedies, and forms of reparations that recognized the wrong of overthrow and annexation.

First, the legal system of the Kingdom of Hawaii commands official respect in that the very first statute in the laws of the State of Hawaii, Hawaii Revised Statutes, second 1-1 provides that the laws, culture, and traditions of Native Hawaiians shall be the common law of Hawaii unless displaced. That is an extraordinary concession to both the continuing significance of the laws and the culture of Native Hawaiians as well as frank concession by the United States and the State of Hawaii that the overthrow of the Kingdom of Hawaii was wrong. On the eve of the annexation Native Hawaiians had more persons having the right to vote than any other group by race. Only the vast settlement of the United States by citizens of the United States after the United States gained political control changed the majority to those of non-Native Hawaiians.

Second, the United States accords Native Hawaiians by race and blood quantum preferences not held by other groups. There are countless federal programs that provide services for Native Hawaiians as to health, education, and entrepreneurship. Evans fails to mention that the Hawaiian Homes Commission Act, provides housing for Native Hawaiians based on a 50 percent blood quantum. It is Congress that established the Hawaiian Homes Commission—a century ago. The University of Hawaii itself, the trustee of Mauna Kea, by past practice, has announced that it is committed to making the University of Hawaii a place of Native Hawaiian learning. There is a school of Native Hawaiian studies. There is a program in excellence in Native
Hawaiian law. There are seats on various boards, including the Department of Land and Natural Resources that specifically require persons with knowledge of Native Hawaiian law and culture. Evans may prefer that this not be the case—but these programs are evidence of a strong political and community support for Native Hawaiians.

Native Hawaiians are not immigrants but persons who collectively wielded sovereignty over the Hawaiian Islands until the United States wrongfully and without legal justification ended the sovereignty of a friendly nation. The committee that drafted the Working Group plan was not acting from an unjustified desire to prefer Hawaiians—but from core values of the United States that the wrong of taking the self-determination of Native Hawaiians must be redressed by the law.

Her article mentions that the Supreme Court upheld the right of the TMT to build on Mauna Kea. The Supreme Court deferred to the view of a single hearings officer who upheld the issuance of a permit. That hearing officer was not acting as a judge. That hearings officer acted with disregard of fundamental procedural due process—a value that the Supreme Court used to remand the case to that hearings officer. To start, the hearings officer failed to allow expert testimony on the title to the lands on which TMT was to be built. I should know, it was my testimony that was excluded despite its relevance. TMT is to be constructed on ceded lands—either land of the former Crown or government of the Kingdom of Hawaii. That is wrong considering the commitment made by the State of Hawaii at Statehood that Native Hawaiians are a defined beneficiary of the trust over those 1.9 million acres. Those 1.9 million acres out of the whole of some 4 million acres of land in the State of Hawaii were taken from the citizens of the Kingdom of Hawaii. There is ample precedent for including a person who understands Native Hawaiian customs and values in the working group.

The construction of Mauna Kea has proceeded from a vacuum of Native Hawaiian representation. The construction of TMT on Mauna Kea would greatly impair Native Hawaiian—it would be destructive to their very identity as persons as much so as if TMT were to be built on monuments the United States and its citizens hold in great reverence, the Pearl Harbor memorial, Gettysburg, Arlington Cemetery, or the beaches of Normandy. To some Mauna Kea may just be another mountain—an ordinary part of the lands of Hawaii. Evans fails to note that Hawaiians if their culture is to be taken seriously and must, consider the Mauna Kea to be central to the creation of the world. Should the search for the Big Bang, the view of western science as to how the Universe is created by advanced by sacrificing the whole of the world view of Native Hawaiians just one for more bit of evidence, not even conclusive evidence, in the West's search for its own form of meaning. There are other great telescopes in place, such as the James Webb and the Great Magellan to be built in the Southern hemisphere. Western astronomy has alternatives to TMT, alternative to Mauna Kea, Native Hawaiians have none.

Williamson Chang has been a Professor of Law at the William S. Richardson School of Law for the past 44 years. He has presented his views on Mauna Kea, as well as Native Hawaiian Sovereignty, in many hearings on Mauna Kea. He has also made presentations at Nagoya University in Japan and the Smithsonian Museum in Washington D.C. However, his testimony was not deemed relevant by the hearings officer in the Contested Case as to TMT. He presently teaches Conflict of Laws, Professional Responsibility and a seminar on Mauna Kea.

<td>I oppose the building of the TMT on Maunakea because that is a very sacred space for us Hawaiians. Many of our ancestors that came before us are buried under there. And to keep on adding more telescopes for the purpose of science is just unbelievable. A solution to this is building this TMT anywhere else in the world OTHER THAN Hawaii. The fact that scientist and David Ige are ok with this makes it known to the Hawaiian people that you guys dont care about us and our past. You guys only care about science and NOT how the people of their own land feel. That is very shamefull and I belive us Hawaiians need to be heard!</td>

I reject the proposal of the TMT to be built atop Mauna Kea. It is a cultural wahipana or sacred place that serves as a spiritual connection to Akua (God). Also, the University of Hawai‘i has neglected their kuleana/responsibility to the maintenance and upkeep of the wahipana with no regard to the people who have the highest regard for Mauna Kea, ʻāina aloha, kapu aloha.

The whole TMT situation has been around for a couple of years now and I just don't think it's right. I personally think that the TMT would open a lot of doors for people, but I just don't think that the location is right. It's just too big and too impacting as a project, impacting as in affecting negatively. It's on sacred lands and the thing is supposed to be as big as Aloha Stadium, so you can just put that into perspective. Even though the whole situation has kind of cooled down or have been somewhat pushed aside since then, it hasn't been forgotten, it's still an issue that has to be solved.

I don't think or want this bill to pass. Thank you for reading my testimony.
Aloha 'O Tehani ko'u inoa

I'm a 10th-grade student at a public charter school called "Halau Ku Mana" also known as "The school of strength". Halau Ku Mana helped me realize the importance of 'Kapu' or 'sacred'. Maunakea is the home to a Hawaiian goddess Poliahu(Goddess of snow). not only that but Maunakea is also a part of the tallest mountains measured. I visited Maunakea on my 8th-grade huaka'i and I haven't felt close to something as big as Maunakea herself. I know people will think "But it's just a mountain, it can't feel anything," a lot of people said the same thing about lava rocks from the Big Island and now some of those people are still scared to come back to Hawaii.
and take their chances. Now imagine destroying someone’s home as if taking something you see as lava rock, but the Hawaiians see it as something sacred. This is an old trick in the book. People will take for money no matter if it’s someone else’s home people will only see dollar signs on our lands.

Your Testimony/Comments

I support adoption of the UH Master Plan for Maunakea. I am extremely disappointed in the recent recommendation of the legislative committee. I believe the management of Mauna Kea should remain the purview of the University of Hawaii. Although mistakes were made in the past, UH has worked diligently to correct those mistakes, especially with increased outreach to members of the Hawaiian community and inclusion of Hawaiians in developing plans for the mauna. However, the current legislative report throws out all of that progress and disregards any input from the rest of the residents of Hawaii.

All aspects of the community should be represented not just one vocal group. The astronomy community should be allowed to participate given the many benefits they provide the community such as funding for
STEM education for our keiki and good paying jobs.

To approve this report would make a mockery of all the work that has been done over the past ten years in favor of kowtowing to the protesters who have violated laws and refused to accept legally valid decisions when they did not go their way. Mauna Kea belongs to all of us, not just to a vocal minority. Mauna Kea is no more sacred than the rest of our beautiful islands and should be cared for by representatives of all of us not just a few. UH has the experience and scientific knowledge to be stewards of this wonderful resource.

**Your Testimony/Comments**

I support adoption of UH's draft Master Plan for Mauna Kea because it keeps astronomy on Mauna Kea alive, including the Thirty Meter Telescope (TMT). UH has done a masterful job of managing Mauna Kea over the last 20 years, especially with respect to obtaining a permit for the construction of TMT. TMT is one of the greatest projects to ever be developed in Hawaii and I wholeheartedly support its completion. I hope UH is doing everything in its power to ensure TMT is built. Moreover, Mauna Kea is now some of the best managed state-owned land in Hawaii. Mauna Kea Observatories are the most scientifically-productive collection of telescopes in the world, and I am proud of their work. Astronomy on Mauna Kea is our culture. Astronomy on Mauna Kea provides opportunities for our keiki to benefit in terms of education, training, inspiration, and pride.
in the scientific discovery that takes place in our home. The presence of astronomy on Mauna Kea is vital for the Hawaii Island community and our state as a whole, for the economic diversification and world-class nature of the work that goes on there. Please keep it up. I mua Kilo Hōkū and i mua TMT!

mahalo,
David Dow

Your Testimony/Comments

To me, it is disrespectful the fact that plan is even called“E Ō I Nā Leo” or“Listen to the voices.” For decades the Board of Regents has continued to ignore complaints and even broken their own agreements towards the development atop Maunakea. There have been multitudes of protests, testimonies, and movements against the continued development and disregard occurring on top of one of Hawaii's most sacred places. I have no issue with progress or research, I have no problem with astronomy; we as Hawaiians were prominent astronomers ourselves! It is the fact that you have paraded around as if you have the final say on this land as if the land you develop and work upon is yours when it is not. 13, 13 is the number of telescopes you have built. That in of itself breaks your original agreement and yet now you want to build a bigger and more
consuming one as well? It is an insult to injury and a spit in the face of the people you are supposed to serve and educate. You have so many options at your disposal but your choice is to create a false reality in which you can justify your actions and then ask the public if it is okay with them. It is not, was not, will not ever be. You have broken our trust and destroyed the possibility of a future in which your precious telescope is created. It is too late now.

**Your Testimony/Comments**

Welina mai kakou,

University of Hawaii Board of Regents Mahalo for this opportunity to share my testimony and stance on Mauna Kea. ‘O Ramsey Fiorello ko‘u inoa, no Kāne‘ohe mai au. I am a kumu at Hālau Kū Māna Public Charter School, and I oppose BOR VI.F Adoption of the Master Plan for the University of Hawai‘i Maunakea Lands – E Ō I Nā Leo (Listen to the Voices).

For fifty years, Mauna Kea has been managed with utter disregard for the environment and its ecosystem. The Department of Land and Natural Resources’ mission statement is to promote the safe and responsible use of Hawai‘i’s natural resources. More specifically, headed by the Board of Land and Natural Resources, the
DLNR is “responsible for managing, administering, and exercising control over public lands, water resources, ocean waters, navigable streams, coastal areas (except commercial harbors), minerals, and all interests therein” (“About DLNR”). However, the BLNR has gone against its own rules and guidelines. For example, Mauna Kea is recognized as Conservation Land and by that definition, the BLNR and UH have failed the mountain miserably. There have been numerous spills and construction projects on the Mauna, which have led to adverse effects on its environment. In 1995, there had been such an accumulation of trash on the mountain that the city had to airlift it out, costing taxpayers $20,000. In 2011, the Subaru Observatory spilled 100 liters of orange coolant, which shut the observatory down for two weeks. These examples are two of many that are the result of the DLNR and UH’s disregard and neglect of Mauna Kea. Allowing them to remain in control of the mountain would be a complete dishonor to the people of Hawai‘i. Mauna Kea holds much significance for our people, both culturally and environmentally. If these actions are to continue our mountain will be gone. I urge the University of Hawaii Board of Regents to not adopt this plan or any other plan. Stop TMT!

Mahalo Nui Loa

BOR VI.F Adoption of the Master Plan for the University of Hawai‘i Maunakea Lands – E Ō I Nā Leo (Listen to the Voices) TESTIMONY LETTER

Addressed specifically to the University of Hawai‘i Board of Regents,

Welina me ke aloha,

Page 2015
I am a 9th grader in Hawaiian Charter School Hālau Kū Māna and I live in Kalihi Kai. My testimony emphasizes that I fully oppose BOR VI.F Adoption of the Master Plan for the University of Hawai'i Maunakea Lands – E o I Nā Leo (Listen to the Voices).

Before I cite my reasons and evidence to oppose TMT, I must recite this ʻŌlelo Noʻeau I thought was relatable to the controversy happening today. “Ka lepo ke kumu wai, e hua i ana ka lepo i kai.” And this ʻōlelo translated is "When the source of the water is dirty, muddy water will be seen in the lowland." Nowadays, you know this ʻōlelo noʻeau is true because whenever it floods, all the mud and ʻopala goes to the ocean and you have to wait for a few days for it to fully flush, right? Well, how this relates to TMT is that due to the 13 TMT already built on Mauna Kea, not only does the chemicals needed to supply it be built 7 stories below ground, these chemicals include coolant and jet fuel. And if you know the effects of these chemicals, then you would know it is extremely harmful to water, and the potential danger it would do to water aquifers. n 2011 the Subaru Observatory spilled 100 liters of orange coolant, leading it to be shut down for two weeks although this observatory did not mean for this to happen, it did which is why the aquifer in Mauna Kea needs to be protected.

From 1893 and until around the 1970′s, the lāhui was at a loss in their culture, for they didn’t know who their ancestors were, and they didn’t know who they were. Sacred wahi pana were being desecrated such as Pōhakuloa, Kahoʻolawe, and various loʻi kalo lands like Kūhiawaho. Many of these lands continue to be desecrated, such as Mauna Kea. When I was born in 2006 and was attempted to be raised around Hawaiian culture as much as possible, it didn’t work out. The only three ʻŌlelo Hawaiʻi I knew were ‘aʻole, ‘ae, and lua. I struggled with asking to go to the lua in Hawaiian. I was at a loss, which at some point didn’t even know the story behind my name. It was only recently that I luckily learned about all of these ‘ike. . But could you imagine what it was like for kids my age before the Hawaiian Renaissance? The oppression ʻŌlelo and practicing cultural activities because if you cultivated your culture, severe physical punishment at school would be the consequence. If not for the Hawaiian renaissance, who knows what would’ve happened to our ʻāina today. Would there even be a Kahoʻolawe, or would it just be labeled as “Testing Site for Military Bombing.” The lack of support from the Board of Regents in shutting down TMT is the same type of oppression our ancestors have suffered. Stop silencing our voices when we say we don’t want this telescope built on our mauna.

Therefore as I conclude my testimony, I would like to recite my position; I fully oppose BOR VI.F Adoption of the Master Plan for the University of Hawai‘i Maunakea Lands – E o I Nā Leo (Listen to the Voices). I would also like to leave with this last bit of information,Kā maka Maoli weren’t the only ones who supported Queen Liliʻuokalani during annexation but Hawaiian Nationals of different nationalities. The same way people of Hawai‘i rallied for what was right then, people of Hawaii are rallying for the shutdown of TMT. It is up to you to make the right decision to continue to whitewash indeginous people and desecrate our lands in the name of profitable astronomy.

Mahalo nui.

Me ke aloha,
Kaʻimipono Inofinada, Kū Kiaʻi Mauna

Dear BOR Members,
I am writing in late, to oppose the adoption of the "Master" Plan for Maunakea Lands. To be honest, I felt too worn down to submit testimony—it is so demoralizing to write and speak, again and again, in the face of callous capitalist and colonial disregard. But after listening to hours of eloquent and impassioned testimony from kiaʻi, who show up every single time such testimony is required, despite the fact that the University does not listen to them (and the title of your "Master" Plan is a travesty as well as an act of cultural appropriation, as pointed out by Mr. Flores), I realized the importance of continuing to speak out, and on the record, to oppose the University’s settler colonial agenda and disregard for the aloha ʻāina who are fighting to protect their land, skies and waters.
Be on the right side of history and stop acting to desecrate the Mauna and to disrespect those who stand and will continue to stand, until the last aloha ʻāina, to protect their beloved ancestor—and the waters that give life to all of us who live on these islands.

Cynthia Franklin
Professor of English, UHM

Aloha!
I am a 40 year caucasian resident of Hawai`i Island.

The 'management' of Mauna Kea has been atrocious for 50 years.

It's time to give up on the TMT & start decommissioning applicable telescopes with the intention of restoring the area for its true owners.

Land based telescopes are dinosaurs and the Hawaiian people and their allies will NEVER allow the TMT to be built. They will block the road to the summit forever, if necessary.

Save yourselves the headache & cash. Throw in the towel.

Mahalo!
Shannon Rudolph - Kona

How wonderful it is that nobody need wait a single moment before starting to improve the world. ~ Anne Frank
Aloha e BOR,

I am writing in complete opposition of this masterplan. The writers of this masterplan have not listened to the voice that have spoken, yet you entitle the plan listen to the voices. This is a sacred site that has been desecrated from the get go. You have not listened at all. No one should be going up there, not astronomers, not tourist vans, not locals to play in the snow. In the past, only certain kahuna had permission to go there, that's it. All the land in Hawai'i is to be cared for by the people who live on it and benefit from it, to take care of it, not destroy it. We all are just caretakers for a short while to pass on to the next generation something better, not worse. This decision rests in the hands of the creator and you the Board should make that decision in the best interest of all, not just a few that might benefit. That being said, the Kanaka Maoli and their ways of knowing take presence because their ancestors have lived and taken care of this land far longer than the foreigners that came and oppressed the native people and still do so today. Justice will always prevail. I am a graduate of UHH, a teacher, a mother, a grandmother, an environmentalist, and steward of the resources, I write from many viewpoints. The taking and owning of land and controlling what is done on that land is the greatest destruction done to the people who were here first, where is the respect. Listen to the people, a majority have spoken against the building of TMT, yet this keeps going on and on, no means no, ‘ā’ole means ‘ā’ole!!! Mahalo for allowing public input, let the voice be heard.

To: "Bor.testimony@hawaii.edu" <bor.testimony@hawaii.edu> Thu, Jan 20, 2022 at 2:37 PM

Aloha,
This testimony is submitted as a result of inability to connect to meeting starting *:30 am. I was advised to submit my testimony before the end of the mtg, to having it included in the minutes of the meeting.

UH Board of Regents meeting 1-20-22

UH Board of Regents,

I apologize for my disability to connect to today's Board meeting. I was able to at least listen via my phone. I am following up with the advice that if I am able to submit testimony by the end of the meeting, that it would be made part of the record.

I wanted to voice our opposition to the Mauna Kea Master Plan and its insistence that the Thirty Meter Telescope is a major part of the plan. It seems that regardless of the substantial opposition to TMT that the University of Hawaii continues to make TMT the spotlight of the future of Astronomy in Hawaii. What seems to escape the University is that the lands of Mauna Kea in its present identification continually declines as it was once considered “Ceded Lands” and now has been identified by the University as “State Owned Lands”. This recent identification portrays Mauna Kea to be State OWNED as opposed to Ceded lands held in Trust, thereby perpetuating a false narrative of ownership that is deceptive to potential funders of the TMT project.

Please understand that new Mauna Kea plans will create potential conflicts with Native Hawaiian Religious practices and cultural practices that conflict with Article 12 sec.7 of the Constitution of the State of Hawaii.

I stand in opposition to the attempt to get an extended lease for the lands of Mauna Kea. The current lease call for its termination in 2033. The University pays a mere $1 per year. As a lease from the State of Hawaii, I believe that the lease agreements need be carried out as specified and conditioned by the original lease. A new lease would have to go through proper bidding channels consistent with State lease laws.

As far as the State Senate’s Mauna Kea working groups findings and suggestions. While we don't necessarily agree with all their points, we do agree that TMT is out of the question and will remain a massive controversy.

Thank you, Hank Fergerstrom
