Update on making UH Hilo more “transfer friendly” - common course numbering

VCAA Platz stated that UH is convening discipline based meetings to attempt to achieve consistency in course numbering.

Focus on financial aid issues to support enrollment

- What should UH Hilo’s position on need-based aid be?
- How do we address the “gap group” – those who are not wealthy enough to be able to pay fully for college, but not poor enough to get enough financial aid?
- Should we be using financial aid as an incentivizing factor for retention/graduation?
- How can we address some unique/specific financial aid needs in a sustainable manner, e.g., teacher training for secondary immersion programs, which require content mastery and the Hawaiian language mastery, lengthening the academic program, so financial aid provision is more challenging?
