ATTENDANCE:

Present: Bob Borris (CoP), Susan Brown (CAS), Karla Hayashi (Academic Affairs), Hank Hennessy (CoBE), Dexter Irvin, (OIA), Jim Mellon (ISS&IE), Shadi Obeidi (UHSA), Matt Platz (VCAA), Jeff Scofield (FAO/Ex Officio), Mike Shintaku (CAFNRM), Keiki Kawaiʻaeʻa (CHL), Leonard Woods (TRiO Programs), Luoluo Hong (Chair/Ex Officio)

Not Available: none

Note: Effective with this meeting, Jeff Scofield will facilitate the meetings, and Luoluo Hong will compile/disseminate notes and documents.

1. Review of October 26th notes – no changes were requested; notes were endorsed

2. Financial Aid Update – please refer to one-page report provided by Jeff Scofield (attached)
   a. Financial aid applications - due to the campus closures during Spring Break, some of the applications that arrived in March will be processed in April, so the apparent small drop of 1.4% is probably a misnomer; financial aid awards are up by 3%
   b. Student loan default rates – last Fall 2011 we were measured on our two-year cohort rate, but starting Fall 2012 we are now transitioning to a three-year cohort rate default rate, for which the national average is 13.4%; the draft rates for 2013 were released, and our three-year rate dropped from 9.3% to 8.3%, and the two-year rate rose from 4.8% to 6.3%; however, these data need to be further examined to determine what actually happened, e.g., student passed away before they went into default
      i. Question was asked if there was a difference in default rate for in-state versus out-of-state students (Jeff estimates that about 50/50 of those who borrow are resident/non-resident) – of students who graduate, about half had borrowed
      ii. The majority of defaulters are those who have borrowed less than $5K
   c. Verification – students who are the most financially needy we have found tend to be the most likely to be targeted, e.g., Pell grant recipients, and this is the group that experiences the greatest level of anxiety responding to requests for inf
4. Effects of sequestration (effective March 1st) – still trying to understand what the full impact will be, but we believe Pell grants will not be affected; SEOG and federal work-study we also believe will not be affected

5. Interest rates – on July 1st the interest rate for federal guaranteed student loans would increase from 3.4% to 6.8%, unless Congress passes another hiatus (folks were up for re-election last year)

6. USDOE certification - we were approved to participate in federal financial aid programs through March 1, 2018 (after mandatory recertification process)

2. Proposed 2013-14 tuition assistance allocation (please see attached proposal)
   a. For 2013-14, 17% of tuition collected in 2012-13 is set aside for tuition assistance – we are in the 2nd year of a five year series of 1% increases
   b. Lois Fujiyoshi has provided us with the final figure for tuition collected in 2012-13, which is $5,715,000 (always have to wait until refunds are issued in Spring term before we can compile this figure)
   c. Keep in mind that 70% of tuition assistance is allocated for need-based aid, or $4,000,500 as proposed for 2013-14
   d. The remainder is allocated for merit-based aid, with amounts needed for Chancellor’s Scholars, RAPS, and Centennial Scholarships taken off the top; thereafter, propose 3% increases to academic colleges, OIA, CoP, DSA, and international exchange scholarships
      i. Distribution of the academic colleges merit pool will be once again based on headcount of majors, so Luo2 will obtain the update for Fall 2012 and distribute
      ii. It was noted that we can make a decision to reduce the number of Chancellor’s Scholarships awarded
      iii. However, for RAPS, that is out of our control – UH System selects the students, and just lets us know in April/May – could we possibly request that (1) selections be made earlier in January/February; (2) UH Hilo have more input in the process; or (3) UH Hilo take over the selection process (UH Manoa agrees with us!) – Luo2 will ask Lui Hokoana, Associate VP for Student Affairs at UH System, what the selection process is, e.g., who participates in the selection?
      iv. Presidents Scholars – 10 students for 2 years; Regents Scholars – 20 students for 4 years
      v. The number of Centennial Scholars is also not in our control - $1000/year for four years if 3.8 GPA in high school
   e. We have $55,193 left to allocate strategically or for new initiatives – what are we doing to help use our tuition assistance dollars to shape our enrollments? we are not doing anything consistently across the board – clearly we need to do a better job with retention and graduation
i. One proposal is to leave it as a “cushion” and use some to support international students  
ii. Another proposal is to redistribute the remainder proportionally among the merit pots  
iii. Susan Brown noted that of students entering, 43% are FTFTF, and 57% are transfers – among the transfer students, women fared less well than the men!  
f. A motion was made that we accept the proposal as is, and then further determine use of the $55K at the next meeting date (perhaps after we know the numbers of RAPS scholars - Jeff); the motion was seconded; the proposal was approved 10-0-1 (Matt was out of the room at the time of the vote)

3. International student scholarships proposal (please see attachment from Jim Mellon)  
a. Currently have two types of scholarships – one for degree-seeking international students (who come to earn a degree from UH Hilo), and one for exchange international students (who attend UH for only 1-2 semesters)  
b. Since mid-2000’s, we saw an increase in the number of exchange students and a decrease in degree-seeking students; 2005 – 12% of all students were international, N = 400; 2012 – 6% of all students are international, N = 230; this decline is consistent with the rest of the state, which is in contrast with the rest of the US  
c. Four primary reasons for this decline:  
   i. As state budgets decrease, more institutions are relying on revenue from international student enrollment, so a lot of aggressive recruitment from New Zealand, Australia and Canada, plus an increase in the amount of degree of competition from other universities  
   ii. For the last few years, our focus was on recruitment of resident students to bring us in alignment with the non-resident enrollment cap  
   iii. We don’t have an engineering program, MBA programs, or very many other graduate programs that might attract students from some countries who send a lot of international students, e.g., India  
   iv. There are challenges to countering the image of Hawaii as a tourist destination versus as a serious educational destination, e.g., Saudi Arabia government will not let their students go to Hawaii or Nevada on their government-sponsored scholarships  
d. The purpose of this proposal is to modify existing scholarships program for international degree-seeking students – it’s not really establishing a totally new program; rather, we are formalizing the program and establishing more definitive parameters; with this proposal, we will shift from just a retention tool to a recruitment AND retention tool, as well as shift more money to degree-seeking students versus exchange students – however, note that current recipients of scholarship under the “old program” will be incrementally phased out as they graduate
e. Summary of the proposal - offer four $5,000 scholarships, and 20 $3,000 scholarships by the end of the five year proposal - the proposal will not need any new funding for the first two years of the proposal, need $16,000 in year three and another additional $16,000 in year four (for a total of $32,000)

f. There is no reality in which UH Hilo can enter the international student recruitment game without any funds to support scholarships

g. Committee endorsed the proposal and supported implementation – to reflect this change, we need to re-label the allocations in the tuition assistance allocation spreadsheet and also move $78K from the DSA allocation

h. The International Recruitment Committee will provide reports to this Committee on the implementation of this proposal and make adjustments as needed

4. Miscellaneous discussion items
   a. Question was raised about whether or not we have progress relative to UH Foundation helping us to fundraise to support some of our desired scholarships; however, they continue to operate under the current philosophy, which is to work with donors to fund whatever specific scholarship they wish, rather than being more strategic in redirecting donors to what our priorities might be – may have to wait to resolve this when new director for UH Hilo Foundation Office is appointed
   b. An ideal scenario is to determine a tuition assistance allocation for each academic year in such a way that Financial Aid Office could then receive the allocation plans from each unit by March 15th – can we move towards this timeline?
   c. Some initial discussion took place about guiding principles for 2014-15 allocation, however, we decided to defer a more thorough discussion to our next meeting; for the new members, some examples of prevailing guiding principles we now use include:
      i. While BOR policy requires us to allocate 60% of tuition assistance to need-based aid, we decided to increase this to 70%
      ii. Merit-based aid would be allocated in a decentralized manner, driven by the units (versus centrally at a campus-wide level)
      iii. Agreement to reallocate merit aid left on the table as of January 15th to need-based awards
   d. Next meeting will be scheduled in such a way that we hopefully know the number of RAPS scholars selected; focus will be on how to allocate the remaining $55K

Respectfully submitted,

Luoluo Hong

**ENDNOTES:**

1. Per UH System policy, 15% of tuition revenue from prior year must be allocated to financial assistance grants; beginning in 2012-13 this contribution increases by 1% for a consecutive give years. Allocations were adjusted for 2012-13 to accommodate changes in federal Pell grant award guidelines.

2. BOR policy mandates that UH Hilo must allocated 60% of tuition-generated aid as need-based financial assistance. For 2010-11, the actual allocation was approximately 65%; this increased to 67% in 2011-12 and will remain level at 70% starting 2012-13 and onward.

3. The number of Chancellors’ Scholars funded from this source was reduced in 2011-12 from 56 to 48, or 12 Scholars per cohort, and funding support temporarily shifted to Foundation dollars. Funding levels are being restored for 2012-13, adjusted for resident tuition increases.

4. Starting in 2011-12, this pool combines what were formerly separate allocations to CAFNRM, CAS, CoBE & Ka Haka `Ula; the pool is further distributed on the basis of prior Fall’s major headcount. Colleges will determine merit-based criteria & Financial Aid Office will distribute and track scholarship awards in a centralized manner in accordance with federal financial aid policies. **Note that funds not awarded/disbursed by January 15th will automatically be redistributed by Financial Aid Office as need-based aid.**

5. This line combined amounts from Financial Aid Office, Admissions Office, and international student scholars starting in 2011-12; these amounts were reduced in 2011-12 to allow for the increased allocation to CoP. The 2012-13 allocation restores the funding levels. This includes amounts for: Admissions Office ($10,000), international student scholars ($78,000), and approximately $32,000 in various campus-wide scholarships which are administered centrally through the Financial Aid Office, some of which UH Hilo is contractually obligated to provide, e.g., Fun Factory. Note that Division of Student Affairs will work collaboratively with academic colleges as appropriate in awarding these funds.

6. The amount for global exchange students was reassigned to a different funding source in 2011-12 to allow for the increased allocation to CoP; it is being restored in 2012-13 to its 2010-11 level of funding, minus $10,000, which was moved to international student scholars.

---

**Approved / Disapproved:**

Luoluo Hong, Vice Chancellor for Student Affairs  
Date

Donald O. Straney, Chancellor  
Date
Proposal for
NEW INTERNATIONAL STUDENT SCHOLARSHIPS

Background
UH Hilo currently offers and provides scholarships to international students. Two types of scholarships exist:

- **International Student Scholars**: Scholarships for degree-seeking international undergraduates on F-1 student visas. In 2012-13, the total amount allocated for this scholarship was $78,000. About 19 students are currently receiving this scholarship with an award of $4,000 per student per year.

- **International Exchange Scholarships**: Scholarships for visiting international students participating in an exchange program at UH Hilo. In 2012-13, the total amount allocated for this scholarship was $100,000. The total amount awarded as of 12/10/12 was $83,339 to a total of 50 students (34 exchange students, 12 student employees, and four 1 + 2 + 1 students), ranging from $300-$3,000 per year.

Proposal
This proposal seeks to create a new scholarship for international students that would be used as a recruitment tool to attract new undergraduate students who have demonstrated outstanding academic achievement. The scholarship would be annually renewable for up to four years provided recipients meet certain conditions. There would be two different levels of scholarships:

- **Rose Tseng International Student Scholarship**: $5,000 per year. Awarded to students who have demonstrated the highest academic achievement.

- **Vice Chancellor for Student Affairs International Student Scholarship**: $3,000 per year. Awarded to students who have demonstrated outstanding academic achievement.

Purpose

- Assist in the recruitment of international students. Currently, only continuing students who have earned at least 12 credits at UH Hilo, or new transfer students who have earned at least 12 credits at a US institution are eligible for the International Student Scholars scholarship.

- The current scholarship scheme serves primarily to retain students, not to attract and recruit them. To be competitive with other institutions and attract the most academically outstanding students in the increasingly competitive national and global international student recruitment market, it is critical to be able to offer scholarships. Enrollment of international students—particularly degree-seeking students—has steadily declined at UH Hilo since 2006, and there is increased interest on the part of the Hawai‘i state government and UH administration to enroll more international students.

- Scholarships that are annually renewable help with recruitment as students and their families are better able to plan their finances in advance. They will also serve to retain students who perform well academically at UH Hilo.

---

1 Note that the financial aid and scholarship allocation document signed by the Chancellor on 6/22/12 indicates an allocation of $100,000 for International Exchange Scholarships, but the information provided by the Center for Global Education & Exchange indicates an allocation of $109,000.
• Offering different levels of scholarships rewards the most academically qualified students and gives prestige to the scholarships.
• Invests more in degree-seeking international students rather than in visiting international exchange students.

Eligibility Criteria
• Admitted to UH Hilo. First-time freshmen will be targeted primarily, but new transfer students will be eligible as well.
• F-1 student visa status.
• Academic achievement, as determined by the following:

International students educated in a U.S. system:

<table>
<thead>
<tr>
<th>Scholarship</th>
<th>GPA</th>

<td>1800 total</td>
<td>25 composite</td>
<td>600 (paper), 100 (interest-based), 250 (computer-based)</td>
</tr>
</tbody>
</table>

*Equivalent scores from other tests of English language proficiency such as the IELTS will be acceptable.

New students not educated in a U.S. system: The scholarship selection committee will evaluate the academic records and test scores of International students educated in other systems. Selection criteria will include strong English proficiency and high achievement in an academically rigorous college preparatory curriculum. Typically, students in the top five percent of the applicant pool will be considered for the scholarship. Criteria such as outstanding and substantive involvement in extra-curricular activities, special talents, awards, and geographic and national origin (to promote diversity) may also be taken into consideration.

Scholarship Renewal Criteria:
Recipients must maintain at least a 3.0 cumulative GPA at UH Hilo, earn at least 24 credits per year, and maintain satisfactory immigration status. Recipients will be limited to a maximum of four years to receive the scholarship.

**Proposed Sources of Funding**

Initially, funds for the new scholarship can be provided by transferring some of the funds allocated for the currently existing International Student Scholarship (the “retention” scholarship) and from the currently existing allocation for International Exchange Scholarships. Over a five-year period, the number of “retention” International Student Scholarships and the International Exchange Scholarships would be reduced and re-allocated to this new scholarship.

<table>
<thead>

</tr>
</tbody>
</table>

For 2017-2018 and beyond, no new funding would be required, as long as funding for the previous years has been secured.

For the 2015-2016 year, $16,000 in funding from sources other than the existing International Student Scholarship and International Exchange Scholarship would need to be secured, and in 2016-2017, $32,000 would need to be secured. These funds could come from one or both of the following:

1. Allocate funds from the pool of funds available for financial assistance. These funds should increase each year as tuition increases and a greater percentage of tuition revenue is allocated for financial assistance.
2. Use funds from the UH Hilo International Scholarship Fund (administered by the UH Foundation). Former Chancellor Rose Tseng established this fund for international student scholarships. To date it has been used to provide some scholarship support for UH Hilo students participating in study abroad programs. The current balance in the account is approximately $79,000. It should be noted, however, if funds are taken from this account they will not be replenished (unless there is a concerted effort to raise additional funds for this purpose).

**Application Process**

To be considered for this scholarship, students must submit a complete application for admission by the application deadline. Students who apply and are admitted to UH Hilo by March 1 for the following fall term will be given priority. Students who apply for admission for a spring term will be considered for the scholarship if they are admitted by October 1 and if funds are available. Students will not be required to submit a separate scholarship application to be considered for the scholarship.

**Selection**

A selection committee will be convened to select students for the scholarship. The most outstanding students will be awarded the Rose Tseng International Student Scholarship, with the next tier of outstanding students being awarded the Vice Chancellor for Student Affairs International Student Scholarship.
Administration of the Scholarship Program

The Director of International Student Services & Intercultural Education will coordinate the administration of the International Student Scholars scholarship in collaboration with the Financial Aid Office. He/she will work rely on Admissions Office staff and the coordinator of international student recruitment to identify potential scholarship recipients. The Director will convene the selection committee to review and select recipients.

Effective Date

It is proposed that this scholarship scheme become effective with the 2013-2014 academic year.

Draft: January 8, 2013
Revised: January 26, 2013
