Write two essays:

1. What is an Environmental Impact Statement (EIS)? What must it include? What purposes does it serve?

2. What are the main issues involved with energy policy? Discuss the costs and benefits of two nonrenewable and two renewable energy sources.

The essays should be approximately 4-5 pages combined (not each). Use Times Roman 12 point font, double spaced, with 1 inch margins. Make sure to write coherent essays, each with an introduction, body and conclusion. You may cite material from the text to support your assertions, but avoid the temptation to rely too much on citations.
